DX Special Bulletin No. 983.1
BID: $OPDX.983.1
November 1, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Jarmo/OH2BN and Jari/OH6BG for the following DX information.

PRESS RELEASE from Helsinki (1 November, 2010)
5R8X - THE LATEST FROM MADAGASCAR

Now that the 2010 CQWW SSB Contest is history, the low-band operation at 5R8X will get seriously underway tonight, Monday. The low-band site was built but not activated for CQWW because of a severe bout of stomach problems afflicting the group. Also, extended power outages limited 5R8X activity during the past weekend.
So, starting tonight, 160, 80, 40 and 30M will be activated for the dark hours every night. During the week, a specific pattern may be established for the bands. Activity will run for 8 days, until Tuesday next week. OH2PM and OH6KN will be at the helm. They did preliminary tests with USA and Japan, and everything is in order.

They plan to use 1822.5, 3505.5, 3525.0, 7005.5 and 7025.0 and 10105.5 MHz CW almost exclusively. From the base camp, they plan to focus on 24 MHz. The distance between the sites is 15km or 1 hour.

The team remain in good spirits and have passed the 7000 QSO mark.
QSL via OH2BH..... ((((73)))) Jarmo OH2BN

VOACAP Online goes Google Maps
"I am pleased to inform that the online HF propagation prediction service VOACAP Online - http://online.voacap.com - now uses Google Maps for coordinate entry. This should make the service even more usable (=much quicker) and accessible, also for a casual user. The transmitter and receiver coordinates are defined by dragging two location markers on the map. The mouse wheel or keyboard keys can be used for zooming in and out so placing the markers at the exact

points on the map is as accurate as it can get.

I have also updated the sunspot predictions until the year 2012.

If you have any questions or suggestions, please feel free to
drop me a note.... 73 Jari OH6BG (oh6bg@sral.fi)"

RAC Bulletin 2010-028E- Ian Snow VA3QT appointed Special Advisor to
the National Field Organization Executive.
2010-11-01

It is with great pleasure that I announce the appointment of Ian
Snow VA3QT, Special Advisor to the RAC National Field Organization
Executive.

Ian, an original National Training Resource Group (NTRG)
member, will work closely with National NTS Coordinator Hew Lines
VA7HU initially, looking at the manner in which the ARES and NTS
stay useful and relevant to the Agencies we serve, from a
messaging and use of technology standpoint.

I would like to welcome Ian, and thank him for his continued
valuable support of the Radio Amateurs of Canada.

Doug Mercer VO1DTM
Vice President Field Services
Radio Amateurs of Canada
P.O. Box 1042 Goulds, Newfoundland Labrador
A1S 1H2
Tel: (709) 364-4741
Cell: (709) 697-3319
" We're ALL about Amateur Radio! "
" Tous ensemble pour la radioamateur! "

The ARES E-Letter

Published by the American Radio Relay League
****

November 3, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY

Last month's brief report on the new Flagler County Emergency Management Volunteer (FEMV <http://www.flagleremergency.com/pages.php?pid=75>) program for volunteer involvement and control sparked a number of responses. Here are two replies, representing the two poles on the issue:

"County Emergency Management is taking direct control of volunteers because many volunteer groups were not covering their members with insurance, providing required training, and obtaining NIMS credentials for their personnel. EM will be able to determine who occupies the management and crew chief positions based on training, certification, exercise, qualifications, and credentialing, under NIMS/ICS standards. In my opinion, Flagler County Emergency Management is correct to resolve these issues by assuming more control." - Michael J. Cryan, WD6ALM, Master Exercise Practitioner, Homeland Security Exercise Evaluation Program; Communications Unit Leader, Incident Command System

"Instead of having ARES volunteers under auspices of the ARES EC, Flagler government will have a nice little group of unpaid employees. If you apply to the county, the county trains you for specific duties, the county issues you a uniform and a badge, and you work under direct supervision of county officials, you are an employee. I'd call this bad precedent for ARES. There may be an EC, but there is no ARES."-- Ed Humphries, N5RCK, EC, Cobb County, Georgia

I met with the County's new Volunteer Coordinating Officer (VCO) Frank Sanita, who is a radio amateur (AA4FS), at the Flagler EOC last Friday. The VCO is assigned to the EOC to coordinate all volunteers during standby, training, exercises, and activations under the new program. He reports directly to the Emergency Management Chief. Under the program, volunteers will be selected through an application process.

The EM is adopting rules on the recruitment, screening, training, responsibility, use, and supervision of volunteers. Volunteers will be

trained for the jobs they will perform, including safety aspects, and perform duties for which they are properly trained. Volunteers can be terminated for cause.

When an emergency event occurs requiring the assistance of volunteers, the VCO will contact volunteers for deployment based on skills, training, and availability. At the time of activation notification, the VCO will provide specific instructions to the volunteer on the time, place, task assignment, special instructions, and any special equipment or attire that may be needed for the assignment. Volunteers will report to ID and Badging immediately upon arrival to the EOC. If reporting directly to the incident, volunteers sign in immediately at their assigned staging area on ICS Form 211.

Volunteers working at the request of FCEM staff are eligible for Worker's Compensation. Self-deployment and freelancing of volunteers is not authorized. Volunteers are considered partners in implementing the mission and programs of FCEM.

Mandatory training for all volunteers includes: IS-100.a (Introduction to Incident Command System); IS-700.a (National Incident Management System -- An Introduction); and any future training courses required by FEMA in order to maintain NIMS compliance.

After my hour long discussion with Sanita, I came away with the following: First, the county's new volunteer program is not about ARES and communications, solely. It applies to a panoply of volunteers - both groups and individuals - across a wide range of emergency service functions, not just radio communications. ARES and emergency communications are merely one part of the whole, which includes call center work, casework/Social Service, critical incident stress management, construction, donations, first responder, food services, heavy lifting, logistics, medical services, disabled/elderly special needs, transportation, animal needs, and so on. For more, look at the various ESFs <http://www.fema.gov/pdf/emergency/nrf/nrf-esf-intro.pdf> in the National Response Framework <http://www.dhs.gov/files/programs/editorial_0566.shtm>.

A major consideration in the county's new program, which was approved by the county attorney and commissioners, was and is NIMS/ICS compliance. By having an application and registration process, the county can ensure that each of their volunteers has basic

Flagler County (Florida) Emergency Coordinator Robbie Creal, KG4HUF, leads our monthly ARES meeting at the county EOC.

NIMS and ICS certs, and thus the county can pass the related audits, which are coming from either the state or the feds. (Of course, more importantly, is that the county EOC, which runs under NIMS/ICS protocols, will have workers who understand these protocols, for the efficacy of emergency operations in the field).

Secondly, it has been inefficient for the county EM to try to work with the numerous volunteer groups on an individual MOU basis. The MOU documents had to be drawn up on a case-by-case basis, revised and updated constantly, and in many cases could not be agreed to by both parties. Group members would self-deploy, cause problems and become liabilities to the EOC, instead of assets in some cases. Also, an individual volunteer could be a member of several groups, and when it came time to activate, confusion reigned when it was unknown as to what group the volunteer would elect to report.

Thirdly, there were liability concerns - for the individual volunteer, the volunteer groups, and the county. These could be ameliorated by having the EOC assume direct control of volunteers who were working for them on deployments. Before, there were no rules, limited controls, and almost a wild west scenario. The new program is a benefit to the individual volunteer in this regard, and the taxpayers of the county.

Also, a major concern for years in the ARES community has been the lack of workers' compensation for operators hurt in the field. Under Flagler's new emergency management volunteer program, workers' compensation may be available.

The FEMV will function under the Department of Homeland Security's Citizen Corps program of which ARRL is a program partner. ARRL is an affiliate under the four charter Citizen Corps programs--Neighborhood Watch, Volunteers in Police Service, Community Emergency Response Teams and Medical Reserve Corps. See the Statement of Understanding <http://www.arrl.org/files/file/Public%20Service/FEMA-ARRL-SOA1.pdf>. Thus, it is natural that the FEMV is supported by our ARES group, which it does, according to Sanita and East Coast District DEC Mike Lee, WB6RTH.

Another value of the FEMV program is rigorous Typing: Registered volunteers are "typed" according to their commitments, qualifications, skills, certifications, training and experience. The VCO can match the EOC's needs for a particular situation to the volunteers' capabilities at the click of a mouse. Our own ARES and Amateur Radio resource and personnel typing is still in an embryonic stage nationwide, from what I have seen, and certainly compared to the county's effort.

A goal of the FEMV is to keep the volunteer more active and engaged with the EOC by direct interaction, cutting out the inefficiencies in having intermediary entities or "middlemen."

As far as the specific function of communications, including radio communications, a "Communications Department" has been established under the FEMV program to draft protocols, and review and upgrade radio systems' hardware and software, antennas, and so forth. This department will be headed by a radio amateur. A review of the EOC Radio Room is currently underway. The County Commissioners have also established the "County Commission Committee on Communications" to exercise oversight and evaluate the EOC's communications functions, and what the objectives of the county should be.

A volunteer recognition program is part of the FEMV plan.

Sanita reports that the new FEMV program has already received the support of the county's ARES leaders and members, along with members of county REACT and CERT leaders and other groups. More than 65 volunteers have registered so far, even before "going public" with the program, said Sanita. They seem to like the idea that volunteering for the county emergency operations has been simplified and that the EOC has consolidated its volunteer assets in one data base for command and control, efficiency and efficacy.

In my opinion, the program is good for our ARES group. We will continue to do what we have always done: train and certify, exercise and activate our ARES members to provide the best possible support for the EOC, which is our primary served agency. Our EC here will have a solid contact and liaison in the VCO at the EOC. I am proud of the Flagler County ARES program - it has come a long way in the past year with some superb new leadership. And we will work hard to make the new FEMV program work for the county. Because it is through this work that we provide the assistance so needed by the end users in all of this: our neighbors and communities who are going through a terrible ordeal in an emergency or disaster. We are not out there for ourselves, we are out there for them. And the best way to fulfill this, is to support our EOC 100%.

To answer some of the e-mail inquiries I received over the course of the past month, while I do not have a crystal ball, I do see this as the future environment for the relationship between ARES and local/county government Emergency Management. Sanita told me he has had multiple inquiries from other local governments around the country who would like to start similar programs. We need to be on this bus, not underneath it. - K1CE

==> D-STAR USED TO SEND AIRBORNE PICTURES

During the 2010 ARRL Simulated Emergency Test (SET) in Gwinnett County, Georgia, ARES members tested sending photos from an airplane via D-STAR's high speed data (DD mode) capability on 1.2 GHz. The test

confirmed the capability of taking pictures while airborne and sending them back in near real time to a Web site for storage and viewing. File sizes for the photos ranged from 75 KB to 250KB for medium resolution images. Transmission times were in the 10 to 30 second timeframe. The plane, piloted by Paul Branson, KA4YZR, was flown from Lawrenceville, Georgia to the east side of Athens, Georgia about 50 miles away. Photos were taken along the way by Scott Hartlage, KF4PWI, and sent back through the WD4STR D-STAR repeater. The signal strength confirmed link calculations that reliable transmission could occur out to at least 100 miles from the air.

Gwinnett ARES tested the concept to provide the capability to the Georgia Emergency Management Agency (GEMA) for quick aerial surveys of disaster areas and other immediate photo needs. The ICOM ID-1 radios aboard the airplane send the photo files via 128 KB IP connection to any of the D-STAR repeaters located around the state.

A statewide network of fully equipped D-STAR repeaters is being installed at Georgia Public Broadcasting sites across Georgia. Multi-band antennas have been installed on each of the tall television towers. Once fully operational later this year, D-STAR voice and data communications will be available near statewide for emergency communications. -- John A. Davis, WB4QDX <wb4qdx@arrl.net>, Emergency Coordinator, Gwinnett (GA) ARES, District Emergency Coordinator

==> IARU REGION 2 MEETS, CONSIDERS EMCOMM ISSUES AND EVENTS

Delegates of IARU Region 2 <http://www.iaru-r2.org/> (the Americas) met in El Salvador last month and discussed regional emcomm issues and events. Vantroi Pe&#65533;a, HI8VP, Secretary of Radio Club Dominicano, graphically described the assistance to Haitian earthquake relief work by amateurs of the Dominican Republic and how the equipment provided by and through the ARRL was put to good use. Delegates of Radio Club de Chile (RCCH <http://www.ce3aa.cl/>) described the effects of the earthquake that struck their country a few weeks later and the communications assistance that radio amateurs were able to provide; they expressed gratitude to Region 2 for its financial support toward repairs to the RCCH club station. Chuy L&#65533;pez-Villalobos, XE2N, explained how amateurs in Mexico are using digital modes in emergency preparedness. Delegates of LABRE <http://www.labre.org.br/>, the national society for Brazil, demonstrated a Web site <http://www.hambrasil.com.br/> where the exact location of Brazilian amateur stations can be seen. On behalf of the Federaci&#65533;n de Radioaficionados de Cuba, Region 2 Director Pedro Rodriguez, CO2RP, described the Caguair&#65533;n homebrew transceiver project that is intended to improve the emergency communications capabilities of Cuban amateurs. An ARRL paper, "Amateur Radio Operators and Tropical Cyclone Events," was accepted for publication on the Region 2 Web site in both English and Spanish; it provides guidance for amateurs on how to prepare for hurricanes and typhoons.

==> 2010 GAREC CONVENED IN CURACAO

The 2010 Global Amateur Radio Emergency Communications (GAREC) Conference is in the history books. It was held October 10-12 in Cura&#65533;ao (PJ2). At the time most conference attendees arrived in Cura&#65533;ao, it was a part of the Netherlands Antilles along with Bonaire, St Maarten, Saba, and St Eustatius. By the time the attendees headed home, independence had been declared and Cura&#65533;ao was its own nation within the Kingdom of the Netherlands.

GAREC is an annual conference attended by radio amateurs from around the world who are involved in emergency communications. This year, representatives from the Netherlands, Switzerland, Finland, the United Kingdom, Cuba, India, Japan, South Africa, the United States and Cura&#65533;ao took part. The ARRL was represented by ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC.

Topics covered included the earthquakes in Haiti and Chile, Amateur Radio emergency communication organizations, how emergency messages are handled, and how an emergency communications exercise is designed and organized. Updates on emergency communications activities in each of the three IARU regions were also given. Greg Mossup, G0DUB, had the attendees conduct a table top exercise for a large scale international disaster.

At the end of the conference a statement paper was written and approved by the representatives in attendance. This will be available soon on the GAREC Web site <http://www.garec.net/>.

GAREC has been held each year since 2005. The meeting location changes each year and is rotated through each IARU region. The 2011 GAREC conference is scheduled to be in Sun City, South Africa in August and will coincide with the 2011 IARU Region 1 Conference. - Mike Corey, W5MPC, ARRL Emergency Preparedness and Response Manager

==> ARES IN ALASKA

Amateur Radio emergency communications programs are alive and well in Alaska. Operators have supported public events and emergency response operations in Alaska for over 70 years. With three ARRL 50+ year affiliated radio clubs and more than 3400 licensees throughout the state, Amateur Radio has the ability to provide communication coverage over the entire state. Alaska is twice the size of Texas, 413 times the size of Rhode Island and yet has only one ARRL Section for the entire state to support activities and emergency communications.

Each operator has a radio, their own power supply and a general knowledge of emergency communications needed to provide emergency or priority communications traffic compliant with the National Response Framework and National Traffic System. Amateur Radio is a key component in the State of Alaska Emergency Plan. The Amateur Radio Emergency Service (ARES) of Alaska <http://www.aresalaska.org/> provides auxiliary communications support for local governments, disaster

relief, and search and rescue groups during emergencies, as well as support for various public service community events. ARES operates throughout Alaska via several regions. In Anchorage, ARES meets on the third Saturday of each month at 9:30 AM in the Carr-Gottstein building, Alaska Pacific University campus. The Anchorage Emergency Coordinator is Heather Hasper, KL7SP <KL7SP@ARRL.net>. [I traveled to a hamfest in Anchorage back in the 1990's, and can attest to the vitality of the amateur community there. Hams there embrace a frontier spirit of public service - K1CE]

==> ARKANSAS SM ATTENDS STATE'S INTEROPERABLE COMMUNICATIONS CONFERENCE

Arkansas SM J.M. Rowe, N5XFW, attended the Arkansas Interoperable Communications Conference (AICC), and the Volunteer Organizations Active in Disasters (VOAD) meeting in one week recently. There were several workshops and presentations at the AICC, and Rowe sat on a panel discussion of the response to the Albert Pike Flood <http://abcnews.go.com/WN/Media/campers-killed-arkansas-flash-flood-albert-pike-campground/story?id=10889327>.
The people involved in the discussion were complimentary of the Amateur Radio community of operators - their flexibility in problem solving, to serving as net controls, to joining a search team that otherwise would not have had external communications.

The main topic of discussion at the VOAD meeting was the upcoming National Level Exercise 2011 (NLE11), on the New Madrid Seismic Zone. Eight states in four different FEMA Areas are participating. The scenario calls for a total systems failure for at least the first 24 hours. It's scheduled for May 16-20, 2011. Face-to-face DEC meetings are scheduled for exercise-specific planning; DECs and ECs will be receiving information from the SEC shortly. The Arkansas Department of Emergency Management is interested in Amateur Radio capabilities, especially in getting messages passed to and from local authorities.

==> IARU INTERNATIONAL EMCOMM NEWS

Communication Support for Dual Disasters in Indonesia <http://www.iaru-r2.org/communication-support-for-dual-disasters-in-indonesia/> -- October 28, 2010. Following two natural disasters, an earthquake triggered tsunami, and separately an erupting volcano, radio amateurs are providing their help as the enormous response effort continues. More here <http://www.iaru-r2.org/communication-support-for-dual-disasters-in-indonesia/>.

Thai Radio Amateurs Provide Emergency Help <http://www.iaru-r2.org/thai-radio-amateurs-provide-emergency-help/> -- October 28, 2010. The worst flooding in decades in part of Thailand caused by heavy monsoon rain over the past two weeks has claimed at least 56 lives and affecting 940,000 homes in 32 provinces. The Bangkok Post newspaper has reported that Amateur Radio operators in Nakhon Ratchasima and Chaiyaphum are helping authorities coordinate rescue. More here <http://www.iaru-r2.org/thai-radio-amateurs-provide-emergency-help/>.

GlobalSET Nov 2010 English <http://www.iaru-r2.org/globalset-nov-2010-english/> -- October 22, 2010. The IARU Region 1 organization is inviting the HQ stations of all IARU Member Societies (MS) and the "Stations of Emergency Communications Groups" to participate in a Global Simulated Emergency Test (GlobalSET) on Saturday, November 13th, 2010; from 1100 to 1500 Local Times. The objectives of the test are: Increase the common interest in emergency communications; test how usable the CoA (Center of Activity) frequencies are across ITU Regions; create practice for international emergency communications and practice the relaying of messages using all modes.

The IARU Region 2 HQ Station will be QRV at 1100 - 1500 local time on all CoA frequencies of Region 2 : 3750 or 3895 kHz; 7060 kHz, 7240 kHz or 7290 kHz; 14300 kHz; 18160 kHz; and 21360 kHz.

Stations intending to participate are requested to register through
their IARU R2 Area/National Emergency Communications Coordinators
<http://www.iaru-r2.org/emergencies/>. For more information on the
GlobalSET Rules, click here

==> TIPS FROM ARES TIPSTER N5FDL

Two quick tips: The PDF version of the ARRL's ARES Field Resources
Manual (downloadable
<http://www.arrl.org/files/file/ARESFieldResourcesManual.pdf>) looks
really great on my iPhone. I also use a free/paid service called
Evernote <http://www.evernote.com> to keep all my frequency lists,
equipment manuals, phone lists, ARES logo artwork, ICS forms,
documents, etc., available wherever I go. It works on smartphones,
desktops, and portables, just like a good cloud app should. I can email
anything I am keeping in Evernote from inside the program, which is
cool. Need an ARES membership application? I can send you one right now
from my phone. -- David Coursey, N5FDL [check out David's excellent
news/blog site here <http://www.n5fdl.com/>. -- ed.]

==> LETTERS

Northern Florida Plan: Too much?

In last month's issue, you gave us quite a description of the Northern
Florida Emergency Plan with all of its grand plans and requirements. I
have been an Amateur Radio operator since 1970, and have handled
emergency traffic when needed in our local area. I was the local Civil
Defense Radio Officer. I have ICS and NIMS training, including IS-100,
IS-200, and IS-700, so I am familiar with the system and its design and
intentions. My impression is that the Northern Florida communications
plan is only for those amateurs who can devote all of their time to
training and exercises, and are willing and able to spend whatever is
"required" for training and operational readiness. If the ARRL or ARES
succeeds in getting this level of requirement in effect over the rest
of the country, I can see many amateurs dropping out of the ARES side
of the hobby. -- John R. Hartmus II, WB8GRX <jhartmus@horizonview.net>,
Frankfort, Ohio

Clear and Present Threat Alerts

The FBI's Infragard <http://www.infragard.org/> program is a citizen
training program to promote awareness of the threats we face and how to
recognize, document and report them. Even small suspicious activity may
be part of a larger scheme that Fusion Centers around the US can
investigate, "connect the dots," and disrupt. -- Robert Berman, W4SET,
FBI Infragard, Hixson, Tennessee

ICS-213 Message Form Meld

Was the intent of the statements about the ICS-213 <http://ics213.com/> in the last issue to have the ADDRESS, TEXT, and SIGNATURE portions of the Radiogram form put into the Message field of the ICS-213? Inserting the PREAMBLE into the ICS 213 will confuse our served agency members. A procedure for dealing with the ICS-213 should be in the ARRL Level One Emcomm course. The new Army MARS Basic Training Course has such a procedure. How about the ARRL issuing the ICS-213 equivalent of FSD-218 <http://www.arrl.org/fsd-218-amateur-message-form>? -- Steve Schroder, KI0KY/AAR8AQ, Hotchkiss, Colorado [Here is a sample <http://www.yoloares.org/news/2008/NEW_ICS_213_form_May_20.pdf> (from Yolo County, California ARES <http://www.yoloares.org/>) of what the field is drafting for NIMS compliant message forms - ed.]

==> K1CE FOR A FINAL

Following the MS-150 communications support effort here last month, a debriefing was held for participating operators. It was a no-holds-barred critique and review of the event, with the objective of improving group and individual performance for future events - whether planned, or otherwise. The after-action review followed some good protocols that should apply to all such reviews, and are especially timely as ARES groups wind down from their annual SETs held this Fall.

- No-Fault Review - there is no criticism of individuals, only of process, methods or procedures. We are not here to bash others, but to grow as a team.
- For each criticism, there should be a recommendation - constructiveness is the name of the game.
- Focus on what was done right, and how we can further leverage that going forward - maybe even take best practices in one area and replicate them in others.
- What more we should do in the future? Did you find things that might have been missed opportunities this year that we should consider for future events?
- What should we abandon (if any) for future events? - These would be low-value tasks that we might have been asked to perform, but which didn't really need to be done (in retrospect).
- Once the review is completed, the results will be published for all who participated, and will be posted on-line for the public on how radio amateurs performed, what they learned and how they intend to improve for the future.

See you next month! 73, Rick K1CE

RAC Bulletin 2010-030E - Bulletin #2 from Ottawa.
2010-11-02

The Board, Executive and other key personnel arrived on Friday, and we have worked long hours through till Sunday afternoon. This took place in a collegial, problem solving atmosphere with open and frank discussions by all participants

* Our member's valuable input was reviewed and discussed in detail, and incorporated into the work done on the draft RAC Vision which will be printed in TCA and a RAC notice in the near future.

* The topic of tiered memberships was discussed and has been forwarded to the Admin and Finance committee for additional financial analysis. This also includes options for a youth and/or student memberships.

* A 2011 budget is being prepared, and is being reviewed by the Admin and Finance committee at this time.

* The outgoing QSL bureau was discussed, and future funding and operating options were discussed.

* A recognition program for our volunteers, who are the backbone of our organization, is being implemented.

* We are moving forward on an improved communications strategy that will push information and news to our members, through a variety of mediums, which would include • Ham nets, local club communications, face-to-face meetings, presentations, newsletters, •The Canadian Amateur• magazine, the web site, bulletins and social media channels.

* In addition, we are actively looking at improving the feedback mechanisms from our membership.

* RAC is the single, national voice for the interests of all Amateur Radio operators in Canada. The Board and Executive believe that an active and growing membership in RAC is the key to effective and strong representation of Amateur Radio in Canada, and with your support, this can be accomplished.

Geoff Bawden, VE4BAW - President, Radio Amateurs of Canada

Rememberance Day - November 11, 2010

Again this year the Guelph Amateur Club is operating the VA3IF
amateur radio station at the McCrae Museum on Water St. here in Guelph
We will be operating on 80 ? 10 HF Bands,
2 meter and IRLP node 2260.

Saturday November 6th, 1-5 PM EDT (17:00-21:00 UTC)
Sunday November 7 1-5 PM EST (18:00-22:00 UTC)

For those in the Geulph area, the museum will be open as follows:

The normal hours of the Museum is 1-5 PM ET, however, with programs
Monday Nov 8, the first program is at 9:30 AM and last ends at 8:30 PM

Tuesday Nov 9, the first program is at 10:00AM and the last ends at 8:30pm

Wednesday Nov 10, the first program is at 10:30, and the last ends at 8:15

Thursday, the flag raising ceremony with the Legion, is in the
memorial gardens at 9:00 AM EST with the John McCrae School
service at 10:30 AM EST

Come and visit with us or listen for us being on the radio.

For In Flanders Field's, see:

** Space Weather News for Nov. 3, 2010 **

FARSIDE SOLAR FLARES: An active region just over the sun's
eastern horizon is crackling with solar flares and hurling
material high above the stellar surface. One of today's flares,
a C4-class event, created a wave of ionization in Earth's upper
atmosphere despite the fact that the blast site was not directly
visible from Earth. The source of this activity appears to be
old sunspot 1112, which has spent the last ~12 days transiting
the far side of the sun, and is now about to turn back toward
our planet. SOURCE: http://spaceweather.com

** 6W, SENEGAL HF and 50 MHz activity **

A German team made up of Matthias/DL5MFL, Juergen/DL4MAQ and
Sven/DF9MV are planning to be active from Senegal between
November 8-18th. A 6V7** callsign is being requested and will
be released when available. The group will be guests of Francois
6W7RV, at the "Le Calao" resort and will do a "dedicated holiday
style" operation. Look for Juergen/ DL4MAQ and Sven/DF9MV to be
active mostly on CW while Matthias/DL5MFL will be on SSB. The
team wants to have two stations on the air simultaneously, the
main activity will be on CW and SSB, possibly some PSK31. They
will have beams for 20/15/10/6 meters, a 4-square for 40 meters
and also a vertical for 160/80/40 meters. For 30/17/12 meters
they will use wire antennas. They do mention about possible
power outages. QSL via DE0MST. The DXpedition currently has a

Sable Island Off!

Tuned out to what is happening in the world of amateur radio?

Global Simulated Emergency Test (GlobalSET)

Concern for 24Ghz band

VK's Travellers Net

ARRL President Makes Final QSO with Australia's WIA Centenary Station

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING NOVEMBER 7 2010

Remembrance Day 11 November 2010

Australia's National Remembrance Service takes place at the Australian War Museum's Parade Ground commencing at 10:15am.

It was back on November 1918 at 11 am the guns of the Western Front fell silent after more than four years of continuous warfare.

This year, 2010, marks the 92nd Anniversary of the Armistice, when Australians remember those who fought and died for our country in war and armed conflicts.

Please Remember with a minutes silence at 11am Thursday.

In VE Land the Guelph Amateur Club will operating VA3IF at the McCrae Museum on Water St. Guelph on 80 - 10 HF Bands, 2 meter and IRLP node 2260.

Saturday November 6th, 17:00-21:00 UTC
Sunday November 7 18:00-22:00 UTC

Thursday, the flag raising ceremony with the Legion, is in the memorial gardens at 9:00 AM EST with the John McCrae School service at 10:30 AM EST

For In Flanders Field's, see:

Sable Island Dxpedition postponement

N0TG reporting on Southgate News says "Dear Clubs and Foundations who have generously supported the Sable Island DXpedition. Unfortunately, a delay has occurred. Due to the uncertainties of the delay and that a reschedule of the DXpedition, if possible to do so, would likely need to be 2011, Sept/Oct It is appropriate to refund the support you have provided."

Unfortunately no contact was given as to where to send for the return of your support, so hopefully those who did provide support in whatever form, still have the address so you can be refunded!

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

ARRL President Makes Final QSO with Australia's WIA Centenary Station

The Wireless Institute of Australia (WIA) marked the conclusion of their VK100WIA centennial special event operation on October 31 with a QSO between WIA President Michael Owen, VK3KI, and ARRL President Kay Craigie, N3KN.

Logged five minutes before midnight in Australia the QSO between N3KN and VK100WIA, with VK3KI at the microphone, was the last contact recorded in the Australian special event's log. Would all who operated as vk100wia make sure to have completed all logging by the end of this month please.

More on this historic broadcast later in this edition of WIA National News

HOME OF THE GOOD GUYS

Now Hear This!

Bionic ear chief scientist a radio amateur

A member of the Australian team, Jim Patrick, that developed the world's leading multi-electrode cochlear implantation, recognised as the most effective treatment of a form of hearing loss, attributed his career success to knowledge learned as a radio amateur.

Now Chief Scientist at Cochlear Limited, an engineer with training in physics and communications engineer, he was recruited as a member of the Australian team that in 1978 which invented the first cochlear implant that let previously deaf patients truly understand speech.

Based in Sydney since 1981, he has been a member of Cochlear's senior management team, responsible for research and development that is looking worldwide at how signal processing can improvement the performance of the cochlear implant.

World-wide 188,000 people had received cochlear implants.

Included in Jim Patrick's professional profile is shown his interest in amateur radio, holding the callsign VK2AKJ.

News from the Gulflands

On OC-227 Sweers Island, there has been some great success in bolstering the DX haven with antenna hardware.

You will recall we put a call out for a tower for Lyn well thanks to Harold VK4ANR a 46ft telescoping tower is arriving on the island real soon.

Lyn wants to thank everyone who helped procure tower, especially Eric VK2VE at Waverly Amateur Radio Society in Sydney, who made an extremely generous offer but unfortunately the cost of freight made it unviable.

Eric and club members put a lot of time into taking photos and measurements of their tower so if anyone else out there closer to Sydney than Lyn and they are looking for a good 46ft tower, complete with tilt-over base, please give Eric a call, or contact Lyn for more details or photos.

Lyn has taken up an idea from Tanya Megaw (xyl of Chris VK4FR) and will be decorating the tower in Christmas fashion in time for the festive season.

HAMS ACROSS AUSTRALIA.

VK1

Foundation Licence course and other examinations

The last VK1 Foundation course and Examinations for Standard and Advanced levels of licence is scheduled to be run on the weekend of the 13th & 14th of November.
For this to go ahead we need to be getting expressions of interest and applications in NOW !

If you are aware of anyone who is interested in attending this course, or to sit and upgrade, please encourage them to contact the club as soon as possible through the club's standard email address of committee@crarc.ampr.org

CRARC's November meeting is the time they have their annual Sausage Sizzle, Christmas Party and Trash & Treasure night.

This year that will take place on Wednesday 24th of November.

There is a trailer load of electronic equipment & heavy multicore cabling that is ideal for the scrounger / equipment builder that will be there with a 'free for the taking' on most of it (the cable will have a small charge),

anything left will be going to the metal recyclers the following day.

(Peter Westerhof VK1NPW, President - Canberra Region Amateur Radio Club.)

Gold Coast Amateur Radio Society wish to advise that the D Star Users Group South East Queensland meet every Wednesday at 8pm EST on 146.8375 (Port c)
This is the Gold Coasts DStar repeater VK4RWN

There are about twenty or more amateurs who have DStar radios in the footprint.

Bob VK4RT told us "The repeater has not been functioning well in the past and as a result many have lost interest and are not listening to the repeater."

This group would like all those with D Star radios to come on frequency and exchange information, obviously you must have a DStar radio to hear this repeater as the signal is digital only.

And don't forget Gold Coast Amateur Radio Society will be holding it's annual Hamfest at Albert Waterways Hall the back of Australia Fair next Saturday 13th November 8.30am.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been wondering who will join us in the amateur radio sandpit.

In marketing there is the old saw that if you lose a customer by bad service, they will tell, say 12, people but if you satisfy a customer they will tell, maybe 8. The figures vary as to who is telling the story but the principle remains that it is easier to alienate people we don't know than it is to recruit from that same area.

We have heard in WIA National News that to recruit the young we need to think in more visual terms. The long term growth of the hobby may depend on getting more younger recruits but think.....it is not only the youth but the youthful minded who can join us. Have we really alienated our family

members, our workmates or have we not tried to share with belief and enthusiasm?

One thing that we don't have details is the demographic of the hobby and the best areas of the community from which we can recruit. But one group that pops up are the newly retired, grey hair and all. Many of these people are looking for a new and engaging interest when the routine of the working life is past. Amateur radio certainly fits the grey nomad as well as the U3A student, the stay-at-home and the gad-about. Maybe we should share our enthusiasm more freely.

I'm, Geoff Emery and that's what I think....what about you?

DISCUSSION POINT

Tuned out to what is happening in the world of amateur radio?

Hello, I'm Jim Linton VK3PC with a look at an issue that is not new, but very frustrating for those involved in the administration of amateur radio and event or activity organisers everywhere.

While there is a wide range of information sources available in our modern life, there are those who deliberately, are too busy, lazy or for other reasons, disengage from the world around them.

For example, each summer there are those who engage in unsafe activities such as burning off during declared fire danger periods, or have no knowledge of when a total fire ban day has been declared.

A similar level of a lack of awareness or knowledge is evident within the ranks of radio amateurs.

Despite this weekly VK1WIA broadcast being available via on air transmission, downloadable audio and its text edition, the internet generally, and Amateur Radio magazine, there are those who don't keep up with important developments and the news.

The recent National Field Day is an example. There were those contacting field stations on air asking what was happening, and admitting they had not heard that such an event was being held.

A similar thing happens during the International Lighthouse and Lightship Weekend and other well publicised events.

Recently the Radio Society of Great Britain, General Manager, Peter Kirby, G0TWW picked up on the ?tuned out? syndrome in his blog.

He wrote: "....it's very apparent that an element of the Society's membership goes into hibernation for long periods of time. Despite a survey showing that ninety percent of our members have access to the internet and all get RadCom (magazine), they remain blissfully ill informed as to what is going on in the world of amateur radio."

He cites a letter from a ?belligerent member who threatened to resign unless the RSGB changed its stance on compulsory Morse Testing,? and how unfair

it was that Class B licence holders are still restricted to VHF operation only.

And this despite the fact that Morse code as a compulsory licence requirement ended in the United Kingdom in 2003. Indeed the end of Morse code testing is still not yet fully appreciated by some in Australia.

The work being done by national radio societies and the International Amateur Radio Union to protect and further the rights and privileges of radio amateurs worldwide also, disappointingly does not have the recognition it deserves.

Despite news and information being readily available about this crucial advocacy work, the message is not reaching its target audience.

Being informed and aware, can make our wonderful hobby of amateur radio even more enjoyable.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Global Simulated Emergency Test (GlobalSET)

This emergency communications exercise is held twice a year, the next GlobalSET is NEXT Saturday the 13th of November.

The main change this time is that it will run 1100 to 1500 hours local time, of the stations taking part.

The operation will take place on and near the emergency Centre-of-Activity (CoA) frequencies on 80, 40, 20, 17 and 15 metres.
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

The objectives of GlobalSET are to:
Increase the common interest in emergency communications. Test how usable the emergency Centre-of-Activity frequencies are across the three ITU regions. Create practices for international emergency communication and Practice the relaying of messages using all modes.

IARU member radio societies, and emergency communications group stations intending to participate are requested to register through their IARU Regional or National Emergency Communications Coordinators.

During GlobalSET, the Radio Club Peruano (RCP) will celebrate it's 80th anniversary, and will be the Region 2 HQ station with the special call sign OC80A.

(RAC plus Jim Linton VK3PC, Chairman, IARU Disaster Communications Committee)

Communication support for dual disasters in Indonesia

Following two natural disasters, an earthquake triggered tsunami and separately an erupting volcano, radio amateurs are providing their help as the enormous response effort continues.

ORARI (Organisasi Amatir Radio Indonesia) International Affairs Coordinator, Wisnu Widjaja YB0AZ has provided initial information about the involvement of radio hams in the dual disasters that hit the Indonesian archipelago this week.

He said that the ORARI Communication and Rescue Task Force has joined the team of the Disaster Management of Directorate General Post and Telecommunications, Ministry of Communication and Informatics Republic of Indonesia.

They has been operating in the field and provide communications support to the government and communities in the area where the eruption of Mount Merapi catastrophe at Yogyakarta province and the earthquake also followed by tsunami at Mentawai of West Sumatra, said Wisnu YB0AZ.

Media reports that at least 170 died, mostly drowned after the tsunami triggered by a 7.7 magnitude offshore earthquake struck the Mentawai islands late Monday week off the west coast of Sumatra. Up to 400 others are missing.

While on the island of Java, several hundred kilometres away, 29 were killed when the volcano, Mount Merapi, erupted on Tuesday releasing clouds of hot gas, rocks and laver into the air. almost 42,000 people had fled to temporary shelters around the nearby city of Yogyakarta as the area is covered in volcanic ash.

The remoteness of the affected areas, poor communications, and the ongoing disaster response and relief efforts are likely to see the OARI Communication and Rescue Task Force involved for some time yet.

(Jim Linton VK3PC, Chairman, IARU Region 3 Disaster Communications Committee.)

Amateur Radio Examination bursaries

The South African Amateur Radio Development Trust is making bursaries available for students under 25 years of age who are planning to write the May 2011 Radio Amateur Examination

Each bursary pays for the examination fee, student membership of the South African Radio League for one year and contributes to the tuition fees.

The bursary is valued at R1000.

(www.amateurradio.org.za)

The 35th meeting of the Canadian Amateur Radio Advisory Board [CARAB] took place on Thursday Oct. 28th.

CARAB is composed of representatives from both Radio Amateurs of Canada representing Canadian Amateurs, and Industry Canada, as the regulator of amateur radio.

Among key issues discussed at the meeting was IC's policy regarding temporary authorization of frequency assignments in amateur bands to non-amateur services [e.g. September 10th and 12th Pro Tour race in Quebec].

Then last weekend, October 31, the Radio Amateur of Canada Director's, executive and key resources gathered in Ottawa to plan the future of RAC.

They checked on feedback received, the future of 'The Canadian Amateur' magazine and what physical presence needs to be in the future.

A 'vision' of what RAC needs to look like to attract and retain members and ensure the future of Amateur Radio in Canada.

IPod

A 12-year-old Delaware girl avoided a kidnapper by pretending her iPod was an iPhone. The girl was waiting outside of her middle school for a ride, when a man in a white van pulled up and commanded she get in the van.

The potential kidnapper immediately fled the scene after the girl took out her iPod, held it up to her ear and pretended to call the police

(shelleypalmer digital)

The seven-month upgrade to the historic "Mars antenna" at NASA's Deep Space Network site in Goldstone, Calif. has been completed. After a month of intensive testing, similar to the rehabilitation stage after surgery, the antenna is now ready to help maintain communication with spacecraft during the next decade of space exploration.

The month of October was used as a testing period to make sure the antenna was in working order and fully functional. A team of workers completed an intense series of tasks to reach its first milestone - upgrading the 230-foot-wide antenna in time to communicate with the EPOXI mission spacecraft during its planned flyby of comet Hartley 2 last Thursday (Nov. 4)

==========

RSGB NEWS FROM G4NJH

Concern for 24Ghz band

Earlier this year Ofcom announced an exemption for Railway Level Crossing systems to use a part of the 24GHz band where we have secondary status.

More recently, on 6th October, the European Union's Radio Spectrum Committee published a review of automotive ultra-wideband short-range radars that currently operate across the entire 24GHz band and which have caused considerable concern.

The Society actively participates in consultations on these matters and along with IARU Region 1, is working to protect and enhance our 24-24.05GHz Primary allocation where innovative DX and Beacon activity is concentrated.

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

In DX, an international team of amateur radio operators are planning to activate Kanton Island for 9 days starting April of 2011. An additional day may be added depending on the sailing time to the island. Transportation has been arranged, all licenses are assigned and the permit is in its final stages. Callsign will be T31A.

They plan to have 6 stations with 12 operators with activity on 160 through 10 meters using CW, SSB and RTTY.
More is on-line t31a.com

Members of the Sony Kyushu's Amateur Radio Club will operate from the Island of Danjo in the East China Sea using the club call JF6ZNT.
This, until today, November 7.
Activity will be on 80-10 meters using CW, SSB and RTTY.

This island is one of today's most wanted in the Japanese Islands on the Air group. QSL via the Bureau.

DL5MFL, DL4MAQ and DF9MV are planning to be active from Senegal from November 8 to 18.

The group will be guests of 6W7RV at the Le Calao resort and will operate dedicated holiday style. A 6V7 callsign is being requested and will be made public as soon as its available.

QSL via D-E-Zero-M-S-T.

Travellers Net

As of today, Sunday 7 November, the 21.185 MHz Travellers Net will run in a new time slot from 04:00 UTC to 05:00 UTC due to propagation.

The Travellers net commenced soon after the introduction of the Novice Class licence in VK to allow travellers with Novice calls a similar service to the 20 metre Traveller's Net which was well established on 14.106mHz for full calls.

Today the 20 metre Net runs on 14.116 opening at 02:00Z with a call-back and reports at 03:00Z.

The operators on both nets log callsign, name and planned overnight stop for all travellers who check in each day, pass any messages as requested, and arrange QSO's or QSP's as required as a voluntary service to the amateur community, their family and friends.

So listen out for the 21.185 Net between 04:00 and 05:00Z or check in and give a signal report.

Old beacon at dump sparks rescue mission

Rescue services were alerted Monday afternoon after Tauranga Airport in ZL and an aircraft flying over the Bay of Plenty picked up a distress signal in the region.

A helicopter from Rotorua narrowed down the search area, and Radio Spectrum Management traced it to the Te Maunga refuse transfer station. The beacon was located in the recycling centre.

The Rescue Coordination Centre New Zealand said the beacon had been placed on a glass conveyor belt and was probably triggered when it was lifted off the belt and set aside on a railing.

The beacon was operating on the old 121.5MHz or 243MHz frequencies.

The incident served as a reminder for people all around the world to dispose of old beacons properly, either by disconnecting the battery or taking the beacon to police, the coastguard or a beacon retailer

MAGAZINE: THE SIX AND TEN REPORTING CLUB

The Six and Ten Reporting Club is an informal group of radio amateurs, mostly from the UK, interested in propagation studies at frequencies around the High Frequency to VHF boundary. Mainly, those who operate on the 6 and 10 meter amateur radio bands.

The club produces a monthly newsletter called the Six and Ten Report that includes analysis of 28 MHz propagation based on beacon monitoring.
Also included is an ongoing analysis of 50 MHz activity reports broken down by propagation mode as well as reports and discussions on unusual propagation events.

The Six and Ten Report is edited and produced by Steve Reed, G0AEV and Martin Harrison, G3USF and is an activity of the RSGB's Propagation Studies Committee.
The Report is usually published online at g7kse.co.uk/6and10

Now for a look inside Amateur Radio magazine for November

In the WIA Comment, President Michael Owen VK3KI provides details of a letter he has sent to the Australian Communications and Media Authority asking that the maximum power limit for Advanced Licensees be increased to 1,000 watts or 500 watts means power, on all exclusive HF Amateur Service bands.

Justification for the increase include the need to overcome increasing global electro-magnetic noise pollution on all HF bands from consumer and commercial devices, enhance the ability to provide emergency communications, and to address a disadvantage Australian radio amateurs have in contesting.

It includes comparison of the Australian 400w PEP limit with those permitted in 13 other countries, nine which have higher limits.

In other interesting reading this month is an article about the 6-metre band and Standard Licensees, from the first hand experience of Stuie Birkin VK8NSB. This is sure to stimulate interest in the Magic Band!

And Foundation Corner ...'Is good enough good enough, when it is not perfect', an interesting potpourri of antenna basics, parameters, feedlines, SWR, efficiency and radiation patterns presented by Geoff Emery VK4ZPP.

This is Barry Robinson VK3PV. I will have more about the contents of Amateur Radio magazine, a WIA membership service and also available at selected newsagents, on next week's VK1WIA broadcast.

FO-29 operating schedule affected by eclipses

Japan Amateur Radio League has been making necessary adjustments to the FO-29 satellite operating schedule as the satellite enters a period of eclipses.

The eclipses have reduced the power budget requiring frequent analysis of available power aboard the satellite.

FO-29 will be enabled when the power budget allows.

JARL requests that satellite operators access FO-29 with as little power as necessary to maintain communication.

Mineo has posted calculations of the FO-29 eclipses at:
http://www.ne.jp/asahi/hamradio/je9pel/fo29ilum.htm

(Mineo Wakita, JE9PEL)

LightSail-1 backup being built

Louis Friedman, program director for LightSail-1, has announced that a back-up craft to LightSail-1 will be built, instead of an investment in insurance for an estimated cost of $200,000.

LightSail-1 is planned to be launched in early 2011.

LightSail-1 is a three Cubesat spacecraft (the size of a shoebox).

It will use UHF frequencies for tracking and command control stations.

Georgia Tech University is leading the mission operations.

Stellar Exploration, is building LightSail-1.

CRARC NEWS

Sunday 21st of November will see the NSW Carriage Driving championships being held at Doug Willcoxson's (VK2FDMW) and wife Dot's property at Witwood.

This event is always a bit of fun and a nice relaxing day in the country watching horses and their accompanying carriages do the cross country sections and then the obstacle runs and reporting in the various times and penalties.

Sections will be on 2 metres Simplex, obstacles on UHF.

Again if you are in the region contact the CRARC and offer your expertise!

Canberra's final event for the year will be the BMSC's "Rallye des Femme" or "Lady Drivers" event. This small rally is designed for long suffering Wives, Girlfriends, Partners and others to take over the rally car from the boys and get out to compete (or should that read revenge!)

It often attracts competitors from Sydney and the south coast in addition to the locals.

Again PLEASE contact Phil VK1PL by email to committee@crarc.ampr.org if you can assist with any of these events.

vk7'S WICEN South are requesting the pleasure of their friends at the now traditional end of year lunch to be held on Saturday 11 December at Rosie's Kitchen, Kettering.

Please indicate your attendance to the WICEN South team.

Good morning Bill
The ANZO 7115 KHz net took place at its new time of 0600z.
Propagation was reasonable spoilt by contest QRM.
Present were Noel VK2IWT, Bill VK4ZD, Peter VK3FPSR,
Rob ZL1RD and myself.

Next week will be a better test of the new time with hopefully less QRM
YIR 73 Peter VK3KCD

LOWDOWN

G3XBM achieves 1733km on 500kHz

This using WSPR.

He writes:

"This evening, quite unexpectedly, I got a string of reports on 500kHz WSPR from OH1LSQ at an astounding distance of 1733km. To me these are amazing reports pushing my best DX on the band with just a few milliwatts ERP to new levels.

What surprises me is how well a very simple vertical wire loop works as a TX antenna, the wire is just 1mm diameter, with an area of around 70m square with part of the loop laying on the ground buried in wet grass.

Even more than before, I now believe almost anything is possible. Now I just need to repeat this on 137.5kHz."

Further G3XBN had other great news, he has an 8.97 kHz transmitter permit.

The UK regulator OFCOM has issued Roger G3XBM with a permit to transmit on 8.97 kHz. He is believed to be the 1st UK station to receive authorisation for the 8.7kHz - 9.1kHz band.

Duration: 1 year
Modes : Not specified
Power : 100mW EIRP

Location at home QTH, special clearance if going portable as some UK locations have at least a 4km exclusion zone.

WICEN Victoria votes to remove Amateur Radio Victoria from their
Rules of Association. (text only)

At a Special General Meeting convened to consider the issue, the
membership of WICEN Victoria voted unanimously to pursue the removal of
the old Wireless Institute of Australia Victorian Division (now trading
as Amateur Radio Victoria) from their Rules of Association. As the rules
currently stand WIA Vic Div/ARV must agree in writing before any changes
can be made to WICEN's rules.

ARRL President Makes Final QSO with Australia's WIA Centenary Station
Date : 02 / 11 / 2010
Author : ARRL

The Wireless Institute of Australia (WIA) marked the conclusion of their VK100WIA centennial special event operation on October 31 with a QSO between WIA President Michael Owen, VK3KI, and ARRL President Kay Craigie, N3KN.

Logged five minutes before midnight in Australia the QSO between N3KN and VK100WIA, with VK3KI at the microphone, was the last contact recorded in the Australian special event's log.

More than 50 WIA-affiliated clubs have used the VK100WIA call sign for almost six months as part of WIA's centennial celebration; the WIA is the oldest Amateur Radio national society. For this contact, VK100WIA was operated portable for the Westlake's Amateur Radio Club, the club privileged to be the last club to use the call sign. Since VK100WIA went on the air in May, it logged 24,439 contacts.

Michael told Kay that the WIA was pleased that the special event station's final contact could be with her, and thanked the ARRL for its support and for participating in the WIA Centenary Weekend through ARRL International Affairs Vice President Jay Bellows, K0QB. Owen also said that the WIA was "passing the baton on to the ARRL, as the ARRL would be celebrating its centenary in four years."

Kay congratulated the WIA on their 100 years of service to Amateur Radio in Australia, wishing them well as they begin their second century. She noted that strong national societies around the world, working together through the International Amateur Radio Union (IARU), are essential for the future well-being of Amateur Radio. VK3KI expressed the WIA's appreciation for the ARRL's contribution to Amateur Radio, especially the League's service as the International Secretariat of the IARU.

"Through their extensive program of centennial observances including the VK100WIA operation the WIA has set the bar very high for the ARRL's own 100th anniversary activities in 2014," N3KN said after the QSO.
"I am honoured to have been invited to be the last station to work VK100WIA on behalf of the ARRL and our members."

Please think of the environment before printing this email

==========
WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

==> + FCC NEWS: US ATTORNEY'S OFFICE CHARGES GLENN BAXTER, K1MAN, WITH
FAILURE TO PAY FINE

On October 25, two US Attorneys filed a Complaint
<http://www.arrl.org/attachments/view/News/55250> in the US District
Court for Maine <http://www.med.uscourts.gov/> against Glenn Baxter,
K1MAN, of Belgrade Lakes, Maine. The Complaint alleged Baxter had not
responded appropriately to an order that he pay a $21,000 fine for
violating several sections of Part 97. The civil action was brought
under Section 503(b) of the Communications Act of 1934, as amended
```

<http://www.fcc.gov/Reports/1934new.pdf>, and Section 1.80
<http://www.arrl.org/intranet/Application%20Data/Microsoft/Word/the%20US%20District%20Court%20for%20Maine>
of the FCC Rules and Regulations.

According to the Complaint, the fine was levied in 2005 "for [the] defendant's willful and repeated violations of Sections 97.101(d) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.101.pdf> [commencing transmissions on top of existing communications on 3.890 MHz] and 97.113(a)(3) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.113.pdf> [transmitting communications in which the station licensee or control operator has a pecuniary interest] of the Commission's Rules, and for the defendant's willful violation of Section 97.105(a) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.105.pdf> [exercising control over station] and 97.113(b) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.113.pdf> [broadcasting] of the Rules and for failure to file requested information pursuant to an Enforcement Bureau directive."

The Complaint seeks to force payment of the $21,000 fine, as well as a filing fee and "such other and further relief as the Court deems just and proper."

==> + FCC NEWS: ARRL RESPONDS IN 2304 MHZ BAND INTERFERENCE DEBATE

On October 28, the ARRL filed a Reply to a Wireless Services Opposition filing, the latest in an ongoing series of exchanges regarding the FCC's proposal to allow mobile broadband services, in addition to fixed services, to operate in parts of the 2.3 GHz band. The Amateur Radio Service has a secondary allocation at 2300-2310 MHz. Read more here <http://www.arrl.org/news/arrl-replies-to-wireless-services-filing-in-2304-mhz-band-interference-debate>.

==> PUBLIC SERVICE: STORM SPOTTERS ON THE LOOKOUT FOR TROPICAL STORM TOMAS

With Tropical Storm Tomas expected to move through the Caribbean over on Thursday and Friday, WX4NHC <http://www.wx4nhc.org/> -- the Amateur Radio Station at the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) -- will activate at 9 AM (EDT) on Saturday, November 6. Hurricane Warnings have been issued for Haiti, Guantanamo, Cuba, the Southeastern Bahamas and the Turks and Caicos Islands. Tropical Storm Warnings have also been issued Jamaica and the Cuban provinces of Santiago de Cuba and Holguin. Read more here <http://www.arrl.org/news/storm-spotters-on-the-lookout-for-tropical-storm-tomas>.

==> PUBLIC SERVICE: THAI HAMS PROVIDE PIVOTAL ROLE DURING MONSOON

Heavy monsoon rains in Thailand have devastated parts of that country, with almost 60 dead and 100,000 homes in 32 provinces damaged or gone. According to the Radio Amateur Society of Thailand (RAST) --

that country's IARU Member-Society -- amateurs in the Nakhon Ratchasima and Chaiyaphum provinces have been helping authorities coordinate the rescue and relief efforts. Nakhon Ratchsima is Thailand's biggest province, with a population of 2.7 million in 32 districts with 3700 villages.

Under the guidance of National Disaster Warning Center Advisor Manas Songsaeng, HS1DE, the Nakhon Ratchasima Amateur Radio Association's (NRARA) club station HS3AN has been coordinating relief work with the help of other Amateur Radio communications centers based in Khao Yai, Phimai and Chaiyaphum that were also providing information to people traveling to and from Nakhon Ratchasima. Located at the provincial hall, the club has been working closely with government agencies, relaying details about the emergency situation to officials and relief workers. Read more here <http://www.arrl.org/news/thai-hams-provide-communication-support-during-monsoon>.

==> PUBLIC SERVICE: HAMS HELP PROVIDE COMMUNICATION SUPPORT FOR DUAL DISASTERS IN INDONESIA

Following two natural disasters, an earthquake triggered tsunami, and separately an erupting volcano, radio amateurs are providing their help as the enormous response effort continues. ORARI (Organisasi Amatir Radio Indonesia) International Affairs Coordinator Wisnu Widjaja, YB0AZ, provided initial information about the involvement of ham radio operators in the dual disasters -- a 7.7 earthquake and an exploding volcano -- that hit the Indonesian archipelago last week. Read more here <http://www.arrl.org/news/communication-support-for-dual-disasters-in-indonesia>.

==> + ARRL FIELD DAY: 2010 RESULTS ARE NOW ONLINE

If you can't wait to get your December issue of QST <http://www.arrl.org/qst> in the mail to see how you did in the 2010 ARRL Field Day, don't worry! The results -- including a copy of the QST article <http://www.arrl.org/files/file/ContestResults/2010/201020Day20QST.pdf> (with line scores) and a results database <http://www.arrl.org/results-database?event_id=13655> -- are now available on the ARRL Web site. Be sure to also check out the 193 comments in the Field Day Soapbox <http://www.arrl.org/contests/soapbox>. It's not too soon to start making plans for next year -- the 2011 ARRL Field Day is scheduled for June 25-26, 2011.

==> + THE DECEMBER ISSUE OF QST IS ON ITS WAY TO YOU!

The December issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including an expanded holiday advertising

guide and the 2010 ARRL Field Day results -- the upcoming issue of QST has something for just about everyone.

If you put 100 hams in a room, you would have at least 100 ways to put up a stealth antenna. As Geoff Haines, N1GY, discovered, neighborhoods that might be averse to a stacked array of 6-element 20 meter Yagis usually don't have a problem with flagpoles. In his article "Constructing a Flagpole Antenna," Haines tells readers that due to restrictions in his neighborhood, he built a flagpole antenna. With this and 100 W, he is able to work most of the stations he hears on 80-10 meters.

If you are a new ham -- or you have one in your life -- a good handheld transceiver is usually the first go-to radio. But with so many out there on the market -- and all of them with tons of features -- how can a new ham -- or even an experienced one -- choose the best one for their purposes? Never fear! ARRL Technical Editor Joel Hallas, W1ZR, comes to the rescue with "Selecting Your First VHF Handheld Transceiver." Hallas takes into account single band vs multi-band modes, access codes, keypads, memory management, connectivity options and more. He reminds hams that any handheld transceiiver you select will provide all the basic communication needs, as well as features you want now and some that you may need in the future.

<http://www.arrl.org/multimedia> NCJ Managing Editor Rick Lindquist, WW3DE, takes a look at the Yaesu FTdx5000D HF and 6 meter transceiver in this month's Product Review. He calls it "an extraordinary transceiver for the discerning contester or DXer. This one will become the gold standard for operators seeking the best receive performance and best value in its class. Yaesu is to be commended for combining top tier receiver performance and a Class A transmitter with the features and functions users expect, all in a competitively priced package."

Many hams spend all year gearing up for ARRL Field Day, the most popular on-the-air operating event in all of Amateur Radio. For those hard-core Field Day aficionados, the December issue of QST is one of the most anticipated issues all year -- this is the issue with the Field Day results! This year, ARRL Field Day Manager Dan Henderson, N1ND, channels his inner-Jimmy Buffett to bring readers the annual Field Day results article. You will also find official announcements for upcoming contests and operating events: the ARRL January VHF Sweepstakes, the ARRL International DX Contest (both SSB and CW), the ARRL Rookie Roundup (CW), Kids Day, the ARRL RTTY Roundup and the ARRL Straight Key Night. The results from the 2010 ARRL June VHF QSO Party are also in the December issue.

Of course, there are the usual columns you know and expect in the December QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your December issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the

ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + INTERNATIONAL SPOTLIGHT: ARRL PRESIDENT MAKES FINAL QSO WITH AUSTRALIA'S WIA CENTENARY STATION

The Wireless Institute of Australia (WIA) marked the conclusion of their VK100WIA centennial special event operation on October 31 with a QSO between WIA President Michael Owen, VK3KI, and ARRL President Kay Craigie, N3KN. Logged at 1255 UTC -- five minutes before midnight in Australia -- the QSO between N3KN and VK100WIA, with VK3KI at the microphone, was the last contact recorded in the Australian special event's log.

The contact was made using EchoLink, with VK100WIA using the VK3ANT node in Melbourne, Victoria. Craigie used the K4IJ 440 MHz repeater in Roanoke, Virginia to access the EchoLink node of the linked North Carolina Hospital Emergency Amateur Radio System repeaters (NCHEARS); the NCHEARS system was also linked to the South Carolina Healthcare Emergency Amateur Radio Team repeaters. Repeater users across three states were able to hear the historic conversation between two continents. Read more here <http://www.arrl.org/news/the-2010-global-amateur-radio-emergency-communications-conference>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of October -- includes seeking protection of amateur frequencies with the FCC; representing the ARRL at the local, regional, national and international level; encouraging hams to build their own equipment; administering ARRL awards programs, and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-27>.

==> + MARS: US AIR FORCE MARS GETS NEW LEADERSHIP

Richard Jenson -- a Program Manager at the Air Force Network Integration Center at Scott Air Force Base, Illinois -- has been selected as the new Chief of Air Force MARS (USAF MARS). Jensen replaces Technical Sergeant Jason E. Sandifer, who served as Interim Chief since May when USAF MARS Chief Allen Eiermann, K3LSR, retired. "I am honored to have been selected to lead this organization of dedicated volunteer radio communicators and am enthusiastic about my new responsibilities," Jenson said. "The members of Air Force MARS can be rightly proud of their service to the nation, and I am eager to work with all of them as we enhance our ability to serve those who serve us." Read more here <http://www.arrl.org/news/air-force-mars-gets-new-leadership>.

==> SOLAR UPDATE

Tad "They watched the hazy Sun sinking in the sea <http://www.youtube.com/watch?v=ccTMG1onW5c>" Cook, K7RA, reports: The average daily sunspot numbers declined again this week, this time by nearly 25 points to 25.7, about half what it was last week. Look for good conditions this weekend in the ARRL CW Sweepstakes. The predicted planetary A index for November 4-7 is 7, 5, 8 and 8, and then 5 for the foreseeable future on November 8 and beyond. Predicted solar flux is 82 for each of the next 10 days. The latest three-month moving average of daily sunspot numbers shows a steady rise, with the trailing three-month average at the end of June through October at 16.2, 20.4, 23.2, 28.9 and 33. The average daily sunspot number for the month of October was 35, slightly higher than the trailing three-month average, which is a good sign. Look for more information on the ARRL Web site on Friday, November 5. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Eagles' The Last Resort <http://www.youtube.com/watch?v=ccTMG1onW5c>.

==> + ARRL RECOGNIZES: DAVID W. CRIPE, NM0S, WINS OCTOBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for October is David W. Cripe, NM0S, for his article "Homebrew Challenge II Co-Winner -- The Lowest Cost Entry." Congratulations David! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the November issue today.

==> THIS WEEK ON THE RADIO

This week:

- November 5 -- QRP Fox Hunt
- November 6-7 -- Ukrainian DX Contest
- November 6-8 -- ARRL CW Sweepstakes <http://www.arrl.org/sweepstakes>
- November 7 -- High Speed Club CW Contest
- November 10 -- QRP Fox Hunt
- November 10-11 -- CWops Mini-CWT Test

Next week:

- November 13-14 -- Kentucky QSO Party; WAE DX Contest (RTTY); OK/OM DX Contest (CW)
- November 13-15 -- CQ-WE Contest
- November 14 -- SKCC Weekend Sprint
- November 17 -- QRP Fox Hunt

Amateur Radio Newsline(tm) Report 1734 - November 5 2010

NOTE: This weeks newscast runs 33 minutes 18 seconds and includes three breaks.

**

Amateur Radio Newsline report number 1734 with a release date of Friday, November 5th 2010 to follow in 5-4-3-2-1. The following is a Q-S-T. The International Space Station celebrates 10 years of manned operation and ham radio was there fore most of it. Also, GlobalSET 2010 takes place on November 13th, the Department of Justice acts to collect a $21,000 fine issued against a Maine radio amateur and an Ohio radio club receives a major grant to buy new gear. Find out the details on Amateur Radio Newsline(tm) report number 1734 coming your way right now. (Billboard Cart Here)

RADIO IN SPACE: THE ISS CELEBRATES ITS 10TH ANNIVERSARY

The International Space Station marked a major milestone on Tuesday, November 2nd. This, as it celebrated the 10-year anniversary of human beings living aboard the orbital outpost. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

The story of the International Space Stations manned operations began on November 2, 2000. That's when an American astronaut and a Russian cosmonaut floated side by side into the station that sits in orbit at about than 300 km above Earth's surface.

The station's first crew was made up of Russians Yuri Gidzenko, Sergei Krikalev and American commander Bill Shepherd. In the intervening decade close to 200 people, many of them licensed radio amateurs have spent time on board the ISS and operated the ARISS ham station.

The Current Expedition 25 crew is made up of Commander Doug Wheelock, KF5BOC along with NASA astronauts Scott Kelly and Shannon Walker, KD5DXB. Also on-orbit with them are Russian cosmonauts Fyodor Yurchikhin, RN3FI, Alexander Kaleri, U8MIR and Oleg Skripochka, RN3FU. The I-S-S has also been a hotel on-orbit for several visiting space tourists including Richard Garriott, W5KWQ. He is the son of Astronaut Owen Garriott, W5LFL, who was the first ham radio operator to take to the airwaves back in 1982 from the space shuttle Columbia.

NASA Administrator Charles Bolden was to have begun the event, speaking live to the I-S-S crew at 9:15 a.m. EDT from the Kennedy Space Center in Florida. His remarks and the following news conference were broadcast live on NASA Television.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting from the Newsroom in the City of Angels.

--

In addition to the crew news conference, NASA is updating the content of the International Space Station section of its website in recognition of the 10th anniversary. The update supports the on-going transition from station assembly to utilization. It now will focus on the research in the unique microgravity environment of low- Earth orbit as found on-board the I-S-S.

(ARNewsline Archive, NASA News and various other sources)

**

HAM RADIO IN SPACE: SECOND HAM STATION FOR THE ISS

A second ham radio station will soon be on the air from on board the International Space Station. This, after NASA approves use of the original VHF and UHF Ericsson handheld radios from the Russian module for use in the US segment of the orbital outpost.

A new power cable for the Ericsson radios is being delivered to the I-S-S. The second station is planned to initially use the same frequencies currently used by the Kenwood D-700 amateur radio transceiver. Studies are underway to determine a compatible operating plan which would allow both stations to operate simultaneously.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (ARISS)

**

RESCUE RADIO: GLOBALSET ON NOVEMBER 13th

The second Global Simulated Emergency Test of 2010 or is slated for Saturday, November 13th from 1100 to 1500 hours local time in the geographic region of the stations taking part. Also known by the acronym GlobalSET, the operation will take place on and near the established world-wide Centre-of-Activity emergency frequencies on the 80, 40, 20, 17 and 15 meter bands.

The objectives of GlobalSET are to increase the common interest in emergency communications, to test how usable the emergency Centre-of-Activity frequencies are across the three I-T-U regions and practice the relaying of messages using all modes. The exercise will also be used to try to create practices for international emergency communication.

IARU member radio societies and emergency communications group stations intending to participate are requested to register their intention through their IARU Regional or National Emergency Communications Coordinators. (IARU)

**

RADIO POLITICS RAC AND IC MEET TO DISCUSS CANADIAN HAM RADIO

The 35th meeting of the Canadian Amateur Radio Advisory Board took place on Thursday October 28th. CARAB as its sometimes known, is composed of representatives from both Radio Amateurs of Canada and Industry Canada. The latter is the regulator of amateur radio in that nation. Amateur Radio Newsline's Norm Seeley, KI7UP, tells us what occurred:
--

Among key issues discussed at the meeting was Industry Canada's policy regarding temporary authorization of frequency assignments in amateur bands to non-amateur services such as last September's Pro Tour race in Quebec. Radio Amateurs of Canada did all it could to impressed upon the Industry Canada officials that Canadian amateurs, objected to intrusion into amateur bands by non-amateur services, especially for non-emergency purposes. For its part, Industry Canada noted the objection. It also committed to improve coordination and cooperation and advised that they were sensitive to Radio Amateurs of Canada's concerns

Industry Canada committed to continue to work with Radio Amateurs of Canada on the national societies request for an allocation in the 60 Meter band which mirror those frequencies available to United States amateurs. Radio Amateurs of Canada emphasized the importance of this request as seen by Canadian amateurs.

Industry Canada and Radio Amateurs of Canada also discussed the positive role that amateur radio played in emergency situations. Industry Canada noted that there would be value in more cooperation and planning between it and Radio Amateurs of Canada in this area. Follow-up meetings between the two will be arranged over the coming month's.

Lastly, the value of the Canadian Amateur Radio Advisory Board as a consultative body between Radio Amateurs of Canada and Industry Canada was reaffirmed by both parties and the Terms of Reference between the two were updated.

Watching this story from south of the U-S and Canadian border, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

The next meeting of Canadian Amateur Radio Advisory Board is anticipated for April, of 2011 and to be held concurrent with the Radio Amateurs of Canada Board of Directors meeting. (RAC)

RESCUE RADIO: OHIO CLUB RECEIVES GRANT FOR NEW GEAR

The Lancaster and Fairfield County Amateur Radio Club of Lancaster, Ohio, has received a $5,219.86 grant from the George and Dollie L. Zimpfer Memorial Fund. The grant, administered through the Fairfield County Foundation, permitted the club to purchase emergency radio gear and associated equipment that can be used at all special community events, local emergencies, natural disasters and during other times used for membership training and simulated emergency drills. The equipment will also be used to supplement emergency responders and provide education and training to volunteers who will assist those responders. The Lancaster and Fairfield County Amateur Radio Club is a public service group and has operated the K8QIK repeater on 147.030 MHz since 1976. (Eagle-Gazette.com)

ENFORCEMENT: US ATTORNEYS OFFICE GOES TO COURT TO COLLECT $21000 FINE ISSUED AGAINST K1MAN

It has taken almost five years, but the United States Department of Justice has gone to court to collect a $21,000 fine issued back in March of 2006 by the FCC to Glenn, Baxter, K1MAN, of Belgrade Lakes, Maine. This, as two US Attorneys file a Complaint in the US District Court in Maine against Baxter for not responding appropriately to an order that he pay the fine that was issued for his alleged violating of several sections of the Part 97 rules. Amateur Radio Newsline's Burt Hicks, has the details:

--

The Complaint was filed on October 25 in the US District Court in Maine by United States Attorney Thomas E. Delehanty and Assistant U.S. Attorney Evan Roth and. It seeks to force Glenn A. Baxter, K1MAN, to pay the $21,000 fine along with a $350 court filing fee and other relief as the Court deems just and proper.

According to the court document, the fine had originally been levied based on what the FCC had deemed as the defendant's willful and repeated violations of Sections 97.101(d) and 97.113(a)(3) of the Commission's Rules. In this case the violation of Section 97.101(d) dealt with Baxters alleged commencing transmissions on top of existing communications on 3 point 890 MHz while 97.113(a)(3) involved what the FCC claimed to be transmitting communications in which the station licensee or control operator has a pecuniary interest.

Baxter had also been cited for willful violation of Section 97.105(a) which deals with exercising proper control over his amateur station and Section 97.113(b) which is a prohibition against broadcasting in the Amateur Service bands. Lastly the complaint notes Baxter's failure to file requested information pursuant to an FCC Enforcement Bureau directive.

It should be noted that this action to collect the $21000 fine is a completely separate action from any further sanctions that the FCC might take regarding the renewal of Baxter's Amateur Service license and K1MAN call sign. His renewal request had been in legal limbo since his license was set aside by the regulatory agency before its expiration date back in October of 2005. Under the terms of a set aside, an Amateur Service license holder can continue to operate until the matter has been properly adjudicated. Payment of a fine or forfeiture will have no bearing on Baxter's renewal or continued holding of an FCC license.

The action to collect the $21000 fine was brought under Section 503(b) of the Communications Act of 1934, and Section 1.80 of the FCC Rules and Regulations. As noted, the original FCC Forfeiture Order was released March 29, 2006. The deadline for service of process would have been February 22, 2011 so the Department of Justice beat that date by a little over 3 months

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

By now, Baxter has likely been informed he has 20 days from date of service in which to answer the summons. If he fails to respond a default judgment will be entered against him in U.S. District Court after which the government can cease whatever property is required to satisfy the judgment.

Those interested can read the full text of the United States Attorney's complaint at the ARRL website at tinyurl.com/2dk3mq (DOJ, FCC, ARRL)

**

ENFORCEMENT: NO STAFF RADIO STATION HIT WITH $25000 FINE

The FCC has notified Rama Communications, Inc, the licensee of A.M. radio station WRHB in Leesburg, Florida, of a proposed forfeiture in the amount of $25,000. This, for violations of sections 73.1125(a) and 73.3526 of the Commissions rules.

The FCC says that the violations stem from a recent visit where inspectors found that Rama failed to maintain full time management and staff at its main studio. It was also charged with failing to maintain and make available a complete public inspection file.

The station was given the customary 30 days to pay the forfeiture or to file an appeal. (FCC)

**

ENFORCEMENT: INDIE POLICE SHOW UP AGAIN ON UNAUTHORIZED FREQUENCIES

For a second time, Indianapolis police are investigating claims that officers are using radio frequencies assigned to an area school district without the proper permission to do so. Jack Parker, W8ISH, has the details:

--

Apparently some members of the Indianapolis Metropolitan Police Department are teaching a new lesson on how to abuse public airwaves and violate FCC rules. According to a report broadcast on one local Indianapolis TV station, some of Indy's finest are using illegal radios for chit chat on a local school systems bus frequency.

This abuse of police radio power has been recorded by a former police-fire dispatcher. According to John, who is a ham radio operator, the cops not only use the school radio channel but mix foul language with cross talk about cases on which they are working. John claims he has recorded about 72 hours of what sounded like car-to-car conversations, some not fit for broadcast.

This is not the first report of this cop caper. Last year Amateur Radio Newsline investigated reports of I-M-P-D officers illegally using amateur radios and frequencies for talk around. The police chief pulled the plug on all un official in-car-radios and ordered their communications people to develop a legal radio system that officers could use for casual talk. Most officers rejected that offer citing the out of pocket cost and the fact that any established radio channel could be monitored by the police brass.

In the past year, at least one other local Amateur Radio operator has filed complaints with FCC offices in Chicago and Washington citing improper use of radio frequencies by Indianapolis Metro Police Officers.

Following that complaint some officers took the high road by earning their amateur radio license. But, they soon realized they can't talk shop on amateur frequencies. The jury remains out on a solution to this touchy tactical dilemma.

I-M-P-D officials say they again are looking into the issue and will implement policy changes if needed.

Reporting from Indianapolis, for Amateur Radio Newsline, this is Jack Parker W8ISH.

--

This is not the first time that members of the Indianapolis Police Force have been found on radio frequencies where they do not belong. You may remember back to when hams found officers chatting on both the 2 meter and 70 centimeter FM sub-bands back in 2009. (ARNewsline(tm) from published news reports)

**

HAM HONORS: NOMINATIONS FOR LEONARD AWARD SOUGHT BY ARRL

The annual nominations for the Bill Leonard Award for professional media coverage of Amateur Radio are now being accepted by the ARRL. Completed nominations are due in no later than December 10th. If you know of a good media hit in the past year, you can nominate the author, reporter or writer. Forms and information are at www dot arrl dot org slash bill dash Leonard dash award. (ARRL)

**

THE SOCIAL SCENE: HAM FAIR IN LISBON

Portugal's Association of Radioamadores of the Village of Moscavide are organizing this years Exposition Ham Fair in the city of Lisbon. The gathering takes place on November 28th and is being billed as one of the biggest events ever for ham radio in that nation. More information in electronically translated English is available on-line at tinyurl.com/3347bds (Southgate)

**

HAM HAPPENINGS: K7NRA TO SAY HAPPY BIRTHDAY NRA

And back in the U-S-A, keep an ear out on special events station K7NRA. It will be active from 1500 to 2300 UTC on November 17th to celebrate the birthday of the National Rifle Association. Frequencies to keep an ear on include on 7.250, 14.250 and 21.335 MHz. More information including QSL routing is on line at tinyurl.com/2fqfrpn (KC5FM) **

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: VA3QT APPOINTED SPECIAL RAC ADVISOR

Some names in the news. First is Ian Snow, VA3QT, who has been appointed as Special Advisor to the Radio Amateurs of Canada's National Field Organization Executive. Snow, an original member of the National Training Resource Group member, will work closely with National Traffic System Coordinator Hew Lines VA7HU. The two will initially looking at ways for both Canadian ARES and the National Traffic System to remain stay useful to the agencies they serve. This, from both a messaging and use of technology standpoint. (VO1DTM)

**

NAMES IN THE NEWS: EI4HS GRANTED HIS GRANDFATHERS EI4L CALL

And John Kelly, the former EI4HS has recently been issued the callsign EI4L. This was the call which was previously held by his grandfather John Scanlon back in in 1936.

John Scanlon is described as one of the true pioneers of radio in Ireland. He was among the first to experiment with television in the years after World War 2 and was also a very active High Frequency DXer. (IRTS)

**

NAMES IN THE NEWS: DK3WN STREAMING HAMSAT AUDIO

And Mike Ruppercht, DK3WN, is spearheading a project that broadcasts audio streams received by amateur radio satellite operators around the world. Links to the audio streams can be found on-line at tinyurl.com/satsound (Southgate)

**

EMERGING HAM TECHNOLOGY: VOACAP ADOPTS GOOGLE MAPS

In the world of emerging ham radio technology, OH6BG has announced that the online H-F propagation prediction service VOACAP is now using Google Maps for coordinate entry. OH6BG says that this should make the service even more accessible, especially for a casual user.

With this new interface, the transmitter and receiver coordinates are now defined by dragging two location markers on the map. The mouse wheel or keyboard keys can be used for zooming in and out so placing the markers at the exact points as accurately as is possible. This makes the predictions as accurate as today's science allows. You can find the site at online dot voacap dot com. (OH6BG)

**
HAM RADIO IN SPACE: ARISSAT-1 PASSES SAFETY TEST

The NASA safety review for ARISSat-1 has been completed with the written safety presentation and the written report approved with only simple modifications required. According to the ARISSat- 1 team, it expects to finalize shipping arrangements for the satellite structure to Russia in the coming weeks.

The Russian Energia Space Agency is handling the customs certifications to ship the satellite overseas. When ARISSat1 is shipped Lou McFadin, W5DID, and Mark Steiner, K3MS, will travel to Russia to assist with testing before the satellite is forwarded to the launch site.

ARISSat-1 is scheduled to be sent to the ISS aboard a Russian Progress vehicle in January 2011 and deployed during a space walk in in February. (ARISS)

**

HAM RADIO IN SPACE: LIGHTSAIL BACKUP SPACECRAFT TO BE BUILT

A second Lightsail spacecraft is going to be constructed. Jim Davis, W2JKD, has the details:

--

Louis Friedman, who is the director for LightSail-1 program, has announced that a back- up craft to LightSail-1 will be built. This, instead of making an investment in insurance for an estimated cost of $200,000.

As previously announced in July by AMSAT, LightSail-1 is a three Cubesat spacecraft planned to be launched in early 2011. It will use UHF frequencies for tracking and command control stations.

Georgia Tech University is leading the mission operations with Dave Spencer serving as mission manager. California Polytechnic University is supplying the Cubesat bus, avionics and launch vehicle interface. Stellar Exploration, Inc. is actually building LightSail-1.

I'm Jim Davis, W2JKD.

--

No date has been announced for the completion of Lightsail2. (ANS, W9GB)

**

HAM RADIO NEAR SPACE: SARSEM-ICARUS II TO LAUNCH NOVEMBER 20

The Amateur Radio Club of the state of Guanajuato in Mexico will launch its second high altitude ham radio research balloon on November 20th. Called SARSEM-ICARUS II, the nearspace balloon will carry a cross-band UHF - VHF repeater system, an APRS tracking system, temperature, voltage sensors, a flight computer, and a secondary backup system including other GPS and control system. It will also carry a photo camera and a video camera transmitting video downlinking at 900 MHz. More information is on line at craeg.remtronic.com. (AR Mexico)

**

CONTEST CORNER: THE 2010 ARRL 10 METER CONTEST

The 2010 ARRL 10 Meter Contest will be held from Friday December 10th at 0000 U-T-C through Sunday evening December 12th at 2359 U-T-C. Except at the peak of the sunspot cycle, 10 meters is generally a daytime band

for DX so you likely lose any sleep with this contest this year. More information is on-line at www dot arrl dot org slash 10 dash meter. (N9LB)

**

DX

DL4VM will be active as portable Oh-Z from Fyn Island between May 28th and June 18th, 2011. His operation will be on 30, 15 and 6 meters, using CW and PSK. QSL via his home callsign either direct or via the bureau.

ZL2KBR will be active as 5W0BR from Upolu Island through November 13th. His operation will be on all HF bands using SSB and PSK31. He plans to use a FT857D at 100 watts into a dipole or vertical antenna. QSL via his home callsign.

K2TQC, N2MF, W1NG and K2NV are on the air portable PJ2 from Curacao through November 11th. Activity is on the lower bands. QSL via their home callsigns.

And listen out for F4BXW as TR8GV from Libreville, Gabon through November 23rd. His activity will be on the HF bands using SSB. QSL via his home callsign.

VE3EY, will be active from St.Barthelemy Island as TO3A from November 2nd to the 30th. Operations will be on 160 through 10 meters using CW, SSB and RTTY. QSL via VE3EY.

Lastly, K8PT will be active as C6APT from Treasure Cay in the Bahamas between November 27th and December 10th. His operation will be on 40 through 10 meters concentrating on the 30, 17and 12 meter bands. Modes to be used will bee CW and RTTY. QSL via K8PT.

(Above from various DX news sources)

**

THAT FINAL ITEM: VK1WIA ENDS CENTENNIAL WITH SPECIAL CONTACT

And finally this week, the Wireless Institute of Australia marked the conclusion of its VK100WIA centennial special event operation on October 31st. This with a special commemorative contact between W-I-A President Michael Owen, VK3KI, and ARRL President Kay Craigie, N3KN. Take a listen:

--

Actual QSO audio here. Hear it by downloading this weeks audio version of the newscast titled news.mp3 at www.arnewsline.org

--

During the contact VK3KI told N3KN that the Wireless Institute of Australia was pleased that the special event station's final contact could be with her, and thanked the ARRL for its support and for participating in the W-I-A Centenary Weekend through ARRL International Affairs Vice President Jay Bellows, K0QB. President Owen also said that the WIA was passing the baton on to the ARRL, as the League would be celebrates its centenary in four years.

During the centenary event, more than 50 Wireless Institute of Australia affiliated clubs have used the VK100WIA call sign for almost six months as part of WIA's centennial celebration. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again that's arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Fred Vobbe, W8HDU saying 73 from Lima, Ohio, and we thank you for listening.

The news headlines

Ofcom to automatically renew Short Contest Callsigns

RSGB Museum Surplus Equipment

4th Bath Buildathon announced

At the Ofcom and RSGB Forum on 19 October it was agreed that, exceptionally, holders of individual Short Contest Call signs would not be required to re-apply and go though the assessment process at the end of this year. The assessment at the end of the year would also not be applied to clubs holding SCCs. Instead Ofcom will automatically renew all SCCs for a further 3 years. Any individuals or clubs holding SCCs that they will not want to renew should inform the Amateur and Maritime Team at Ofcom as soon as possible. All are reminded that the assessment criteria remains, and that individuals or clubs that envisage requiring SCCs after 2014 should appraise themselves of, and work toward, meeting the criteria. Ofcom has a detailed explanation of the criteria for Short Contest Call signs on their website.

The first RSGB Museum Surplus Sale closed last Sunday and the initial items all sold. Several hundred people registered as watchers of the items and eight lucky people walked away with bargains including an IC-720 and a Hallicrafters Skyrider SX23. Proceeds of all the sales will be going towards the costs of the National Radio Centre at Bletchley Park. This week over 20 items have been put up for sale and the auction ends this evening, 7th November. Several hundred people are watching these items too. In the first few days it was obvious that the Microwave Modules linear amplifier and the Eddystone 960 are on the most-wanted list. For details of the surplus equipment check out the RSGB website at www.rsgb.org/auction.

The date of the 4th Bath Buildathon has been confirmed as Saturday 8 January 2011. For those that are not familiar with the concept, the basic idea is for a group of radio enthusiasts to lock themselves in a room for a day and build a radio project under the watchful eye of a few experienced mentors. These events are ideal for Intermediate students or licensed amateurs who has never raised solder smoke in anger before. This year the event will cost ?55 to include a 20m SSB superhet receiver kit, room hire, tea, coffee, etc. The Bath Buildathon Crew will be providing all tools and test equipment required and no previous

experience is needed, just a bucket load of enthusiasm! Booking forms for the Buildathon are available on request from g0fuw@tiscali.co.uk or by post. Steve is QTHR in the Yearbook and on QRZ.com.

On 1 October, at the National Hamfest in Newark, a new Amateur Radio Society was launched for lifeboat enthusiasts. Called the Lifeboat Amateur Radio Society, membership is open to everyone for a flat membership fee of just ?10 per year for those aged 16 and above; under-16s are free. Clubs may affiliate themselves with the society for only ?40 per year. The club's website is at

www.lifeboat-amateur-radio.org.uk. The next SOS Day will take place on 28 January 2011 and the Lifeboat Amateur Radio Society will, once again, be organising SOS Radio Week to coincide with it. Taking part is easy, you simply register on the event website at www.sosradioweek.org.uk.

A short wave station on the African continent is refusing to leave the amateur-only portion of 40 metres even after notification from the government. Radio Uganda continues to operate on the amateur radio frequency of 7.195MHz. Uganda radio amateurs have been authorised by Uganda Communications Commission to use the band 7.1 to 7.2MHz.

Many UK amateurs who operate on 501 - 504kHz have reported over the past month reception of an wideband signal between 498 and 502kHz. The RSGB is investigating the matter, but it is possible that it is an early trial of a so called e-Navigation MFSK system that the maritime service is proposing for this part of the spectrum at WRC-12 preparation meetings.

Lubomir, OK2BVG has been given permission to operate between 501-504kHz with maximum power of 20W ERP. This permission is valid until the 1 September 2011. Lubomir would like to thank the executive staff of the Czech Telecommunications Office and OK1HH of the Czech Radio Club for their assistance. This means that 11 countries in Region 1 are now known to be authorised in this part of the 500kHz band and more information can be found on the IARU Region 1 website.

Whitton Amateur Radio Group is planning a six week Intermediate course starting 10 November and a Foundation course early in the New Year. Whitton Amateur Radio Group can be contacted on 0870 760 5082 or by e-mail to g0ofn@msn.com.

And now for the details of rallies and events for the coming week.

Today, 7 November, the Kempton Rally is taking place at Kempton Park racecourse, Staines Road East, Sunbury on Thames, Middlesex TW16 5AQ. There will be a talk-in station on 145.550MHz using the callsign GB2KRT. Doors open at 10am and there will be trade stands, lectures and an RSGB bookstand. Coulsdon Amateur Transmitting Society will be running a Bring and Buy stand. Details from Paul, M0CJX, on 0845 165 0351.

Also today, 7 November, the Foyle & District ARC Annual Rally is being held at the Best Western White Horse Hotel, 68 Clooney Road, Derry BT47

3PA. Doors open at 12 noon and there will be trade stands, special interest groups and RSGB representation.

On Saturday 13 November, the Rochdale & District RS Traditional Radio Rally will take place at St Vincent's Church Hall, Caldershaw Road, Rochdale OL12 7QL. Note that this is a Saturday rally. Doors open at 10.30am and admission is ?2.50 with concessions for under 12s and seniors. There will be a Bring & Buy. More details from Dave, G0PUD, on 07710 243 107.

Now for the news of special events

>From 9 November GB2AD will be on the air from Lurgan in County Armagh for Armisitice Day.

Coventry Amateur Radio Society will be operating GB70CBC for the Coventry Blitz Commemoration from Coventry Cathedral during November. Operation will be on an 'as available basis' on 2m and the HF bands between 80 and 10m. Further information from G8GMU on 0247636 4235 or by e-mail to info@andrewphotgraphic.co.uk.

And now the HF DX news compiled from 425 DX News and other sources

DL5MFL, DL4MAQ and DF9MV are planning to be active from Senegal from 8 to 18 November. The group will be guests of 6W7RV at the Le Calao resort and will operate dedicated holiday style. A 6V7 callsign has been requested. QSL via DE0MST.

The low band operation at 5R8X in Madagascar is now under way. 160, 80, 40 and 30m will be activated during the dark hours every night. Activity will run for 8 days, until 9 November. They plan to use 1822.5, 3505.5, 3525, 7005.5 and 7025 and 10105.5kHz, almost exclusively CW.

Ulli, DL2AH is on Tristan da Cunha, IOTA reference AF-029, and will operate as ZD9AH until 6 December. This is not a DXpedition and he plans to operate mainly SSB on 40, 20, 17, 12 and 10 metres with some RTTY activity during the last two weeks of November. QSL via DL2AH, direct or via the bureau.

Sigi, DL7DF, will lead 9U0A operations from Burundi until 11 November. One station will be full time on digital modes. QSL to DL7DF direct or to the German DARC Bureau.

HA5UK and HA5AO will be on Efata Island, OC-035, Vanuatu, until 15 November, signing YJ0HA, all bands and modes, including SSTV. QSL via HA5UK direct and LoTW.

Now the contest news

The first event this week is the 432MHz UK Activity Contest on 9 November from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The SSB leg of the 80m Club Sprints on Thursday 11th. The event takes place between 2000 and 2130UTC and the exchange is serial number and name.

On Saturday 13 November, between 2000 and 2300UTC, we have the annual Club Calls Contest on 160m. This event often sees clubs making a special effort to get new operators to take part under supervision. Exchange a report, a serial number and, if you are a member of an RSGB affiliated society, the full official name of your club and the word `member'. For those using a club's own callsign, say `club station' instead of `member'. Some clubs have very long names, so there's a list on the Contest Committee website at www.rsgbcc.org/hf/clubcalls.xls of over 100 approved abbreviations for club names to be given in submitted logs. You still need to give the full name during each QSO. Something important for the contest managers of clubs to do is ensure that all the members who partake give exactly the same club name. This can done by giving everyone a cue card to place in a prominent place on their station while the contest is running. A log-keeping tip for participants is to key in `M' for Member, `CS' for Club Station and `NC' for No Club while QSOs are taking place, and expand the abbreviations to the full words afterwards.

16 November sees the UHF UK Activity Contest from 2000 to 2230UTC. Using the 1.3 and 2.3GHz bands the exchange is signal report, serial number and locator.

The RTTY leg of the Worked All Europe DX Contest takes place over the weekend 13 and 14 November from 0000 to 2359UTC. Unlike the CW leg held in August and SSB leg held in September, in the RTTY leg everybody works everybody. Single op stations are limited to 36 hours out of 48. The exchange is signal report and serial number.

And now the solar factual data for the period from the 25th to the 31st of October, compiled by Neil Clarke, G0CAS on the 1st of November.

The solar disc had sunspots visible every day. Solar activity increased to low on four days when in total six C class solar flares occurred. The largest was a C5 which took place early on the 31st. Several coronal mass ejections also took place but had very little effect. Solar flux levels varied little day to day and averaged 85 units. The 90 day solar flux average on the 31st remained at 81 units for another week. X-ray flux levels also varied little and averaged A9.9 units. Geomagnetic activity was quiet every day. The average was Ap 4 units. The most disturbed day was the 26th with an Ap of 8. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 670 kilometres per second on the 26th to 330 by the 320 by the 31st. Particle densities were very low with only 2 particles per cubic centimetre except for the 31st when around midday there was a brief increase to 10 particles per cubic centimetre. Bz never varied more than minus 5 and plus 8 nanoTeslas during the period.

And now the solar forecast. Later this week the more active side of the Sun is expected to rotate into view. Solar activity could increase after

midweek. Solar flux levels should increase and by next weekend be in the mid 80's, or even higher. Geomagnetic activity is expected to be quiet every day. MUFs during daylight hours at equal latitudes should be around 26MHz for the south and 23MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to the Middle East should have a maximum usable frequency of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 0900 and 1400 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

Do you know anyone who wants to take the Foundation Course? Nunsfield House Amateur Radio Group is enrolling now for new courses in Derby. If you know anyone who is interested in taking any of the courses or exams, please direct them to www.frankcom.plus.com/nun_courses.html.

On Sunday 7 November South Birmingham Radio Society is attending the Martlesham Microwave Round Table. Contact Don, on 0121 458 1603.

On Monday 8 November Gloucester Amateur Radio & Electronics Society is having a DF Hunt. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 8 November Leicester Radio Society is having a bring and share BBQ. Contact Alex, G8FCQ, on 0753 120 1640.

On Monday 8 November South Birmingham Radio Society is having an equipment dismantling evening for the next rally. Contact Don, on 0121 458 1603.

On Monday 8 November Stratford Upon Avon District Radio Society is holding a surplus equipment sale, hosted by G8HJS. Contact G0CHO, on 01608 664488.

On Monday 8 November Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 9 November Loughborough & District Amateur Radio Club is having a talk on the RSGB by RSGB Deputy Regional Manager John Rogers, M0JAV. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 9 November Mid-Warwickshire Amateur Radio Society is having a video or DVD evening. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 9 November Wythall Radio Club is having a committee meeting. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 10 November Bolsover Amateur Radio Society is having a talk on IOTA by Keith, G0THF. Bolsover Town Social Club 8pm. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 10 November Lincoln Short-Wave Club is watching the DVD of Grantham Amateur Radio Club's DXpedition to Denmark. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 10 November Midland Amateur Radio Society is having a ragchew, training classes and a committee meeting. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 10 November Telford & District Amateur Radio Society is examining the club library. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 11 November Brigg & District Amateur Radio Club is having a talk on operating from the Caribbean�by Graham, M0AEP. Details from John, 2E0III, on 01652 632938.

On Thursday 11 November Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Thursday 11 November South Birmingham Radio Society is having Foundation training classes with G8OWL. Contact Don, on 0121 458 1603.

On Friday 12 November Bromsgrove & District Amateur Radio Club invites members to try their radios on the club antenna. Contact Chris, M0BQE on 01905 776 869.

On Friday 12 November Coventry Amateur Radio Society is holding a Great Egg Race. Contact John, G8SEQ, on 07958 777363.

On Friday 12 November South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 13 November Leicester Radio Society is taking part in the Club Calls 160 metre contest. Contact Alex, G8FCQ, on 0753 120 1640.

On Saturday 13 November Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 13 November Wythall Radio Club continues its Advanced Course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

NEWS FOR THE NORTH OF ENGLAND

On Monday 8 November Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 8 November Bolton Wireless Club is having a talk on HF digimode operation, including the new APSK mode, by Chris, G4HYG et al. For details, send an email to boltonwireless@gmail.com.

On Monday 8 November Macclesfield & District Radio Society is having an introduction to VHF contesting. More information from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 8 November Scarborough Amateur Radio Society is watching the Red Arrows 1983 American tour Classic Manoeuvres DVD. More information from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 8 November Sheffield Amateur Radio Club is having a demo of the dip and loading tuning technique. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 8 November Workington and Distrct Radio and IT Group has its monthly meeting and is in the air. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

Good morning,

Please review the following regarding Hurricane Tomas from the
IARU. The next 48 hours will be an important time for our friends
in the South Atlantic as this storm strengthens. You are encouraged
to monitor 14.325, 7.268, 3.950 during this period, in the event
that you might lend relay assistance to WX4NHC at the National
Hurricane Center.

As the storm track becomes more evident, I will provide further updates.

SARL NEWS - SUNDAY 7 NOVEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

OCTOBER RAE RESULTS RELEASED

SCORE A 2011 ARRL HANDBOOK IN THE FIELD DAY CONTEST

2011 CONSTRUCTION COMPETITION WITH GREAT PRIZES

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

OCTOBER RAE RESULTS RELEASED

"I have a concern that the examination is by some candidates not taken seriously, that there is not sufficient effort being put into learning the material", RAE Manager, Mark Zank, said when he released the results on Friday. "I believe that it is very important for candidates to attend classes that are arranged by many clubs as there is a lot more learnt from the knowledge and interaction with other candidates."

"I am aware of three SARL affiliated clubs that have achieved a 100% pass rate. The three clubs are Oakdale, Sandton and Kempton Park. These clubs provide excellent tuition and their lecturers put lots of energy into creating teaching material. There may be other clubs that have also achieved a 100% pass rate but this has not yet been brought to the attention of the SARL."

"A number of new questions were included in the past examination and new questions will be added to the exams going forward This is done to ensure that at all times we remain compliant to the HAREC requirements," Mark said.

Congratulations to all candidates who passed the RAE. For those that have not quite made it, please do not give up, you will have another opportunity to tackle the examination in May 2011.

The SARL is still awaiting examination papers which became stuck in the postal system and the SARL is keeping track of those papers and as soon as they arrive, they will be marked and successful candidates will be added to the list.

The SARL expects that call signs will be issued in the next few days. As soon as they are released the SARL web will be updated and successful candidates may start operating immediately. The actual printed licence may take several weeks before being processed. Please do not call ICASA as that will only slow down the processing.

The youngest candidate that wrote the RAE was 9 years old the oldest was 66 years old. The highest score was 98% for the Class A and 96% for the Class B. The pass rates for class A exam was 85% and 66% for class B.

The results are available on www.sarl.org.za.

SARL MEMBERSHIP GETS ANOTHER BOOST

This week the SARL membership stood at 1 425 which is just 35 short to reach this year's target of 1 460. With your support we should reach 1500 soon. To join or pay your membership, call Mariska at 011 675 2393 on Monday.

SCORE A 2011 ARRL HANDBOOK IN THE FIELD DAY CONTEST

The Boland Amateur Radio Club invites all radio amateurs to join in the last event of the SARL 85 year anniversary celebrations by making a contact with ZS85SARL during the SARL field day weekend. The competition will take place from 10:00 UTC Saturday 20 November till 10:00 UTC on Sunday 21 November 2010.

BARK will set up a field station and operate as ZS85SARL. All amateurs who make contact with the special event field day station will participate in a lucky draw. You do not have to be a field station to qualify for the lucky draw.

The first participant drawn, and who is a SARL member, will win the brand new 2011 Hardcover ARRL Handbook. The first name drawn from a non SARL members will receive a free membership of the SARL for the current financial year.

Get the contest rules on www.sarl.org.za.

2011 CONSTRUCTION COMPETITION WITH GREAT PRIZES

At its Board meeting on Thursday last week the South African Amateur Radio Development Trust has announced details of its 2011 construction competition. As one of the main objectives of the Development Trust is to promote and expand innovation in Amateur Radio technology,

activities during 2011 will focus on various aspects of what makes amateur the most rewarding of all scientific hobbies.

The 2011 construction competition focuses on construction and operation and not on circuit design. Participants may search the web and the literature for any design. The focus is on the ingenuity displayed in the construction of one of the following two projects:

A QRP transmitter with an upper power limit of 5 watts using the minimum of components operating on any amateur band or a minimum component transistor receiver operating on any amateur band.

The competition is in two parts. Part one is a paper entry with a brief write-up, a circuit diagram and a photograph of the prototype or breadboard.

>From the first phase entries, three finalists will be chosen to go through to the second phase during which the project must be constructed, tested, be fully operational and suitably housed and submitted with a full write up and circuit diagram. Each finalist will receive a grant of R500 to build the project.

The winner will be invited to the annual award lunch in May 2011 and presented with a 2011 ARRL Handbook, and a choice of three SARL construction kits and a year of free membership of the SARL.

The closing dates are as follows: Phase one 30 January 2011. The three finalists will be announced on 15 February 2011. The closing date for phase two is 15 April 2011.

Full details and an entry form can be found on www.amateurradio.org.za.

ON THE AIR ACTIVITY

Remembrance Day Service

The annual Remembrance Day service will be transmitted next Sunday 14 November at 10:45 on Amateur Radio Mirror International. The service will be conducted by the Reverend Jan Kramer, ZS6JRK, of the Hervormde Kerk, Elsburg. The annual service is in remembrance of radio amateurs who lost their lives in service of their country. The script reading will be in English and the service in Afrikaans. As a mark of respect, radio silence is requested between 10:45 and 11:00 CAT next Sunday morning.

Clubs wishing to transmit the service on their local repeater can down load a MP3 audio file. Send an email to armi@sarl.org.za to receive details of the URL.

SATnetwork

On Sunday evening 21 November SA AMSAT invites you to participate in the SATNETWORK when Eddie Leighton, ZS6BNE, will talk about "APRS via the ISS". It will be on the air at 19:30 . More detail in next Sunday's

SARL News.

COMPETITION NEWS

The following are the results of the AWA Valve QSO Party held in October 2010

AM - First place to Andrew Dekenah, ZS6DEK Second, ZS0AWA operated by ZS6ADY

SSB - First, Andrew Dekenah, ZS6DEK Second, Theunis Potgieter, ZS2EC Third, ZS0AWA operated by ZS6ADY

A total of 33 stations were recorded in the AM section and 85 in the SSB section, but the number of logs actually submitted ewere disappointgly low.

However, the AWA believes that the objective was achieved as we do say the QSO party is there to encourage activity on the bands, and this it certainly did. Our thanks to all who took part and congratulations to Andrew, ZS6DEK, and Theunis, ZS2EC, on their efforts.

YL NET

The YL Net kicked off last Sunday, October the 31st in Pretoria.

The YLs who reported in to Anette, ZR6D, were Pam Momberg, ZS6APT, Rene de Witt, ZU6MA, and Koba Maree, ZR6CMA. Elrika van der Merwe, ZS1BEL, from Dana Bay joined via Echolink. Apologies were made by Heather Holland, ZS6YE, who was on vacation at the Vaal Dam. Corinna Carstens, ZS1CC, reported via e-mail, that the 40 m band was poorly received in Cape Town. Thanks the ladies for their participation. All the YLs are invited to their next on the air meeting to be held on November 28, 2010 at 15:00 on the Magalies repeater, 145,750 MHz, with a relay on 7 065 kHz . The ladies can also join via Echolink, link to ZS6FCS-R. You can also contact Anette on tel 073 199 9032 or via email to zr6d@ymail.com.

MEETING FOR RUSTENBURG RADIO ACTIVES

The Rustenburg Radioamateur Club, ZS6RTB, will have a club meeting on 27 November 2010. The club meeting will also coincide with a meeting to which all two way roll players in the area ie. Citizens Band, Amateur Radio, Commercial, Marnet, Civil Defense etc. are invited.

The aim of the meeting is to improve relations between the different groups as well as try to formulate a plan of action for emergency situations, should it arise. All interested parties please visit the website www.zs6rtb.co.za for details.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Old sunspot region 1 112 will soon rotate back into view on the southeastern limb while Sunspot 1 120 is rapidly fading. The effective

sunspot number is expected to be less than 25 for the coming week.

20 m will provide the best opportunities for DX followed by 15 and 10 m. Conditions to India will be good from the afternoons till after sunset. During the afternoons conditions will be good towards Europa on 15 m, later to be followed by good 20 m openings. Late afternoons and early evenings 15 m contacts with the USA are at last possible again. Contacts with Australia are possible at sunset on 20 m. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

20 November - 10:0 UTC, field day weekend with ZS85SARL on the air commences; 21 November - 10:0 UTC, field day weekend and ZS85SARL closes; 21 November - 19:30 SAT, SATnetwork on the air; 28 November - YL net starts at 15:00 CAT; 20 January 2011 - Closing date for submission for application for May 2011 RAE bursaries, visit www.amateurradio.org.za for application vorms; 30 January 2011 - Closing date for Phase 1 of construction competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

If you have not heard of Chris Wright VK2UW - He is the Australian version of K1MAN.

He has been previously warned by the ACMA about using excess power and dropping carriers etc. on QSO's on the HF bands.

Most recently he was causing interference to the VK100WIA special event callsign.

He is a disgraced and sick individual who has been banned from posting on QRZ.com, banned from most DX clusters etc.

More details can be found here:

http://www.vk2uw.com

****
Please think of the environment before printing this email
>From The Business Manager ZL2TDM
Debby says...
Call Book
The Ministries database of call signs was provided to the call book editor
on the 18th of August, therefore in compliance of the Privacy Act, nothing
on this database could be altered, updated or deleted after this date.

As I previously advised in an earlier broadcast the RSM did experience
problems with the reintroduction of silent key call signs on a recent

upgrade to the SMART system, therefore the Call Book Editor, RSM and myself carefully removed these from their system as best we could. I apologise if there are still some that need to be removed, however I need you to advise me in writing, so they can be deleted.

A tremendous amount of work has gone into ensuring the correctness and integrity of this data by Lorne Douglas, including branch information, and we do not wish to go back down the who is at fault and abusiveness received by us both, that has been experienced in the past. We really do want to give you the best most up to date and correct Call Book that you can possibly have, we do not intentionally want to get things wrong.

Elections for Council
If you are considering standing for NZART Council or President, attached to this Info Line edition, is the nomination form that needs to be completed and posted to "The Returning Officer" no later than 30 December 2010.

Talk soon...Debby ZL2TDM

Missing and Incorrect Callsigns
PLEASE ADVISE PHIL KING ON ZL1PK@NZART.ORG.NZ, BEFORE THE END OF 10th NOVEMBER, IF YOUR CALLSIGN AND/OR DETAILS ARE INCORRECT OR MISSING IN THE 2010/2011 CALL BOOK. THIS REQUEST APPLIES TO SECONDARY CALLS TOO. THIS SHOULD ENABLE THEM TO BE IN THE CORRECTIONS IN THE NEXT BREAK IN.

FMTAG Notes For November 2010 Council Meeting
Proposals
Branch 66 Auckland VHF Group has applied for a Spectrum License on TV Channel 39 for its Nihotupu AIV repeater, to replace its previous Radio License, cancelled by the MED as part of the Digital Switch-Over process. The location is Nihotupu, Topo50 map reference BA31 40l.84 114.69.

Final Recommendations to NZART Council
Branch 33 Rotorua has applied for a 2 metre APRS Digipeater at Makatiti Dome, Topo50 map reference BH38 038.75 730.97. An engineering evaluation confirms that there will be no interference to other stations and that the transmit and receive frequency will be 144.575 MHz.

Branch 74 Wellington VHF Group has applied for a Spectrum License on TV Channel 39 for its Belmont AIV repeater, to replace its previous Radio License, cancelled by the MED as part of the Digital Switch-Over process. The location is Belmont, Topo50 map reference BQ32 568.70 398.86. All of the engineering parameters are unchanged from those of the cancelled licence.

ZL2BDI has applied for a 70 centimetre ATV Beacon at Lower Hutt, Topo50 map reference BQ32 575.50 361.93. An engineering evaluation confirms that there will be no interference to other stations and that the Vision Carrier frequency will be 431.250 MHz, in accordance with the NZART bandplan.

Comments and Applications
Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to:
fmtag@nzart.org.nz?subject=FMTAG_INFOLINE

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available at:
http://www.nzart.org.nz/fmtag/index.html
Completed forms should be sent by e-mail to:
fmtag@nzart.org.nz?subject=FMTAG_INFOLINE
END

RSGB News From G4NJH - Concern For 24 GHz Band
Earlier this year Ofcom (UK equivalent of NZ's MED) announced an exemption for Railway Level Crossing systems to use a part of the 24 GHz band where we have secondary status. More recently, on 6th October, the European Union's Radio Spectrum Committee published a review of automotive ultra-wideband short-range radars that currently operate across the entire 24 GHz band and which have caused considerable concern.

The Society actively participates in consultations on these matters and along with IARU Region 1, is working to protect and enhance our 24-24.05GHz Primary allocation where innovative DX and Beacon activity is concentrated.

Defending The Amateur Radio Spectrum: Everyone's Responsibility
The second edition of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- has just been released on the ARRL Web site. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. Your financial support is vital to continue the ARRL's work to protect your operating privileges...

ARRL President Makes Final QSO with Australia's WIA Centenary Station
The Wireless Institute of Australia (WIA) marked the conclusion of their VK100WIA centennial special event operation on October 31 with a QSO between WIA President Michael Owen, VK3KI, and ARRL President Kay Craigie, N3KN. Logged five minutes before midnight in Australia the QSO between N3KN and VK100WIA, with VK3KI at the microphone, was the last contact recorded in the Australian special event's log. Would all who operated as vk100wia make sure to have completed all logging by the end of this month please.

More than 50 WIA-affiliated clubs have used the VK100WIA call sign for almost six months as part of WIA's centennial celebration; the WIA is the oldest Amateur Radio national society. For this contact, VK100WIA was operated portable for the Westlake's Amateur Radio Club, the club privileged to be the last club to use the call sign. Since VK100WIA went on the air in May, it logged 24,439 contacts.

Michael told Kay that the WIA was pleased that the special event station's final contact could be with her, and thanked the ARRL for its support and for participating in the WIA Centenary Weekend through ARRL International Affairs Vice President Jay Bellows, K0QB. Owen also said that the WIA was "passing the baton on to the ARRL, as the ARRL would be celebrating its centenary in four years."

Kay congratulated the WIA on their 100 years of service to Amateur Radio in Australia, wishing them well as they begin their second century. She noted that strong national societies around the world, working together through the International Amateur Radio Union (IARU), are essential for the future well-being of Amateur Radio. VK3KI expressed the WIA's appreciation for the ARRL's contribution to Amateur Radio, especially the League's service as the International Secretariat of the IARU.

"Through their extensive program of centennial observances including the VK100WIA operation the WIA has set the bar very high for the ARRL's own 100th anniversary activities in 2014," N3KN said after the QSO.

"I am honoured to have been invited to be the last station to work VK100WIA on behalf of the ARRL and our members."

IARU Region 2 Conference
The 58 delegates and observers who gathered in Salinitas, Sonsonate, El Salvador for the 17th General Assembly of IARU Region 2 experienced a busy and enjoyable week. The conference began on October 4 and concluded on October 8. Twelve IARU Member-Societies in the Americas were represented in person, with another seven represented by proxy. President Kay Craigie, N3KN, served as the voting delegate for the ARRL and was assisted by International Affairs Vice President Jay Bellows, K0QB, and Executive Vice President David Sumner, K1ZZ. Observers from IARU Regions 1 and 3 and the International Secretariat were present to assist and to learn from the conferees. Read more here:
http://tinyurl.com/2dvtpnu

New WB4MAK SDR Receiver in Atlanta Georgia
Mack Mc Cormick, WB4MAK, of Atlanta, Georgia, has made available a web-based 80, 40 and 20 meter SDR based receiver. We gave it a try from the Newsline office. Its tuning is very responsive and the first station we came across on 20 meters turned out to be a guest operator at the ARRL Headquarters station W1AW in Newington Connecticut. We also heard W1AW contacting W6RO on board the Queen Mary ocean liner that's docked in Long Beach, California, but due to band conditions, we only heard the W1AW side of the contact. The WB4MAK SDR receiver can be a handy tool to check out radio propagation to the South-Eastern United States by anyone with a high speed Internet connection. You will find it on line at:
http://wb4mak.com/

Mapping UP
Sydney-based developers of Google Maps have been recognised for their contribution to the industry.
Lars and Jens Rasmussen who are Brothers were named NSW's Entrepreneurs of the Year in the information and communications technology field.
The annual Pearcey Foundation award was announced at NSW Parliament on Tuesday, with their achievement being hailed as a coup for Australia, positioning it as a global leader in online services.
Google Maps is now used by around one-third of all Google visitors.
The Pearcey Foundation was established in 1998 to raise the profile of the Australian ICT industry and profession.

WIA Centenary Award - Update
So far 269 claims for this limited time operating award have been received and verified with certificates now issued.
The 200th award went to Monica Crockett VK3FMON of Axedale. It is good to see the enthusiasm of Foundation Licensees with some 30 having already qualified for and claimed the award.
The VK2AWA Contest Group is the very latest radio club on the award list. Some 15 DX stations from Finland, India, Hawaii, Japan, New Zealand, Russia and the USA are also recipients of the award.
For details about the WIA Centenary Award visit WIA website http://www.wia.org.au/

Intruder Watch - Enforcement Zone

24.890 to 24.990 MHz
28.000 to 29.700 MHz

Old Beacon At Dump Sparks Rescue Mission
Rescue services were alerted Monday afternoon after Tauranga Airport in ZL and an aircraft flying over the Bay of Plenty picked up a distress signal in the region.

A helicopter from Rotorua narrowed down the search area, and Radio Spectrum Management traced it to the Te Maunga refuse transfer station. The beacon was located in the recycling centre.

The Rescue Coordination Centre New Zealand said the beacon had been placed on a glass conveyor belt and was probably triggered when it was lifted off the belt and set aside on a railing.

The beacon was operating on the old 121.5 MHz or 243 MHz frequencies.

The incident served as a reminder for people all around the world to dispose of old beacons properly, either by disconnecting the battery or taking the beacon to police, the coastguard or a beacon retailer.

Web Update
Continuing from the last Infoline's brief comments about the CMS Web, good progress has been made on the checking of the new website.
If you want a look check it out on:

if you have any comments. Jamie Pye ZL2NN

Feilding Radio Club-ZL2AMR - Out of Recess after 14 years
At a Meeting Held Jota at Grassmere venue Colyton Road, on Saturday the 16th October 2010 10.00 am, Feilding Radio Club-ZL2AMR came out of recess.
Fifteen members were present and voted unanimously. Officers voted in are:
President: Mike Prior ZL2UKW,
Sec\Tres: John de Burgh ZL2TG, and
Callsign custodian: Mike Prior ZL2UKW

After General Business the following items were decided:
Website to be worked on by ZL2TG
Next AGM will be on the: 30th November 2011
General meeting every two months last Wednesdays of the month

Next meeting will be at:
Wednesday 24th November 7:30pm place TBA
Cups of Tea. Meeting closed at 11:00 hr's

Wireless Charging for Electric Vehicles
Inductive Power Transfer (IPT) for your Electric Car: System Detail
HaloIPT is the first company in the world to make Inductive Power Transfer (IPT) wireless charging for the electric car commercially available. This is the safest, most efficient and effective way to transfer power without wires - a proven technology that is ready - here, now, today.

How it Works
The mains supply is rectified with a full bridge rectifier followed by a small DC capacitor. Keeping this capacitor small helps the overall power factor and allows the system to have a fast start up with a minimal current surge. The inverter consists of an H-bridge to energise the tuned primary pad with current at 20kHz. The 20kHz current also has a 100Hz/120Hz envelope as a result of the small DC bus capacitor. Power is coupled to the secondary tuned pad. This is then rectified and controlled to a specified output DC voltage.... For more please see:
http://www.haloipt.com/technology.aspx#n_details

Weird and Wonderful
October 2010
The October we just had was very special as it had:
5 Fridays, 5 Saturdays and 5 Sundays all in 1 month.
This happens only once in 823 years.

Some items in this issue from WIA and ARRL Weekly Newsletters
ELECTORAL
Nomination for President and Executive Council period 2011/2013

To: The Returning Officer -Nomination

N Z Association of Radio Transmitter Incorporated

P O Box 40-525

UPPER HUTT 5140

I, the undersigned nominator HEREBY NOMINATE

_____(ZL_____)

First name Surname Callsign

For the office(s) of: Tick 4 One
President
Councillor for the District
President AND Councillor for the District

Select the required alternative and complete as necessary - In the event of the member being elected to both offices the member is deemed by the Association Constitution to prefer the office of President.

I, the undersigned seconder HEREBY SECOND this nomination.

I, the undersigned nominee HEREBY ACCEPT this nomination.

We, the undersigned nominator, seconder and nominee severally CERTIFY that the nominee is an active amateur as defined in Schedule C paragraph (a) of the Association Constitution.

NOTES

1.Nominations must reach the Returning Officer by 31 December 2010. The Returning Officer has no discretion to receive late nominations even if postmarked prior to that date. Facsimile nominations cannot be accepted.

2.Allow ample time for transit by post. Holiday mail is often delayed.

3.Nominees must submit biographical details to the Returning Officer at the address overleaf by 10 January 2011, for probable inclusion in the January/February 2011 issue of Break In. Endorse the envelope "BIOGRAPHY". The Returning Officer, (who has the authority to edit details submitted), suggests a limit of 200 words.

4.No nomination should be presumed to be in order until acknowledged in writing - usually within seven working days.

5.Ensure that addresses are shown above for acknowledgements as often in the heat of the moment, this detail is overlooked.

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 7th November 2010

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

GlobalSet 2010 - November 13

IARU Region 1 invites the HQ-Stations of all IARU member societies and stations of Emergency Communications Groups to participate in a Global Simulated Emergency Test on Saturday November 13th, 2010 11.00 - 15.00 Local Time.

The operation will take place on and near the emergency Centre-of-Activity (CoA) frequencies on 80, 40, 20, 17 and 15 metres (+-QRM). This event is different to earlier ones as we will not be activating all stations around the globe at the same time, instead the event will call for stations to be active at their local time.

This will mean that some stations will have to wait for HQ stations to come on air to pass their messages but will reduce the inter-region interference that may occur.

Science Week 2010

Science Week is being held from today until the 14th of November. Clubs are encouraged to take advantage of the publicity generated by Science Week to promote their activities, perhaps by putting on a special event station or partnering with some other local Science Week project.

More details on the Website www.scienceweek.ie

South Dublin Radio Club

The three South Dublin Radio Club members who were successful in the recent theory examination have now received their amateur radio station licences.

The three new licensed members are Jim Hall EI9GLB, Fran Griffin EI9GQB and his son Ronan Griffin EI9GPB. Congratulations to all involved - the students and their tutor Michael Friary EI2GKB.

Hill Walking Radio Network

In Munster some Hill walkers and radio hobbyists have come together the form the Hill Walking Radio Network. The group is trying to get other enthusiasts and users of the outdoors, where mobile coverage is poor or unreliable to use commonly available low cost PMR 446 hand held Radios. Similar networks are successful using this method in Scotland, Sweden & Austria.

Channel 8 on these radios is the Network Channel, and although phase 1 is based in Munster at the moment it is hoped this will develop into a National Organisation in a short time.

For more info on the Network please email hillwalkingradioch8 /at/ gmail.com

---

Limerick Radio Club News.

The Limerick Radio Club Website has now been ported to its own domain at www.limerickradioclub.ie Lots of new features will appear over the coming months and members are encouraged to let us know of ideas they may have for features they would like to see on the site. Many thanks to Simon EI7ALB and Gerry EI3JU for their work on the site.

The club contest call EI0A got its first airing last weekend by Ger EI4GXB in the CQWW SSB contest. A total of 1108 qso's, 107 countries, 6 continents and 42 states were contacted and we wait with interest on the final results.

The final flight of the space shuttle Discovery STS-133 was linked to the limerick Repeater via IRLP and we hope that many listeners enjoyed the live audio.

The next club meeting will take place on Thursday 11 November at the Limerick Institute of Technology at 7.30pm.

Rallies

Sunday 7th November 2010 Event: Foyle and District ARC Rally Venue: White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA Doors open at 12 noon Information: See www.mn0aku.co.uk

Sunday 21st November 2010 Event: Mayo Radio Experimenters Network Annual Rally Venue: Welcome Inn, Castlebar, Co. Mayo Doors open at 11:00 a.m. Information: Rally Director: Padraic Baynes, EI9JA See www.ei7mre.org

For further details on Rallies please see www.irts.ie/rallies

---

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

1004. [RAC-Bulletin] [EMCOMM] Indonesian disasters - update report 7 November 2010

[EMCOMM]: Indonesian disasters - update report 7 November 2010
2010-11-07

VIA: James Linton VK3PC, Chairman, IARU Region 3 Disaster
Communications Committee.

All Amateur Radio operators are requested to note the following from
the ORARI Organisasi Amatir Radio Indonesia. All IARU Center of
Activity frequencies, 21.360, 18.160, 14.300, 7.060 and 3.760 should
be kept clear. The disaster assistance effort is using 7.065. Your
usual cooperation is very much appreciated.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1DG, NJ1Q, KH2AR/W4, NG3K & ADXO, W3BTX, N4AA & QRZ DX, N5UCF, W6LD, N7UN, K8YSE, W8GEX (60m News), K9EL, W8DX, N0TG, 4L2M, 9V1YC, Algarve STAR DX Team, AT International, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F5NBU, F6AJA & Les Nouvelles DX, G3SWH, G3TKK, I1JQJ/IK1ADH & 425 DX News, IK1QBT, IK7JWX, JA1MFR, JE1JKL, JI5RPT, OK1MU, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM5COP, VA3RJ & ICPO, VE3LYC, VHF-DX-Portal (MMMonVHF), VK3PC and VK3QB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 31st-October, through Sunday, 7th-November there were 235 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND. Operators Gert/ZS6AYU and Hannes/ZS6BZP are now active as 3DA0GF (CW) and 3DA0HC (SSB), respectively, from the Hawane Resort

near Mbabane, between now and November 8th. Activity is on 40-10 meters including the 30/17/12 meters and will alternate operations between CW and SSB (If possible, simultaneous operation). QSL only direct to their home callsign. CW QSOs to ZS6AYU and SSB QSOs to ZS6BZP. QSL address can be found on QRZ.com.

5W, SAMOA. John, VK2ZKY, is once again active as 5W0KY from Samoa (OC-097) until about November 21st. Activity will be on the HF bands. He was heard this past week on the ANZA Net on 20m and 40m. QSL via his home callsign.

8Q, MALDIVES. Vitaly, RN4WA, will once again be active as 8Q7DV during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. He plans to use GPs on the beach with his radio and an ACOM2000. QSL via UA9CLB.

A3, TONGA (IOTA Op). Akira, JA1NLX, will be active as A35AY from Fafa Island near Tongatapu Island (OC-049) between February 4-9th (2011). Activity will be on 80-10 meters, including 30/17/12 meters, using CW and RTTY. Suggested frequencies are:
CW - 3505, 7015, 10115, 14035, 18075, 21035, 24895 and 28035 kHz
RTTY - 10140, 14085, 18110, 21085, 24920 and 28085 kHz
Equipment will be a FT857 w/100w into a simple vertcal antenna on the beach. QSL via JA1NLX, direct, by the Bureau or LoTW. For more details, visit: http://www.ne.jp/asahi/ja1nlx/ham/A35_2011.html

AU2, INDIA (Special Event). Look for special event station AU2JCB to be active between November 20th and December 5th. Activity will be on 40-10 meters SSB. Suggested frequencies are: 28490, 21280, 21340, 14220, 14320 and 7030 kHz. QSL direct to VU2DSI. Operations are to celebrate the 152nd anniversary of the birth of Sir Jagadeesh Chandra Bose who they consider the "Father of radio communications". For more details, see the following Web page at: http://www.qsl.net/vu2msy/JCBOSE.htm

CR6, PORTUGAL (Lighthouse/WFF Op). Members of the Algarve STAR DX Team will be activating from Sard&#65533;o Lighthouse (SW Aletejano Natural Park CTFF-12) as CR6A between November 13-14th. Activity will be on 80-15 meters using CW, SSB and RTTY. One station will be in the WAE (Worked All Europe) RTTY Contest; their category is unknown at moment. Operators mentioned are Jose/CT1EHX, Toze/CT1GFK, Al/CT1GPQ and Hermann/HB9CRV. QSL via CT1GFK. For more info about their activity and award numbers, visit: http://algarvedx.com

CY0, SABLE ISLAND (Update/Operation Postponed). Randy, N0TG, reports: "Sable is back on the calendar. The rescheduled dates are December 6-13th, 2010. Fortunately, several critical details were resolved sooner than expected." For more details, visit: http://www.CY0dxpedition.com

DX0, SPRATLY ISLANDS (Update). Chris, VK3FY, Team Leader/Public Affairs Person of DX0DX, reports the following on November 4th (edited):
Going to plan: The Spratlys DXpedition 6 January to 1 Feb 2011

A recent meeting chaired by the DX0DX DXpedition Team Leader, Chris

Dimitrijevic/VK3FY & DU8/VK3FY reviewed progress achieved so far with only 60 days to go until special DX entity The Spratlys (IOTA AS-051) hits the amateur bands.
The meeting was attended by the DX0DX Co-Leader and Webmaster Peter Dernikos/VK3FGRC, Public Affairs Officer Jim Linton/VK3PC, and team members Keith Proctor/VK3FT, Lee Moyle/VK3GK and Nik Dimitrijevic/VK3FNIK.
It heard that the pre-assembly, erection and tuning of eight HF yagi antennas in Fontana California went extremely well with the antennas tuned as per instructions to their allotted bands.
The antennas are three TW-33-XL 30-17-12m band 3-element tri-banders, three TA-33-M 20-15-10m 3-element tri-banders, and two 4-element mono-banders for 20m.
Each was then partly disassembled breaking down into four parts for allow for quick installation once they reach the island. Masts, rotators, masts and cabling have all been finalised.
Other main equipment includes ten ICOM IC7600 transceivers (four each for CW and SSB, plus two on digital modes), an IC9100 (6m, 2m, 70cm & 23cm), eight generators with associated electromagnetic interference (EMI) filters, 11 laptop computers, four SteppIR Verticals, 1x 2 element SteppIR Yagi, 2x 80m 4sq's, 2x 40m 4sq's, 6x OM Power OM3500HF amplifeirs, 3x ACOM 1000 amplifies, 1x OM Power OM2006 6m amplifier, 1x ACOM 1010 Amplifier, 2x Thamway amplifiers, 1x Commander 144MHz Amplifier, headsets, foot switches and interfaces.
Chris/VK3FY & DU8/VK3FY said, "Well done to the Station & Planning Co-ordinator David Collingham/K3LP for organising and attending the Pre-Assembly Gathering and also DXpedition logistics coordinator Charles Spetnagel/W6KK for his understanding in having all the equipment dispatched to his QTH and also being part of the Pre-Assembly Gathering."
Special thanks for their hands-on contribution in this important phase of the exercise goes to DX0DX Team Leader Chris Dimitrijevic/VK3FY, Nik Dimitrijevic/VK3FNIK, Arnie Shatz/N6HC, Bob Grimmick/N6OX, West Coast Pilot Milt Garb/W6QE, Dennis Juniper/N7DDU, Byron Hunsaker/NF6T and Richard Briano, who all attended the Pre-Assembly and Container loading gathering in Fontana, California over the weekend of 30-31 October.
The Philippine Amateur Radio Association (PARA) has appointed DX0DX team member, Dindo Garcia DV1UD, as the PARA liaison person to handle all in coming equipment shipments, and liaise with the Bureau of Customs in respect of all equipment for the DXpedition.
Chris/VK3FY & DU8/VK3FY said, "A new high tide photographic survey commissioned by the DXpedition has confirmed that the island's coastline and available beach has dramatically changed from what was previously known, due to rising sea levels and sea erosion.
This has meant a change in some aspects of the location of antennas and operating camps, but being fully aware in advance has enabled David Collingham/K3LP the Station Layout Coordinator and other DX0DX Team members to ensure it does not have a significant impact of the DXpedition plans."
The four operating camps will use hand-held VHF/UHF transceivers, kindly provided by ICOM Amateur, for intercommunication.
The meeting also had its lighter moments in discussing the island's

resident goats and whether they could take a liking to coax cable, and if a diet high in vitamin B12-rich Marmite might ward off mosquitoes.
In recent hours Chris/VK3FY & DU8/VK3FY has been informed that the boat hired to transport the team and its supplies to Thitu Island is now in need of extensive repair following damage sustained in very rough weather.
"The official advice received is that it is doubtful repairs can be made before the team is due on the island. While this is a disappointment, with it occurring two months out from the DXpedition sufficient time remains to source a replacement vessel," he said.
The excitement continues about this major DXpedition that will see more than 37 radio amateurs from 15 Nations, who have made their individual substantial financial commitment to be part of the DX0DX operating team over the four weeks. As part of a humanitarian contribution, two doctors, Josette Docherty/VK2FXGR and Edward Soriano/4F1OZ are also to provide medical checks to the island's residents.
In another development, Chris/VK3FY & DU8/VK3FY said that the DXpedition is to be extended to accommodate the CQ World Wide 160m CW Contest. The Municipality of Kalayaan has agreed to the time extension.
He said, while DX0DX was to go QRT on 24 January, a couple of individual and keen members have asked if they could stay on air for that contest when ends at 2200 UTC Sunday 30 January. This will now extend DX0DX activation to 1 Feb 2011.
"This limited extension was carefully considered and agreed in light of strong interest from Top Band contesters and the 160m band being the highest sought after in the DX0DX website online survey."
The generous corporate sponsorship that makes the DXpedition possible by providing equipment and other needs, plus funding support from DX groups, clubs, and individual radio amateurs which is still being received. All are gratefully acknowledged on the DX0DX website.
- Jim Linton VK3PC, Public Affairs DX0DX www.dx0dx.net
4 November 2010

EA6, BALEARIC ISLANDS. Peter, G3TKK, will be operating holiday style from JM19GL in central Majorca between now and November 14th. Operation will be on CW, BPSK and RTTY with the callsign EA6/G3TKK. QSL via G3TKK. QSOs will be uploaded to LoTW ASAP on his return.

FM/TO5, MARTINIQUE. Saty, JE1JKL, will be active as FM/JE1JKL/p from FM5BH's QTH between November 24-26th. Activity will also include the CQWW DX CW Contest (November 27-28th), signing as TO5T, and as a Single-Op/All-Band/High-Power entry. QSL via JE1JKL.

FS, SAINT MARTIN. Operators Nick/K9NB and John/K9EL will be active as FS/homecall from French St. Martin (NA-105) between November 25th and December 1st. They will be a casual entry into the CQWW DX CW Contest (November 27-28th). Outside of the contest, their plans are to be active on all bands 160-6 meters as conditions permit. Primary focus will be on CW with some SSB and RTTY possibly. Please QSL to their home callsigns. Skeds welcome.

H7/YN, NICARAGUA. Three members of the "Texas DX Society" will return to Nicaragua November 25-30th, to participate in the CQWW DX CW Contest (November 27-28th) as a Multi-Single/Low-Power entry. The team members are: Cal/WF5W (YN2EA), Paul/W5PF (YN2PF) and Bill/K5WAF (YN2WF). During the contest they will be using the H7V callsign. During non-contest periods they plan to have 2 stations active on 160-10 meters using CW, SSB and RTTY, operating with their own personal callsigns. QSL Manager for all callsigns is W5PF. For further information, visit their Web page at: http://www.tdxs.net/yn2-tdxs.html

HC2/HD2, ECUADOR (Update). Members of the SK6M Contest Team will be active as HC2/homecall from Nobol between November 22nd and December 4th. Activity will be on the low bands, WARC and RTTY. QSL via their home callsigns. The Swedish team will team up with some locals and be active as HD2M during the CQWW DX CW Contest (November 27-28th) as a Multi-Multi entry. QSL via SM6FKF. Operators mentioned are Allan/HC2A, Alfredo/HC2SL, Rune/SM5COP, Fredy/SM6FKF, Ben/SM6LJU, Peter/SM6MCW and Mats/SM7BUA. SM5COP will use HC2/SM0COP outside the contest. For more info, see <http://sk6m.com> under HC2010.

IOTA NEWS.....
AF-019. Operators Tony/IK1QBT and Emilio/IZ1GAR will be active from Pantelleria Island (WLOTA 0041), between November 23-30th. In the CQWW DX CW Contest (November 27-28th), Tony will be Single Band 80 meters entry as IH9X, and Emilio as IH9R Single Band 40 meters. Pantelleria counts a Multiplier Zone 33 Africa Italy for the CQWW DX rule (islands are located over the African continent platform). Prior to the contest they will be putting an emphasis on the lower bands as IH9/IK1QBT and IH9/IZIGAR. QSL via their home callsigns.

AF-053. Operators Freddy/J28RO and Darko/J28AA are in the process of planning a small DXpedition to Moucha Island, Djibouti, during the month of January 2011 (for four days). Specific days are not yet set. They plan to use two K3 radios and two multi-band verticals for 80-10 meters using CW and SSB. The duo will be using their home callsign. They have requested special callsigns for this operation, but because of the local red tape callsigns, it will probably not be received on time.

AF-068. (Update and Not AF-065 as mentioned in OPDX.983) Some of the operators from the recent TS7TI and TS8P operations, and the Navajo DX Team are planning a DXpedition to Herne Island, Morocco, and Dakhla Park (WFF CNFF-007) between January 29th and February 6th (2011). This island is a rare IOTA (14.1 %). The group is hoping to receive permissions. They state that their friend Kacem, CN8LR, secretary of ARRAM, is helping them obtain a license and special callsign. For update, watch: http://www.i8lwl.it
The team needs supporters and sponsors for the DXpedition. To subscribe to the DX Team's mailing list, send an E-mail to: navajodxteam@libero.it

NA-078. Operators Manuel/XE2HUQ and Tony/XE2HVF will be active as XF1HUQ and XF1HVF, respectively, from Magdalena Island between November 18-22nd. Activity will be on 80-10 meters using CW and SSB. QSL via their home callsigns.

SA-031
and
SA-097. Operators Cezar/VE3LYC and Johan/PA3EXX will attempt a very challenging expedition to Wollaston Islands (SA-031) and Diego Ramirez Islands (SA-097) between approximately January 7-22nd. In demand by 98% of IOTA chasers, SA-031 currently ranks #6 on the "Most Wanted IOTA List" world-wide and #1 in South America, whereas SA-097 has never been activated. The plan is to operate for 4 days from each group. However, weather and sea conditions can significantly influence this schedule. The team has retained for this trip the services of Thomas, an experienced skipper, with his 40 ft. yacht. They are aware that landing on SA-097 is extremely difficult and may not be possible within such a limited time frame. The logistical support received from the "Radio Club de Chile" and "Radio Club de Punta Arenas" has been invaluable in obtaining the licenses, permits, and the authorizations required for this project. This is not only a difficult but also a very expensive operation. At this time the team seeks enthusiastic group and individual donors who wish to be part of this effort. Financial support can be sent by mail to Cezar/VE3LYC or PayPal to tiberius.trifu@gmail.com. All contributions to this project will be acknowledged. Callsigns and direct / bureau QSL instructions will be announced in due course.

J6, ST. LUCIA (DX News Release #2). Guy, N7UN, reports: "The "Buddies in the Caribbean" DXpedition group which specializes in 100 watt or less low power radios and the Buddipole portable antenna systems are back again to St. Lucia (J6) on December 5-13th, 2010. The north shore Villa location was magnificent on our first visit in February 2010 and we want to demonstrate with a new group of operators, "ultralite" DXpeditioning into magnificent 'vista' locations, operating a field portable, battery-only radio with backpackable, lightweight antennas and most of all 'having fun'. The entire DXpedition is limited to equipment that can fit in your airline 'suitcase'. The eight operators are: Budd/W3FF, Guy/N7UN, Wey/K8EAB, Bill/W7ZT, Todd/N4LA, Kent/K4MK, Gary/NX8L, and Tom/W4OKW. There will be 3 Villa stations in operation at various times on 160-10 meters using CW, SSB, and RTTY. During the day, several teams will be battery-only, field portable either from St. Lucia beaches or scenic mountain tops. The group has received a unique J6BP callsign for the ARRL 10m Contest on December 11-12th. QSL via LoTW, eQSL, or mail to the operator's home callsign (SASE required). For more details, see the following Web page at: http://sites.google.com/site/carribeanbuddies "

JD1/O, OGASAWARA. OPDX was informed by Makoto/JI5RPT that Harry/JG7PSJ and he will once again be active from Chichijima Island (AS-031) between Friday, December 24th, and Saturday, January 8th (2011). Their callsigns

will be JD1BLY (JI5RPT) and JD1BMH(JG7PSJ). Activity will be on all bands 160-10 meters (focus on lower bands) using CW, SSB, Digital and the satellites. Specific dates details are:
JD1BLY - between Dec. 24th and Jan. 3rd (2011)
JD1BMH - between Dec. 30th and Jan. 8th (2011)
QSL via the Bureau to the JD1 callsigns or direct to their home callsigns. For more info and log search, visit the operator's Web pages at:
JD1BLY: http://www.ji5rpt.com/jd1
JD1BMH: http://sapphire.es.tohoku.ac.jp/jd1bmh

K0, UNITED STATES (Special Event). Members of the Emporia Amateur Radio Society will again be on the air with special event station K0V from now until November 14th from various club members' QTHs, and on Veterans Day, November 11th, from the birthplace of Veterans Day, Emporia Kansas, to honor our Veterans. Suggested frequencies will be: 14268, 7262 and 3920 kHz (+/- 20 kHz). Other frequencies may be used depending on QRM and/or propagation. They will also do Digital QSOs. A special QSL card is available, send a SASE to: EARS, Leslie Elliott KC0PTO, P.O. Box 372, Madison KS 66860. For those that would prefer a E-mail QSL card, instead of a mailed one, E-mail them at emporiaars@qsl.net with your QSO info and E-mail address, and they will E-mail one out to you. They will not use eQSL.cc for this special event station. Visit EARS Web page at:
http://www.qsl.net/emporiaars/Veterans%20Day%20Special%20Event%20Station.htm
l

KH2, GUAM. Operators Masa/JA1OZK/W6LJ, JA1CGC, Tadao/JF1TAB, Ken/JH1FUD, Hiroshi/JL1LOW, Akira/JA1NMH/W1NMH and Shimizu/JA1MFR/WN1Y will be active from Guam (OC-026) between November 22-27th. Masa/JA1OZK will be signing as KH2KY (QSL via JA1OZK), while the others will sign KH2/homecalls (which is also their QSL routes; Bureau is "OK"). Activities will be on all HF bands using CW, SSB and the Digital modes (SSTV).

KH2, GUAM. Look for 11 year old YL Eri/JF1VGZ to operate as KH7ERI/KH2 from Guam (OC-026) between November 22-24th. QSL via JF1VGZ (direct).

KH2/NH2, GUAM. Dave, N2NL, will be active as NH2T from Guam (OC-026) during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/ High-Power entry. He is expected to be here until the summer of 2013. Dave will be active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC.

KH6BZF PROPAGATION FORECAST/REPORT (For November 8-7th)....
Nov 8 AN SOLAR REFERENCE KEYS
Nov 9 AN --------------------
Nov 10 AN BN - Below Normal
Nov 11 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 12 AN LN - Low Normal
Nov 13 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 14 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

ODXG NEWS (New Web Page/VK9N DXpedition/etc..). The Oceania Amateur Radio DX Group Inc. (ODXG) is please to announce their new Web site at: http://www.odxg.org
Their new designed Web page now supports on-line logging for members' DXpeditions and also contains new sections. Such as: Regular News Updates, DXpedition Plans for 2011 and Maps of Oceania Entities. There will be more developments announced in the near future. Bookmark the site and visit ODXG from time to time to see what they are up to.

ODXG PLANNED 2011 DXPEDITIONS. In 2011, ODXG is planning a "family friendly" DXpedition to Norfolk Island between late March and early April. The operation will be for days. Check out the details on the ODXG Web site. ODXG is also considering another 1 or 2 DXpeditions to the South Pacific islands. Again, watch their Web page.

OH0, ALAND ISLAND. Tomi, OH6EI, will once again be active as OH0Z. His activity will include the CQWW DX CW Contest (November 27-28th). He will be a Single-Op/All-Band/High-Power entry. QSL via W0MM.

P4, ARUBA. Operators John/W6LD, Denny/KX7M, Rick/N6XI and Mike/N7MH will be active as P40L during the CQWW DX CW Contest (November 27-28th) as a Multi/Single entry. QSL via WA3FRP. The team of operators will be on the air from the evening of November 21st through the morning of November 29th. Activity outside of the contest will be on all bands, 160-10 meters, using CW with little SSB, but no RTTY.

PJ4, BONAIRE. Hennie, PE1MAE, is once again active as PJ4/PE1MAE from Bonaire (SA-006, WLOTA LH-1279) for the next four months. Activity will be mainly SSB on 40 meters (around 7175 kHz) at 0000z. He will also be on 80 and 20 meters, possibly some other bands. Hennie will specifically be looking for PA and Europeon stations. He will only run 100 watts into a Delta Loop antenna. QSL via PA2NJC, direct or by the Bureau.

PJ7E WRAP-UP REPORT. The PJ7E co-leaders, Joe/W8GEX and Craig/K9CT, report on October 31st: "We have all returned safely to our homes, but the work of the DXpedition continues. The equipment is ready to be shipped to Miami and then returned to our sponsors after clearing customs...a four week process. The team is most appreciative of the support that we have received. The oQSL setup has been completed and we are receiving good response to this. QSL card design is moving along but not yet complete. This should be done in the next few days. Articles are being prepared for the magazines and DX publications. Pictures are being collected for use in these and the power point presentations." Visit their Web site at: http://www.pj7e.com

9V1UV QSL INFO. Jerry, N5UCF, reports: "I will continue to serve as QSL Manager for Selva, 9V1UV. I regret to inform all that Selva is now SK. I have logs for all of Selva's QSOs and will be answering direct and bureau requests. Please send direct requests to my QRZ.COM address with SASE or SAE + new IRC or minimum of 1 USD for a direct return."

G3SWH OQRS SERVICE. Phil Whitchurch, G3SWH/AD5YS, reports: "I am pleased to announce the launch of my 'On-line QSL Request System' (OQRS). In addition to the long established ability to request bureau cards via E-mail, you can now request QSL cards for any of the 100+ callsigns that I manage to be mailed to you direct and to pay for the postage etc. via PayPal. Why bother with mailing direct? The OQRS is easy and reasonable. Any queries or unforeseen issues will be handled via e-mail. Please visit my web site <http://www.g3swh.org.uk> for further information and instructions..... 73 for now Phil Whitchurch"

LAKE SUPERIOR QSL STATUS. John, K8YSE, reports that all contacts made during his Lake Superior Grid Expedition have been confirmed direct by mail. He states, "It was quite a project but it is finally finished. This includes both USA and DX contacts. TI2SW was the first contact made during the expedition from Tawas, MI (EN84FG) on August 3rd. KI4RDT was the last contact logged from Ludington, MI (EN63UW) on September 7th. There were 2069 QSOs made on 168 passes. There were about 317 unique callsigns when the /p's etc. were removed. 32 grids were activated. We operated from 97 unique 6 character grid locators. (All QSL cards included the 6 character locator to pin down our location more accurately)." For more details about John's trip, as well as audio recording of satellite passes, visit his Web page at: http://www.papays.com/sat

N3U/Flt93 USA QSL CARDS. Bob, W3BTX/P49T, informs OPDX: "The N3U/Flt93 operation (on Sept 11, 2010) has encountered a problem with sending out USA QSL cards through the USA district bureaus. Please refer to N3U on QRZ.com for new QSL instructions.

TC03W QSL STATUS. The TC03W IOTA DXpedition to Giresun island (AS-154) made 10,731 QSOs during 66 hours of operation. QSL Manager is OK2GZ, by the Bureau or direct. Complete logs including all previous activities (TB0DX, TC0DX, YM0DX, TC0W, TC098A, TC07DX) have been uploaded on the LoTW. For more info, visit: http://www.okdxf.eu/expedice/en/tc03w/www

The last activity (TC03W) this year marked the 5th year effort to activate all 7 Turkish IOTA groups. During these DXpeditions, some 85,529 QSOs were worked. Colored QSL cards for all previous activities are still available. If somebody still needs any QSL cards, just send via OK2GZ.

UF6 PIRATE STATIONS. Mamuka Kordzakhia, 4L2M, President of the National Association Radioamateurs of Georgia informs OPDX: "All amateur radio stations working from Abkhazia with prefix UF6 are illegals. All UF6V callsigns are pirates because the prefix UF6 is a Russian prefix, and Abkhazia is a part of Georgia and all amateur radio stations from the territory of Abkhazia must only use 4L prefix. Therefore, any amateur radio stations who receive a 4L license from the Georgian Communication Comission in Tbilisi City (capital of Georgia), can operate from the territory of Abkhazia."

VY0X QSL STATUS. Cezar, VE3LYC, informs, "The VY0X QSL cards are on their way to me. Once they arrive, I will be able to reply shortly to all those who submitted QSL direct requests for NA-208."

QSLS VIA LoTW: 2M0YIO, 4B2S, 9A2EU, DC1NSK, DL5ASK, DK8CX, DL3AXM, DT8A, EA1AR, EA5AWC, F5NBU, FO8RZ, GW3YRP, HA7TM, HB9BIN, HC8EP, HH2/OH2TA, HK3W, J39BS, JA1BNL, JA2VMU, JA5AUC, KG4SS, KL7AC, KV4FZ, LU8EKC, LV5V, MI0SAI, MU0GSY, NH2T, OH0Z, OH2BF, OK2ZC, OM5MF, ON7GB, OR2A, OZ5NJ, OZ7P, P40L, P49X, PA7CG, PD7BZ, PJ4/W9NJY, PJ5/AH6HY, PY0FF, RW4AA, SM2JUR, SP2EXE, SP2QCU, SP6CIK, SP8HXN, TF8GX, UA1AJW, UA4CR, UU2JQ, V44KAI, VE3EK, VE7UF, VK3TDX, VP2EMR, VP8NO, VR2YYW, VY2LI, WP4NEG, XE1AE, YB8FL, YS1ZC, ZD8ZZ, ZP5CGL and ZS2CR

QSLS RECEIVED VIA MAIL: 4U10NPT, 6W/HA0NAR, 7V2PI, 9A1HCD, 9L0W, 9M6/JK2VOC, 9U1VO, C31PP, CK8G, D2EB, IR0ROMA, J5NAR, KH6BB, PJ2/OH1VR, PY7XC/P, R1FJM, SV2ASP/A, TK/F4FGJ, YN2N and Z21BB

QSLS RECEIVED VIA THE BUREAU: 7J4AAL and ZL4M

SILENT KEY. It is with great saddness to report that the members of NODXA lost a good friend and DXer. Ron Klukan, W8WH, of Walton Hills became a "Silent Key" (SK) on Saturday, October 30th, at 11:00 PM. He will surely be missed. OPDX and its readers would like to send out our deepest sympathy to the family and friends of W8WH.

ST, SUDAN. Robert, S53R, will be active as ST2AR from Khartoum during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power/ Unassisted entry. QSL via S53R.

TJ, CAMEROON. Henri, F6EAY, who is in Cameroon for professional reasons and the duration of his stay is uncertain, just received his license to operate as TJ3AY. Activity will be on 40-6 meters using RTTY and SSB. Equipment at the moment is a R6000 vertical antenna and a dipole for 40 meters. He was heard this past week on 20/15/12/10 meters at various times. QSL is via F5LGE. It is suggested to be patient on the QSLs. QSL printing is not yet done; not until February 2011.

V5, NAMIBIA. Klaus, DJ4SO, will once again be active as V5/DJ4SO between now and December 1st. Activity will be on 160-10 meters using mostly CW and RTTY/PSK31, with some SSB. He plans to be in the WAEDC RTTY Contest (November 13-14th) and the CQWW DX CW Contest (November 27-28th). QSL via his home callsign, direct or by the bureau. His logs will be uploaded to LoTW.

VK0M, MACQUARIE ISLAND (Update). Kevin, VK4KEV, is now operating as VK0KEV from Macquarie Island (AN-005) for possibly up to 18 months. Activity will be mostly on 40 and 20 meters using SSB and the Digital modes. A report indicates the Kevin will erect a 5 band vertical antenna as soon as time permits. His operating schedule (outside his work duties) are unknown, but this past week he was heard between 0445-0700z and between 1000-1030z. QSL via JE1LET.

VP8/O, SOUTH ORKNEY ISLANDS (Update - VP8ORK Press Release #3 [The Low-Band Plan]): "Many have been asking about our low-band plans for the upcoming VP8ORK South Orkney DXpedition in January 2011. With antennas to cover 75, 80 and 160m simultaneously from sunset to sunrise, dedicated receive systems and top-of-the-line radios, we will be active on all these bands, every night, for almost two solid weeks. Rest assured that we're giving the low-bands a top priority.
Of course this doesn't mean we're ignoring 40m and up. It just means we're putting in a bigger effort than usual on those bands where the need is greatest.
We realize that lone operators at remote polar science stations often have limited time and equipment to make an effort on every band, let alone 80 or 160. This is why the big Antarctic DXpeditions are there to fill in the gaps. These expeditions offer experienced DXers a chance at working some new band-modes, and newcomers a chance at climbing the honor-roll. Here is a listing of our low-band arsenal:

Antennas:
160 transmit - The Battle Creek Special (160 main) 85 foot vertical wire supported by Spiderbeam telescoping pole
(160 backup).
80 transmit - SteppIR vertical with 80 meter coil (CW) (80m)
- 60 foot vertical wire supported by Spiderbeam
telescoping pole (75m)
- 60 foot vertical wire supported by second Spiderbeam
telescoping pole (backup)

160/80 receive - DX Engineering 4 square with DX Engineering preamp and DX Engineering splitters to feed 3 low band radios. Two
RX beverages as an option to 4 square dependant on
circumstances encountered on site.

Radios: 7 x K3 transceivers (sponsored by Elecraft)
3 x Acom 1010 amplifiers (sponsored by Acom)
2 x Acom 1000 amplifiers (sponsored by Acom)

Team: EY8MM, K9ZO, ND2T, 9V1YC, K0IR, N1DG, W3WL, K6AW, N6MZ, N4GRN, WB9Z, W7EW, and VE3EJ

I'm sure most of you recognize these calls. This team brings with it an unprecedented amount of experience in Antarctic DXpeditioning, contesting and low-band knowledge to ensure that all bands are covered from start to finish.
But, even with a great plan, the best equipment and experienced operators, activating the remote entities of the Southern Ocean is still one of the most challenging aspects of amateur radio. These islands are some of the windiest, coldest and roughest places on earth to survive, and just reaching them is an achievement in itself. Its no secret that private, non-governmental Antarctic expeditions come at an astronomical cost, and without support from everyone within the DX community these trips would simply not happen.
We're extremely grateful to have major DX foundations such as the NCDXF, INDEXA and the ARRL funding us with large donations. We're also thankful to have support from many worldwide DX clubs and commercial equipment sponsors such as Elecraft, Acom, DX Engineering and SteppIR. But even with all that, and each team member contributing over 12,000 USDs, it still doesn't even come close to covering the massive expense of a polar expedition. We need financial support from all of you.
If you haven't sent in a donation yet we hope you will consider joining those who have already stepped up to help. Our website www.vp8o.com gives full details of our trip, and is where you can contribute at whatever level you feel comfortable.
We look forward to working you on all bands!
73, James Brooks, 9V1YC
The Microlite Penguins DXpedition Team
VP8ORK South Orkney 2011"

WP3, PUERTO RICO. Alfredo (Al), WP3C, will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via W3HNK. Visit his Web page at: http://www.wp3c.qth.com

ZL7, CHATHAM ISLANDS. Oliver, W6NV, will be active as ZL7NV during the CQWW DX CW Contest (November 27-28th). QSL direct to his home callsign or LoTW.

ZL8, KERMADEC. Chris, DL1MGB, from the ZL8X DXpedition team, has put out a new press release this week on the ZL8X Web page at: http://www.kermadec.de
Excerpts from the release state that they have less than two weeks to go till they will be active from Raoul Island with the callsign ZL8X. All team members are highly motivated and can't await the start of the DXpedition. They mention that some of the guys are already on their way to New Zealand, and the group has already transported over 2.5 tons of equipment to New Zealand. The advance team will organize the equipment and take care of loading the equipment onboard the ship. Because the Jarvis DXpedition was postponed by one year, the vessel Braveheart was again available, and they will go now with this well-known ship. They also mention that within the last weeks the group decided to take some 6m equipment with them which will be organized by ZL hams. For the complete press release, please go to the above Web page.

RAC Bulletin 2010-031E - Field Organization Review Project
2010-11-09

I am pleased to report that a National Field Organization Review Project was started yesterday. With the assistance of Hew Lines VA7HU and Ian Snow VA3QT, and others, guidelines were adopted to review the entire RAC Field Organization including but not limited to:

Organizational structure
Focus
Training
Methodology
Communication to and from our members
Technology

This will be an ongoing process that will look at all aspects of how we operate and how we deliver Amateur Radio resources to our customers. If you would like to assist with this project, and feel that you have something to offer, I encourage you to contact the undersigned.

73
Doug Mercer VO1DTM CEC (vo1dtm@rac.ca)

DXNL 1701 - Nov 10, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

C5 - GAMBIA
The OM0C Contest Crew members Rich,OM2TW/OK8WW, Jiri,OK1RI, Jiri,OK1DO, Norbert,OM6NM, Roman,OM2RA, Joe,OM5AW, Lada,OK1DIX, Petr,OK1FFU, and Vlada,OK1NY, will be on the air as C50C and C52C from Nov 17-30. They will work with up to six stations simultaneously in CW/SSB on 160m-10m. They will take part in the WWDX CW Contest signing C5A in multi/multi. The QSL manager for all calls is OM2FY, who confirms via bureau also. Their homepage is: http://www.om0c.com/?Gambia_2010_-_C5A

EA6 - BALEARIC ISLANDS, EU-004
Peter,EA6/G3TKK, is working "holiday style" in CW, BPSK and RTTY from the Balearic Islands (EU-004) until Nov 14. QSL via homecall or LoTW.

GU - GUERNSEY, EU-114
MU/F4EGD, MU/F4ERS, MU/F5CWU and MU/F5NHJ on Guernsey (EU-114) are working with three stations in all modes on 160m-10m from Nov 9-19. QSLs via their homecalls, direct or via bureau.

OA - PERU
OM Hans,OE3NHW, is active again as OA6/OE3NHW (or as OA4/ from Lima) from Arequipa/Peru until the mid of March 2011. Right now QSOs to Europe are difficult but you can try longpath on 20m from 1000-1200 UTC or on 15m, 17m and 20m from 1200-1800 UTC. Hans is working in CW, RTTY and PSK, not so much SSB. He has a 5 band Spiderbeam for 10m-20m and a G5RV for 30m/40m, transceiver: Kenwood TS-480HX with max. 200 watts. QSL via OE bureau, eQSL or direct.

TJ - CAMEROON
Henri,F6EAY, is working in Cameroon now. He is licensed as TJ3AY and works in RTTY and SSB on 40m-6m with a dipole (for 40m) and a vertical. QSL cards via F5LGE, bureau ok.

V5 - NAMIBIA
Klaus,DJ4SO, had to cancel his Namibia trip on short notice because of
personal reasons. He announced a new date next year from Feb 22 until
Mar 23. Details will follow later.

VK0/M - MACQUARIE ISLAND, AN-005
Kevin,VK4KEV, showed up from Macquarie (AN-005) as VK0KEV like stated
in the last DXNL. He has been spotted in SSB and digital modes on 40m
and 20m from 0445-0700 and 1000-1030 UTC. He plans to build up his
5 band vertical soon.
Kevis has a QSL manager now, his call is JE1LET (direct only).

ZL8 - KERMADEC ISLANDS, OC-039
Another highlight of the year is coming up from Nov 19 until Dec 5.
DJ5IW, DJ9RR, DK1II, DL1MGB, DL3DXX, DL5CW, DL5LYM, DL5XL, DL6FBL,
DL8LAS, DL8OH, SP5XVY, and YL Victoria,SV2KBS, are going to activate
Raoul Island (OC-039) as ZL8X. They will have seven stations working
in CW, SSB and RTTY all around the clock. They ask everybody to make
only one QSO in RTTY because they are expecting to have a tremendous
pile-up in RTTY and want to provide a new one to as many as possible.
All information and QSL routes can be found on http://www.kermadec.de
An OQRS (Online QSL Request System) will be available later as well.
To check the local webcam on Raoul Island please visit:
http://www.geonet.org.nz/volcano/activity/kermadec-islands/cameras/raoul-latest.html
This is the bandplan of ZL8X (QRGs in kHz):
Band CW SSB RTTY
==
160m 1826.5 (1) 1843.5 (2) ---
80m 3522.5 +3 3782.5 (1) ---
40m 7022.5 +3 7182.5 +5 ---
30m 10102.5 +3 --- 10132.5 +3
20m 14022.5 +3 14192.5 +5 14082.5 +3
(+50 fuer General)
17m 18072.5 +3 18152.5 +5 18102.5 +3
15m 21022.5 +3 21292.5 +5 21082.5 +3
12m 24892.5 +3 24972.5 +5 ---
10m 28022.5 +3 28492 +5 ---
6m TBD (3) TBD (3) ---
(1) QSX down for JA; QSX up for the rest of the world.
(2) Maybe some SSB operation during the second half of the operation.
Split is announced on air.
(3) One station will function as a beacon. DX Cluster will be available
and watched for possible DX openings, only CW/SSB, no EME.

ZS8 - PRINCE EDWARD AND MARION ISLANDS, AF-021
Pierre,ZS8M, is temporarily QRT because the whole team is moving to a
new base. When they are finished he will install his equipment again.
A newsletter about his activities can be found at:
http://www.iz8epy.it/html/zs8m.html

5R - MADAGASCAR, AF-090
Eric,F6ICX, will be active again as 5R8IC from Saint Marie (AF-090)

working "holiday style" in CW, RTTY and PSK63 from Nov 15 until Dec 18.
He has 100 watts with verticals, Inverted Ls and a Hexbeam for 20m-10m.
QSL via homecall, also via REF bureau.
Please visit his homepage at: http://f6kbk.free.fr/5r8ic/5r8ic.htm

5W - WESTERN SAMOA, OC-097
John,VK2ZKY, is QRV as 5W0KY from Samoa (OC-097) until Nov 21. He is
working on HF and has been spotted in the ANZA net on 20m and 40m.
QSL via homecall.

5X - UGANDA
Alan,G3XAQ, will stay in Kampala from Nov 14 until Dec 1. He works
only in CW signing 5X1XA with 100 watts and a small yagi. He will join
the CQ WWDX CW Contest in a single band category (most likely 20m).
QSL via G3SWH. On Phil's homepage (http://www.g3swh.org.uk) there is
an Online QSL Request System where you can request direct and bureau
QSLs of more than 100 stations he manages.

Graham,5X1GS, is back in Kampala and will show up on the bands soon.
He was QRT since the beginning of this year because he was working in
South Sudan.

USA, SPECIAL EVENT STATION
Members of the "Yavapai Amateur Radio Club" (YARC) in Prescott/Arizona
will us the special callsign K7NRA on Nov 17.
For more information visit the YARC-website at: http://www.w7yrc.org

LIGHTHOUSE AND WFF OPERATION: Jose,CT1EHX, Toze,CT1GFK, Hermann,HB9CRV, and
Al,CT1GPQ, of the "Algarve STAR DX Team" will show up as CR6A from
Sardao Lighthouse (SW Aletejano Natural Park CTFF-12) on Nov 13/14.
They work in CW, SSB and RTTY on 80m-15m and one station will join the
WAE RTTY Contest. QSL via CT1GFK. See also: http://algarvedx.com

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The DXpedition to Sable Island (CY0) will take place from Dec 6-13.
See also: http://www.CY0dxpedition.com

UPCOMING CONTESTS

Nov 13/14: WAEDC RTTY Contest
Nov 13/14: Japan International DX Contest
Nov 13/14: OK/OM DX Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-037, 9L, Sierra Leone, North/West Province Group: Karl,DK2WV, and

Heino,DJ9AF, are signing 9L0W from the Banana Islands until Nov 18.
QSL via DK2WV (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

G1OCN LH 2880 Portland Island resident

****************************************
The ARRL Contest Update

Published by the American Radio Relay League
****************************************

November 10, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- ARRL Phone SS and Collegiate Championship
- Rattle Cross The Pond - WAE Digital
- Missing Your Calling
- A Soapbox Of Fun
- Contest Helmet
- Field Day and August UHF Results
- Tube Caps - Not What You Think
- Ballooning Antennary
- Sights For Sore Eyes

NEW HF OPERATORS - THINGS TO DO

If you have been thinking about RTTY contesting and would like to see
how it plays for DX contacts, the Worked All Europe
<http://www.waedc.de/> (WAE) Digital contest is this coming weekend.
Check out the interesting QTC feature of this contest, too. And the
following weekend - join the excitement of ARRL Sweepstake's "second
half" on phone.

BULLETINS

Your editor is currently out of his office and pestering the
inhabitants of ARRL HQ in theirs during a bi-annual visit to Newington.
This cuts down on the available time for collecting and editing
newsletter material, so this issue is a bit attenuated. Besides, don't
you have antenna work to finish up?

Don't forget that both ARRL Sweepstakes and CQ WW have moved the log
due date earlier than in past years! ARRL SS logs are due 15 days after
the contest (23 Nov for CW Sweepstakes) and CQ WW SSB logs are due on
Nov 21.

BUSTED QSOS

No reported bugs or "unintended features" in the last issue!
```

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Nov 13-14

- CWops Mini-CWT Test (Nov 10)
- Worked All Europe DX Contest--Digital
- Japan International DX Contest--Phone
- OK-OM DX Contest--CW
- Kentucky QSO Party
- CQ WE (Western Electric)
- Straight Key Weekend Sprint

Nov 20-21

- ARRL November Sweepstakes--Phone
- Collegiate ARC Championship--Phone
- Mongolia DX Contest
- LZ DX Contest
- All Austria 160 Meter Contest--CW
- RSGB 1.8MHz Contest--CW
- Homebrew and Oldtime Contest--CW
- Run For the Bacon--CW (Nov 22)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Having received a number of comments about "missing calls" during last weekend's CW Sweepstakes, the ARRL Contest Branch would like to make it clear that the Sweepstakes exchange MUST contain the call sign of the transmitting station. Yes, you have to send your call along with the serial number, precedence (your category abbreviation), check and section. It is not necessary to send the call sign of the receiving station before the exchange, but it is good practice to do so when stations are very close together and it might be unclear who is the intended recipient. This will be clarified in the contest rules.

Lest you think a monster station is required to make a big Sweepstakes score, Ralph N5RZ's CW Sweepstakes log of 1421 QSOs and 79 sections was made using a TH6DXX tribander at 50', a 2-element tri-band delta loop at 50', an 80 meter inverted vee at 50', and a ground-mounted Butternut vertical. The most important part of any contest station is between the ears!

The next issue of the Finnish contesting magazine PileUP! <http://www.helsinki.fi/%7Ekorpela/PU/PU.html> will see daylight on Jan 2, 2011. Compiled by volunteers, the editors are looking for your contributions on propagation, antennas, station accessories, international contest coordination, contesting history, your thoughts on this year's fall contest season, and humor! Contact the editors with your ideas - contributions are due by 31 Dec. (Thanks, Pileup! Editor Ilkka OH1WZ <oh1wz@sral.fi>)

Another couple of post-Sweepstakes reports have appeared that folks are sending around emails trying to confirm a QSO or some part of the exchange. Um, the contest was over at 0300Z on Sunday, fellas. "Log scrubbing", in which you go back and change the log to what you think you "should" have logged, isn't OK. The time between the end of the contest - when you put your metaphorical pencils down - and the log due date is to make sure your log file is properly constructed, that you have the right category of submission and operator information, and to resolve any computer file issues - NOT to go back and change the logged information. The proper response to any such fishing for information is that you'll be glad to discuss it after the log submission deadline. Check out the ARRL's "HF Contesting Guidelines <http://www.arrl.org/hf-operating-guidelines>" for more information.

Web Site of the Week - For a bowl full of bite-sized reading fun, try Dink N7WA's collection of the current 3830 SS CW soapbox <http://www.eskimo.com/%7Emwdink/3830/> comments from 3830 score postings. You'll find comments from Sweepstakes and other major contests, too! While you're at it, don't forget to post your photos and stories on the ARRL Soapbox page <http://www.arrl.org/contests/soapbox>, too.

WORD TO THE WISE

"I can copy 45 wpm. Unfortunately I can only remember 10 wpm." (Thanks, Bill W9OL)

==> SIGHTS AND SOUNDS

After last weekend's head-banger of a CW Sweepstakes, the contest helmet imagined by Jeff K1NSS of Dashtoons <http://www.dashtoons.com/> will surely make total sense!

Have you ever wondered what Sweepstakes sounds like overseas? Nick VK2DX (aka VK1AA) provides this nice snapshot of SS contest signals <http://www.genesisradio.com.au/VK2DX/log/ss_vk2dxxl.jpg> on the 40 meter band in urban Sydney, VK2. This was gray line propagation to the US East Coast, an hour before local sunset. WX3B (at W3LPL) and W9RE were the strongest signals, peaking well over S9. Here's another snapshot an hour after sunset <http://www.genesisradio.com.au/VK2DX/log/screen3_SSxl.jpg>. All the above signals are 12,000-15,000 km from VK2!

George K5TR has posted a number of interesting high-rate contest audio recordings online. For example, during a 359 contact hour, he has posted WAV files of the fastest 10 minutes <http://www.k5tr.net/audio/hc8n-best-10min.wav> and the entire hour <http://www.k5tr.net/audio/hc8n_20000304_hour1.wav>. Here's an MP3 of a 179 contact clock hour <http://www.k5tr.net/audio/contests/SS/SSB/2004/2004_K5TR_ss_ssb_2004-11-21_00:00.mp3> in ARRL Phone Sweepstakes. Jose CT1BOH has some very cool recordings of him doing some CW contests <http://www.qsl.net/ct1boh/audio.htm>, including a few from P40E <http://www.qsl.net/ct1boh/p40e.htm>. (He is

using two radios, so you will hear the audio from both.) And if you have ever wondered what it sounds like to be on the other end of one of those big DXpedition pileups, here is 9V1YC operating on 20 meters from VP8GEO <http://www.k5tr.net/audio/vp8/vp8geo_cw.mp3>. The wideband noise you hear in this recording is the 20 meter SSB station's phase noise.

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X, announces that Field Day results are online and the extended online version of the August UHF report by John K9JK will be posted on the ARRL Contest results Web page <http://www.arrl.org/contest-results-articles> in the next few days when supporting items such as Log Checking Reports are finished. Certificates for the 2009 ARRL 160 Meter Contest have been mailed and should be appearing in mailboxes across the land.

Nearly seven days after loading the 9482-QSO CQ WW SSB K3LR log into the ARRL's Logbook Of the World, eQSL, and the CQ WW email robot, what's the result? LOTW confirmations totaled 1743 confirmations or 18.9% based on net QSOs, with eQSL confirmations at 1356 or 14.7%. With international postage approaching $1, plus return postage, the card itself, and an envelope, the savings are substantial, to say nothing of the time savings. "Very cool," says Tim.

OPERATING TIP

With the long exchange of Phone Sweepstakes coming up - remember to breathe! Before giving your exchange, inhale so that you can say it all smoothly without interruption. Leave out the unnecessary and time-consuming phrases ("please copy" and "you are" come to mind) and give out the information in the same order every time. A regular breathing rhythm actually has a calming effect, helps minimize confusion, and fights off the dreaded "Uh..." panic attacks. Sound calm, cool, and collected like a veteran! (And don't forget to give your call in the exchange as required.)

==> TECHNICAL TOPICS AND INFORMATION

>From the online QST "Way-back machine" of searchable archives, Brad AA1IP contributed this outstanding example of the ham's proclivity for reuse in the July 1965 issue. "Try using the lid from a toothpaste tube as an attractive knob. Select a rubber grommet with an outside diameter that will fit tightly inside the toothpaste lid and at the same time will fit tightly over the control shaft, so that the combination will not slip. There are many styles, shapes and colors of toothpaste lids available." Brad wonders if that would still work on equipment containing a cavity magnetron. Arnie CO2KK chimed in with the observation that the wheels from broken toy cars and trucks also make great controls!

The daily LF through 6 meter propagation forecasts <http://www.solarcycle24.org/> by Thomas NZ4O are back after a ten

month period of illness. Welcome back, Thomas!

The popular software package of calculators HAMCALC by George VE3ERP cannot drive printers connected to computer USB ports, but there is a solution in the form of DOS2USB <http://www.dos2usb.com/>. The trial version can be used for 15 days for free and converted to a permanent license for a small fee.

Technical Web Site of the Week - With the 160 meter contest season looming, dreams of full-size verticals supported by balloons take shape in the minds of the antenna-challenged. Brian N9ADG has done just that and shares his pictures <http://www.n9adg.com/articles/antennas/blimp-or-balloon-for-160-meters.html> thereof - give it a try!

==> CONVERSATION

Sights for Sore Eyes

Due to the nature of this busy-ness trip, you're spared from my editorial ramblings this time and get to view some extra photos of contest activity around the bands in recent weeks. Enjoy!

73, Ward N0AX

==> CONTESTS

10 Nov through 23 Nov

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Mini-CWT Test--CW, from Nov 10, 1100Z to Nov 11, 0400Z. Bands (MHz): 3.5-14. Frequencies: Monthly on the second Wednesday, 18 to 28 kHz above band edge, multiple operating periods. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Worked All Europe DX Contest--Digital, from Nov 13, 0000Z to Nov 14, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial (see Web for QTC rules). Logs due: Nov 29. Rules <http://www.waedc.de/>

Japan International DX Contest--Phone, from Nov 13, 0700Z to Nov 14, 1300Z. Bands (MHz): 3.5-28. Exchange: RST and JA prefecture or CQ Zone. Logs due: Dec 31. Rules <http://jidx.org/>

OK-OM DX Contest--CW, from Nov 13, 1200Z to Nov 14, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or OK/OM district. Logs due: Dec 1. Rules <http://okomdx.crk.cz/>

Kentucky QSO Party--Phone,CW, from Nov 13, 1400Z to Nov 14, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: CW--1.815, 3.550, 7.050, 14.050, 21.050, 28.050, 50.090; SSB--1.855, 3.820, 7.240, 14.280, 21.390, 28.390, 50.190. Exchange: RST and KY county or S/P/C. Logs due: Dec 31. Rules <http://www.wkdxa.com/>

CQ WE (Western Electric)--Phone,CW,Digital, from Nov 13, 1900Z to Nov 15, 0500Z. Bands (MHz): 1.8-28, 50-440. Exchange: Call, name, Bell QTH, yrs of svc (see Web). Logs due: Dec 1. Rules <http://cqwe.cboh.org/>

Straight Key Weekend Sprint--CW, from Nov 14, 0000Z to Nov 14, 2359Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the second Sunday. Exchange: RST, S/P/C, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

Homebrew and Oldtime Contest--CW, from Nov 21, 1300Z to Nov 21, 1700Z. Bands (MHz): 3.5-7. Exchange: RST, serial, and category. Logs due: Dec 21. Rules <http://www.qrpcc.de/contestrules/hotr.html>

Mongolia DX Contest--Phone,CW, from Nov 20, 0000Z to Nov 21, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T) and CQ Zone. Logs due: Dec 31.

LZ DX Contest--Phone,CW, from Nov 20, 1200Z to Nov 21, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and ITU Zone or LZ district. Logs due: 30 days. Rules <http://lzdx.bfra.org/>

All Austria 160 Meter Contest--CW, from Nov 20, 1600Z to Nov 21, 0700Z. Bands (MHz): 1.8. Exchange: RST, serial, OE district. Logs due: Dec 31. Rules <http://www.oevsv.at/>

ARRL November Sweepstakes--Phone, from Nov 20, 2100Z to Nov 22, 0300Z. Bands (MHz): 1.8-28. Exchange: Serial, category, call, check, ARRL sec. Logs due: Dec 8. Rules <http://www.arrl.org/contests>

Collegiate ARC Championship--Phone, from Nov 20, 2100Z to Nov 22, 0300Z. Bands (MHz): 1.8-28. Exchange: See ARRL Sweepstakes. Logs due: Dec 8. Rules <http://www.collegiatechampionship.org/>

RSGB 1.8MHz Contest--CW, from Nov 20, 2100Z to Nov 21, 0100Z. Bands (MHz): 1.8. Exchange: RST, serial, UK district. Logs due: 16 days. Rules <http://www.vhfcc.org/hfcc>

Run For the Bacon--CW, from Nov 22, 0200Z to Nov 22, 0400Z. Bands (MHz): 1.8-28. Frequencies: Monthly on the third Sunday local time. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.com/fpqrprun.php>

VHF+ CONTESTS

Kentucky QSO Party--Phone,CW, from Nov 13, 1400Z to Nov 14, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: CW--1.815, 3.550, 7.050, 14.050, 21.050, 28.050, 50.090; SSB--1.855, 3.820, 7.240, 14.280, 21.390, 28.390, 50.190. Exchange: RST and KY county or S/P/C. Logs due: Dec 31. Rules <http://www.wkdxa.com/>

** COMET Ikeya-Murakami OUTBURST **

Comet Ikeya-Murakami (C/2010 V1) is definitely undergoing an
outburst event. Italian astronomers Ernesto Guido and Giovanni
Sostero assembled the following animation from images they
obtained between Nov. 4th and Nov 9th: The sequence clearly
shows an explosion in progress. "Only Nov. 7th is missing,"
they say, "because of rare cloudy skies over New Mexico, where
the remotely-controlled telescope we used is located." Read more

Following a successful season last January, the VK9NA team of
Alan, Kevin and Michael will be joined by Andrew VK1DA, for a
return to Norfolk Island in January 2011. Here is an opportunity
for those who missed adding VK9N to their log! With the VHF-UHF
Field Day falling in the middle weekend of this Dxpedition, this
will give many more the chance to get into a great location to
work Norfolk Island. Get your gear ready! This year the team will
have a particular focus on the Microwave bands from 2.4GHz to
10GHz, as we have unfinished business in this part of the
spectrum. This does not mean the lower VHF bands will be
neglected, as we will be operational on all bands from 50MHz to
10GHz. Modes operated will include SSB, CW, FSK441 and JT65
Also, after successful tests, we are pleased to announce VK9NA
will be on 2 metre EME this year. We have added a 12 metre long
Yagi (courtesy of Rex VK7MO), and look forward to extending
participation to vhf stations around the world. Accommodation
and Airfares are booked and planning is well under way. This year
we are hopeful of having 240volts. This along with an expanded
team will mean there will be more bands operational at more times
Make sure you don't miss out this year. For updates and schedules
keep your eye on: http://www.vk9na.com
Michael VK3KH for the VK9NA team

** CE/K7CA qrv from FG41JM on 50 MHz EME soon **

As those of you who worked K7CA this summer already know, Al is
taking a converted HF amp and 36' yagi with him down to Huasco,
Chile later this month. He tested out the system by making a dozen
or so 6m EME contacts this summer. CE/K7CA will be in FG41jm,
looking out over the ocean on moonset. I think he will be down
there for at least 2 months this trip, so there should be many
opportunities for contacts with stations in various locations
during his moonset. It is very exciting to finally have activation
of CE on 6m EME ;-) I am sure we will hear from Al if he is able
to be QRV by the next optimum period for EME at the end of this
month. SOURCE: tnx to Lance, W7GJ direct to MMMonVHF

** Craig K2LZQ is going to Chile begin 2011 **

When not fishing for trout and salmon will be active on all
3 bands. Six meters will be primary band. Have more in detail:

** VK4EME - QRV 70cm EME this weekend **

Hi Gents, I will be QRV on 70cm JT and CW again this weekend. My
EME windows are as follows : Fri 12 Nov 00:15 to 13:15 UTC and
Sat 13 Nov 01:00 to 14:00 UTC, Sun 14 Nov 02:00 to about 06:00 UTC
I usually call on 432.070 JT and 432.015 CW. I will be monitoring
HB9Q and N0UK loggers for signs of life!!! My set-up is: 16x 15 el
(4wl) DL6WU, full polarity, 100 watts, cavity FHX35 (0.38dB when
last measured) Skeds very welcome. Please email me with a proposal
if you are interested. If you have 20dBd of antenna _and_ an ERP
greater than 4 or 5KW _and_ a reasonably quiet QTH we should be
able to work JT, (add about 10dB for CW).
cheers, Allan (vk4eme"at"westnet"dot"com"dot"au) VK4EME QG63kq

** HF and 50 MHz Operation from 6V7 planned... **

Operators Matthias DL5MFL, Juergen DL4MAQ and Sven DF9MV are
planning to be active from the Le Calao resort, Senegal, on 8-
18 November 2010. A 6V7** callsign is being requested and will

be released when available. QRV 160-6 metres, using CW, SSB and digital modes. QSL via DE0MST. The DXpedition currently has a Blog page running at: dl4maq.wordpress.com/category/6w8-2010
SOURCE: [OPDX Bulletin] via ICPO Bulletin (05-12 November 2010)

** Next Operation from island of French St. Martin **

Nick, K9NB and John, K9EL will be operating from the island of French St. Martin (IOTA NA-105, DIFO FS-001, WLOTA 0383, Grid Loc. FK88) as FS/homecall between 25 November and 1 December 2010 and will be a casual entry into the CQWW CW Contest. Outside of the contest the plans are to be active on all bands 160-6m as conditions permit. Primary focus will be on CW with SSB and RTTY possible. QSL to home calls. Skeds welcome (k9el at comcast dot net).

** 6m activity from Cameroon **

TJ - Henri, F6EAY is now stationed in Cameroon "for professional reasons" and is expected to remain there for quite some time. He is active as TJ3AY and will operate RTTY and SSB on 40-6 metres. QSL via F5LGE. SOURCE: [F5NBU] via David, BRS25429 on UKSMG Announce

** ZL8X possible qrv 50 MHz **

The following was posted on the ZL8X Kermedec website (http://www.kermadec.de/index.php) today. The dxpedition will run from 19 Nov to 05 Dec: In the last weeks we decided to take some 6m equipment with us which will organized by ZL hams. The spare station will serve from the beginning as the 6m station. Besides a K3 and an ACOM 1000 it will contain a 5 element yagi and a rotator being put on a 10m mast. We are not sure what we can expect on the magic band but we will run the station as a beacon whenever possible, we will put the station near the cafeteria where there is always anyone available and we will watch the DX cluster network for possible openings. Equipped with a BGAN modem for Inmarsat we have the possibility to be online in the DX cluster 24/7 to get an immediate feedback of our operation from our audience. WIA Centenary

WIA Centenary Award - update

Claims for this popular operating award are still arriving, but if you're thinking of make a claim it must be done before the 30th of January 2011.

This limited issue amateur radio operating award is part of the celebration of the Centenary of Organised Amateur Radio in Australia.

Each claim is verified as meeting the award rules which appear on the WIA website.

A further 24 awards have been issued in the past week taking the total number so far to 336.

News from Central Queensland

Lunch with the WIA President

As this WIA National News goes to air this morning, Sunday November 14, hams in the Rockhampton region are listening to the special news transmission being made by the RADAR Clubs station VK4CHV live from the Rockhampton Heritage Village at Parkhurst.

The comprehensive static and live display (hopefully not to much static! hihi)of historical radio equipment and modern day apparatus is being inspected by WIA President Michael Owen VK3KI and WIA Board Member Ewan McLeod VK4ERM prior to the WIA QAC Lunch with the President, this year sponsored by the RADAR Club and being held at the Rockhampton Leagues Club during the afternoon.

Many local hams along with representatives from radio clubs right across VK4 will hear first hand about activities and plans the WIA are involved with and give valuable feedback to Michael and Ewan to assist in the future direction of the Institute and how it can best serve its members.

Make sure to keep the local call-back operators busy after the news transmission !

CSIRO have unveiled a new wireless technology designed to bring broadband to people living beyond the optical fibre network. If implemented, people living in the bush can connect to high-speed internet just by using a new set-top box.

Called Ngara, the organisation aims to re-use old analogue TV channels that will be fully switched off in 2013 to enable multiple users to upload

information at the same time, without reducing their individual systems' data transfer rate of 12 Mbps.

According to the organisation, this radio spectrum is a finite and highly valuable, natural resource.

CSIRO's spectral efficiency is three times that of the closest comparable technology and the data rate is more than 10 times the industry's recently declared minimum standard. Its 12 Mbps, six-user system works in the space of one television channel, which is seven megahertz (MHz) wide.

It is also currently completing the research and testing of the downlink part of the system, which will also run at 12 Mbps per user.

This means any rural property or business that can currently receive TV signals could in future connect to high-speed internet just by using a new set-top box.

FRIES WITH THAT?

McDonald's Australia is launching contactless credit card technology in its stores that will allow customers to pay without swiping, signing or using a PIN.

The technology, to be rolled out later this month, follows a number of other merchants moving into the contactless payment space, including convenient store chain 7-Eleven.

"With Visa payWave, customers see speedier transactions and they can pick up their food with just a wave of their card," McDonald's chief information officer Henry Shiner said in a statement.

A number of banks and financial institutions are already beginning to distribute contactless-payment cards, which operate via radio frequencies. Both the banks and merchants are emphasising the use of up-to-date security measures.

HAMS ACROSS AUSTRALIA.

VK0

MACQUARIE ISLAND, VK0. Kevin, VK4KEV is QRV as VK0KEV for about eighteen months while on work assignment. Activity is on 40 and 20 meters using SSB and digital modes in his spare time. QSL to home call.

Kevin is the most southerly member of the Maryborough Electronicsa Radio Group and has been seen/heard logging in to VK4TPT-L on 145.350 MHz.

Day time: 21.365 MHz. USB.

Overnight: (1830 - 0530 EST) 7.077 MHz. or 7.093 MHz.

You may also hear him on 7.130 MHz. from 1930 hrs, EST on Monday, Wednesday and Friday.

Short talks on interesting topics wanted - the Centre Victoria RadioFest No. 4 Organising Committee is keen to hear from anyone who can deliver a presentation as part of its mini-lecture program.

Anything that can be presented in a concise and interesting manner will be considered.

>From DC to daylight and beyond, antennas, techniques, special modes, home-brew, or DX operating aids, tips and hints.

A mini-lecture may also include a static display or active demonstration. Among those in the audience will be many who are new to amateur radio and ready to learn more about what the hobby has to offer them.

Anyone wishing to be part of the mini-lecture program should contact without delay the organising committee via email to radiofest@amateurradio.com.au or contact the coordinator Peter Cossins VK3BFG.

Plan ahead now for the Centre Victoria RadioFest No. 4 at the Kyneton racecourse on Sunday the 13th of February.

TARC AGM happening soon - catering numbers needed by this Tuesday

The 2010 Annual General Meeting of theTARCinc happens Sunday November 21st from 7am at Area 2 - Rossiter Park Aitkenvale.

The AGM will start off with a scrumptious Breakfast with pancakes!

Relay your AGM numbers as soon as possible to Phil VK4HSV, let the Townsville call-cack operator know straight after today's QNEWS.

OR 040 77 37 97 6

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

The two things that most clubs find over time that are the hardest to maintain are the recruitment of new members and the keeping of current members. When membership renewal time comes around, there is probably an unconscious cringe amongst the management committee and a sucking in of breath waiting to see how the numbers stack up.

When it does happen that there is a number of non-renewals, what does the club know as to why? It is no use just speculating or justifying past action or inaction with self serving excuses. It is no use to the other club members if people stand around wringing their hands and wailing.

There can be as many reasons as there are people involved. So what can we do?

Perhaps what is needed is some one from the membership who can personally contact the non renewed members. They can be given the brief to greet these people and explain that the club is sorry that they have not renewed their subscription. If they indicate they do not intend to rejoin, then ask if they can frankly say what their reasons are. This will help the club and its current members be more responsive to member needs. In marketing, it is stressed that people are receptive and responsive to the use of their name. For this reason, please, oh please, do not resort to impersonal, anonymous form letters or emails.

When we are losing a friend from the circle, the best response is to enquire why and do so directly and personally.

I'm Geoff Emery and that's what I think......how about you?

CLUBBING -

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from the Rockhampton and District Amateur Radio Club, The RADAR Club. This is Les VK4VIL reporting.

As this edition of QNEWS goes to air, more than 80 people from Gladstone, Townsville, Mackay, Bundaberg, Gympie, Maryborough and the Central Highlands are attending with a good rollup from the local club, the Qld Presidents Lunch.

WIA President VK3KI Michael will be accompanied by Federal Director, Ewan VK4ERM and will be inspecting the RADAR Club's new Museum and radio rooms prior to the luncheon, commencing at 1pm.

The visit to this site holds some significance.

During last year's luncheon in Brisbane, Michael invited radio club presidents, without notice, to indicate what their club was doing to promote amateur radio. Reporting on a visionary initiative by local club member, Jeff VK4NJB, Rockhampton President Jack VK4JRC was able to indicate that plans were in place to build a museum and radio shack at the Rockhampton Heritage Village and that a suitable building space had been allocated.

Twelve months later, following a mountain of work by a number of club members led by stalwarts Mike VK4LMB and Ray VK4HOT the museum is up and running and has already hosted numerous visitors and several school classes.

During the luncheon, Michael will cut a specially produced WIA 100 celebration cake and present long service medals to a number of members, the longest continuous service exceeding 60 years. Rumour has it that the luncheon is planned to continue late into the afternoon, or further and the venue booking confirm this.

RADAR Secretary Clive VK4ACC is to be congratulated for organising the event from start to finish. Well done Clive.

This is Les VK4VIL, on behalf or the Rockhampton and District Amateur Radio Club.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

TREC members entertained a couple of visitors to the Atherton Tablelands on Thursday, Ray VK4NET and xyl Wendy and Col VK4UCM and xyl Joan VK4FTVL were spending time exploring the many wonderful sites that our area has to offer. TREC members shared a delicious meal and pleasant time with them at Tolga. They reluctantly returned to Townsville on Friday vowing to return.

We are gearing up for the VHF/UHF Spring field day to be held on 20/21 November. TREC members will be on air from Hallorans Hill QH22rr and will be looking for contacts on 6 Metres, 2 Metres, 70 cm, 23 cm and the 3 cm bands.

This has been Dale VK4DMC and you are listening to QNEWS.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF and it is good to back with news from Redcliffe Amateur Radio club.

Next Monday night Mal, VK4UMS will be releasing the details of a proposed trip for all amateurs to the one and only Dayton Hamfest. Mal went last year and enjoyed it so much that he has been planning to have a tour group from the Brisbane area to attend. Would you like to go in 2011. If so come to the club house next Monday night, to hear all the costing and the side tours that have been organised.

The club had a fantastic Jota weekend. Despite the heavy rain fall preceding the event, the club put on a fantastic show for the scouts. Some of the highlights included some 113 kits were built by the scouts with assistance of club members and this was the first year for the holding of a scout fox hunts which were a great success.

Next year planning is under way to include trying to have broadband access so the EchoLink & IRLP stations can see the scout DX clusters on the web. In all a fantastic effort by all! A special thanks must go to Glen VK4FZ who organised this year's event with Andy VK4KY and the rest of the team leaders who looked after each specific activity.

The club also was involved in the National field day with a station located at the Redcliffe Jetty. This was well supported by club members and the club was host to Councillor Ray Frawley from the Moreton Bay Council & Lillian van Litsenburg, the State Member for Redcliffe who also attended and gave valuable support to the club. A detailed report has been sent to WIA.

There are plans to try to identify the sources of some Local HF noise in the Redcliffe area. This activity will be held next year and will try to identify the sources of man-made noise around the club house area.

And lastly the details of the club's Christmas party are as follows, it will be on Saturday 4 December at Jamieson Park, Scarborough. The park is on Reef Point road Scarborough. The event is a BYO food & drinks and tables and chairs and the club will provide the shelter. There are BBQ & toilets on site and take-away food is close by if needed. It will have an early start of 10am. So we can beat the usual Saturday crowds.

And a final final, if you are Interested in Spring UHF / VHF field competition could you speak to either Peter VK4EA or John VK4YJV.

Until next time 73 from Ray, VK4CF.

Central Highlands Hamfest 4 December at Miena

The Miena Hamfest is only weeks away and preparations are well under way with a good line up of traders from interstate who have already booked their places for Miena.

The Ham Fest is set down for the 4th of December commencing at 10.00 am and will conclude at approximately 2.00 PM entry fee is $5.00 dollars per person or family and goes towards the cost of running the event and will include free tea and coffee, soft drinks will also be available for sale food will be on sale from approximately 11.00am and will include the famous Miena Saveloys and sauce together with hamburgers and sausages in bread all made from the finest local ingredients.

If anyone has any thing that they think could add value to the day please do contact Dave, VK7OB

ACMA NEWS

The Australian Communications and Media Authority is proposing to continue to prohibit the supply, possession and operation of jamming devices designed to deliberately interfere with public mobile telecommunication services (PMTS).

PMTS services include 3G networks and equivalent services such as mobile WiMAX.

'Since the original prohibition was made in March 1999, technological, economic and social developments have resulted in a proliferation of devices that consumers use for the purposes of wireless communications. There is a growing reliance on mobile connectivity for personal and business transactions. These changes make the case for continuing a ban even more compelling, and this is reflected in the new, updated prohibition proposal.'

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Wireless charging for electric vehicles

A New Zealand company has launched wireless technology that allows parked or moving electric vehicles to charge automatically.

It has produced IPT (Inductive Power Transfer) technology enabling vehicles fitted with a receiver pad to charge automatically when parked over transmitter pads buried into the ground.

The press release gave no information on the frequencies the system would be using or any indication of any radio interference they may cause.

Read the Scoop news story at www.scoop.co.nz/stories/BU1010/S00905/nz-company-launches-first-wireless-electric-cars.htm

REBUILDING BROADCASTING FROM GROUND ZERO

An audio recording of the 2003 Audio Engineering Society conference detailing how radio and television broadcasting was returned to the metro New York City area following the September 11th 2001 terrorist attack by al-Quida is now on line at the AES website.

Immediately after the attack, broadcasters, especially TV stations, had to scramble to get back on the air or return their service to full coverage. A common solution was to broadcast from the Empire State Building, where many had been based before moving to the World Trade Centre. Nearly two years later, the then 115th AES Convention featured a session titled "Rebuilding of New York Broadcasting." It examined the events from 9/11 through getting broadcasters back up onto the air and exploring ways to make the broadcast systems of the city safer and more secure.

You can hear the entire 2 hour and 18 minute Podcast at tinyurl.com/911radio

G0JHC RECEIVES ROYAL ORDER AWARD

Neil Carr, G0JHC, has been awarded the prestigious Royal Order of Transatlantic Brass Pounders trophy that recognizes outstanding and consistent DX work.

The Royal Order of Transatlantic Brass Pounders trophy was first awarded in 1924.
The original Members of the Order were from those who operated transatlantic tests from 1921 to 1924.

As such, Neil Carr, G0JHC joins a small group of elite U-K operators who have earned this honour. RSGB President Dave Wilson, M0OBW and HF Awards Manager, John Dunnington, G3LZQ will visit G0JGC shortly to present the award.

==========

NEWS FROM ARNEWSLINE

COPPER THIEF ELECTROCUTED IN LOS ANGELES SUBURB

A man allegedly trying to steal copper wire from a vacant building in A Los Angeles neighbourhood was electrocuted on Saturday, October 23rd. This after he tried to cut through a power distribution site he apparently thought was deactivated but was still alive.

The incident took place at an electrical vault on a lot at Firestone Blvd., at the corner of South Gate Avenue. The lot was the former site of the Liberty Cable Company but has been unoccupied for more than a year.

According to police reports, the unidentified man was electrocuted and died at the scene. His female partner tried to pull him away from the vault when it caught fire and exploded, but the electrical current travelled through her body and she received severe burns. South Gate police spokesman Lt. Keith Huff said she was taken to nearby St. Francis Medical Centre for emergency treatment and then transferred Saturday night to the Grossman Burn Centre.

The couple's two small children were found in a truck about fifteen feet from the incident but were not injured. They were being held in protective custody by Children's' Services until other family members can be found and notified.

According to Lt. Huff, the explosion that took place at 4:14 p.m. knocked out power across the west side of South Gate. Electrical service was largely restored by the evening.

With the economic slide due to the recession continuing and California having one of the nations highest unemployment rates, copper wire theft for resale to the scrap metal market remains a major criminal activity, state wide.

EME STATION STOLEN IN NORWAY

Anders Thorrud, LA8LF, in Drammen, Norway reports over the VHF reflector that most of his Earth-Moon-Earth station equipment and all instrumentation was stolen in a recent burglary at his EME site. Also taken was most of his documentation including his EME logs from 1987 onward and his log from the last ARRL 23 CM EME contest during which he worked some 20 new stations. He is requesting that those who worked him as a new initial contact to please contact him with their QSO information.

KOLN RADIO MUSEUM REPORTS THEFT OF VINTAGE GEAR

Meantime reports that some prized vintage radio equipment was stolen in a burglary at Germany's famed K�ln Radio Museum. Among the pieces taken was a Otek Darling horn-type speaker dating back to 1926 and a Telefunken Arcolette receiver from 1927.

Details of the stolen equipment can be found in this Google English in a PDF file at tinyurl.com/museumradiotheft. The museum asks that anyone seeing this equipment for sale on Ebay or elsewhere should contact them immediately. You can reach the K�ln Radio Museum by e-mail to info@radiomuseum-koeln.de

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

Count down continues for The Spratlys DXpedition

With only 60 days to go until DX0DX hits the amateur bands the DXpedition Team Leader, Chris Dimitrijevic VK3FY & DU8/VK3FY has announced it will be extended to allow participation in the CQ World Wide 160m CW Contest.

He says while DX0DX was to go QRT on the 24th January, a couple of individual and keen members have asked if they could stay on air for that contest when ends at 2200 UTC Sunday the 30th of January. This will now extend DX0DX activation to 1st of February, 2011.

This limited extension was agreed in light of strong interest from Top Band contesters and the 160m band being the highest sought after in the DX0DX website online survey.

In another development, the pre-assembly, erection and tuning of eight HF yagi antennas in Fontana California went extremely well with the eight antennas tuned as per instructions to their allotted bands.

Each was then partly disassembled breaking down into four parts for allow for quick installation once they reach the island. Masts, rotators, masts and cabling have all been finalised.

Chris VK3FY & DU8/VK3FY says, well done to the Station & Planning Co-ordinator David Collingham K3LP for organising and attending the Pre-Assembly Gathering, and also DXpedition logistics coordinator Charles Spetnagel W6KK for his understanding in having all the equipment dispatched to his QTH and also for being part of the Pre-Assembly Gathering.

Special thanks for their hands-on contribution in this important phase of the exercise goes to DX0DX Team Leader Chris Dimitrijevic VK3FY, Nik Dimitrijevic VK3FNIK, Arnie Shatz N6HC, Bob Grimmick N6OX, West Coast Pilot Milt Garb W6QE, Dennis Juniper N7DDU, Byron Hunsaker NF6T and Richard Briano, who all attended the Pre-Assembly and Container loading gathering in Fontana, California over the weekend of the 30th and 31st October.

DX0DX will be on air from the 6th of January and now through to the 1st of February, 2011.

(Jim Linton VK3PC, Public Affairs DX0DX www.dx0dx.net)

Buddies in the Caribbean DXpedition group head back to St. Lucia

The 'Buddies in the Caribbean' DXpedition group which specializes in 100 watt or less low power radios and the Buddipole portable antenna systems is back again to St Lucia (J6) on Dec 5 &#65533; 13, 2010.

The entire DXpedition is limited to equipment that can fit in an airline "suitcase".

The eight operators are:
Budd/W3FF, Guy/ N7UN, Wey /K8EAB, Bill/W7ZT,
Todd/N4LA, Kent/K4MK, Gary/NX8L and Tom /W4OKW.

During the day, several teams will be battery-only, field portable either from St Lucia beaches or scenic mountain tops. The group has received a unique J6BP callsign for the ARRL 10m contest on Dec 11-12th.

QSL via LoTW, eQSL, or mail to the operator's home callsign (SASE required).

http://sites.google.com/site/caribbeanbuddies/

International Lighthouse and Lightship Weekend 2011

Strong interest is again being demonstrated in this popular annual 48 hour premier international goodwill event which sees radio amateurs going portable to put lighthouses on air.

Some 70 registrations from 18 countries have been received for the event on the 20th and 21st of August, showing their enthusiasm to be part of it nine months in advance.

Australia has 20 registrations so far, including a cluster in Bass Strait, a narrow dangerous stretch of water between Tasmania and Mainland Australia that has over 700 shipwrecks. Lighthouse navigation when

introduced greatly improved shipping safety.

On King Island both lighthouses will be activated this year. Tony Hambling VK3VTH/7 at the Currie Lighthouse while Laurie Davison VK7ZE has chosen the Cape Wickham light. And across the Strait at Gabo Island, Trevor Close VK3ATX has registered and is to be accompanied by a number of others.

Also in the Bass Strait cluster is the Gippsland Gate Radio and Electronics Club VK3BJA at Wilson's Promontory Lighthouse, the southernmost point of the Australian mainland, to Western Victoria is Cape Otway Light registered by Michael Adams VK3KMA, Point Lonsdale to be activated by the Geelong Amateur Radio Club VK3ATL, and Table Cape Light registered by Wayne Hays VK7FWAY.

Among the other countries with multiple registrations are England, Germany, Holland, Italy, New Zealand, and the United States of America. To find out more about the 14th International Lighthouse and Lightship Weekend on the 20th and 21st of August, or to make an online registration, visit the website illw.net

(Jim Linton VK3PC)

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Creation of a high-performance 'metal-insulator-metal' diode could change modern electronics.

Researchers at Oregon State University have solved a quest in fundamental material science that has eluded scientists since the 1960s, and could form the basis of a new approach to electronics

The discovery, just reported online in the professional journal Advanced Materials, outlines the creation for the first time of a high-performance "metal-insulator-metal" diode.

Diodes made previously with other approaches always had poor yield and performance".

Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

RSGB to investigate mystery signal

Many UK amateurs who operate on 501-504kHz have reported over the past month reception of an wideband signal between 498 and 502kHz.

The RSGB is investigating the matter, but it is possible that it is an early trial of a so called e-Navigation MFSK system that the maritime service is proposing for this part of the spectrum at WRC-12 preparation meetings.

(rsgb)

TUNNEL VISION

Recently theACMA received notice of interference to the 7 kilometre CLEM7 tunnel in Brisbane.

The interfering signal only occurred between 9.00-11.00am.

The CLEM7 communicating systems operate immediately above 403 MHz in the land mobile band.

Field Operations officers discovered that every week the interference changed direction.

Eventually they triangulated the direction towards Moreton Island, which indicated the interference could be associated with shipping, dredgers, wave and channel buoys.

Another thought was surveyors could be moving a malfunctioning or spurious differential global positioning system (DGPS) from location to location.

Eventually one of the team remembered hearing the same type of noise when working in Fiji and successfully identified the interference as coming from a weather balloon's radiosonde transmitter, which measures various atmospheric parameters and transmits them to a fixed receiver.

The Brisbane office of the Bureau of Meteorology quickly confirmed that a weather balloon is released every morning at 9.00 am with a radiosonde attached transmitting on 403 MHz. This of course explained why the position of the interference kept changing. The wind direction would be consistent for a week, for example, giving the teams great direction readings, and then suddenly change with a new wind direction.

While the met bureau have a spectrum frequency allocation of 400-403 MHz, the transmitter was drifting above this range and causing interference to CLEM7's land mobile radio systems.

DECEMBER ISSUE OF QST

If you put 100 hams in a room, you would have at least 100 ways to put up a stealth antenna. As N1GY discovered, neighbourhoods that might be averse to a stacked array of 6-element 20 meter Yagis usually don't have a problem with flagpoles.

In his article "Constructing a Flagpole Antenna," he tells readers that due to restrictions in his neighbourhood, he built a flagpole antenna.

With this and 100 W, he is able to work most of the stations he hears on 80-10 meters.

New offshore radio book: 'Death of a Pirate'

The website of the Wall Street Journal has published a review of a new book by Adrian Johns called Death of a Pirate, focusing on Major Oliver Smedley who launched the British offshore station Radio Atlanta in 1964, and was subsequently acquitted of the murder of fellow offshore station owner Reg Calvert.

Radio Atlanta arguably was home to Britain's most famous (or is that most infamous) DJ Screaming Lord Sutch

The book was published on 26 October.

The November edition of Amateur Radio magazine

Continuing on from last week's review of its contents, there's a full well-illustrated report on the Super Spring Time that saw the special callsign VK100WIA open Perth to the world over 12 days in a collaborative effort by seven groups, achieving 2,200 contacts.

There are further International Lighthouse and Lightship Weekend with reports from the Geelong Amateur Radio Club at the Point Lonsdale Lighthouse, and WICEN VK6WIE that activated the Guilderton Lighthouse about 80 kilometres north of Perth.

In technical articles Charlie Kahwagi VK3NX presents a noise meter suitable for measuring noise from the sun and the moon , while Jim Tregellas VK5JST has a detailed project RF voltmeter for transceiver measurements.

Shortwave Listening notes from Robin Harwood VK7RH includes references to harmful interference from two Over-The-Horizon radar systems, one in China and the other rumoured to be in Cyprus.

And a report on the Winter VHF/UHF field day experience by Phil Derbyshire VK2FIL and team that participated in the 24 hour multi-section of the contest, north of the Central tablelands area of New South Wales.

Amateur Radio magazine, a WIA membership service and also available at
selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

ALARA - AUSTRALIAN LADIES AR ASSOCIATION
http://alara.org.au
Net is held each Mondays on 3.580 MHz, commencing at 1030 UTC.
(1000utc during daylight saving)
geencee@picknowl.com.au

The sa YL Net has kicked off from Pretoria.

All YLs are invited to their next on the air meeting to be held November 28,
15:00 CAT on the Magalies repeater, 145,750 MHz, with a relay on 7 065 kHz.

The ladies can also join via Echolink, link to ZS6FCS-R.

You can also contact Annette via email to zr6d@ymail.com

WW SPECIAL INTEREST GROUP --- NAVAL

UK navy's website hacked:

Britain's Royal Navy was forced to lower its website after it was disrupted by
hackers, the Ministry of Defence said just last Monday.

A message on the website read:
"Unfortunately the Royal Navy website is currently undergoing essential
maintenance. Please visit again soon."

It comes just weeks after the government announced a 650 million pound
national cyber security programme.

"We can confirm that there was a compromise of the RN web over the weekend,"
a Royal Navy spokesman said in a statement.

"There has been no malicious damage; but as a precaution, the RN website has
been temporarily suspended. Security teams are investigating."

LOWDOWN

New 500 kHz permit in Czech Republic

OK2BVG has been given permission to operate between 501 and 504kHz with maximum power of 20W ERP until 1st September 2011.
11 countries in Region 1 are now authorised in this part of the 500kHz band and more information can be found on the IARU Region 1 website.

UK Dreamer's Band first transmission (8.760kHz)

Roger G3XBM, has transmitted a QRSS3 beacon signal on 8.760kHz under the terms of his recently-received licence. He thinks this may be a first in the UK.

TX was 4W from a TDA2002 audio IC matched into earth electrodes 20m apart.

The beacon message (callsign and QTH locator in QRSS3) was provided by a K1EL keyer chip and the frequency reference was an HF crystal divided down by 512 times in a 4060 divider IC.

Clear QRSS3 reception was possible 5.1km away from the transmitter location, detecting the signal with an 80cm loop fed into an E-field probe (Hi-Z input) into Spectran software. Marginal reception was just possible at 5.3km.

UK dreaming has started, if only modestly.

REWIND

THE XTAL SET BUILDERS

Amateurs would be very interested in a story on how a group of Amateur Radio Operators contributed a huge effort to the winning of the great naval battles in the Pacific during the second world war.

The same group then went on to kick start the digital computer industry from techniques developed during the war. John VK3TCT has written a story detailing some of the developments and how it came about, two men from the period were responsible for equipment development and took on one of the worlds great corporations, IBM.

IBM was forced to pay out a huge sum of money to the group and IBM did not catch these two men for fifty odd years. The article can be found on the Control Data Australia ex employees' website by just googling EXCDA and following the link 'What's New'.'

==> + FCC NEWS: FCC ISSUES REPORT AND ORDER ON VANITY AND CLUB STATION
CALL SIGNS

In November 2009, the FCC issued a Notice of Proposed Rule Making
(NPRM) -- WT Docket No. 09-209 -- seeking to amend the Commission's
Amateur Radio Service rules to clarify and codify existing procedures
governing the vanity call sign system. The NPRM also sought to revise
certain rules applicable to club stations. The ARRL submitted its
comments to the FCC on March 26. On Monday, November 8, 2010, the FCC
issued a Report and Order with its decisions. These new rules will take
effect 60 days after publication in the Federal Register.

In the Report and Order, the FCC amended and clarified its rules with
respect to Amateur Service vanity call signs "in order to promote
processes that are more equitable and administratively efficient." The
```

FCC has amended its vanity call sign rules to clarify the date on which the call sign associated with a license that is canceled due to the licensee's death becomes available for reassignment. The R&O also clarifies the exceptions to the general rule that a call sign is unavailable to the vanity call sign system for two years after the license terminates. As for club stations, the FCC has placed limits on who can file applications on behalf of a club, how many vanity call signs a club can hold and how many clubs can have the same license trustee. Read more here <http://www.arrl.org/news/fcc-issues-em-report-and-order-em-on-vanity-and-club-station-call-signs>.

==> + PUBLIC SERVICE: INDONESIAN HAMS CONTINUE TO SUPPORT COMMUNICATIONS AS VOLCANO STAYS ACTIVE

As the dual natural disasters of an erupting volcano and the aftermath of a tsunami continue in Indonesia, the Organisasi Amatir Radio Indonesia (ORARI) -- that country's IARU Member-Society -- continues to provide communication support to relief and government agencies. According to ORARI International Affairs Coordinator Wisnu Widjaja, YB0AZ, ORARI members are still working in the field at the site of the Mount Merapi eruption and the Mentawai tsunami: "We are working on the 2 meter band and on HF at 7.065 MHz." He asked that the 40 meter frequency and the IARU Region 3 Emergency Center of Activity Frequencies be kept clear from regular use. These frequencies are 3.600, 7.110, 14.300, 18.160 and 21.360 MHz . Read more here <http://www.arrl.org/news/indonesian-hams-continue-to-support-communications-as-volcano-stays-active>.

==> THE ARRL ON-LINE AUCTION: GOING ONCE, GOING TWICE, GONE!

With almost 200 items up for bid -- and almost 1000 bids placed -- the Fifth Annual ARRL On-Line Auction closed on October 25 with winning bids on every auction item. ARRL Business Services Manager Deb Jahnke, K1DAJ, said that she was happy with the responses the Auction received during its run. The generosity of many donors, Jahnke says, made it possible for the Auction to offer a diverse list of items that included transceivers, ARRL Lab-tested and reviewed equipment, vintage gear, one-of-a-kind treasures, mystery "junque" boxes and more. Read more here <http://www.arrl.org/news/the-arrl-on-line-auction-going-once-going-twice-gone-1>.

==> + THE DOCTOR IS IN: PACEMAKERS AND RF

Schley Cox, W4AMW, of Owensboro, Kentucky, told the Doctor that he's headed to see the cardiologist next week about a pacemaker. He's already started researching their use around RF and says he is happy to go all low power (QRP), if that's what's called for. Schley mentioned that he might also be able to operate his rig remotely -- perhaps 20 feet away, but he needs to know how to measure stray RF in the shack itself.

Here's what the Doctor had to say:

I haven't received actual reports of any pacemaker problems and that seems to go along with the info on the ARRL Web site <http://www.arrl.org/pacemaker>. Note that there are no power levels (or field strength) limits noted there, nor have I found any on manufacturers' Web sites. Thus knowing the actual field strength level in the station may not help. If it were me, I would start by talking to my physician. She won't be able to give you power limits, but perhaps could indicate symptoms to watch for while on the air so you could take appropriate action quickly if called for.

I would start with a careful RF safety evaluation, as required by the FCC anyway. While the FCC guidelines were not based on pacemaker interference, they should result in a reasonably safe environment. If your station is properly set up -- without common mode feed line current, for example -- most radiation should surround the antenna and there should not be much RF within the shack.

Calibrated RF field strength meters are available, but are quite expensive. Relative measurement is pretty easy -- look at any recent ARRL Handbook. If you had a simple field strength meter running at all times in the station (I'm thinking the diode and microampmeter type that doesn't require power), you could see if anything changed, and diagnose and repair as needed.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> + ON THE AIR: W1AW ANNOUNCES WINTER OPERATING SCHEDULE

With the switch from Daylight Saving Time to Standard Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. The standard times have not changed, but the UTC times have. Read more here <http://www.arrl.org/news/w1aw-announces-winter-operating-schedule>.

==> + ARRL SAYS "THANK YOU" TO VETERANS

On Thursday, November 11, here in the US and abroad, we celebrate Veterans Day, also called Remembrance Day or Armistice Day. Originally a holiday that marked the end of World War I -- the "War to End All Wars" -- this day has been set aside to honor all who have served their country. It was on November 11, 1918, on the 11th hour of the 11th day of the 11th month, that Germany signed the Armistice, formally ending the hostilities that had been ongoing since 1914.

The ARRL would like to take this opportunity to thank our service veterans. Whether they served on active duty or reserve, during peace time or time of conflict, they served their county with honor. We also would be remiss if we did not remember the families of those veterans

who kept the homefires burning bright; without their love and support, our veterans would have indeed been alone.

ARRL Headquarters has its share of service veterans: Contributing Editor Al Brogdon, W1AB (Army); Publications Sales Associate Mark Dzamba, KB1FMY (Air Force); Assistant VEC Manager Perry Green, WY1O (Army); Technical Editor Joel Hallas, W1ZR (Army); News Editor S. Khrystyne Keane, K1SFA (Coast Guard); DXCC Manager Bill Moore, NC1L (Army); Reprints Specialist Tony Nesta, AA1RZ (Navy); Membership and Volunteer Programs Manager Dave Patton, NN1N (Navy); Technical Relations Specialist Jon Siverling, WB3ERA (Army); Field and Regulatory Correspondent Chuck Skolaut, K0BOG (Air Force); Education & Technology Program Coordinator Mark Spencer, WA8SME (Air Force), and Archivist Perry Williams, W1UED (Air Force).

Thank you for your service -- your sacrifice and the sacrifice of your fellow service members is not forgotten.

==> + SECTION NEWS: NEW SECTION MANAGER APPOINTED IN WESTERN NEW YORK

Steve Ryan, N2ITF, of Ashville, New York, has been appointed Section Manager of the ARRL Western New York Section, effective November 2. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Atlantic Division Director Bill Edgar, N3LLR, after Scott Bauer, W2LC, announced his resignation for personal reasons on October 31. Bauer had served as Section Manager since January 2000. Read more here <http://www.arrl.org/news/new-section-manager-appointed-in-western-new-york>.

==> SOLAR UPDATE

Tad "Now I believe the Sun is gonna shine <http://www.youtube.com/watch?v=PXyzDpLjMK0>" Cook, K7RA, reports: The average daily sunspot numbers and solar flux increased over the past week, with sunspot numbers up 7.4 points to 33.1, and solar flux up 2.1 points to 84.2. Four new sunspot groups have appeared since November 4. The latest forecast shows predicted solar flux at 86 on November 11-12, 85 on November 13, 83 on November 14-18 and 85 on November 19-25. The predicted planetary A index for the next week is 5. Last year, Steve Nichols, G0KYA, wrote the bulletin for us on October 30, and he has just published a free online book -- Understanding LF and HF Propagation -- with G3NYK. You can download it from Steve's blog <http://www.g0kya.blogspot.com/>. Look for more information on the ARRL Web site on Friday, November 12. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Eagles' No More Cloudy Days <http://www.youtube.com/watch?v=PXyzDpLjMK0>.

==> + SILENT KEY: JOHN W. SODERBERG, W1AKV (SK)

John Soderberg, W1AKV, of Weston, Vermont, passed away on November 7. He was 90. Soderberg, an ARRL member, was one of the inventors of

the spherical array and its associated electromechanical compensator that was the primary acoustic (sonar) sensor subsystem on three generations of Navy nuclear attack and fleet ballistic submarines. He was also a key member of the Underwater Sound Laboratory (USL) engineering team that developed sonar and related systems for the submarines. According to friends, he was walking the hills for miles with his German shepherd and working CW just days before his death.

==> + SILENT KEY: MILTON A. SULLIVAN JR, EX-K8YDO, FORMER CHIEF ENGINEER AT R. L. DRAKE (SK)

Milton A. "Buddy" Sullivan Jr, ex-K8YDO, of Washington, DC -- the former chief engineer at the R. L. Drake Company <http://en.wikipedia.org/wiki/R._L._Drake_Company> -- passed away from a stroke on October 28. He was 85. Sullivan designed and oversaw the designs of all the most significant Drake Amateur Radio products, including the 1A, 2B and 2NT transmitter, all the 4 lines and the beginning of the 7 line. After retiring from Drake in 1984, Sullivan ran his own business selling and setting up satellite television systems, an offshoot of his later projects at Drake that involved designing satellite equipment. After that, he went back to work full time as chief engineer for Lytton Electronics, where he worked until his final retirement in 1990. In 1993, he and his wife Judith moved to South Carolina where Sullivan worked for Alpha Delta, the small company owned by his former Drake colleague and long time friend, Don Tyrrell, W8AD. Sullivan donated his body to science. A US Navy veteran, he will be interred at Arlington National Cemetery after a term with the Georgetown University Medical School. -- Thanks to John Sullivan and Don Tyrrell, W8AD, for the information

==> THIS WEEK ON THE RADIO

This week:

- November 13-14 -- Kentucky QSO Party; WAE DX Contest (RTTY); OK/OM DX Contest (CW)
- November 13-15 -- CQ-WE Contest
- November 14 -- SKCC Weekend Sprint
- November 17 -- QRP Fox Hunt
- November 18 -- NAQCC Straight Key/Bug Sprint

Next week:

- November 19 -- YO International PSK31 Contest; QRP Fox Hunt
- November 20 -- Feld Hell Sprint
- November 20-21 -- LZ DX Contest; All Austrian 160 Meter Contest; RSGB Second 1.8 MHz Contest (CW)
- November 20-22 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North American Collegiate ARC Championship (SSB)
- November 21 -- EU PSK63 QSO Party; Homebrew and Oldtime Equipment Party

- November 22 -- Run for the Bacon QRP Contest
- November 24 -- SKCC Sprint; QRP Fox Hunt

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Amateur Radio Newsline(tm) Report 1735 - November 12 2010

Amateur Radio Newsline report number 1735 with a release date of
Friday, November 12th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio continues its emergency respond in
Indonesia, a South African ham helps save two on board a stricken
yacht; the FCC closes a number of loopholes in the Vanity Call Sign
program, Dayton says its time to start sending in nominations for the
2011 Hamvention awards and W5KUB to provide a day long streaming video
tour of M-F-J. All this and more on Amateur Radio Newsline(tm) report
number 1735 coming your way right now.

RESCUE RADIO: HAMS RESPOND TO INDONESIAN TWIN DISASTERS

Amateur radio is doing its part after a pair of disasters hit Indonesia
back to back. Jason Dee, VK2LAW, of the WIA News has the latest:

--

Following two natural disasters, an earthquake triggered tsunami and
separately an erupting volcano, radio amateurs are providing their help
as the enormous response effort continues.

ORARI, the Organization of Amateur Radio in Indonesia's International
Affairs coordinator, Wisnu Widjaja YB0AZ has provided initial
information about the nvolvement of radio hams in the dual disasters
that hit the Indonesian archipelago this week.

He said that the ORARI Communication and Rescue Task Force has joined
the team of the Disaster Management of Directorate General Post and
Telecommunications, Ministry of Communication and Informatics Republic
of Indonesia.

They has been operating in the field and provide communications support
to the government and communities in the area where the eruption of
Mount Merapi catastrophe at Yogyakarta province and the earthquake also
followed by tsunami at Mentawai of West Sumatra, said Wisnu YB0AZ.

Media reports that at least 170 died, mostly drowned after the tsunami
triggered by a 7.7 magnitude offshore earthquake struck the Mentawai
islands late Monday week off the west coast of Sumatra. Up to 400
others are missing.

While on the island of Java, several hundred kilometres away, 29 were killed when the volcano, Mount Merapi, erupted on Tuesday releasing clouds of hot gas, rocks and laver into the air. almost 42,000 people had fled to temporary shelters around the nearby city of Yogyakarta as the area is covered in volcanic ash.

I'm Jason, VK2LAW

--

The remoteness of the affected areas, poor communications, and the ongoing disaster response and relief efforts are likely to see the Organization of Amateur Radio of Indonesia Communications and its rescue task force involved for some time yet. (VK3PC)

**

RESCUE RADIO: SOUTH AFRICAN HAM HELPS RESCUE STRANDED YACHT

A real time rescue at sea with the aid of a South African sailor and ham radio operator. Hamnet's Francois Botha, ZS5BUU is here with the details:

--

Roy Cook, ZS5CB was instrumental earlier this week in the rescue of 2 yachtsmen aboard a yacht called Houbo that ran into difficulties off the coast of Mozambique. Roy had intercepted a call for assistance, via a Ham Radio marine VHF monitoring frequency, and contacted NSRI Richards Bay on Saturday afternoon the 30th of October.

He reported that the yacht Philigic had by chance come across the yacht with two Frenchmen, on board and in a desperate state of disrepair, some 200 nautical miles off-shore from the Mozambique coast. The yacht Houbo unfortunately had been caught up in severe tropical weather out at sea and had not only capsized and corrected itself but that the two yachtsmen had lost most of their food, drinking water, and that the boat had been severely damaged. Their radio equipment and antenna system was non functional with result they could not radio for help.

Richards Bay NSRI under the control of Dorian Robertson indicated that the yacht was out of range for a rescue operation but the team were placed on alert to monitor the situation. Roy, in the meantime had been able to maintain contact with the other yacht and kept the Richards Bay NSRI up to date with information on the progress of the two yachts.

Once the yachts were in South African waters by Monday afternoon around 16h00, the Richards Bay NSRI launched the rescue craft and rendezvoused with the Houbo 12 nautical miles off-shore in a 25 knot North Easterly wind and a 1 to 2 meter swell. A towline was attached to the yacht and safely brought to the safety of Richards Bay harbor.

Both the yachtsmen were unhurt but will spend quite a while repairing the yacht before they continue on their journey.

Reporting for Hamnet this is Francois Botha, ZS6BUU.

--

The final destination of the damaged yacht is at this stage is unknown, but it may be a long time before its back at sea. (ARMI)

**

RADIO LAW: FCC CLOSES LOOPHOLES IN VANITY CALL PROGRAM

The FCC has closed some loopholes in the vanity call sign program. Mark Abramovich, NT3V, reports from the City of Brotherly Love:

--

It has been nearly 14 years since the Vanity Call Sign system was rolled out by the Federal Communications Commission. And, in that time, tens of thousands of amateurs have taken part.

The regulatory panel decided only last year it might be time to revisit some issues that it felt were either left unresolved or needed clarification.

Now, the FCC's report and order are out regarding the vanity call sign system and there are some adjustments.

There is one, though that the FCC did not go for - a request to eliminate the fee for a first-time application for a vanity call sign -and the renewal fee for that call sign.

The fee for each will remain $13.30.

The term of the license, like the standard amateur radio license, is 10 years.

Something else also contained deeper in the report and order was discussion and a decision regarding restricting an applicant's vanity call sign to the call region in which he or she lives.

The FCC notes in discussion of this issue that "the applicant's choice of vanity call signs would be reduced to 10 percent of less of the call signs that would otherwise be assignable to the station."

The FCC continues "a limitation based upon the person's place of residence...could easily be circumvented by using a mailing address in another call sign region."

Therefore, the FCC decided there will be no change in the existing rules which allow someone say in the Third Call area to apply for a vanity call sign in any area, including the Third Call area.

What else?

>From now on, any new trustees for a club station license or vanity call sign may not serve as a trustee for multiple clubs and station licenses. But those who already do so will be grandfathered - meaning

they can continue to do so for now.

And, there are also new restrictions on who can file applications on behalf of a club regarding a change in trustee. That application must now be signed by an officer of the club making the application to the Club Station Call Sign Administrator.

The FCC says this should "prevent a departing trustee from making off with the club license and call sign, or refusing to agree to a change in trustee."

The FCC also says this requirement will also address "instances in which a trustee becomes incapacitated."

And, finally, what about the two-year wait until the call sign of a deceased ham can be assigned to someone else in the vanity system?

The FCC decided to clarify that issue by stating that the countdown -so to speak - would begin on the date of death of the licensee and not the notification date to the FCC.

In addition, the FCC decided to add a 30-day waiting period before that canceled license - due to death - is put into the database and available to give all an equal opportunity to complete for the license.

And what about the close-relative exception - that is a close relative being put first in line to apply for the call sign of a deceased relative as a memorial to that person?

The FCC says that's now the rule and clarified who is covered.

Here's what the FCC decided: "the term in-law is to include only a parent, stepparent, sibling, or step sibling of a licensee's spouse, and the spouse of a license's sibling, step-sibling, children or stepchild, or the spouse of a licensee's spouse's sibling or step-sibling.

That expands the pool of relatives quite a bit.

And, finally, the FCC says if you held a license and let it expire, you'll be able to get it back within a two-year window before it's entered in the vanity call sign system.

And, one more thing for those of you who still might hold a Novice license.

The FCC now says you can be the trustee of a club station license.

The FCC reasoned that the license classification "is not a reason to prohibit them from being club station trustees, for frequency and operating privileges are determined soley by the class of the operator license held by the control operator, rather than the license held by the club station trustee."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

In summarizing the changes, the Commission said that it believes that the public interest will be served by amending its rules in order to make the amateur service's vanity call sign system more equitable and transparent. It also believes that changes in the rules governing club station licensing will promote a more equitable and administratively efficient licensing process. (FCC, ARNewsline(tm))

ENFORCEMENT: UNKNOWN SIGNAL AT 500 KHZ BEING INVESTIGATED

The Radio Society of Great Britain is beginning an investigation of a mystery signal in the 500 Kilohertz band. This, after UK radio amateurs who operate from 501 to 504 kHz over the past month have reported reception of a wideband signal between 498 and 502kHz.

The RSGB is looking into the matter. It says that the signal may be an early trial of a so called e-Navigation system that the maritime service is planning to propose for this part of the spectrum at the WRC-12 preparation meetings. (RSGB)

RESCUE RADIO: RAC BEGINS REVIEW OF ITS NATIONAL FIELD ORGANIZATION

Radio Amateurs of Canada began its National Field Organization Review Project on Monday, November 8th. With the assistance of Hew Lines, VA7HU, Ian Snow, VA3QT, and others, guidelines were adopted to review the entire Radio Amateurs of Canada Field Organization including but not limited to such aspects as the overall structure, the groups focus, the training it affords members and several other points crucial in an emergency communications and public service environment

According to the Radio Amateurs of Canada news release, this will be an ongoing process that will look at all aspects of how the program operates and how it can better deliver amateur radio resources to those it serves. Canadian hams looking to assist are asked to contact Doug Mercer, VO1DTM. Mercer is the Radio Amateurs of Canada Vice President Field Services. His e-mail is vo1dtm (at) hotmail (dot) com. (RAC)

RESCUE RADIO: ANOTHER FALSE RESCUE BEACON DOWN-UNDER

An improperly disposed of personal rescue beacon recently caused a major T-hunt in New Zealand. Graham Kemp of the WIA News has more:

--

Rescue services were alerted after Tauranga Airport in ZL and an aircraft flying over the Bay of Plenty picked up a distress signal in the region.

A helicopter from Rotorua narrowed down the search area, and Radio. Spectrum Management traced it to the Te Maunga refuse transfer station. The beacon was located in the recycling center.

The Rescue Coordination Centre New Zealand said the beacon had been placed on a glass conveyor belt and was probably triggered when it was lifted off the belt and set aside on a railing. The beacon was operating on the old 121.5MHz or 243MHz frequencies.

The incident served as a reminder for people all around the world to dispose of old beacons properly, either by disconnecting the battery or taking the beacon to police, the coastguard or a beacon retailer.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia

--

No word yet on who the beacon locator beacon belonged to or how it wound up in a trash dump. (WIA News)

**

ENFORCEMENT NEEDED: NEW WAY TO ELECTRONICALLY PILFER MOVIES MADE PUBLIC

Illegal downloading pirated films are no longer Hollywood's worst nightmare, but that's only because of a newer criminal enterprise in the form of equally illegal offshore subscription services. Fred Vobbe, W8HDU, has the rest of the story:

--

Foreign businesses, often with criminal connections collect illegally obtained movies into what are called Cyberlockers. Cyberlockers are similar to Internet storage sites used by individual consumers to squirrel away pirated video. But news reports say that the for-profit version has spawned an array of sophisticated and seemingly reputable websites selling unlimited digital movie files for as little as $5 a month.

Fred Huntsberry is the chief operating officer for Paramount Pictures. He recently detailed the evolution of the latest in professional

electronic movie piracy methods for hundreds of European movie theater operators attending an opening-day seminar at Cinema Expo.

According to Huntsberry It is quite common for Hollywood movies to be made available via illegal for-profit websites within days of theatrical release. He notes that the advent of global releasing now allows the proliferation of individual titles into an array of languages within the first month of a theatrical debut. When movies are later released on DVD and Blu-ray Disc, the illegal Cyberlocker sites upgrade the quality of video offered by the illegally camera recorded images to pristine digital copies.

Cyberlocker-based businesses operate from Russia, Ukraine, Colombia, Germany, Switzerland and elsewhere. Several even sell advertising to mainstream, often-unwitting advertisers.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

Paramount's Huntsberry added these Cyberlockers now represent the preferred method by which consumers are enjoying pirated content. (Published news reports)

HAMVENTION 2011: NOMINATIONS NOW OPEN FOR HAMVENTION AWARDS

The Dayton Hamvention is soliciting nominations for its 2011 Technical Excellence, Special Achievement and Amateur of the Year Awards. Also, by popular demand the Hamvention has decided to continue its new Radio Club of the Year Award and to make it a permanent addition of the Hamvention Awards program.

By way of review, the Amateur of the Year is for the special person who has made a long term or lifelong commitment to the advancement of amateur radio. He or she must be a well-rounded individual who has contributed to our hobby in some outstanding way.

The Special Achievement Award is for the person who has made an outstanding contribution to the advancement of amateur radio. This award is usually given to a respected amateur who spearheaded a single significant project.

The Technical Excellence Award is presented to a radio amateur that has made an outstanding technical advancement in the field of amateur radio.

Lastly, the new Club of the Year award recognizes a radio clubs accomplishment, activities, and its service to the public.

To be considered for any of these awards, completed nominations must be submitted no later than January 15, 2011. Nomination forms can be found at www dot Hamvention dot org in the awards section or with your Yahoo Groups login directly at tinyurl.com/2alox4g. Send your completed nominating forms and substantiating documentation to Hamvention 2011, Attention Awards Committee, Post Office Box 964, Dayton, Ohio, 45401-0964. Again, the cutoff date to submit nominations is January 15, 2011. (DARA)

NAMES IN THE NEWS: W8ROG NAMED KNIGHT OF THE LEGION OF HONOR

Some names in the news. First up is Ken Kott, W8ROG, of Macomb County Michigan. Kott has recently been named Knight of the Legion of Honor for his actions during World War Two.

The award notification issued by Consul General of France, Graham Paul, reads in part: "This outstanding distinction is the highest honor that France can bestow upon those who have achieved remarkable deeds for France. It is also a sign of true gratitude for your invaluable contribution to the liberation of France during these difficult times in the History of our nation."

In addition to radioman and reconnaissance duty with the 3rd Armored Division in Europe during WW2, Kott also taught Morse code in the Army.

Ken Kott, W8ROG who at age 90 is still an ardent C-W operator is also the father of former Worldrado editor Nancy Kott, WZ8C. (WZ8C)

**

NAMES IN THE NEWS: N2ITF APPOINTED SM FOR WEST NEW YORK

And word from the ARRL that Steve Ryan, N2ITF, of Ashville, New York, has been appointed Section Manager of the ARRL Western New York Section, effective November 2. Ryan will finish out the term of Scott Bauer, W2LC, who announced his resignation for personal reasons on October 31st. Bauer had served as Section Manager since January of 2000. ARRL Membership and Volunteer Programs Department Manager Dave Patton, NN1N, made the Ryan appointment in consultation with Atlantic Division Director Bill Edgar, N3LLR. (ARRL)

RADIO PROBLEMS: PROPOSED NEW BUILDING IN NYC COULD LEAD TO RECEPTION PROBLEMS IN NJ

A New York City developer's plan to build a new 67 story building in midtown Manhattan is drawing a closer look from the regions broadcasters. They are worried that the structure could partially block their transmissions from atop the nearby Empire State Building. Bruce Tennant, K6PZW, reports::

--

The skyscraper, named 15 Penn Plaza, is to be built just two blocks from the Empire State Building. Empire as it is known in the broadcast field has been the home for most FM and television broadcasters in the city since the 911 al-Quida terrorist attacks that leveled the twin towers of the World Trade Center. As a result, Empire is currently home to 19 FM stations and most of the city's television transmitters and had served that same purpose before many stations had moved to the taller World Trade Center.

Vornado Realty Trust is the developer behind the proposed 1,190-foot building at 15 Penn Plaza. By comparison, Empire is 1,250 feet, plus a 204-foot antenna structure. Some local observers agree that 15 Penn Plaza could cast a significant signal shadow southwest of the city, and in particular affect FM listening in the New York suburbs.

Jim Stagnitto is the Director of Engineering for New York Public Radio. He says that he is concerned about both of his FMs at the Empire State Building. He notes that without a predictive study to examine, there isa really no way to predict how bad it could be.

Josh Hadden is Stagnitto's counterpart for Clear Channel Radio in New York. He says that his company is studying the different potential impacts the building could have on his facilities adding that they are watching the development of the plan closely.

Reporting for the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The building's designer, Pelli-Clarke-Pelli Architects, is known for designing some of the world's tallest buildings, including the Petronas

Towers in Malaysia. According to observers, Vornado officials have thus far not indicated any interest in building broadcast facilities atop the new tower. (RW, other published reports)

**

HAM RADIO IN SPACE: ASTRONAUTS TAKE PART IN GROUND BASED ARISS TRAINING EXERCISE

Turning to ham radio space related news, word that astronauts Joe Acaba, KE5DAR and Aki Hoshide, KE5DNI participated in simulated ARISS school contact with students attending Ralph McCall School in Airdrie, Alberta, Canada. This, on Tuesday, October 26th. The simulated contacts are training sessions for the astronaut hams using ARISS equivalent equipment to make terrestrial-based amateur radio contacts. Acaba, who is slated to fly with Expedition 31, also had an ARISS refresher course on Wednesday, October 27th for his upcoming mission in 2012. (ANS)

HAM RADIO IN SPACE: NANOSAIL-D TO LAUNCH NOVEMBER 20

NanoSail-D, carrying an Amateur Radio beacon on 437.305 MHz, is planned to launch on November 20th. The spacecraft will be carried into space on board Minotaur-4 rocket. Once in space, NanoSail-D will be in a low earth orbit at 9 degrees inclination. The orbit will be elliptical, 685 km apogee and 340 km perigee, degrading to 200 km at which time it will de-orbit. While in space NasnoSail-D will transmit a beacon signal on 437.305 MHz operating AX25 protocol with one 1/2 second burst every 5 seconds. (AMSAT)

**

WORLDBEAT: SOUTH AFRICA'S REMEMBRANCE DAY

South Africa's annual Remembrance Day service was to be transmitted Sunday November 14th on the radio program Amateur Radio Mirror International. The service, conducted by the Reverend Jan Kramer, ZS6JRK, is a memorial of radio amateurs who lost their lives in service of their country. The script reading was to be in English and the service in Afrikaans. Clubs wishing to retransmit the service on their local repeater can down load a MP3 audio file. Send an email to armi at sarl dot org dot za to receive details of the URL. (ARMI)

**

WORLDBEAT: UK HAMS TO HOLD SOS RADIO WEEK IN JANUARY

The next United Kingdom SOS Day will take place on the 28th of January and the Lifeboat Amateur Radio Society will, once again, be organizing SOS Radio Week to coincide with it.

SOS Radio Week is a nine days non-competitive, operating occasion held as a fund raising event by United Kingdom radio amateurs for the Royal

National Lifeboat Institution.

Taking part is easy. If you are a UK ham, simply take your web browser to saosradiowqeek.org.uk to register. (Southgate)

**

WORLDBEAT: CELEBRATING 20 YEARS OF GERMANYS REUNIFICATION

On the air, listen out for the ham radio festivities surrounding the 20th anniversary of the reunification of Germany are taking place in the city of Bremen. To help in the celebration, the Amateur Radio Club of Bremen has activated the special callsign DL20YDM until August 31st of 2011. If you work this one please QSL as directed on the air. (Various)

**

DX

In DX, the Buddies in the Caribbean DXpedition which is a group which specializes in 100 watt or less low power operation and the Buddipole portable antenna systems is headed back to St Lucia. They will be there from December 5th to the 13th operating portable J 6 from a north shore villa location. There will be three stations in operation at various times on 160 through 10 meters using CW, SSB, and RTTY. Callsigns to listen for are W3FF, N7UN, K8EAB, W7ZT, N4LA, K4MK, NX8L, and W4OKW. . QSL with a self addressed stamped envelope to each operators home call or electronically using Logbook of the World or eQSL.

And keep an ear out for DL2AH on Tristan da Cunha as ZD9AH until December 6th. This is not a DXpedition so he plans to operate mainly SSB on 40, 20, 17, 12 and 10 metres as time permits. Also some RTTY activity during the last two weeks of November. QSL via DL2AH, direct or via the bureau.

F4BXW is on the air from Gabon as TR8GV. He will be there through November 23rd operating SSB from the capitol city of Libertyville. If you make contact, QSL to F4BXW.

VK4KEV will be on Macquarie Island for about 18 months. During his spare time he will sign VK0KEV in SSB und digital modes mostly on 40 and 20 meters. QSL as directed on the air.

Lastly, N0TG reports that the Sable Island DX operation is back on the calendar. The rescheduled dates are December 6th through the 13th. According to N0TG, several critical details were resolved sooner than expected. More is on-line at www dot cy0dxpedition dot com. Above from various DX news sources)

**

THAT FINAL ITEM: A VIDEO TOUR OF MFJ ON TUESDAY NOVEMBER 16

And finally this week, its well known in ham radio circles that Martin Jue, K5FLU, made the Great American Dream a reality when he formed MFJ Enterprises back in in 1972. And now you can get to meet him and tour his facilities thanks to ham radio webcaster Tom Medlin, W5KUB. Bill Pasternak, WA6ITF, is in the Newsroom with the details:

--

Martin Jue, K5FLU, first ham radio product was a high selectivity filter that would enable a receiver to more easily separate Morse code signals on the crowded High Frequency amateur radio bands. The success of this receiver add-on turned out to be the seed for a company that has grown into the MFJ Enterprises of today. And if you have some free time on Tuesday, November 16th, you can see it all and get to know Martin Jue, K5FLU, in a very special day long webcast produced and hosted by Tom Medlin, W5KUB.

According to W5KUB, the live webcast will include a tour of MFJ, along with its subsidiary companies including Cushcraft, Hy-gain, Ameritron, Mirage, and Vectornics. The webcast will also show all the engineering, design, manufacturing aspects of the ham gear that's now found in stations around the world. Most of all you will get to meet the company's founder, Martin Jue, K5FLU, and even get to ask him questions over Toms two way interactive w5kub dot com website.

So tune in on Tuesday, November 16th to this very special all day tour of MFJ Enterprises to learn how the American dream that has come true in Starksville, Mississippi. A day of ham radio fun brought to you courtesy of Tom Medlin, W5KUB, at his interactive website at w5kub.com.

For the Amateur Radioi Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

Again that's Tuesday, November 16th for this special streaming video tour of MFJ and the chance to meet the company's founder Martin Jue, K5FLU. All of this in a live webcast at w5kub.com. (W5KUB)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If

you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

The news headlines

RSGB Board Election 2010 declared invalid

RAIBC put Advanced licence material on disk

RSGB Museum Surplus Equipment proving popular

Governance of the RSGB is regulated by the Memorandum and Articles of Association of the Society, or M&A, a copy of which may be found on the Members' only section of the website. An irregularity has been identified in the nomination of the two candidates standing for election as nationally elected members of the Board. Unfortunately, it was not noticed until after RadCom had gone to press that both candidates shared two nominators. This is not in accordance with the M&A and therefore the candidates were not properly nominated. The Board has considered its options under the M&A and has determined that the only course of action open to it is to declare the election for nationally elected members of the Board invalid. Given other requirements of the M&A, the Board will now co-opt both candidates as Board members for a twelve month period until the next election late in 2011, when the candidates may stand for election again. The Society very much regrets this error, but believes that the best interests of the membership are served by acting as set out above. The regional election for Region 4 is unaffected and closes at midday on 2 December.

The RAIBC audio reading team has updated the Advanced Licence Course talking book to the 2010 copy of the Advanced Manual. The disks are produced with the permission of RSGB for the use of anyone with visual impairments, text reading difficulties or disabilities that restrict the ability to read printed material. The discs are available post free for the use of visually impaired and dyslectic students. All they ask in return is a small donation to RAIBC funds to cover the cost of the disk, packing and to further the work for amateurs with disabilities. The RAIBC have a expert team with experience of assisting amateurs with disabilities. If you require any help in a personal capacity or as an instructor please contact the RAIBC Helpline on 0800 0 141 743 or by e-mail to russell.bradleyg0okd@ntlworld.com.

Last week's RSGB Museum Surplus Equipment sale was very successful, as was the trip to the Kempton rally. The two most popular items were Eddystone 960 HF amateur receiver and the Microwave Modules 70cm 100W

linear. This week there are 28 items available and the auction finishes today, Sunday 14 November. There is a wide range of complimentary Heathkit equipment, which is already attracting a lot of attention. The Radiovision Commander HF receiver is also generating a lot of interest. Check out the RSGB website www.rsgb.org.uk/auction for details and photographs of the equipment. All proceeds from the sale will be going towards funding the National Radio Centre at Bletchley Park.

Last week the Five Towns Repeater Group put the 6m repeater GB3WY, formerly GB3HX, on the air from the groups' site just west of Wakefield. It is co-located with the 2m GB3YW and 23cm GB3WC repeaters. The new repeater operates on R50-9, which is 50.800 and 51.300MHz, and requires continuous CTCSS of 82.5Hz. All the equipment was transported to site and installed by Dave, G4RQI, Michael, G1XCC and Martin, 2E0RFE. Reception reports would be appreciated and should be sent to either G1XCC or G4RQI, both of whose details can be found on QRZ.COM.

Now a reminder. It is important that the RSGB gets the views of all radio amateurs and shortwave listeners on amateur radio today and into the future. If you have yet to complete the amateur radio survey, please go to www.rsgb.org/survey and make your voice heard.

The Bletchley Park Trust has a public talk on Sunday 21 November at 2.30pm. The speaker is the author of the newly published official spy book, MI6, The History of the Secret Intelligence Service 1909 - 1949, and a former Head of the Secret Intelligence Service. Professor Keith Jeffery is the first author to be given access to the closed archives of the Secret Intelligence Service. Seats for this talk are limited and the cost of attendance is ?40 which includes a signed copy of MI6: The History of the Secret Intelligence Service 1909-1949. To attend this event, please purchase a ticket at www.bletchleypark.org.uk or for further information please call 01908 640404 or e-mail info@bletchleypark.org.uk

And now for the details of rallies and events for the coming week

Next weekend, 21 November, the 33rd CATS Radio & Electronics Bazaar takes place at the 1st Coulsdon Scout HQ, which is at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. The event is open from 10am to 1pm and admission is ?1. There will be a Bring & Buy. Details from Andy, G8JAC, by e-mail to secretary@catsradio.org.

Also next weekend, 21 November, the Plymouth Radio Club Rally will take place at the Elm Community Centre, Leypark Walk, Estover, Plymouth PL6 8UE. Doors open at 10am and the admission is ?2. There will be trade stands and a Bring & Buy.

Now for the news of special events

The Canadian Coast Guard Radio Station, Thunder Bay MCTS Centre, is celebrating 100 years of radio service. Built by the Canadian Marconi Company in 1910, the new wireless station, MUG Port Arthur, was the first and only Canadian Great Lakes Marconi station ever built. During

the November 2010, the Centre's amateurs will be operating special event station CG3MUG, to celebrate the 100th birthday.

>From 29 November, GB4RN will be active from Waterlooville. Look out for them on Top Band through to 2m.

And now the HF DX news compiled from 425 DX News and other sources

Members of the Czech and Slovak Contest Crew have announced a DXpedition to The Gambia to take place between 17 and 30 November. They will be using renewed callsigns from their previous 2007 operation as C50C or C52C. Also, the special callsign C5A will be reserved for the CQ World Wide DX CW Contest. QSL by the Bureau or direct to OM2FY, which is correct on QRZ.com.

Listen out for F4BXW as TR8GV from Libreville, Gabon until 23 November. His activity will be on the HF bands using SSB. QSL via his home callsign.

Karel, ON5TN will be staying at the Belgian Antarctic base Princess Elisabeth, until February 2011. He plans to operate as OR4TN in his spare time, starting in December. Updates will be posted on QRZ.com under OR4TN. QSL via ON5TN.

Manuel, XE2HUQ and Tony, XE2HVF plan to be active as XF1HUQ and XF1HVF from Magdalena Island, IOTA NA-07 from 18 to 22 November. Expect activity on 80 to 10m using CW and SSB. QSL via home call.

VE3EY will be active from St. Barthelemy Island using the callsign TO3A until 30 November. Operations will be on 160 through to 10m using CW, SSB and RTTY. QSL via VE3EY.

Now the contest news

16 November sees the UHF UK Activity Contest from 2000 to 2230UTC. Using the 1.3 and 2.3GHz bands the exchange is signal report, serial number and locator.

The RTTY leg of the Worked All Europe (WAE) DX Contest takes place over the weekend 13 and 14 November from 0000 to 2359UTC. Unlike the CW leg held in August and SSB leg held in September, in the RTTY leg everybody works everybody. Single op stations are limited to 36 hours out of 48. The exchange is signal report and serial number.

Next weekend, 20 and 21 November, sees the 2nd 1.8MHz Contest taking place between 2100 and 0100UTC. Using CW only, the exchange is signal report, serial number and District code.

And now the solar factual data for the period from the 1st to the 7th of November, compiled by Neil Clarke, G0CAS on the 8th of November

The solar disc had a couple of sunspots visible on most days. Prior to one of these groups rotating into view it had already produced a couple of C class solar flares. By the 4th the group rotated into view and

continued producing more C class flares along with three M class solar flares. The largest was a M5/1N on the 6th which increased solar activity to high levels. Associated with this flare was a narrow coronal mass ejection and a sudden ionospheric disturbance which affected the daylight side of the Earth. Solar flux levels increased from 79 units to 89 by the 6th. The average was 82 units. The 90 day solar flux average on the 7th remained at 81 units, where it as remained for the last six weeks. X-ray flux levels increased from A8 units on the 1st to B2.1 by the 3rd and the average was B1 units. Geomagnetic activity was very quiet every day, on the 6th and the 7th the Ap index was only one unit. The average was Ap 2 units. Solar wind data from the ACE spacecraft saw slow solar wind speeds every day and by the 4th were down to a very slow speed of 280 kilometres per second. Particle densities were low throughout the period. Bz never varied more than minus and plus 5 nanoTeslas every day.

And now the solar forecast. This week the quiet side of the Sun is expected to rotate into view. However, an active region could be visible and increase activity. Given no large and active sunspot groups the solar flux levels should be around the mid 80's. Geomagnetic activity is expected to be at quiet levels at first but during the second half of the week activity is expected to increase due to a recurring coronal hole. On its last rotation the Ap peaked at 23 units and the disturbance lasted for two days. MUFs during daylight hours at equal latitudes should be around 28MHz for the south and 25MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try the path will be between 0900 and 1300 hours. The long path will be several MHz lower and peak a couple of hours earlier.

Finally, a reminder that you can find concise explanations of the technical terms used in these reports in the propagation pages of the RSGB Yearbook.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 15 November Gloucester Amateur Radio & Electronics Society is having an HF and workshop evening. Contact Anne, 2E1GKY, on 01452

548478, daytime.

On Monday 15 November South Birmingham Radio Society is having a committee meeting. Contact Don, on 0121 458 1603.

On Monday 15 November Welland Valley Amateur Radio Society has an SWL talk. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Monday 15 November Wythall Radio Club continues its Advanced course. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Tuesday 16 November Wythall Radio Club is looking at homebrew. Details from Christopher Pettitt, G0EYO, by email to g0eyo@blueyonder.co.uk.

On Wednesday 17 November Bolsover Amateur Radio Society is having a quiz by Colin, G0RXT. For details, send an email to postmaster@g4rsb.org.uk.

On Wednesday 17 November Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 17 November Midland Amateur Radio Society is having training classes and a film show by Ron Swinbourne, M0WSN. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 17 November Telford & District Amateur Radio Society is holding a surplus equipment sale with G8UGL in the chair. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 18 November Cheltenham Amateur Radio Association is having a talk on Radio Winchcombe by P Arkell. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 18 November Salop Amateur Radio Society is having a talk on foxhunts by Les, M0BAV and Tony, M0AMP. Details on the club website at www.salop-ars.org.uk.

On Thursday 18 November South Birmingham Radio Society continues its Foundation training classes with G8OWL. Contact Don, on 0121 458 1603.

On Friday 19 November Bromsgrove & District Amateur Radio Club is on the air and holding a committee meeting. Contact Chris, M0BQE on 01905 776 869.

On Friday 19 November Coventry Amateur Radio Society has a skittles night. Contact John, G8SEQ, on 07958 777363.

On Friday 19 November Melton Mowbray Amateur Radio Society is having a talk on repairing and refurbishing vintage radios and televisions by Bert Reeves. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 19 November Nunsfield House Amateur Radio Group is having a talk on the central western birds of India by Ken Frankcom. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 19 November South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 20 November Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

Lincoln area 2 metre GB2RS news reader Simon, M0SIY, has had to stand down.�His partner news reader Jim, G0EJQ urgently needs a volunteer to come forward and fill the vacancy.�The reading takes place on Sunday mornings at 10.30am local time on 145.525MHz FM, and will�involve a rota with�G0EJQ and any other volunteer who may come forward. Volunteers must be members of the RSGB and should contact Jim, G0EJQ on 01 522 532 604 or the GB2RS News Manager Gordon, G3LEQ on 01 565 652 652 for further information.�More information about the GB2RS News Service, along with a news reader application form, can be found in the Members' Area of the RSGB web site by clicking on "News".

Advance notice now for listeners to the 6m North of England GB2RS transmission, which changes frequency and time next week. Today is the last broadcast on 51.530MHz. On Sunday 21 November the broadcast will be on the new 6 metre repeater GB3WY on 50.800MHz. The time of the bulletin will change from 11:00 to 09:00. These new arrangements will considerably improve coverage. Readings will still be by the same team of Dave, G4CLI, Ken, 2E0SSQ and Robin, G1MHU. Initially, the reader will break carrier every four to five minutes to allow the repeater time-out timer to reset and to allow any emergency calls to be made. The news team would like to express their sincere gratitude to Michael, G1XCC, Dave, G4RQI and Martin, 2E0RFE of the Five Towns Repeater Group for their efforts in getting GB3WY on the air.

On Monday 15 November Angel of the North Amateur Radio Club is having a recap on aerial basics, testing aerials and using basic test equipment for building aerials by Daniel Harrop. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 15 November Macclesfield & District Radio Society is having a social night. More information from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 15 November Scarborough Amateur Radio Society is having a talk on peculiar antennas by G0UVR. Details from Jerry Scarr G6LBL, on 01751 476601.

On Monday 15 November Sheffield Amateur Radio Club is holding its winter junk sale. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 15 November Thornton Cleveleys Amateur Radio Society is having a video with Ted, G3WBB. Details from John Foster, 2E0EZY, on 01253 399377.

On Tuesday 16 November Chester & District Amateur Radio Society is having a talk by Chris Gozzard, M6GOZ, on his eight month African adventure teaching in Lesotho. Details from Barbara Green on 07957 870770.

On Wednesday 17 November Hornsea Amateur Radio Club has a bring a mystery object evening. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 17 November Maltby & District Amateur Radio Society is holding a computer clinic. Contact Keith, G1PQW, on 07701 156 678.

On Wednesday 17 November Mid-Cheshire Amateur Radio Society is on the air. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 18 November Ripon & District Amateur Radio Society is having a talk on digital modes using Linux. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 18 November Wakefield & District Radio Society is on the air and holding a committee meeting. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 19 November East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 20 November Hornsea Amateur Radio Club is taking part in the 1.8MHz CW contest. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Saturday 20 November Wakefield & District Radio Society continues its Foundation and Advanced courses. Contact Ken, 2E0SSQ, on 07900 563117.

SARL NEWS - SUNDAY 14 NOVEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

SILENT KEYS

It is with regret that we have to announce that the keys of two radio amateurs have become silent. They are Carol Siedle, ZS5YG, on 26 October and Mike van der Westhuizen, ZS6UP, a long-time member of TNT and Magalies ARC on 8 November. Our sincere condolences go to their relatives and friends.

(PAUSE)

In the news today:

NEW SARL BROCHURE ON AMATEUR RADIO IS NOW AVAILABLE

APRS FROM THE INTERNATIONAL SPACE STATION

SARL REPRESENTATION TO ICASA NOW ON THE WEB

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NEW SARL BROCHURE ON AMATEUR RADIO IS NOW AVAILABLE

A new SARL brochure about Amateur Radio will be available on the web for download in PDF from Tuesday next week. Follow the URL on the home page at www.sarl.org.za. A full colour printed version will be available shortly. Clubs can place orders with Mariska by emailing their requirements and details to admin@sarl.org.za. The printed version will be packaged in batches of 100.

ANNUAL REMEMBRANCE DAY SERVICE

The annual Remembrance Day service will be on the air as part of Amateur Radio Mirror International today at approximately 10:45 CAT. As a mark of respect radio amateurs are requested to observe radio silence during the transmission.

Clubs wishing to retransmit the service can download a MP3 file from the ARMI website. Go to www.sarl.org.za and click on ARMI and follow the links. The service is being conducted by the Reverent Jan Kramer, ZS6JRK.

APRS FROM THE INTERNATIONAL SPACE STATION

SA AMSAT invites you to participate in the SATNETWORK on Sunday evening 21 November when Eddie Leighton, ZS6BNE ,will talk about "APRS via the ISS". It will be on the air at 19:30 . Clubs wishing to link their local repeater should send an email to armi@sarl,org.za with details of their repeater coverage and telephone number to be linked not later than Monday. No pre-paid numbers can be connected.

SARL REPRESENTATION TO ICASA NOW ON THE WEB

SARL members can now download the SARL representation re the draft Radio Frequency Spectrum Regulations from the member's section of the web. The document will be sent to ICASA on Monday when it becomes a public document and will be available for download from the open section of the web. The final document includes many of the suggestions received from members. It should be noted that members have submitted opposing views on various aspects of the regulations which all had to be considered. SARL believes that it has produced a document that is balanced and serves the best interest of amateur radio.

The next step will be the operating frequency table which will specify the frequencies and power levels permitted on various bands. The SARL-ICASA quarterly liaison committee is meeting this week when it is hoped that there will some clarity on the time table for the next step.

Persons wishing to submit their personal comments to ICASA should note that the closing date is Friday 19 November 2010. Details can be found in the Government Gazette.

RADIO ZS COVER

The editor of Radio ZS is looking for suitable photographs to be used on the cover of the magazine. Photographs showing Amateur Radio in Action - a field day station, a contest station, a club activity, youth activity - would be welcome. Send your photograph to radiozs@sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Two new sunspot regions were numbered on Wednesday. Sunspot 1 123, which is located towards the east of shrinking Sunspot 1 121, is now producing C-Class flares. Sunspot 1 124 was also numbered, but remains quiet. The effective sunspot number is expected to be less than

25 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoons until after sunset. During the afternoons conditions will be good towards Europe on 15 m, to be followed later by good 20 m openings. Late afternoons and early evenings 15 m contacts with the USA are at last possible again. Contacts with Australia are possible at sunset on 20 m. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings, 17 m will also be full of surprises.

For the CW and digital enthusiasts, 30 m may be very rewarding with openings to many parts of the world.

Locally, 40 m is the workhorse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS Today 14 November - Remembrance Day Service at 10:45; 20 November - 10:00 UTC, field day weekend with ZS85SARL on the air commences; 21 November - 10:00 UTC, field day weekend and ZS85SARL closes; 21 November - 19:30 SAT, SATnetwork on the air; 27 November - ZS6RTB Club meeting together with other radio operators; 28 November - YL net starts at 15:00 CAT on 145,750 MHz in Pretoria. 20 January 2011 - Closing date for submission for application for May 2011 RAE bursaries, visit www.amateurradio.org.za for application forms; 30 January 2011 - Closing date for phase 1 of the construction competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN, and edited by Hester van der Walt.

Thank you for listening, 73.

/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 14th November 2010

IRTS Stand at Foyle and District Rally

Foyle & District Radio Club held their Annual Rally last Sunday, 7th November. This is the first time that the IRTS have been invited to this Rally and the invite was graciously accepted.

Pat EI2HX and Peter EI4HX were on hand at the stand, which was kept busy all day with enquiries, and meeting new and old friends some whom have been members for many years, but had never had an opportunity to meet any IRTS Representatives.

There was a good selection of equipment, old and new, and the many visitors were well pleased.

There were many enquiries about IRTS contests, Worked EI Counties, and worked all Ireland awards, and some new WAI members were signed up. Pat was busy signing autographs for his [ATV] HX Files, articles in Echo Ireland, and Peter met some of the callers, who give reports to the IRTS News on Monday Nights, via the Dundalk Repeater EI2CCR, which is well heard in the North West.

CQ CQ calling news items

As is common through the year we have occasional lulls in news. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

DXCC Activity by EIs

We reported a few weeks ago when Dave EI9FBB became the first EI to achieve 10 band DXCC; this achievement is also the subject of an article in the current issue of Echo Ireland.

Other EI radio amateurs have also been busy on the DXCC front. The latest EI DXCC List - which can be seen at www.irts.ie/dxcc - highlights recent movements in the DXCC rankings by EI radio amateurs; we notice that one of the milestones shown in this list is the fact that Dave EI3IO has become the first EI to have more than 200 entities

confirmed on 160 metres.

Other EIs who have clearly been busy working DX and collecting QSLs include John EI7BA and Dave EI4BZ.

North Cork Radio Group Arrival

The North Cork Radio Group would like to welcome their newest member, Luke James O'Callaghan, born on the 7th November 2010 at 1.33am at Cork University Maternity Hospital.

This little boy could be picked up at 5 and 9+ throughout Cork City. He is happy and healthy and looking forward to his first field day already.

Mick O'Callaghan, EI5GGB will have to put his radio aside for a while to bring his junior op up to speed with the world of amateur radio. Listen out on 49MHZ as he can be picked up loud and proud on his baby monitor hi hi. Congratulations to mum and dad from all the Group.

Ham Square - for ham radio ops on the move

Amateur radio enthusiasts who also own an iPhone may find this new app from G7LEU quite useful - especially if they are constantly on the move.

Mark Turner G7LEU has developed an iPhone application that may be of interest.

The app, Ham Square, uses the iPhone's built-in GPS receiver to determine the current location, and then presents that location in decimal degrees and Maidenhead Locator, i.e. it shows the current "square".

The app is free, and available to iPhone users via the iTunes App Store as usual.

Please see http://www.kramstuff.com/ for more details and a screenshot.

DX News

Sierra Leone The DXpedition to the Banana Islands IOTA AF-037 off the coast of Sierra Leone is QRV till next Thursday (18th November) Callsign to look for is 9L0W and the QSL info is via DK2WV

South Korea For those who like working unusual callsigns the special event call D7G20 (that is D-seven-G-twenty) is on the air till 28th November. This is in connection with the G20 Summit being held in Seoul.

Tristan da Cunha This quite rare DXCC entity is available till early next month with DL2AH on the air as ZD9AH. Operation is mainly SSB with

some RTTY expected later.

Uganda G3XAQ is QRV as 5X1XA from now till 1st December. A single band entry in the CQ WW DX CW Contest (27-28 November) will probably be on 20 metres. QSL info is via G3SWH.

Kermadec A mainly German team is planning to operate as ZL8X from the Kermadec Islands from 19th November till 5th December. This is a rare one for the DX fraternity so listen for the pile-ups!! Up to date info can be found on www.kermadec.de

Sable Island DXpedition back on again Sable is back on the calendar. The rescheduled dates are December 6-13th, 2010.

For more details, visit: http://www.CY0dxpedition.com

Understanding LF and HF Propagation - free ebook

Steve G0KYA and Alan G3NYK, of the Radio Society of Great Britain's (RSGB) Propagation Studies Committee, have released a free ebook called 'Understanding LF and HF Propagation'

In 2008/2009 Steve and Alan wrote a series of features on LF and HF propagation for the RSGB's "RadCom" magazine.

You can download your free copy of "Understanding LF and HF Propagation" at www.g0kya.blogspot.com

November 15, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, KH2AR/W4, NG3K & ADXO, K4RUM, N4AA & QRZ DX, K5TR, N5SMD, W5KUB, K8GI, K8YSE, NE8Z, W8GEX (60m News), K9CS, AT International, DL1SBF, DL7MAE & The DX News Letter, DX World.Net, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3LYC and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-November, through Sunday, 14th-November there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VK0M, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND. Gert, ZS6AYU, will revisit and be active as 3DA0GF from the Hawane Resort near Mbabane, between November 16-19th. Activity is on 40-10 meters including the 17/12 meters using CW only. QSL 3DA0GF via the info on QRZ.com.

4L, GEORGIA. Operator Andi, UU0JM, will be active as 4L0A from Obcha during the CQWW DX CW Contest (November 27-28th) a Single-Op/All-Band/ High-Power entry. QSL via LoTW.

4L, GEORGIA. Operator Vaho, 4L8A, will be active in the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via K1BV.

5C, MOROCCO. Members of the URE Cartagena team will be active from the ARRAM HQ club station CN8MC in Rabat as 5C5T during the CQWW DX CW Contest (November 27-28th) as a Multi-Single/Low-Power entry. QSL via EA5YU, by the Spanish Bureau or direct. Operators mentioned are: Juan/EA5BLJ, Jose/EA5CP and Jose/EA5YU. The operators will be there between November 25-28th, and plan to be active outside of the contest on 80-10 meters using 100 watts, CW only.

5H3, TANZANIA. Orlando, IN3KIZ, is expected to be active as 5H3OC (dates were not provided). Activity will be on the HF bands. QSL via IN3DEI.

6V/6W, SENEGAL (Update). Stan, EI6DX, will be active as 6W/EI6DX from Somone, which is located 70 km southeast of Dakar, for the holidays (dates not announced). He will concentrate on the lower bands and CW. Stan will take part in the CQ WW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry signing 6V7Y. QSL via RX3RC, by the Bureau or direct. Look for updates at: http://www.ei6dx.com

6Y5, JAMAICA. Mischa, PA1OKZ, will be active as 6Y5NS from Jamaica (NA-097) between now and November 26th. Activity will be on the HF bands using SSB and the Digital modes. QSL via eQSL or PA1OKZ.

C5, THE GAMBIA (Just A Reminder). Members of the Czech and Slovak OM0C Contest Crew will be on another DXpedition to The Gambia to take place between November 17-30. They will be using renewed callsigns from their previous DXpedition, C50C or C52C used in The Gambia 2007, the greatest Slovak expedition of its kind ever. The special callsign C5A will be reserved for the CQWW DX CW Contest as a Multi-Multi entry. The team members of The Gambia 2010 DXpedition are: Rich OK8WW/OM2TW, Jiri/OK1RI, Joe/OM5AW, Norbert/OM6NM, Roman/OM2RA, Jiri/OK1DO, Lada/OK1DIX, Petr/ OK1FFU and Vlada/OK1NY. Activity will be on 160-10 meters using CW and SSB. The Gambia 2010 DXpedition will use various transceivers from Elecraft and Kenwood. They will set up 6 full time stations that can be used simultaneously in order to take advantage of all band openings. Most of the time they will use 4 stations only. The whole set up of 6 stations will be used during the CQWW CW Contest only. QSL Manager is Brani, OM2FY. QSL by the Bureau or direct to: Branislav Daras, P.O.Box 6, SK-820 08 Bratislava 28, Slovak Republic. For more details and updates, visit their Web at: http://www.om0c.com/?Gambia_2010_-_C5A

C6, BAHAMAS. Brian, ND3F, will once again be active as C6AQQ from New Providence Island between November 24th and December 6th. Activity will be mostly on the lower bands, but he will also be in the CQWW DX CW Contest (November 27-28th) and ARRL 160 Meter Contest (December 3-5th). QSL via his home callsign, direct preferred or LoTW, by the Bureau (long wait).

C6, BAHAMAS. Operators Bob/N4BP (C6AKQ), Tim/N4UM (C6ARU) and Mike/K4RUM (C6AUM) will be active from Freeport in the Bahamas (NA-080) between November 30th and December 7th. Bob and Mike will operate primarily on CW, while Tim will be primarily on the Digital modes. Their operations will also include the ARRL 160 Meter Contest (December 3-5th). QSL via the operator's home callsign.

C6, BAHAMAS. Operators Tom/N6BT and Fred/KE7X will be active as C6ARR and C6AKX, respectively, between November 20-29th. Activity will be on 160-20 meters. Both operators will also be in the CQWW DX CW Contest (November 27-28th). Tom will be a Single-Op/Single-Band (160m)/Low-Power entry (He will be looking for JAs on 160m before the contest). Fred will be a Single-Op/Single-Band (20m)/Low-Power entry. QSL both operations via WA4WTG.

E7, BOSNIA-HERZEGOVINA. Operators Chris/9A5K, Mario/DJ2MX, Matthias/DK4YJ, Christoph/DK9TN, Ranko/E70R, Vlado/E70T, Radomir/E74IW, Zoran/E76C and Braco/E77DX will be active as E7DX during the CQWW DX CW Contest (November 27-28th) as a Multi-Single entry. QSL via E77E.

EA6, BALEARIC ISLAND. Julio, EA3AIR, will be active as EA6URA (formerly EA6IB) from Ibiza Island during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (40m) entry. QSL via EA3AIR, by the Bureau, LoTW or direct to: Julio Isa Garcia, Carrenca 25, 08017 BARCELONA, Spain.

FG, GUADELOUPE. Jules, ex-FR1AN, has relocated to Guadeloupe Island, his wife's homeland. He has been issued the callsign FG4NN. A tower and antennas were put up last week, and he is on the air now with activity also on 6 meters. Buzz, NI5DX, will continue to assist Jules with the QSLs.

HI7, DOMINICAN REPUBLIC. Ronny, ON4ARV, will be active as HI7/OT4R from Punta-Cana between May 2-20th (2011). Activity will be on 20/15/10 meters SSB between 2000-2200z everyday. QSL only via LoTW and eQSL. More info is available on his Web site at: http://www.OT4R.net

HK0, COLOMBIA. Gerd, DL7VOG, will once again be active as HK0GU/1 from Isla del Pirata (SA-040) between November 17-21st. Activity will be on the HF bands using CW and RTTY. QSL via DL7VOG, direct or by the Bureau.

HK0, SAN ANDRES ISLAND. Gerd, DL7VOG, will be active as HK0GU from San Andres Island (IOTA NA-033) between November 22nd and December 2nd. Activity will include the CQWW DX CW Contest (November 27-28th). QSL via DL7VOG, direct or by the Bureau.

IM0, SARDINIA. Martin, OL5Y, will be active as IM0/OL5Y from La Maddalena Island (EU-041, IIA OT-008) during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (15m) entry. Listen for QSL info.

IOTA NEWS.....
EU-009. Russell, G5XW, will once again be active from the Orkney Islands as GM5XW between November 17-22nd. His main QTH will be the mainland Orkney (IOSA OR01, SCOTIA OI14, WLOTA 1652), but he will also be activating other islands in the Orkney group (excluding Stroma). QSL via G5XW, direct only (QRZ.com).

NA-078. Operators Manuel/XE2HUQ and Tony/XE2HVF will be active as XF1HUQ and XF1HVF, respectively, from Magdalena Island between November 18-22nd. Activity will be on 80-10 meters using CW and SSB. QSL via their home callsigns.

NA-085. After activating Santa Rosa Island (NA-142) this past weekend, look for William/K9RR and Rick/K8GI to activate St. George Island (NA-085) as K9RR/4 and K8GI/4, respectively, on November 15th, between 1300-2030z. Suggested frequencies are: 7160 (SSB), 14040 (CW), 14072.5 (PSK63), 14082.5 (RTTY), 14260 (SSB), 18103 (RTTY) and 18128 (SSB) kHz (+/- QRM). QSL via their home call-sign, direct (preferred) or by the Bureau. All K8GI/4 QSOs will be uploaded to LoTW as well.

NA-171. Members of the Radio Club Sat�lite A.C. (XE1RCS) will activate the rare Isla Venados in the Sinaloa State Group as XF1RCS between November 18-21st. Activity will be on 80-10 meters using CW and SSB. QSL via N7RO. A Web site and Twitter page is available (with a live video stream during their activation) at: http://www.xe1rcs.org.mx/xf1rcs/index-eng.html http://twitter.com/XF1RCS

OC-111. (Cancelled) Pista, HA5AO, reports on his Web page: "Unfortunately, we have had to cancel this trip, due to the circumstances and considerations, as follows -- We could find transportation to the island early in the morning. However, we would have to spend the night there, as the motorboat can only come back for us on the next after-noon. We would have to spend the night there, but we could not find any solution to be safe there. We could not take the risk to have an overnight alone on those remote islands. Our safety is the first. Sorry about it, but we have had to make this decision. We can only hope your understanding." For more details, see the Web site at: http://ha5ao.novolab.hu

J6, ST. LUCIA. Bob, G3PJT, will once again be active as J6/G3PJT from the northeast corner of St. Lucia (NA-108) between March 8-15th. Activity will be holiday style using a K2 w/100 watts and vertical antennas. He plans to also be in the RSGB's 74th Commonwealth Contest (March 12-13th). Look for him outside of the contest, especially on 80 and 30 meters. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For November 15-21st)....
Nov 15 AN SOLAR REFERENCE KEYS
Nov 16 AN --------------------
Nov 17 AN-HN BN - Below Normal
Nov 18 HN-AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 19 LN LN - Low Normal
Nov 20 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 21 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

SPECIAL NOTE FROM EDITOR: A FREE excellent tutorial on LF and HF radiowave propagation written by Steve/G0KYA and Alan/G3NYK is available at: http://www.southgatearc.org/news/november2010/propagation_ebook.htm

LIVE HAM RADIO WEB BROADCAST. Tom, W5KUB, informs OPDX readers that a live Web broadcast will take place on Tuesday, November 16th, at 1400z, from MFJ, Cushcraft, Hy-gain, Ameritron, Mirage, and Vectronics, at: http://w5kub.com
Tom states, "Go behind the scenes. This is a live broadcast showing all their plants, engineering, design, manufacturing, etc. Talk to other hams in 150 countries using our chat room or ask key people questions. Hear from Martin F. Jue, K5FLU, the president of these companies. This is an all day event and we will be giving prizes to lucky people logged in. Help us spread the word. The <http://w5kub.com/> site is up 365 days per year showing recorded video when we are not live at ham events. We will also be broadcasting our drive live (200 miles) from Memphis, TN, to Starkville, MS, on the Monday, November 15th, starting about 2:00 PM central or 2000z. See if you can guess where we are."

MJ0, JERSEY. Mat, F5SHQ, will be active as MJ0ASP during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (15m) entry. QSL via LoTW.

PACIFIC TOUR. Bob, 5B4AGN, will be active from the Pacific during the first half of February 2011. His tentative plans are as follows:
February 2-8th - From Palau (OC-009) as T88ZM. Operations will be from the Palau Rental Shack (See the following Web page at: http://palau.rental-shack.com/english)

February 9-16th - From Saipan (OC-086, USI NI002S, WLOTA 1333) as KH0/G3ZEM. Operations will be from the Saipan Rental Shack (See the following Web page at: http://saipan.rental-shack.com/english/index.html)
Activity from both locations will be CW only on the HF bands. QSL via M0URX.

PJ4, BONAIRE ISLAND. Valery, RD3A, will be active as PJ4G from the K2NG/PJ4G rental QTH on Bonaire (IOTA SA-006, WLOTA L1279) during the ARRL DX CW Contest (February 19-20th, 2011) as a Single-Op/All-Band/ High-Power entry. QSL via K4BAI.

PJ6, SABA ISLAND. George, K5TR, reports (edited): "A six meter expedition to Saba Island (NA-145) is taking shape. The team will be Dick/K5AND, Pat/W5OZI and George/K5TR. We have a location picked out and reserved on the island. It is located on the northeast part of the island at about 150 meters above sea leavel (490 ft) with perfect take off to the US,

EU, AF and most of SA. We will be on the island between June 22nd and
July 6th, 2011. The plan is to operate CW on 50.106 MHz and SSB on 50.118
MHz. We will also be on JT65 during moonsets and moonrises on 50.190 MHz.
We should have a website in the coming month to post updates to the trip.
We do not know what callsign(s) we will use."

PJ7, SINT MAARTEN. Joe, KC0VKN, will be active as PJ7/KC0VKN from Sint
Maarten (NA-105) between December 18&#65533;23rd. Activity will be holiday
style on 40-10 meters using CW, depending on operating times and openings.
QSL via his home callsign.

UA2FX and ZD8ZZ

QSLS RECEIVED VIA MAIL: 6V7W, 9M6DXX/P, A51A, CE3RR, CE9/R1ANF, D44TD,
EI185RNLI, G/HB9LEY, J3/AA8LL, JW/HB9LEY, JW/JQ2GYU, M0LZP, T88NA,
VP8DMH, VP8DMH/P, XE1RCS and XR0Y

QSLS RECEIVED VIA THE BUREAU: NONE Reported This Week!

SILENT KEY. It has been reported that Henry "Hank" Richard Kohl, K8DD,
became a Silent Key (SK) on Saturday, morning November 13th, from
respiratory complications in the ICU of Henry Ford Detroit. Hank was
surrounded by his wife Kathie, son Andy and friends Trish and Stan
Arnett/AC8W. Hank was well-known for his operations from some of the
following places:
FP/K8DD - February 2005, October 2001, October 2000
HK1/K8DD - February 2007
K8DD/C6A - 1997, 1998, 1999
K8DD/KH0 - 1992
PZ5DD - February 2008
V47DD - 2003

VO2AAA - November 2004 CQ WW CW contest ONLY
VP2MEH - 1978
YN2DD - February 2009 & 2010

OPDX and its readers would like to send out our deepest sympathy to the family and friends of K8DD.

T7, SAN MARINO. Operator Ivo, 9A3A/E73A, will be active as T70A from the contest station of the "Amateurs Radio Republic of San Marino" (ARRSM) during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/ High-Power entry. QSL via A.R.R.S.M. Radio Club, P.O.BOX 77, 47890 Rep. San Marino, SAN MARINO.

V4, ST. KITTS. We will be seeing more of St. Kitts (NA-104) on the air. John, W5JON/V47JA, has just returned from Calypso Bay after purchasing a vacation/retirement home on the island. He states, "Our applications for St. Kitts residency have been submitted and will soon be approved. The antennas will be going up in Feb. when we return for an extended stay."

V7, MARSHALL ISLANDS (Update/IOTA Op). Yuri, N3QQ, has reported that Tim, NL8F, will join him on the DXpedition to Marshall Islands. Both operators will arrive on Majuro (OC-029) on November 30th, and they will stay in V73-land until December 17th. The operators will travel to Enewetak Atoll (OC-087) where some of the equipment is already prepositioned. Look for some possible 160m operations from Enewetak Atoll. The callsign will be V73QQ on Enewetak Atoll. The callsign V73RRC will be used on Ujelang Atoll (OC-278) planned around December 7-12th. For updates, watch: http://www.oc-278.ucoz.com

VP2M, MONTSERRAT (Update). Operators Larry/K3VX (VP2MVX), Will/K9FO (VP2MFO), Don/K9NR (VP2MNR) and Carl/K9CS (VP2MSC) will be active from here (NA-103) between November 23rd and December 5th. Activity will include entries in the CQWW DX CW Contest (November 27-28th) and ARRL 160 Contests (December 3-5th) as a Multi-2 class signing VP2M. Activity outside the contests will be on 160-10 meters, mostly CW but some SSB, RTTY and PSK. QSL all callsigns via K9CS.

WR4, UNITED STATES (Special Event). Members of the Barrow Amateur Radio Club will activate special event Christmas station WR4BC from Bethlehem, GA, between 1700z, December 4th and 1700z, December 5th. Suggested frequencies are (-/+ QRM):
CW/Digital/RTTY - 3575, 7065, 14065, 21065 and 28065 kHz
SSB - 3875, 7265, 14265, 21365 and 28465 kHz

A Limited-Edition collectable QSL will be issued, complete with the Bethlehem Christmas Postmark, to arrive at your QTH before Christmas. To Receive YOUR QSL card, make the QSO and send 1 USD to the address below to cover postage and printing. QSL to: Barrow Amateur Radio Club, 287 Crescent Court, Winder, GA 30680. For more information, please visit the club Web site at: http://www.barrowhamradio.org

XR3, CHILE (Special Event). Members of the Radio Club de Copiapo are now active as XR33M between now and end of December. Activity is to celebrate

the rescued miners in Chile. Look for operations to be on 80-15 meters on SSB. Also, look for the Radio Club de Copiapo team members to be active during the ARRL 10 Meter Contest (December 11-12th). QSL via CE3BBC direct.

YE1, INDONESIA. Operators Yon/YB1CCF, Heri/YB1KAR, Gus/YB1ALL, Terry/ YC1KAF, Danu/YD1GCL and Joz/YD1JZ will be active as YE1C during the CQWW DX CW Contest (November 27-28th) as a Multi-Single entry. QSL YE1C to: West Java DX Association, PO. Box 1042, Bandung, 40010 Indonesia. Visit their Web page at: http://ye1c.wordpress.com

ZA, ALBANIA. Members of the Hungarian "Haros Radio Club" (HA5HRK) will be active as ZA3HA from Orikum-Radhime Beach in the Bay of Vlora during the CQWW DX CW Contest (November 27-28th). Operators mentioned are: Fatos/ZA1FD, Lazer/ZA1V, Tomi/HA5PT, Fero/HA8MT, Otto/HA5OT, Happy/HA5TMK, Pista/HA5TI and Chris/HA5X. Look for HA operators to sign ZA/homecall outside the contest. QSL ZA3HA via HA5X or LoTW. All other callsigns via the operator's home callsign.

ZL7, CHATHAM ISLAND (Update). Seppo, OH1VR, will be active from Chatham Island (OC-038) as ZL7VR between November 23-29th. Activity will be on the HF bands (specific bands and modes not provided). Operations will also include the CQWW DX CW Contest (November 27-28th) as a Single-Op/ Single-Band (15m) entry. QSL via OH1VR.

ZL8, KERMADEC (Update). By the time you read this, the whole team should be in Auckland. They plan to depart from Tauranga harbor around Monday evening, November 15th. Weather permitting, they should be at Raoul Island on Thursday morning. A couple announcements were made this past week. There is a webcam on Raoul Island. It is a permanent installation of the GeoNet, a monitoring system in New Zealand to watch hazards like earth- quakes, and volcani activities or tsunamis. The ZL8X Web site has installed a link where you can go directly to the GeoNet site. Also, Mario, DJ2MX, was again announced as their QSL Manager, as well as an Online QSL Request System (OQRS) which will be activated "AFTER" their radio operations. They state, "If it is possible, please use our service to minimize the workload for us! If for any reason you are not able to use our OQRS you may also send your card normally by post (address via QRZ.COM) or via the Bureau." For details on becoming a sponsor or more information about this DXpedition, visit the ZL8X Web page at: http://www.kermadec.de

1024. [RAC-Bulletin] RAC Bulletin 2010-032E - Vision Statement 2010-11-14

Newsgroup: rec.radio.amateur.misc
Date: 2010-11-15 05:40:25 UTC
From: rac-bulletins@eton.ca
Message-ID: <4CE0C58A.2080103@rac.ca>
Source record: 5193
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2010-032E - Vision Statement 2010-11-14
2010-11-14

Vision for RAC as unanimusly agreed upopn by the Board of Directors
and Executive of the Radio Amateurs of Canada:

"The Board and Executive of the Radio Amateurs of Canada, committed to
the future of Amateur Radio in Canada and to the future of RAC,
held a planning meeting in Ottawa from October 29th to October 31st as
part of a process to map the future of RAC in the 21st Century.
The Board and Executive have unanimously agreed upon a draft Vision
for RAC."

This Vision appears below and will be published on our website and
appear in the January/February issue of The Canadian Amateur.
Comments from members and amateurs are welcomed and should be sent to
Paul Burggraaf, Secretary, Radio Amateurs of Canada by email to
the RAC Corporate Secretary at <pburggraaf@nf.sympatico.ca>."

Radio Amateurs of Canada (RAC) becomes an integral part of Amateur
Radio culture . when a new Ham obtains his/her certification, they
rush to join RAC and enjoy the benefits of the organization which is
recognized both nationally and internationally as the voice of
Amateur Radio in Canada. If it is an Amateur Radio question, concern
or issue . RAC is the organization that addresses those concerns
and supplies the answers and guidance.

We attain high service levels; we meet the needs of our members and
serve as an example to other international Amateur Radio
organizations on how to service their constituents. Director,
Executive and Assistant Director positions are coveted by RAC members,
who are equitably represented by their elected officials. The annual
convention is well attended and through technology, is made available
to a wider range of members who cannot attend in person.

RAC pushes communications to their members, through a variety of
methods . Ham nets, local club communications, face-to-face meetings,
presentations, newsletters, .The Canadian Amateur. magazine, social
networks and e-mail/web bulletins are among the devices employed.
We achieve a level of communication with the public, and the various
levels of government that truly reflects our capabilities and the
extent to which we can contribute to both emergency communications and
public awareness of the abilities of our hobby.

RAC promotes education and .elmering. to new Hams, and supports the training and coaching of RAC volunteers to achieve exemplary results, at the municipal, provincial and national levels. The new RAC Field Training program is the recognized tool leveraged by our ARES groups. Our volunteers are the lifeblood of our organization, and we develop an appreciation program that reflects our reliance on their abilities and commitment. All RAC members recognize and appreciate what the individual volunteers contribute, and the value that RAC, as an organization, brings to Amateur Radio in Canada.

RAC achieves a stable financial position, with a positive, growing membership which truly reflects the outstanding representation that RAC makes to Industry Canada and the world of Amateur Radio in Canada.

Paul Burggraaf
RAC Corporate Secretary

DXNL 1702 - Nov 17, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

C6 - BAHAMAS, NA-001
Kenny,C6ATA (K2KW), Fred,C6AKX (KE7X), and Tom,C6ARR (N6BT), will be
QRV mostly in CW on 160m/40m and the WARC bands from Eleuthera (NA-001)
from Nov 20-29. All three of them will take part in the WWDX CW Contest
in a single OP/single band/low power class. QSL via WA4WTG, bureau ok.

FJ - ST BARTHELEMY, NA-146
From Nov 22-30 Nikola,VE3EY, is going to hit the airwaves as TO3A from
St. Barthelemy (NA-146, DIFO FJ-001/WLOTA LH-0377) in CW, SSB and RTTY
on 160-10m. He will join the CQ WWDX CW Contest as single OP/allband.
QSL via VE3EY.

HC - ECUADOR
HC2/SM7BUA, HC2/SM6FKF, HC2/SM6LJU, HC2/SM6MCW, HC2/SM5COP, HC2A and
HC2SL will be active from Nov 22 until Dec 4 (incl. WWDX CW as HD2M).
They will focus on the lowbands, WARC bands and RTTY before and after
the contest. QSL cards should be sent to their homecalls.
Find more information at HC2010 on: http://sk6m.com

HK0/SA - SAN ANDRES ISLANDS, NA-033
Gerd,DL7VOG, will be active as HK0GU/1 from Isla Pirata (SA-040) from
Nov 17-21. After that short sidetrip he will show up as HK0GU from
San Andres (NA-033) between Nov 22 and Dec 2. Gerd prefers CW and RTTY
and plans to take part in the CQ WWDX CW Contest as well.
QSL via DL7VOG, direct and very reliably also via bureau.
A logbook search will be available later at: http://www.qsl.net/hk0gu

KH2 - GUAM, OC-026
JA1CGC, Masa,JA1OZK/W6LJ, Akira,JA1NMH/W1NMH, Tadao,JF1TAB, Ken,JH1FUD,
Hiroshi,JL1LOW, and Shimizu,JA1MFR/WN1Y, will activate Guam (OC-026)
from Nov 22-27. Masa,JA1OZK, will sign KH2KY, all others: KH2/homecall.
Activities will take place in CW, SSB and digital modes (also SSTV) on
all bands. QSLs also via bureau to their homecalls.

The 11 year old YL Eri,JF1VGZ, will be QRV as KH7ERI/KH2 from Guam
from Nov 22-24. QSLs direct via JF1VGZ.

P4 - ARUBA, SA-036
John,W6LD, Denny,KX7M, Rick,N6XI, and Mike,N7MH, will join the upcoming
CQWW DX CW Contest as multi/single signing P40L. QSL via WA3FRP.
The team will gather on Aruba (SA-036) on Nov 21 and stays till Nov 29.
They will work mainly in CW but also in SSB on 160-10m outside the WWDX

P40W will be the callsign of John,W2GD, between Nov 22 and Dec 1. He
will join the WWDX CW Contest in the single OP/allband category.
John will focus on 160m and the WARC bands before and after the WWDX.
QSL via LoTW or direct to N2MM.

PJ4 - BONAIRE, SA-006
John,PJ4/K4BAI, Jeff,PJ4/KU8E, and Jim,PJ4/K9YC, will show up from
Bonaire (SA-006, WLOTA L1279) from Nov 23-30. They plan to take part
in the WWDX Contest (multi/single) as PJ4A.
All QSLs via K4BAI, also via bureau (e-mail to k4bai@att.net).

PJ5 - SABA AND ST EUSTATIUS, NA-145
Janusz,PJ5/SP6IXF, and Wlodek,PJ5/SP6EQZ, are working in CW, SSB and
RTTY on 160-10m from St. Eustatius (NA-145) between Nov 18 and Dec 3.
QSLs also via bureau to their homecalls.
An online log and more information at: http://www.pj5-2010.dxing.pl

PJ7 - ST MAARTEN, NA-105
Masa,K1GI/JN3NFQ, will sign PJ7/K1GI from St. Maarten (NA-105) from
Nov 20-23. He works "family style" in CW, SSB and digital modes on
80m-10m including the WARC bands. He will use a FT-450, a dipole for
40m/20m, a delta loop for 15m/10m and a Buddipole for 80m/30m/17m/12m.
QSLs via bureau or direct to JG2BRI.

S7 - SEYCHELLES, AF-024
Noboru,JA2AAU (S79AU), Iwao,JA2LSS (S79SS), Seiji,JA2ATE (S79TE), and
Tug,JA2ZS (S79ZS), will be QRV from Mahe (AF-024) working in CW, SSB,
RTTY and PSK on 160m-6m from Nov 19-27.
QSLs direct or via bureau to their homecalls.

VP2M - MONTSERRAT, NA-103
K3VX (VP2MVX), K9CS (VP2MCS), K9FO (VP2MFO), K9OWQ (VP2MWP) and
K9NR (VP2MNR) will activate the volcano Montserrat (NA-103) mostly
in CW but also in SSB and RTTY on 160m-6m from Nov 22 until Dec 6.
They also plan to take part in the CQ WWDX CW and ARRL 160m contests.
The QSL manager for all stations is K9CS.

ZD9 - TRISTAN DA CUNHA, AF-029
Dieter,DJ2EH, will stay on Tristan da Cunha (AF-029) from Nov 20 until
Dec 8. He will receive his call upon arrival and plans to work in CW,
SSB and RTTY using a vertical for 160m-30m and a 3 ele wire beam.
QSL cards should be sent via his homecall, bureau ok.

ZF - CAYMAN ISLANDS, NA-016
Robert,K5PI, will show up as ZF2PI from Little Cayman from Nov 18-22.
His next stop is Grand Cayman Island (WLOTA LH-1042) from Nov 23-26.
At last he will join the ZF1A contest team in the WWDX CW on Nov 27/28.
The 60m band is allowed in ZF since March and so he will be QRV there
as well. QSLs for ZF2PI via LoTW or K5PI,
QSLs for ZF1A via bureau, LoTW or direct to K6AM.

ZK2 - NIUE, OC-040 / VK9/N - NORFOLK ISLAND, OC-005
IK1PMR, PA3LEO, LA9SN, N6TQS and K6SRZ will stay on Niue (OC-040) from
Nov 20 until Dec 3. They will sign ZK2AA in CW and RTTY on 6m-160m with
four Elecraft K3 radios plus amplifiers. They want to focus on working
Europe and the lowbands. QSLs via PA3LEO, also via bureau.
Their next stop will be Norfolk Island (OC-005) from Dec 5-19 where
they will sign VK9NN. See also: http://www.pacificdxpedition.com

ZL7 - CHATHAM ISLANDS, OC-038
Seppo,OH1VR, will be active as ZL7VR from Chatham (OC-038) respectively
as ZL7V (in the CQ WWDX CW Contest) from Nov 23-30. QSLs via homecall.

6Y - JAMAICA, NA-097
Mischa,PA1OKZ, is now active as 6Y5NS from Jamaica (NA-097) and will
stay there until Nov 26. He works in SSB and digital modes on HF.
QSL via PA1OKZ, but only eQSLs!

9H - MALTA, EU-023
DL4HG and DL5XAT will show up as 9H3TX from Gozo Island (EU-023)
from Nov 23-30. They will use 100 watts and verticals and will be
QRV as Multi/2 in the WWDX CW Contest.
QSLs via bureau, direct or LoTW to DL5XAT.

CHILE, SPECIAL EVENT STATION
Some members of the "Radio Club de Copiapo" (CE1CPI) will activate
the special event station XR33M in November and December working in
SSB on 15m/20m/40m and 80m to remember the rescue of the 33 miners
after being caught for 69 days. QSLs via CE3BBC.

INDIA, SPECIAL EVENT STATION
The special event station AU2JCB will be QRV in SSB on 40m-10m from
Nov 20 until Dec 5 to remember the Indian physicist and radio pioneer
Jagadish Chandra Bose. QSLs direct with 2 IRCs to VU2DSI.

SILENT KEY: Some sources from the US state that Henry "Hank" Kohl,K8DD,
a wellknown DXer, passed away on Nov 13. He was active from FP, HK,
C6A, KH0, PZ, V47, VO2, VP2M, YN and many more countries.

DXCC: QSL cards of J5NAR (Guinea-Bissau, operation in 2010) are accepted
for DXCC credit now.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Nov 19/20: UFT YL CW Contest, 80m
Nov 20/21: RSGB 1,8 MHz Contest
Nov 20: Mongolian DX Contest
Nov 21: 13. IGARAG St. Barbara Party
Nov 21: HOT Party

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AF-018, IH9, Pantelleria Island: Tony,IH9/IK1QBT, and Emilio,IH9/IZ1GAR,
will be QRV from Pantelleria (WLOTA 0041) from Nov 23-30. In the
WWDX CW Contest they will sign IH9X (80m single) and IH9R (40m single).
QSL via homecall (bureau/direct).

EU-009, GM/MM, Orkneys: Russell,G5XW, announced to be active as GM5XW from
Orkney Mainland (IOSA OR-01, SCOTIA OI-14) from Nov 17-22. He intends
to activate other islands as well. QSL via homecall (see QRZ.com).

EU-080, EA1, Pontevedra Province Group: Francois,EA1/ON4LO/p, plans to
activate several lighthouses (e.g. Arousa Island) from Nov 20-30.
QSL via homecall (bureau/direct).

NA-078, XE2, Baja California Sur State SW: Manuel,XE2HUQ, and Tony,XE2HVF,
will be QRV as XF1HUQ and XF1HVF from Magdalena Island from Nov 18-22.
QSLs via homecalls (bureau/direct).

NA-171, XE2, Sinaloa State Group: The XE1RCS Radio Club will be active as
XF1RCS from Venados Island from Nov 18-21. QSL via N7RO & LoTW.
See their website at: http://www.xe1rcs.org.mx/xf1rcs/index-eng.html

SA-059, YV5, Los Testigos Group: Members of the Caracas DX Group will be
QRV as YW5LF from the Los Frailes archipelago from Nov 18-22.
QSL via DM4TI (bureau/direct).

1026. UTC Clock For Desktop ?

Newsgroup: rec.radio.amateur.misc
Date: 2010-11-17 19:07:02 UTC
From: Bob <rgsros@notme.invalid>
Message-ID: <ic194r$9g5$1@news.eternal-september.org>
Source record: 5195

Hi all,

Am using W7.

My Alpha Clock aplet, and any new downloads for it, for whatever reason,
won't display UTC time correctly on my PC.
Probably something on my PC, as it used to just fine.
PC time, time zone set, etc. all seek correct.

Anyway,

Anyone know of any free small digital clock display that can reside on
my desktop and do nothing but display the correct UTC ?

Thanks,
Bob

Go to Walmart. Buy a cheap digital wristwatch. Remove the band. Set
the watch to UTC. Velcro it to the front of a shelf or some other
place where it's in plain sight.

Good Morning Bob:

I have a small program on the desktop that displays all the info
your're looking for. The program is at:

http://www.worldtimeserver.com/atomic-clock/

It's a great little app...

Gook luck

Tom G, Sr.

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-11-18
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF is looking for additional technical support! **

With a rising number of tools and sections on our web portal
MMMonVHF.de the required programming and maintaining effort of
those is also getting more. Due to the fact, that this is as of
today a "one-man" show, we are looking for some addtional
volunteer (s) for supporting us in this topic. So, if you are
willing to spend some of your free time with developing new web
tools and maintaining the existing web/database structure and
you have some advanced knowledge / experience in php / mysql
javascript you are very welcome to contact us (we would preferred
german language speaking people for that issue) - For details you
may contact Ansgar, DG2KBC (dg2kbc"at"mmmonvhf.de) direct...
SOURCE: Ansgar, DG2KBC, on behalf of the MMMonVHF Team

** Spring VHF-UHF Field Day reminder **

A reminder: the Spring VHF-UHF Field Day will be held next
weekend, November 20/21. Please note that there was a typing error
in the advertised finishing time of the Field Day. The correct
times are 0100Z on Saturday to 0100Z on Sunday (0400Z for VK6 only)
A corrected copy of the rules is available on the contest web page
by clicking here: http://www.wia.org.au/members/contests/vhfuhf/
The due date for logs will be Monday, December 7. Early logs would
be appreciated, to allow the certificates to be mailed out as early
as possible before the Christmas postal rush. As well as the normal
certificates, special certificates will be awarded to the entrants
who have participated in all three Field Days in this WIA centenary
year. To be eligible for this extra certificate, you must operate
under the same callsign in all three Field Days.

** MoonSked 1.6.0 and 1.6.1 released, by David GM4JJJ **

Today I have released a bug fix update for MoonSked for Windows
and MoonSked X for Macintosh computers. This fixes a potential
problem where there could be a high CPU load if a Tracking Window
was closed (1.6.0) Latest version (1.6.1) fixes a communication
problem between MoonSked and Rotator Drivers when AutoTrack was
toggled off and on more than twice. I would advise all users to
consider updating to the latest release version 1.6.1 available
on Davidï¿½s website below. Thanks, 73 David , GM4JJJ
http://www.gm4jjj.co.uk/MoonSked/moonsked.htm

VE8/W7EME in CP28 qrv end of 2010, begin 2011...
This is a job related QRV. It is also in Christmas holiday.
I will also have the "small" portable, 5wl and 500 watts.
Watch for random operatins of JT on Moon and FSK441 beaming
south east. All operation between 144.140 and .144MHz. CW by
request (hopefully all skeds can be same evenings, I will start
to organize these as time gets closer ...)

** Jarvis Island (Grid Loc. AI99) qrv HF and 50 MHz **

A team of operators plan to activate Jarvis Island (OC-081, USi
OI005S, WFF KFF-115, Grid Loc. AI99) as N5E between 17 November
and 1 December 2010. Applications for the required government
permits have been submitted to the US Fish & Wildlife Service,
but final approval has not yet been received. Plans call for
24-25 operators to continuously staff 12 stations on CW, SSB and
RTTY on 160m through 6m. (No 60m operations are planned). CQWW
DX CW Contest operations are included. Transportation and support
services will be provided by the MV Braveheart and its crew, the
same group who helped make the 2008 VP6DX expedition a success.
More updates to follow in the coming months...
SOURCE: [rsgbiota.org] via ICPO Bulletin (12-19 November 2010)

** Special Event GB70CBC **

The Coventry Amateur Radio Society will be operating GB70CBC for the Coventry Blitz Commemoration from Coventry Cathedral [aka St. Michael's Cathederal], Coventry, West Midlands, Canterbury, England (IOTA EU-005, WLOTA 1841), during November. Operation will be as and when from 1st to 28th November 2010 mainly on 20m and 40m SSB, also 2m and 70cm FM. St Michael's church was largely constructed between the late 14th century and early 15th century It was one of the largest parish churches in England when, in 1918 it was elevated to cathedral status on the creation of Coventry Diocese. This St Michael's Cathedral now stands ruined, bombed almost to destruction during the Coventry Blitz on 14 November 1940 by the German Luftwaffe. Only the tower, spire, the outer wall and the bronze effigy and tomb of its first bishop, Huyshe Wolcott Yeatman-Biggs, survived. QSL via the RSGB bureau. SOURCE: [GB2RS] via ICPO Bulletin (12-19 November 2010)

** N8OFS qrv for the State Park Activation **

N8OFS will be qrv 2011-01-22 1900Z till 2011-01-22 2300Z from EN81VD for the State Park Activation. N8OFS/8 EN81vd Lorain County Ohio / Findley Ohio State Park... Kenwood TS-60 @ 90W to 29.4ft of LMR-400 to the PAR OA-50 @ 13ft... 1900Z-2300Z on January 22nd only...SEE: www.mmmonvhf.de/latest.php?id=3595 Counts for http://parks.portcars.org/ospota/?p=173 WAOSPA... Activates Park for POTA (Parks On The Air) Yahoo Group... SOURCE: Andy, N8OFS, direct to MMMonVHF

** JF1OCQ going to ZL7 (Chatham Islands) **

ZL7A is the new callsign that Hiro, JF1OCQ will be using from the Chatham Islands on 2-9 December. Hiro and Toshi,ZL7/W1SY will be QRV on 160-6 metres all modes. QSL ZL7/W1SY via JE1SYN, QSL ZL7A via JF1OCQ. Infos: http://w1vx.net/pedition/zl7/2010ZL7.htm SOURCE: [TNX K9CS] via 425 DX News #1019

** Six Meter Expedition to Saba Island (PJ6) **

Dick K5AND, Pat W5OZI and George K5TR will be active from Saba (NA-145) from 22 June to 6 July 2011. The QTH is located on the northeast part of the island at about 150 meters above sea leavel (490 ft) with perfect take off to the US, EU, AF and most of SA. The plan is to operate CW on 50.106 Mhz and SSB on 50.118 Mhz. We will also be on JT65 during moonsets and moonrises on 50.190 Mhz. We should have a web site in the coming month to post updates to the trip. We do not know what callsign(s) we will use. SOURCE: GOTO List and 425-DX-News

** S7, SEYCHELLES, HF and 50 MHz Operation **

Noboru/JA2AAU (S79AU), Iwao/JA2LSS (S79SS), Seiji/JA2ATE (S79TE) and Tug/JA2ZS (S79ZS) will be active from Mahe (AF-024), Seychelles on 19-27 November. They plan to operate CW, SSB, RTTY and PSK on 160-6 metres. QSL via home calls, direct or bureau. SOURCE: [TNX The Daily DX] via 425 DX News #1019

** VP2M, Montserrat, HF and 50 MHz Operation **

K3VX, K9CS, K9FO and K9NR will be active from Montserrat (NA-103)
from 23 November to 5 December, including participation in the CQ
WW DX CW and ARRL 160 Meter Contests. Activity is planned on
160-6 metres mostly CW, with some RTTY, SSB and possibly
PSK31. Requested callsigns are VP2MVX, VP2MSC, VP2MFO and VP2MNR.
QSL all via K9CS. SOURCE: [TNX K9CS] via 425 DX News #1019

** ZK2 - NIUE and VK9/N - NORFOLK ISLAND HF & 50 MHz Operation **

IK1PMR, PA3LEO, LA9SN, N6TQS and K6SRZ will stay on Niue (OC-040)
from Nov 20 until Dec 3. They will sign ZK2AA in CW and RTTY on
6m-160m with four Elecraft K3 radios plus amplifiers. They want
to focus on working Europe and the lowbands. QSLs via PA3LEO,
also via bureau. Their next stop will be Norfolk Island (OC-005)
from Dec 5-19 where they will sign VK9NN. See also:

THIS WEEKEND THE SPRING VHF/UHF FIELD DAY

VHF-UHF Field Days provide operators with the opportunity to "head for the
hills" and see how far they can work.

Field Days have separate sections for single and multiple operator stations. The duration of the Field Day is 24 hours, but there are also 8 hour sections for operators who may not be able to camp overnight.

Most club stations prefer to operate for the full 24 hours.

Field Days also generate plenty of activity from home stations, so there is also a separate Home Station section.

The scoring is based on grid locator squares. Each new square worked gives quite a boost to the score, and this encourages the entrants to operate from locations in grid squares that normally don't have a great amount of amateur activity.

There are no mode restrictions, except that all contacts must be simplex - contacts through repeaters or satellites are not allowed. There is plenty of FM activity, but one feature of the Field Days is a high level of SSB.

It is possible to do very well with only modest antennas if you pick a good hilltop. Another option, if your station is easily transportable, is to operate from more than one grid square during the contest period.

Field Day scoring is simple - one point per contact. But entrants also score 10 points for each different locator square worked, and each locator square they have operated from, on each band. There are also band multipliers to encourage activity on the higher UHF and microwave bands.

Logs must be accompanied by a cover sheet including a scoring table as described in the rules. A sample scoring sheet is available for download at wiaorg.au look in members area under contests.

Logs can be submitted either on paper or as email attachments.

Paper logs can be mailed to The Manager
VHF-UHF Field Day
3 Vernal Avenue
Mitcham
Vic 3132.

Electronic logs can be e-mailed to vhf-contests@wia.org.au

FREE EMAIL ADDRESS

Your WIA though it's email server allows you to establish "yourcallsign@wia.org.au"

All emails sent to this address automatically forwarded to either your home or work email account.

This provides YOU with ONE consistent email address. And should you ever change ISP, then having a WIA address means your friends and colleagues will still be able to email you without the need for individually providing them with your new address. All YOU need to do is to simply advise the WIA of your new address, through da form on our website and we do the rest.

It couldn't be easier!!

A further benefit of having a WIA address, is in receiving informative Amateur Radio news as it breaks, sent directly to YOUR inbox..

A new phone app is being developed to help people survive natural disasters.

The application will provide people with access to emergency information including details about a natural disaster at their location and assist emergency services in locating people in trouble, very similar in fact to the ABC Radio emergency information web.

Researchers at the University of Queensland are developing the technology, with project manager Anthony Frangi saying the app will be targeted at young people.

"While radio and television is a traditional method for getting information out to people about emergency situations, young people aged under 25 do not listen to radio extensively and so are at risk of not being informed if an emergency situation develops," Mr Frangi said in a statement.

The application, which will be compatible with popular smart phones, is due to be released in November NEXT year.

Those listening in VK4 in particular may be aware of the name Anthony Frangi as he was on ABC Radio across Queensland and also was at 4BC.

Telstra Wednesday launched Telstra Plus Premium Support

a new service designed to help we Australians repair, set-up or install a wide range of home technologies over the phone or in person.

Telstra Executive Director Consumer, Ms Rebekah O'Flaherty, said the launch of Telstra Plus Premium Support was timely in light of new Telstra research which revealed more than a third of Australians have given up installing a new home gadget because the process seemed too hard.

"From wireless laptops to game consoles and internet-enabled TVs, in the past 12 months alone approximately one-third of Aussies have spent between $1,000 and $3,000 on new gadgets for their home, with one in five investing between $3,000 and $7,000.

"However while we have the latest and greatest multimedia technologies at our fingertips, it seems only a quarter of us feel like we've got to grips with their more advanced features - leaving a wealth of useful and entertaining features undiscovered.

Prices for the new service will vary upwards from $59, depending on the level of technical support required and whether the job can be done remotely or requires a home visit.

Customers can visit www.telstra.com.au/telstra-plus for more information.

Digital radio technologies to be reviewed in regional Australia

The minister for broadband, communications and the digital economy, Senator Stephen Conroy, has called for public comment on which technologies might be suitable for the provision of digital radio services in regional Australia.

The Government has released a paper called 'Technologies for digital radio servcies in regional Australia', which calls for submissions on whether the technologies used in metropolitan areas are suitable for regional areas.

HAMS ACROSS AUSTRALIA.

VK1

Results of Saturday's Standard & Advanced Licence examinations / assessments.

There were 2 candidates and results were that Murray De Plater VK1FMDP and Shane Talbot VK1FOOT successfully completed their upgrade to standard licence level.

Congratulations to you both.

Thanks to Alan VK1WX and Glenn VK1NUT for giving their time to run these exams.

The next scheduled Foundation Licence Course and Examinations / Assessments will be held in March 2011.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Next Sunday the 28th will be last Dural based Trash and Treasure for the year at the VK2WI site in Quarry Road. The Trash and Treasure event is in the morning, then the afternoon has the Home Brew and Experimenters Group.
The lecture will be on photography.

The first Trash and Treasure event at VK2WI next year will be at the end of January 2011.

Also in the morning - assessments for all levels of licence are conducted.

Waverley Amateur Radio Society Training weekends provide the opportunity for those new to amateur radio to obtain a foundation licence over a single weekend and for others to be assessed for higher grades.

The next is planned for the 12th & 13th of February next year.

Interested? contact education@vk2bv.org

VK3
web service:- http://www.amateurradio.com.au/news/
VKC Roundup http://www.police

The final Foundation Licence Training and Assessment Weekend held by Amateur Radio Victoria this year will be on the 5th and 6th of December.

Enrolments for this quality training session held at Ashburton will close soon.

Also just announced is a Standard Bridging Course to help Foundation Licence fill their theory knowledge gap to the Standard Licence Syllabus level.

This high successful Bridging Course is held over a number of Wednesday evenings in February, plus a Saturday revision session.

For inquiries or enrolments in either the Foundation Licence or Bridging Course, please contact Barry Robinson VK3PV phone 0428 516 001 or email foundation@amateurradio.com.au

VK4 SILENT KEYS @ 2010 - 2011 QAC YEAR

VK4MWT Tom Bowden November 14 2010 Advised by Gavin VK4ZZ

Sad news in that Tom Bowden VK4MWT went Silent Key during the early hours of Sunday morning November 14th. He was being treated in hospital for a coronary condition at the time.

Tom is a former TARCadian and was Class Manager of the club during the 1980s.

Tom was also an active member of the SES and the Rural Fire Brigade in the Saunders Beach and Deeragun areas and was in business for some years along with Jean VK4MUJ running the General Store at Saunders Beach.

Tom always tried to help his fellow ham or community member when they asked for assistance with technical or operational matters and was one of the hobbys true gentlemen.

Tom moved to Strathpine in later years to be closer to family and medical care and although was restricted in what he could do radio-wise still participated in the hobby through the CQ100 network as well as occasional operation on Echolink and IRLP.

Tom will be missed and our heartfelt commiserations go out to Jean VK4MUJ and family

Vale Tom Bowden VK4MWT SK

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

Recently I have been drawing attention to allowing for the normal business of personal life when we are planning our club events. Well just as if to prove a point, Murphy seems to have intervened for me,too.

Last Sunday, as every one was sitting down to eat at the Presidents Lunch, in Rockhampton, I was enjoying an air-conditioned trip to hospital. Until Thursday, I had been planning to be with my club delegates at the lunch and then I was told I was in for an enforced holiday at the local hospital.

What this has meant is that, at late notice, two of our delegates were struck off the list and by Friday because of other health issues, the whole trip was off. This is a disappointment as this meeting of club delegates and WIA representatives tends to fill in gaps in knowing what is happening in our hobby and provides direct feedback to the Institute.

Had this been a field day or another competitive event, what happened last week would have been a disaster for our club. The good part this situation is that should I not bounce as well as I hope, our club has a group of experienced members who can continue to keep the bases covered.

It is important to train our club members in running the organisation by rotating people at annual elections.

I'm Geoff Emery and that's what I think....how about you?

CLUBBING -

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greetings from the Rockhampton and District Amateur Radio Club, the RADAR Club. This is Les VK4VIL reporting.

>From all reports, last weekend's visit to Rockhampton by WIA President Michael Owen VK3KI and the Presidents Queensland Luncheon could be considered a success all round.

The visit to the Club's radio museum and communications room at the Rockhampton Heritage Village by Michael offered just reward for all involved and the luncheon and other functions resulted in a great social time for those who attended. More importantly, the focal point of the visit and the luncheon, a chance to exchange ideas regarding the path of amateur radio in the State and elsewhere, proved the real winner.

Topics included the regionalisation of local authorities in Queensland and the varying support by local authorities to different clubs, the requirement to produce attractive displays for recruitment and information purposes, delay period between submission and publication with AR Magazine, the considerable cost of examinations and the hardships of clubs having small membership.

While Michael was quick to point out the role of the WIA and particularly its requirement to efficiently utilise monies sourced from membership, he did not attempt to conceal issues of concern which required attention. His pen was certainly working overtime and he was obviously preparing for further work on his return to HQ.

On completion of the luncheon, it was also interesting and positive to hear a couple of comments from the "non-hams" including some XYLs who confessed to being lost in the lingo, but nevertheless had gained some idea of what amateur radio was all about, not just time in front of a microphone.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

As this news goes to air TREC members are in the last stages of the Spring VHF/UHF Field Day event. We are operating VK4WAT from Hallorans Hill just on the edge of Atherton in Far North Queensland. Band conditions have not been as good as previous years but we have still managed to put together a respectable score.

Due to the tyranny of distance it is hard to compete with the southern stations, many of whom have many other stations located close to their area of operations, hey, but we still have a great time Hi Hi! And the beer's cold.

We will be dismantling our station and packing up after 0100 zulu.

Thank you to all the stations who gave us valuable contacts throughout the 24 hour period.

We are looking forward to the Summer VHF/UHF Field day where hopefully the band conditions will be better.

theTARCinc 2010 Christmas Party and Monster Auction happens on Sunday afternoon December 12th from 2-00pm at the VK4TJS Satellite Dish City.

>From 2-30pm the Monster Auction will get underway.
>From 4-30pm the BBQ will light up.

VK9

VK9NA Norfolk Island DXpedition 2011

The trio of Michael Coleman VK3KH, Kevin Johnston VK4UH and Alan Devlin VK3XPD is returning to Norfolk Island after their inaugural VHF/UHF and Microwave band DXpedition of last summer.

The dates are 7-21 January, with more output power on several bands and this time it includes the VK VHF-UHF Summer Field Day Contest on 15-16 January.

Alan VK3XPD advises that the prime focus this time are the elusive microwave QSO's on 2.4 GHz thru 10 GHz back to VK, and across the "pond" to ZL.

However the team will again have 6 meters, 2 meters, 70 cm & 1296 MHz. A team of serious microwavers, Colin Hutchesson VK5DK, Trevor Niven VK5NC and Les Janes VK5JL, will set up at Port Macquarie on the VK2 coastline.

Alan VK3XPD says because of the sizable distances involved and the finicky nature of the propagation, the WSJT digital modes will more than likely offer us the best possible chance of success.

However, 2m, 70cm & 23cm via tropospheric ducting will be used as propagation indicators for the microwave bands.

(Jim Linton VK3PC)

SILENT KEYS

Bernard Clancy has written a great piece in the Age on a guy many who served in Vietnam will remember as "Hound Dog" John Hounslow.

JOHN Hounslow, (Hound Dog) delivered daily news from home to Australian troops in Vietnam in 1968-69, and who later won both Logie and Penguin awards as a television journalist, has died of cancer at Cabrini Hospital.

He was only 63.

Hounslow's early career was defined by the army. He was conscripted in 1967 and arrived in Vietnam about 12 months later, where he served in army public relations in Saigon (now Ho Chi Minh City). His most important task was to read a five-minute bulletin of news from Australia on the American Forces Vietnam Network (AFVN) radio station at 10am each day, probably the first time any of us had heard FM broadcasting!

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

The SARL (South African Radio League) representation to ICASA re: the draft Radio Frequency Spectrum Regulations is now available on the web.

The document was sent to ICASA Monday last, when it then became a public document.

The final document includes many of the suggestions received from SARL members.

It should be noted that members have submitted opposing views on various aspects of the regulations which all had to be considered. SARL believes that it has produced a document that is balanced and serves the best interest of amateur radio.

The next step will be the operating frequency table which will specify the frequencies and power levels permitted on various bands.

Details can be found in the SA Government Gazette.

US ATTORNEYS OFFICE GOES TO COURT TO COLLECT $21000 FINE ISSUED AGAINST K1MAN

It has taken almost five years, but the United States Department of Justice has gone to court to collect a $21,000 fine issued back in March of 2006 by the FCC to Glenn, Baxter, K1MAN.

This, as two US Attorneys file a Complaint in the US District Court in Maine against Baxter for not responding appropriately to an order that he pay the fine that was issued for his alleged violating of several sections of the Part 97 rules.

Baxter had also been cited for wilful violation of Sections which deal with exercising proper control over his amateur station and a prohibition against "broadcasting" in the Ham bands.

W8ROG NAMED KNIGHT OF THE LEGION OF HONOR

Ken Kott, W8ROG, has recently been named Knight of the Legion of Honour for his actions during World War Two.

The award notification issued by Consul General of France, Graham Paul, reads in part: "This outstanding distinction is the highest honour that France can bestow upon those who have achieved remarkable deeds for France. It is also a sign of true gratitude for your invaluable contribution to the liberation of France during these difficult times in the History of our nation."

In addition to radioman and reconnaissance duty with the 3rd Armoured Division in Europe during WW2, Kott also taught Morse code in the Army.

Ken Kott, W8ROG who at age 90 is still an ardent C-W operator is also the father of former Worldrado editor Nancy Kott, WZ8C.

Curse OF 882 kHz

Vandalism to transmitter forces radio station off-air.

Vandals who attacked a radio transmitter caused BBC Radio Wales on medium wave 882 off-air for a time.

The transmitter in north Somerset, broadcasts across much of Wales was off-air for around three hours on Tuesday afternoon.

The damage also hit services from other broadcasters who share the site.

Several years ago here in VK Radio 4BH in Brisbane was also vandalised, their tower toppled. Their frequency? 882 KHz

==========

RSGB NEWS FROM G4NJH

RSGB Board Election invalid

Governance of the RSGB is regulated by the Memorandum and Articles of Association of the Society, or M&A, a copy of which may be found on the Members-only section of the website.

An irregularity has been identified in the nomination of the two candidates standing for election as nationally elected members of the Board. Unfortunately, it was not noticed until after RadCom had gone to press that both candidates shared two nominators. This is not in accordance with the

M&A and therefore the candidates were not properly nominated.

The Board has considered its options under the M&A and has determined
that the only course of action open to it is to declare the election
for nationally elected members of the Board invalid. Given other
requirements of the M&A, the Board will now co-opt both candidates as
Board members for a twelve month period until the next election late
in 2011, when the candidates may stand for election again. The
Society very much regrets this error, but believes that the best
interests of the membership are served by acting as set out above.

The regional election for Region 4 is unaffected and closes midday December 2.

==========

WEIRD AND WONDERFUL

If ever EVER you have a queasy feeling about climbing your 10 metre ham tower
THIS should fix it!

Christmas in Bethlehem - amateur radio special event

Members of the Barrow Amateur Radio Club will activate special event Christmas
station WR4BC from Bethlehem, Georgia, between December 4 and 5.

Suggested frequencies are (-/+ QRM):
CW/Digital/RTTY - 3575, 7065, 14065, 21065 and 28065 kHz
SSB - 3875, 7265, 14265, 21365 and 28465 kHz

A Limited-edition collectable QSL will be issued, complete with the Bethlehem
Christmas Postmark.

For more information, please visit the club Web site at:
www.barrowhamradio.org

Antarctic
Karel, ON5TN will be staying at the Belgian Antarctic base Princess Elisabeth, until February 2011. He plans to operate as OR4TN in his spare time, starting in December. Updates will be posted on QRZ.com under OR4TN. QSL via ON5TN.

South Korea
For those who like working unusual callsigns the special event call D7G20 (that is D-seven-G-twenty) is on the air till 28th November. This is in connection with the Seoul G20 Summit.

Tristan da Cunha
This quite rare DXCC entity is available till early December as ZD9AH. Operation is mainly SSB with some RTTY expected later.

Uganda
5X1XA from now till 1st December. A single band entry in the CQ WW DX CW Contest (27-28 November) will probably be on 20 metres.
QSL info is via G3SWH.

Kermadec
ZL8X from the Kermadec Islands till 5th December. This is a rare one for the DX fraternity so listen for the pile-ups!!
Up to date info can be found on www.kermadec.de

Gambia
A team of amateur radio operators from the Czech and Slovak OM0C Contest Crew are on another DXpedition to The Gambia to take place now until November 30.

Activity 160-10 meters using CW and SSB.

6 full time stations simultaneously in order to take advantage of all band openings.

QSL Manager is Brani, OM2FY.
QSL by the Bureau

For more details and updates, visit their Web at:
www.om0c.com/?Gambia_2010_-_C5A

Chilean hams celebrates mine rescue

Members of the Radio Club de Copiapo are now active as XR33M until the end of December with the callsign celebrating the rescue of 33 trapped miners at San Jose in Chile.

XR33M is using on the HF bands including during the CQ World Wide DX CW Contest the 27th and 28th of November, and the ARRL 10 Meter Contest the 11th and 12th of December.

The club members responded to offer their support to the rescue effort by providing communications in the desert region where the copper mine is located.

That support enabled links for various authorities with emergency equipment inside the San Jose site and also with family and authorities in the City Of Copiapo.

ASTRONAUTS TAKE PART IN GROUND BASED ARISS TRAINING EXERCISE

Turning to ham radio space related news, word that astronauts Joe Acaba, KE5DAR and Aki Hoshide, KE5DNI participated in a simulated ARISS school contact with students attending Ralph McCall School in Alberta, Canada.

The simulated contacts are training sessions for the astronaut hams using ARISS equivalent equipment to make terrestrial-based amateur radio contacts.

Acaba, who is slated to fly with Expedition 31, also had an ARISS refresher course for his upcoming mission in 2012.

Out Of This World: A Paper Plane In Space

A group of British space buffs is celebrating the successful launch of a paper plane into space.

Amateur space enthusiasts, John Oates, Lester Haines, Radio Amateur Steve Daniels G6UIM (who designed the radio tracking system) made the plane out of paper straws covered with paper.

They attached the aircraft - which has a 3ft wingspan - and a camera to a helium balloon and released it into the air, soaring an astonishing 23 miles above the ground, taking dozens of photographs, before gliding back to earth.

After months of planning, they put operation Paris - Paper Aircraft Released Into Space - into action, travelling to Spain to send the plane on its journey. (As you do!)

The balloon climbed to 90,000 ft where the helium expanded to a point that caused the balloon to burst and the plane was released, gliding down to earth 100 miles from where it set off.

It's a world first, but we are led to believe a group from VK are going to challenge!

WW SPECIAL INTEREST GROUP --- NAVAL

The Antenna Made Out of Sea Water

A whole new meaning behind "on a piece of wet string".

You'd think that with all the leaps we've made in wireless communication that we wouldn't need a new antenna. Daniel Tam disagrees. This engineer at SPAWAR Systems Center has to solve the daunting task of jamming as many antennas possible onto a Navy ship.

His brilliant solution?

Use the one material there's plenty of near a boat: seawater.

The prototype antenna consists of a water pump, a nozzle and a large magnetic coil with a coax jack for input and output. Reception is achieved by blasting a stream of seawater through the magnet. It's rated for 2 to 400MHz, meaning it can send and receive signals in the UHF, VHF and HF ranges.

Although the device was primarily designed for on seaborne craft, Dan hopes to see it used in other applications, such as for emergency radio broadcasts. He even envisions the antenna used on land.

Where you'd find the seawater, only Tam knows.

SOUTH AFRICAN HAM HELPS RESCUE STRANDED YACHT

A real time rescue at sea with the aid of a South African sailor and ham radio operator.

Hamnet's Francois Botha, ZS5BUU is here with the details:

Roy Cook, ZS5CB was instrumental earlier this week in the rescue of 2 yachtsmen aboard a yacht called Houbo that ran into difficulties off the coast of Mozambique. Roy had intercepted a call for assistance, via a Ham Radio marine VHF monitoring frequency, and contacted NSRI Richards Bay on Saturday afternoon the 30th of October.

He reported that the yacht Philigic had by chance come across the yacht with two Frenchmen, on board and in a desperate state of disrepair, some 200 nautical miles off-shore from the Mozambique coast. The yacht Houbo unfortunately had been caught up in severe tropical weather out at sea and

had not only capsized and corrected itself but that the two yachtsmen had lost most of their food, drinking water, and that the boat had been severely damaged. Their radio equipment and antenna system was non functional with result they could not radio for help.

Richards Bay NSRI under the control of Dorian Robertson indicated that the yacht was out of range for a rescue operation but the team were placed on alert to monitor the situation. Roy, in the meantime had been able to maintain contact with the other yacht and kept the Richards Bay NSRI up to date with information on the progress of the two yachts.

Once the yachts were in South African waters by Monday afternoon around 16h00, the Richards Bay NSRI launched the rescue craft and rendezvoused with the Houbo 12 nautical miles off-shore in a 25 knot North Easterly wind and a 1 to 2 meter swell. A towline was attached to the yacht and safely brought to the safety of Richards Bay harbor.

Both the yachtsmen were unhurt but will spend quite a while repairing the yacht before they continue on their journey.

Reporting for Hamnet this is Francois Botha, ZS6BUU.

The final destination of the damaged yacht is at this stage is unknown, but it may be a long time before its back at sea. (ARMI)

==========
WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

==> + PUBLIC SERVICE: SKYWARN RECOGNITION DAY SET FOR DECEMBER 4

The 12th Annual SKYWARN Recognition Day (SRD) Special Event will
take place Saturday, December 4, 2010. SRD is co-sponsored by the ARRL
and the National Weather Service as a way to recognize the commitment
made by Amateur Radio operators in helping to keep their communities
safe. According to SRD Coordinator David Floyd, N5DBZ, Amateur Radio
operators can visit their local participating NWS office, working as a
team to contact other hams across the world throughout the 24 hour
event.

Floyd said that as SKYWARN Recognition Day has grown throughout the
years, he has seen a greater use of digital communications in addition
to SSB, CW, RTTY and packet radio: "Each year, more and more contacts
are being made using EchoLink, Winlink and the use of e-mail
reflectors." In keeping with the NWS setting, stations are asked to
```

include a weather report for their location in their exchange. The 2010 SKYWARN Recognition Day will be held on December 4 from 0000 UTC-2400 UTC. Read more here <http://www.arrl.org/news/skywarn-recognition-day-set-for-december-4>.

==> + ARRL RECOGNIZES: DEADLINE APPROACHING FOR NOMINATIONS FOR ARRL'S LEONARD AWARD

Television, radio, magazines, newspapers, blogs, Webcasts -- Amateur Radio has been featured in all of them in 2010. And now it is time to thank the professional media people who made it happen by nominating them for the Bill Leonard, W2SKE, Professional Media Award. This national level annual award is sponsored by the ARRL and honors three professional journalists whose outstanding coverage in audio, video and print formats best reflect the enjoyment, importance and public service value of the Amateur Radio Service. The deadline for nominations is December 10. Read more here <http://www.arrl.org/news/deadline-approaching-for-nominations-for-arrl-s-leonard-award>.

==> + DAYTON HAMVENTION®: NOMINATIONS SOUGHT FOR 2011 DAYTON HAMVENTION AWARDS

The Dayton Hamvention® is accepting nominations for its 2011 awards. Do you know an outstanding amateur in your club, community or from on-the-air contacts? Does this person excel in some phase of Amateur Radio? Do you feel this person deserves worldwide recognition? Is there an Amateur Radio club that you know of that has an outstanding record of public service? All radio amateurs and Amateur Radio clubs are eligible. The deadline for nominations is January 15, 2011. The winners will be recognized at the 2011 Hamvention, May 20-22. Read more here <http://www.arrl.org/news/nominations-sought-for-2011-dayton-hamvention-awards>.

==> ON THE AIR: ARRL PHONE SWEEPSTAKES THIS WEEKEND

ARRL Sweepstakes <http://www.arrl.org/sweepstakes> has been part of Amateur Radio in the US and Canada for more than 75 years. In 2010, the tradition continues with the 77th running of the best domestic contest in all of Amateur Radio: the Phone portion of the contest runs this weekend, from 2100 UTC Saturday, November 20 through 0300 UTC Monday, November 22. Read more here <http://www.arrl.org/news/no-maybes-about-it-arrl-sweepstakes-is-fun>.

==> HINTS & KINKS: SEALING PL-259 UHF PLUGS AND SO-239 UHF CONNECTORS

Don Dorward, VA3DDN, of Pickering, Ontario, sent us this idea for seals for PL-259/SO-239 connectors . Contact Don via e-mail <va3ddn@arrl.net> for more information.

The popular and low-cost PL-259 UHF plug and its mating SO-239 UHF connector were never designed to be waterproof. In spite of this, many of us find ourselves having to use these connectors out-of-doors for an

antenna or cable connection and then have the experience of trying to apply some form of weatherproofing.

If this is not done, and done well, then intermittent connections soon result, especially with wet freezing and thawing conditions, resulting in moisture and corrosion getting into the connectors and even into the coax itself.

One well-known solution is to use a bondable rubber tape wrapping. That often seems to work using one of the soft, moldable, stretchable tapes that are available for the purpose. In practice, I have found that the hardest area to seal effectively using this method is the area from the rim of the male PL-259 shell to the mating SO-239 socket face. This is especially true when the SO-239 socket is located partially inside the cowl of the antenna mount (such as the Solarcon/Antron vertical or other similar types) and it is impossible to get sealing tape up into this tight location.

To overcome this problem, simply slip as many tight fitting O-ring(s) over the SO-239 barrel (see Figure) as needed to fill the space between the base of the SO-239 and the coupling ring. Lubricate the O-rings with a generous amount of silicone grease, often sold in the automotive part stores as "dielectric tune-up grease."

Important: Check that when the mating PL-259 plug is installed and tightened down, the outer rim of the PL-259 shell butts up against and slightly compresses the "O"-ring(s). The "O"-rings I used were ones I had on hand, about 9/16 inch ID ± 0.10 inch thick. I am sure anything that's a snug fit will work. Of course, you will still need to wrap the lower half of the PL-259 shell and the spot where the coax exits the connector with tape to seal that part.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint, you will receive $20. Send your hints via e-mail to h&k(at)arrl(dot)org or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> ARRL PUBLICATIONS: ARRL INTRODUCES EXAM REVIEW SOFTWARE FOR HAM RADIO LICENSING

ARRL announced today that it will begin including practice examination software with all of its popular license manuals. "The first book to include the new bundled-in software is The ARRL Ham Radio License Manual -- used by tens of thousands of prospective hams as their first introduction to Amateur Radio," said ARRL Marketing Manager Bob Inderbitzen, NQ1R. "The book includes everything to prepare for a 'first' ham radio license -- the Technician class license. A CD-ROM tucked into the back of the book contains the new software, which we've

named ARRL Exam Review. The software includes the complete examination question pool, plus short explanations of every question to help make sure you understand the answer." Read more here <http://www.arrl.org/news/arrl-introduces-exam-review-software-for-ham-radio-licensing>.

==> + NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEB SITE

Three new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL Web site. Let your voice be heard!

Questions in this month's QuickStats poll include:

- From an operator's point of view, have modern Amateur Radio transceivers become too complex?
- Looking back over the last several years, do you think the amount of time you spend on the air has increased or decreased?
- Which social media platforms do you use most often?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the February QST QuickStats page, located in the rear advertising section. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> + ARRL TO CLOSE IN OBSERVANCE OF THANKSGIVING HOLIDAY

ARRL Headquarters will be closed November 25 and 26 in observance of Thanksgiving. There will be no W1AW bulletins or code practice transmissions those days <http://www.arrl.org/w1aw-operating-schedule>. The ARRL Letter <http://www.arrl.org/arrlletter/> will be published a day early on Wednesday, November 24, but there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> next week. ARRL Headquarters will reopen Monday, November 29 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> SOLAR UPDATE

Tad "The sky won't snow and the Sun won't shine <http://www.dailymotion.com/video/xret4_eagles-desperado_life>" Cook, K7RA, reports: Five new sunspot groups appeared in the past eight days, and the average daily sunspot number for the November 11-17 period rose nearly 28 points to 60.9, compared to the week before. The average daily solar flux was up nearly four points to 87.9. The current forecast from NOAA/USAF shows a planetary A index of 5 on every day through the end of November, and the predicted solar flux on November 18-27 at 91, 90, 88, 86, 84, 84, 84, 84, 80 and 80. Conditions should be good during the ARRL Phone Sweepstakes this weekend. The latest predictions show continued solar activity with low geomagnetic activity levels. Look for more information on the ARRL Web site on Friday, November 19. For more information concerning radio propagation, visit

the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Eagles' Desperado <http://www.dailymotion.com/video/xret4_eagles-desperado_life>.

==> + SILENT KEY: JOHN CHAMPA, K8OCL (SK)

John Champa, K8OCL, of Richardson, Texas, passed away from complications of cancer on Friday, November 12. He was 66. An ARRL Life Member, Champa was the former Chairman of the ARRL HSMM (High Speed Multimedia) Working Group and Executive Vice President of AMSAT-NA. He was also the High Speed Multi-Media Radio Contributing Editor for CQ VHF Magazine. Champa did early work in Amateur Television (ATV) and later Amateur Digital Video (ADV). His recent focus was on PropNET, Automatic Packet Reporting (APRS) and GPS navigation systems, HSMM radio and HF digital modes. Read more here <http://www.arrl.org/news/john-champa-k8ocl-sk>.

==> THIS WEEK ON THE RADIO

This week:

- November 19 -- YO International PSK31 Contest; QRP Fox Hunt
- November 20 -- Feld Hell Sprint
- November 20-21 -- LZ DX Contest; All Austrian 160 Meter Contest; RSGB Second 1.8 MHz Contest (CW)
- November 20-22 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North American Collegiate ARC Championship (SSB)
- November 21 -- EU PSK63 QSO Party; Homebrew and Oldtime Equipment Party
- November 22 -- Run for the Bacon QRP Contest
- November 24 -- SKCC Sprint; QRP Fox Hunt

Next week:

- November 26 -- QRP Fox Hunt
- November 27-28 -- CQ Worldwide DX Contest (CW)
- December 1 -- QRP Fox Hunt
- December 2 -- ARCI Topband Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 4-5, 2010 -- ARRL West Central Florida Section Convention <http://www.fgcarc.org/>, Palmetto, Florida

- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a hamfest or convention near you, click here
<http://www.arrl.org/hamfests>.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2010-033E - Volunteers honoured for service to RAC

QSL Bureaus honoured. Nenad Stevanovic, VE3EXY, and Len Morgan, VE9MY receive Plaques of Recognition.

Radio Amateurs of Canada Presents Plaques of Recognition to the Managers of the RAC National Incoming and Outgoing QSL Bureaus.

The Radio Amateurs of Canada exists largely on the efforts of dedicated volunteers who actually do the work of the organization. Recently, the RAC has embarked on a program to offer recognition for significant volunteer efforts. One of the first areas to be recognized is the RAC National QSL Bureau system, comprised of the Incoming and Outgoing QSL Bureaus. The National QSL Bureau system for Canada was set up and is funded by the Radio Amateurs of Canada for use by its members, as a benefit of membership in the organization.

The RAC National Incoming Bureau is located in Saint John, NB. It receives and sorts QSL cards from other IARU countries and sends them at on to the appropriate Provincial Bureau, who then sends the cards on to individual hams.

The RAC National Outgoing Bureau is located in Ottawa,ON and receives cards from RAC members and forwards them on to their respective international destination.

At a recent meeting in Ottawa, the Radio Amateurs of Canada recognized the long term effort by the individuals who have operated these bureaus for many years on behalf of the RAC. Plaques were presented to Nenad Stevanovic VE3EXY, the manager of the National Outgoing Bureau for more than 10 years of service, and to Len Morgan VE9MY and the Loyalist City Amateur Radio Club, the manager of the National Incoming Bureau, for more than 15 years of service.

Congratulations and big Thank You to these people for all their dedicated work from the Radio Amateurs of Canada.

Ian MacFarquhar VE9IM
1st Vice President
Radio Amateurs of Canada

Amateur Radio Newsline(tm) Report 1736 - November 19 2010

Amateur Radio Newsline report number 1736 with a release date of
Friday, November 19th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The National Telecommunications and Information Agency proposes a fast track for spectrum reallocation that has little impact on ham radio, the Czech Republic issues its first 500 kilohertz ham radio permit, FM simplex in the satellite subbands is reeking havoc with ham radio space operations and a group opposed to a ham radio antenna installation says it will ask the ARRL for help. Find out the details on Amateur Radio Newsline(tm) report number 1736 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: NTIA PROPOSES FAST TRACK PLAN FOR REALLOCATING SPECTRUM

The National Telecommunications and Information Agency, which is the White House version of the FCC is proposing a fast track approach to the reallocation of 115 MHz of radio spectrum for wireless broadband now, increasing to a total of 500 MHz within ten years. So far the possible losses to ham radio appear minimal. Bill Pasternak, WA6ITF, is in the Newsroom with more:

--

If one looks at the National Telecommunications and Information Administration's proposed Fast Track the reallocation of 115 MHz of radio spectrum for wireless broadband now and a total of 500 MHz within ten years from a ham radio point of view, the hobby comes out looking pretty much unscathed. The only amateur radio spectrum on the list is a part of the 2.3 GHz band where hams have a secondary user status, and if this is the re-farming plan that's adopted, Amateur radio comes out with little in the way of losses.

But this is not the only plan that will be put forth. The FCC is still in the process of finalizing its reallocation recommendations and various industry groups will likely be lobbying for theirs. In the end, whatever the Washington bureaucrats dream up is likely to be a composite of what the NTIA. The FCC and other interests agree on. Thats just the way that the Washington DC political arena works.

Perhaps more important for ham radio to consider is the fact that no matter what plan is chosen, there will be various services displaced for the spectrum that they now inhabit. This means they will be searching for new bands to go to. And it is this secondary fallout that could pose more of a threat to the ham radio bands at 420 MHz and above than the initial re-farming plan itself.

Those of you who enjoy wadeing through government documents can find yhis one in PDF format at tinyurl.com/2bq3694

And I'm Bill Pasternak, WA6ITF, watching this one from the newsroom in nthe City of Angels. Jim.

--

More on this plan in future Amateur Radio Newsline reports. (NTIA Release)

**

RESTRUCTURING: CZECH REPUBLIC ISSUES 500 KHZ PERMIT

A new 500 kHz operating permit has been issued in the Czech Republic. The recipient is OK2BVG who has been given permission to operate between 501 and 504 kHz with a maximum of 20 watts Effective Radiated Power until September 1st of 2011.

As we go to air, 11 countries in IARU Region 1 have now authorized amateur or experimental operations in this part of the 500kHz band. More information can be found on the IARU Region 1 website. Its in cyberspace at www dot iaru-R1 dot org. (IARU)

**

HAM RADIO IN SPACE: FM SIMPLEX DAMAGING SPACE COMMUNICATIONS

FM operators are once again being asked to not use 145.8 to 146.0 MHz for terrestrial, point to point casual communications. This is because such operations are devastating to weal signal ground to space and space to ground satellite operations. Take a listen:

--

Actual QSO audio.

--

Thats from the FM interference on HO-68 uplink as recorded by OZ9AEC on November 9th. Two FM stations can be heard speaking in Russian. The one speaker is barely audible in the noise but the stronger one holds the potential of capturing the HO-68 receiver and blocking weak signal operations using CW, SSB band narrowband digital modes.

OZ9AEC has posted the full QSO between these stations operating on the HO-68 uplink to the YouTube dot com. It very graphically illustrates the problem that operating FM simplex operation on 145.8 to 146 and 435

to 438 MHz can cause for ham radio satellite operations. It can be heard at tinyurl.com/35yqkhl (Southgate)

**

BREAKING DX NEWS: SPRATLEY DXPEDITION EXTENDED FOR 160 METER DX CONTEST

Some good news in the world of DX. With less than 60 days to go until the Spratley Island, DX0DX operation hits the amateur bands the DXpedition Team Leader, Chris Dimitrijevic VK3FY, has announced it will be extended to allow participation in the CQ World Wide 160 Meter CW Contest. Felix Scerri, VK4FUQ, of the W-I-A News has more:

--

While DX0DX was to go QRT on the 24th January, a couple of individual and keen members have asked if they could stay on air for that contest when ends at 2200 UTC Sunday the 30th of January. This will now extend DX0DX activation to 1st of February, 2011.

This limited extension was agreed in light of strong interest from Top Band contesters and the 160 meter band being the highest sought after in the DX0DX website online survey.

In another development, the pre-assembly, erection and tuning of eight HF yagi antennas in Fontana California went extremely well with the eight antennas tuned as per instructions to their allotted bands. Each was then partly disassembled breaking down into four parts for allow for quick installation once they reach the island. Masts, rotators, masts and cabling have all been finalized.

Chris VK3FY and DU8/VK3FY says, well done to the Station & Planning Co-ordinator David Collingham K3LP for organising and attending the Pre-Assembly Gathering, and also DXpedition logistics coordinator Charles Spetnagel, W6KK, for his understanding in having all the equipment dispatched to his QTH and also for being part of the Pre-Assembly Gathering.

Im Felix, VK4FUQ.

--

DX0DX will be on air from the 6th of January and now through to the 1st of February, 2011. We will have more DX news later on in this weeks Amateur Radio Newsline report. (WIA News)

ROLE REVERSAL: OPPONENT OF HAM TOWERS SEEKS HELP FROM THE ARRL

In a total role reversal, a group of not-so-nearby neighbors trying to stop a Tivoli, Illinois ham from erecting eleven towers on his property say that they will appeal to the ARRL for help. This after being denied a chance to officially offer arguments against a proposed cluster of ham radio towers on private property in rural Tivoli

Township.

The Peoria County Planning and Zoning Commission approved the permit request by Craig Thompson, K9CT, in July for 11 towers that range in height from 30 feet to 195 feet on property he owns. Opponents of the towers are now searching for ways to slow or stop construction that already is under way.

John Martin is the nearest neighbor of the property that's situated among the rolling farm fields and woodlands south of Tivoli. He tells the local newspaper that there is likely little that people in the area can do to stop construction. He then goes on to say that those opposed to the towers are trying to form a grassroots organization to let the American Radio Relay League know their position and get them to agree that what Thompson plans to do is excessive. Martin adds that his hope is to convince the ARRL to show Thompson that it is in his best interest to scale back his plans.

But Martin has also taken his opposition to the towers to the local community. He has posted flyers and bought space in the local weekly shopper newsletter that includes a photograph of a cluster of towers and the caption "Stop this from happening in your town!"

Thompson's attorney is Fred Hopengarten, K1VR, of Massachusetts. He is an expert in telecommunications law and helped convince the state's attorney office that the county zoning law was trumped by Federal Communications Commission mandate that allowed for construction of ham radio towers. Hopengarten and Thompson and both say that the flyers are an exaggeration.

So far there has been no word from the ARRL if it has received a request from Martin to assist in stopping construction of Thompson's tower farm in rural Tivoli, Illinois. More on this story as it develops. (pjstar.com)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W6ASH repeater serving Mountain View California.

(5 sec pause here)

**

SOLAR ACTIVITY: CLIMATE CHANGES AND SUNSPOTS

Hams are not the only ones concerned about the lack of solar activity. Now, WNDU television in South Bend, Indiana, has reported on the way in which lowered solar activity could drastically affect the worlds climate. Amateur Radio Newsline's Jack Parker, W8ISH, has the rest of the details:

--

If you actively pursue DX it may come as no surprise that sunspot activity over the past few years has been at an all time low. According to a special report broadcast by WNDU Meteorologist Mike Hoffman , we have had over 800 days with no sunspots and that has not happened in 300 years.

The last time old sol was this quiet was between 1645 and 1715. A period in time called the Maunder Minimum. Paintings from that era show wintry weather in areas where it's not typical, like carnivals held on frozen rivers and people playing on the ice. According to researchers that period of weather was brutal.

Hoffman's information comes from a recently published paper on sunspots in the Journal of Climate. Purdue University's Doctor Ernest Agee, authored this report. He says civilizations almost perished due to the harshness of winter and things like that. Doctor Agee writes that widespread crop failures caused famine around the world and many villages were deserted. So.could that happen in the modern world? The Purdue professor says the Sun is what powers the Earth, so even the smallest changes on the Sun can have an impact on our lives and our climate.

Sunspot data only goes back to the year 1610. Many scientists correlate low sunspots with low temperatures in many parts of the world and the best data shows that.

Doctor Agee's paper delivers more bad news for Amateur Radio DXer's and modern day society as well. In his Journal of Climate report, the Purdue researcher says the length of the solar cycle, the definition of a quiet period, the length of a quiet period for modern record and the deepness of the quiet period indicate that something has, quote, "upset the apple cart. As a result we are seeing new physics and new science emerging to explain what is happening.

For the immediate future scientists will continue to chart the solar activity and try to forecast a rosy outcome with hopes of increased sunspot activity leading to a brighter future for the world and for those who live by the sun spot cycles in amateur radio.

Reporting for Amateur Radio Newsline, this is Jack Parker, W8ISH.

RADIO LAW: FCC DENIES APPEAL FOR W5ER VANITY CALL

The FCC has denied a request for reconsideration from Mark S. Wintersole, WB5NMZ, of Montgomery, Alabama, who had sought to change his call to W5ER under the Vanity Callsign System.

The story is one you have heard before. Wintersole was among those who wanted the a call when it became available in trhe Vanity Call Sign system. In this case the call was W5ER and Wintersole filed for it under the Vanity program only to have his application dismissed because the FCC says it was filed to early. So Wintersole appealed the initial decision where he argued that he was entitled to the call because it was canceled on September 27, 2008, and therefore should have been available when he filed his application on September 27, 2010.

Now, in its November 9th letter affirming the dismissal of Wintersole's initial application for the W5ER call, the FCC says that a canceled call sign does not become available for reassignment until after the two year waiting period ends. Because the W5ER call was canceled on September 27, 2008, the call sign became available to the vanity call sign system on September 28, 2010. Consequently, the FCC says that Wintersole's application was properly dismissed because it was filed before the W5ER call sign became available to the Vanity Call Sign system.

The current listed holder of the W5ER call sign is Edward J. Reynolds of Boston, Pennsylvania. (FCC)

RADIO LAW: AUSTRALIA TO CONTINUE BAN ON RADIO JAMMERS

The Australian Communications and Media Authority is proposing to continue to prohibit the supply, possession and operation of jamming devices designed to deliberately interfere with public mobile telecommunication services or P-M-T-S. This includes 3G networks and equivalent services such as mobile Wi-MAX.

According to the regulatory agency, since the original prohibition was made in March 1999, technological, economic and social developments have resulted in a proliferation of devices that consumers use for the purposes of wireless communications. A-C-M-A says that there is a growing reliance on mobile connectivity for personal and business transactions. These changes make the case for continuing a ban even more compelling, and this is reflected in the new, updated prohibition proposal. (WIA News)

ENFORCEMENT: ANOTHER COMMERCIAL WITH FALSE EAS TONES

Another ad using what sounds like an Emergency Activation System tones has been reported. This time it's a television commercial for the recently released motion picture Skyline.

According to a report in the trade publication Radio World, broadcast engineers have notified the magazine that the promotional sport for the film contains what sounded like EAS tones throughout. In an e-mail reported by the trade publication Radio World, Lincoln Financial's Media's Barry Thomas told SBE engineers that he was able to decode the

data. Thomas e-mail said that he believes it was a replay of a Required Monthly Test that covered central Pennsylvania.

Tom Ray who is also chairman of SBE Chapter 15 in New York City, says the ad was illegal, according to Part 11 of FCC regulations. That section prohibits deceptive E-A-S transmissions and reads as follows:

"No person may transmit or cause to transmit the EAS codes or Attention Signal, or a recording or simulation thereof, in any circumstance other than in an actual National, State or Local Area emergency or authorized test of the EAS. Broadcast station licensees should also refer to 73.1217 of this chapter."

This is the second reported use of EAS tones as a commercial marketing tool. You may recall a few months ago when an ARCO ad used what sounded like simulated EAS tones. (RW)

HAM RADIO ON THE WEB: CONTESTRANK.COM

Contestrank is a new website from EA4ZK that contains volumes of information about contesting including results, winners call signs, scores and much more. The site translates itself in five languages. These are English, German, Polish, Russian and Spanish. The full web address is www dot contestrank dot com. (EA4ZK)

**

NAMES IN THE NEWS: G5HF - WW2 UK COUNTERSPY

Some names in the news. First up is Harry Heap G5HF whose story as a World War 2 Voluntary Radio Interceptor has now been told by the The Essex Chronicle newspaper.

Heap was first licensed in 1932 as 2BZZ. He was issued the callsign G5HF in 1933. Following the outbreak of war he moved to Chelmsford where during the day he worked at Crompton on devices to neutralize magnetic mines and during the evenings worked as a Voluntary Radio Interceptor listening in to secret Nazi messages. The information he collected was passed to Bletchley Park for decoding.

Heap later became President of the Chelmsford Amateur Radio Society and retired from that role only a few weeks ago at the tender young age of 93. You can read more about this ham radio World War 2 hero at tinyurl.com/23s86xe (Essex Chronicle)

**

NAMES IN THE NEWS: CHIP MARGELLI, K7JA JOIND CQ PUBLISHING

And congratulations to our longtime friend and supporter Chip Margelli, K7JA. This, on his being appointed as the new Director of Advertising Sales and Marketing for CQ Communications, Inc..

Margelli will join the CQ staff on December 1st and will be responsible for advertising sales for CQ Amateur Radio, CQ VHF and Popular Communications magazines/. He will also take on marketing efforts for all CQ Communications products.

Chip Margelli brings to CQ more than three decades of experience in the amateur radio industry. He spent nearly thirty years with Yaesu and the past four years with Heil Sound. In addition to English, he is fluent in the Japanese, German and Spanish languages.

An active ham for more than 45 years, K7JA is known worldwide as a champion contester, DXer and DXpeditioner. He is currently active on all amateur bands from 160 meters through 1300 MHz, and is a 2008 inductee into the CQ Amateur Radio Hall of Fame.

Chip and his wife, Janet, KL7MF, live in Garden Grove, California, just south of Los Angeles. In addition to amateur radio, K7JA enjoys photography and astronomy, and is a marathon runner.

Chip Margelli succeeds Don Allen, W9CW, CQ and CQ VHF Advertising Manager; and Arnie Sposato, N2IQO, Popular Communications Advertising Manager, both of whom are retiring at the end of 2010. Advertising sales for WorldRadio Online will continue to be coordinated by Jon Kummer, WA2OJK. (CQ)

CHANGING OF THE GUARD: MILTON SULLIVAN JR. _ DESIGNER OF DRAKE HAM GEAR - SK.

As we have said far to many times of late, the changing of the guard continues with word of the passing of Milton Sullivan Jr, the former K8YDO, of Washington, DC. Sullivan who was the former Chief Engineer at the R. L. Drake Company passed away from a stroke on October 28th at age 85.

During his tenure at Drake, Sullivan oversaw the designs of all the most of Drake's ham radio gear including the famed models 1A and 2B receivers as well as all of the companys transceivers from the 4 lines through the beginning of the 7 line. He retired from Drake in 1984 and entered the commercial satellite industry first founding his own business and then working for Lytton Electronics until his retirement in 1990. (W8AD via Southgate)

**

WORLDBEAT: RSGB DECLAES BOD ELECTION INVALID

The Radio Society of Great Britain has declared its 2010 Board Election as being invalid. This, because two candidates shared the same two nominators.

This is not in accordance with the society's election rules and therefore the candidates were not properly nominated. As a result the Board has considered its options and has determined that the only course of action open to it is to declare the election as invalid.

Given other requirements the Board will now co-opt both candidates as Board members for a twelve month period until the next election late in 2011, when the candidates may stand for election again. The regional election for Region 4 is unaffected and closes at midday on December 2nd. (RSGB)

**

WORLDBEAT: NEW UK 6 METER REPEATER

A new 6 meter repeater has taken to the airwaves in the United Kingdom. This with word that the Five Towns Repeater Group put its 6 meter machine on the air from the organizations site just west of Wakefield.

The system uses the call sign GB3WY. It operates on the Europen R50-channel pair which equates to 50.800 and 51.300MHz, and requires a continuous CTCSS tone of 82.5Hz to access. Keeping an ear open for the signal from GB3WY could be a good beacon to let hams in the America's know when the band is open across the Atlantic. (Southgate)

**

RADIOSPORTS: THE INTERNATIONAL NAVAL CONTES

The International Naval Contest will be held the second weekend of December. The contest runs from December 11th at 16:00 UTC to December 12th at 15:59 UTC. Bands used are 160 through 10 meters except for the WARC bands. Modes are SSB and CW only. Electronic logs go to df8ld at darc dot de. (OPDX)

**

RADIOSPORTS: AUGUST ARRL UHF CONTEST RESULTS NOW ON LINE

And the results for the 2010 ARRL August UHF Contest are now online. You can find them on line at www dot arrl dot org slash contest dash results dash articles. (KX9X)

**

RADIOSPORTS: PSK63 QSO PARTY ON NOVEMBER 21

The European PSK Club invites amateur radio operators from all over the world to participate in the 5th annual PSK63 QSO Party. The objective

of the competition is to establish as many contacts as possible between radio amateurs around the world by using the BPSK63 mode. The contest will be held from 00:00 UTC to 24:00 UTC on Sunday, November 21st. Complete rules and other information can be found on line at tinyurl.com/39hvvnb (European PSK Club)

**

ON THE AIR: CELEBRTING THE CHRISTMAS HOLIDAY

On the air, listen out for members of the Bethlehem Georgia based Barrow Amateur Radio Club who will activate special event station WR4BC. This from 1700 UTC on December 4th through 1700 UTC on December 5th in celebration of the upcoming Christmas holiday. Operation will be on the primary High Frequency bands using SSB, CW, RTTY and digital modes. A limited-edition collectable QSL will be issued, complete with the Bethlehem Christmas Postmark, to arrive before Christmas. More is on-line at www.barrowhamradio.org. (Via e-mail)

**

DX

In DX, OL5Y, will be active portable I-M-Zero from La Maddalena Island in Sardinia on 15 meters during the CQWW DX CW Contest on November 27th and 28th. This, as a Single-Operator, Single-Band entry. QSL as directed on the air.

IN3KIZ is expected to be active as 5H3OC from Tanzania in the near future. His operation will be on the HF bands. QSL via IN3DEI.

PA1OKZ will be on the air from Jamaica as 6Y5NS through November 26th. His operations will be on the HF bands using SSB and the Digital modes. QSL to PA1OKZ via eQSL or his Callbook address.

DL7VOG is active as HK0GU/1 from Isla del Pirata Columbia through November 21st. Operations are on the HF bands using CW and RTTY. QSL via DL7VOG, direct or by the Bureau.

Lastly, KC0VKN, will be operational portable PJ7 from Sint Maarten Island between December 18th and the 23rd. His activity will be holiday style on 40 through 10 meters using CW depending on operating times and openings. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: CITIZEN BUYS POLICE INTERNET DOMAIN TO FIGHT RED LIGHT CAMERAS

And finally this week the story of how one citizen has taken communications with public officials to a new height. This, by purchasing the Internet domain name of the police department whose red light camera issued him a ticket. We have more in this report:

--

Most of the time, if you or I get a speeding ticket we just grumble about it and pay the fine. Oh we can fight it in court but for most people those are the only two options.

However, after receiving a $90 speeding ticket in Bluff City, Tennessee, Brian McCrary discovered a third. It seems that the Bluff City Police Department had forgotten to renew its Internet domain name of BluffCityPD dot com. It had expired so McCrary bought the domain for $80. He then posted his side of the story along with information about speed traps in Bluff City and the $250,000 per month the system was costing the town's 1,500 residents.

The police department had no idea their domain name had expired and that McCrary owned it. That was until October 8th when reporters started calling them to ask about it.

Bluff City Police Chief David Nelson said the city may approach McCrary about buying the domain back from him, but admits Chief Nelson, the city is not very optimistic that a deal can be made.

For the Amateur Radio Newsline, I'm Bruce Tennent, K6PZW, and trying to avoid the Red Light Cameras in Los Angeles.

--

McCrary says that his goal is to get enough attention to put pressure on the local government to remove the traffic enforcement cameras in Bluff City. (Published news reports)

GB2RS NEWS

Sunday 21st November 2010

The news headlines:

Network and RSGB announce new Agreement

Amateur radio exam fees set to change

RSGB Region 4 election closes soon

The Radio Amateurs' Emergency Network, the UK's principal organisation of volunteers providing radio communications in time of need, and the Radio Society of Great Britain (RSGB), the UK's national society for Amateur Radio, are pleased to announce the signing of a formal agreement between the two organisations providing a framework to progress the closer working relationship between them.

The Network Chairman, Cathy Clark, said ``I am delighted to sign this agreement, which promises to bring the two organisations closer together for the benefit of our members and the service they provide to our many User Services.''

RSGB President Dave Wilson, said ``I would like to thank all those who've been working behind the scenes on what was undoubtedly not an easy task to get us to the position we are today. The signing of this agreement cements on-going co-operation between the two organisations. Joint working will continue to ensure the smooth implementation of the Principles of Co-operation described in the agreement.''

The RSGB Public Services Co-ordinator, Charlie Morrison, commented "It was the obvious way forward for our two organisations to work more closely together, making use of our own capabilities for the greater good of emergency communications. I am pleased that both parties found the agreement so easy to accept.''

The agreement, which had unanimous acceptance by both the RSGB Board and the Network's Committee of Management, was signed on Saturday 20th November 2010 during the RSGB Spectrum Forum meeting in which all parties consider frequency planning and usage issues.

The cost of UK amateur radio examinations is to rise by ?5 from 1st January 2011. The new fees will be ?27.50 for the Foundation, ?32.50 for Intermediate and ?37.50 for the Advanced exam. This applies to all exams falling on or after 1st January 2011. Instructors need to be aware that any requests for exam papers in the last three weeks of December 2010

need to be accompanied by the increased fee.

Following the announcement that the RSGB Board election has been declared invalid, Members in Region 4 are reminded that their Regional Election is still going ahead. Details of the candidates were published in the November RadCom. You can vote online at www.votebyinternet.com/rsgb10, that's rsgb one zero. You will need your callsign and membership number to vote. Members may instead vote by post using the envelope that came with November's magazine. Voting closes at noon on 2nd December.

.

Last week's RSGB Museum Surplus Equipment sale was yet another very successful event. This week is a bumper week and the auctions end today, Sunday 21st, after 8pm. So far the most popular items this week are a Yaesu FT-200 HF transceiver, which has lots of interest and bids and the RME 69 HF valve receiver. Check out the RSGB website www.rsgb.org.uk/auction for details and photographs of the equipment. All the proceeds from the sale will be going towards funding the National Radio Centre at Bletchley Park. Today, 21 November, also sees the start of the final auction of RSGB Museum Surplus Equipment. It will be packed full of star buys and will finish after 8pm on Sunday 28 November.

The G4M and N series sub Manager recently advised that, as of January, he needs to remove some 185 envelopes from his files. Most are stamped with monetary values that no longer apply. Many are very old. Some larger A4 envelopes cannot be sent as First Class Mail, being too wide or too thick when folded. In the event of a price rise, First or Second Class stamps will be honoured by the Post Office but stamps with a monetary value will not. In order to bring many M0 callsign holders into line with other UK sort groups, the grouping has been reorganised. Wayne Thomas, M0WAY will deal with the group M0M to Z and David Mappin, G4EDR will continue to look after M0G to L. Outstanding cards and envelopes for these groups have been transferred to the appropriate manager.

AMSAT-UK's FUNcube is an educational single Cubesat project with the goal of enthusing and educating young people about radio, space, physics and electronics. It will support the educational Science, Technology, Engineering and Maths initiatives and provide an additional resource for the GB4FUN Mobile Communications Centre. To keep up to date with the latest project news, including the ground station receiver board and the FUNcube Dongle, visit http://uk.groups.yahoo.com/group/funcube/ or search funcube within the yahoo groups.

On Saturday 4 December, Wakefield and District Radio Society will host a Train the Trainers session. The venue is their HQ, 23rd Wakefield Scouts, rear of the Methodist church, Barnsley Road, Wakefield WF1 5NU. The course will be run by RSGB President, Dave Wilson, M0OBW, and there will be no charge for those that attend. A small buffet will be provided and the kettle will also be on for the duration. The course commences at

9.30am and candidates would be advised to arrive by no later than 9.15. Further information can be obtained by contacting Ken Quinn, 2E0SSQ by e-mail to kquinn27@o2.co.uk r by phone, before 8pm please, on 07900 563117.

Due to a very kind gesture, the Bath Buildathon Crew are able to offer a free place at the 4th Bath Buildathon to someone who would benefit from the experience but maybe cannot afford the cost. The lucky person will build a 20m superhet receiver kit under their watchful eyes and take it away at the end of the day on Saturday 8 January 2011. The organisers cannot run to paying transport costs, but the venue is within walking distance of the train station and, with advanced booking, the travel should not be too expensive. If you know of a youngster who is studying for their Intermediate exam, or maybe someone who has a Full licence but needs a helping hand to get some construction experience, please send details to g0fuw@tiscali.co.uk. The Buildathon Crew will then ask the sponsor of the place make the decision on who should get it. Closing date for nominations is 11 December. In addition to the Buildathon, the Bath group will be carrying out Intermediate Practical Assessments and the written exam on the same day. If anyone is interested in the exams the contact is also Steve, G0FUW, who must have your details by 11 December.

The Wakefield & District Radio Society's IRLP and Echolink Node MB7IWR, which operates on 145.3375MHz from Dewsbury has had an antenna upgrade. Thanks to the generosity and work of both Michael, G1XCC and Nathan, M0KKH, the new antenna seems to be performing well. Reception reports would be appreciated to the node keeper, Dave, G4CLI by e-mail to g4cli@wdrs.org.uk. Further improvements are planned with the acquisition of an embedded node and a new rig. More information about the node can be found on the society website at www.wdrs.org.uk.

And now for the details of rallies and events for the coming week

Today, 21 November, the 33rd CATS Radio & Electronics Bazaar takes place at the 1st Coulsdon Scout HQ, which is at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. The event is open from 10am to 1pm and admission is ?1. There will be a Bring & Buy. Details Andy, G8JAC, by e-mail to secretary@catsradio.org.

Also today, 21 November, the Plymouth Radio Club Rally will take place at the Elm Community Centre, Leypark Walk, Estover, Plymouth PL6 8UE. Doors open at 10am and the admission is ?2. There will be trade stands and a Bring & Buy.

The final rally of the year is the Bishop Auckland Radio Amateurs Club Rally that takes place on 28 November at the Spennymoor Leisure Centre, Co Durham DL16 6DB. There is plenty of car parking and talk-in on S22. Doors open at 10.30am and admission is ?1.50, although accompanied under 14s are free. There will be trade stands and a Bring & Buy. Details from Mark, G0GFG, on 01388 745 353.

Now for the news of special events

On Saturday 27 November, Preston Amateur Radio Soceity is running GB1LD for Lancashire Day. The main bands of operation will be 80 and 40m. Further details are on qrz.com.

Chorley & District Amateur Radio Society will be running GB0LD again this year to celebrate Lancashire Day on 27 November. The callsign is valid from Monday 22 November to Sunday 28 November inclusive and will be operating on all bands from 2m to Top Band.

On 27 and 28 November, Crewe Heritage Centre ARC will be putting on a special event station, GB4CHC, to commemorate 50 Years of the Class 37s. For more information, contact John M0JCD on 01270 619034.

And now the HF DX news compiled from 425 DX News and other sources

Halifax Amateur Radio Society will be active from Mull of Galloway lighthouse and Corsewall Point lighthouse in Scotland from 22 to 26 November. They will be using the callsign GS2UG and full details are on www.qrz.com.

Tony, IK1QBT and Emilio, IZ1GAR will be active as IH9/IK1QBT and IH9/IZIGAR from Pantelleria, which is IOTA reference AF-019, from 23 to 30 November. They will participate in the CQ WW DX CW Contest as IH9X on 80 metres and as IH9R on 40 metres respectively. QSL via their home calls.

Look for Hennie, PJ4/PE1MAE to be active from Bonaire, which is IOTA reference SA-006, for about four months. QSL via bureau or direct to PA2NJC.

Now the contest news

Advance notice first. The Mid Ulster Amateur Radio Club is hosting an inter-membership HF contest on Sunday 9 January 2011. All modes and HF frequencies are allowed, so if you hear any of their members, as listed at www.muarc.com, then please talk to them, as they would appreciate the points.

On 23 November the 50MHz Activity Contest will take place from 2000 to 2230UTC. Using all modes on the 50MHz band the exchange is signal report, serial number and locator.

The following day, 24 November sees the CW leg of the 80m Club Sprint from 2000 to 2130UTC. The exchange is serial number and name.

Morse enthusiasts get their slice of the action on the last weekend of the month, 27 and 28 November, when the CW leg of CQWW takes place. Expect the CW segments of the HF contesting bands from 80m to 10m to be busy for the whole weekend, even the upper HF bands. Taking place from 0000 to 2350UTC, the exchange is signal report and Zone, with the UK being 14.

And now the solar factual data for the period from the 8th to the 14th of November, compiled by Neil Clarke, G0CAS on the 15th of November

Up to four sunspot groups were visible on some days. Two groups produced C class solar flares from the 11th which increased solar activity to low levels. In total fourteen C class solar flares took place. Several sudden ionospheric disturbances and coronal mass ejections were also observed. Solar flux levels showed little daily variation and averaged 85 units. The 90 day solar flux average on the 14th was 81 units. That's the same level as last week. X-ray flux Averaged A9.8 units which also showed little variation day to day. Geomagnetic activity started at very quiet levels with an Ap index of only 3 units on the 8th and the 9th. During the evening of the 10th a magnetic disturbance arrived and lasted for the next two days when the Ap was 15 units. The average was Ap 8 units. Particle densities were low except for a brief increase to 14 particles per cubic centimetre during the 10th. Bz varied between minus 4 and plus 3 nanoTeslas on the quiet days and between minus 10 and plus 12 nanoTeslas during the disturbance.

And now the solar forecast. This week solar activity is expected to be very low to low. If any large, active sunspot groups appear then activity could increase to moderate. Solar flux levels should be in the 80's for most of the week. Geomagnetic activity could be unsettled today but the decline to quiet levels for the rest of the week. MUFs during daylight hours at equal latitudes should be around 26MHz for the south and 23MHz for the north. Darkness hour lows are expected to be about 8MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about 29MHz. The optimum working frequency with a 90 per cent success rate will be around 22MHz. The best time to try this path will be between 1100 to 1600 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

Lincoln area 2 metre GB2RS news reader Simon, M0SIY, has had to stand down.&#65533;His partner news reader Jim, G0EJQ urgently needs a volunteer to come forward and fill the vacancy.&#65533;The reading takes place on Sunday mornings at 10.30am local time on 145.525MHz FM, and will&#65533;involve a rota with&#65533;G0EJQ and any other volunteer who may come forward. Volunteers must be members of the RSGB and should contact Jim, G0EJQ on 01 522 532 604 or the GB2RS News Manager Gordon, G3LEQ on 01 565 652 652 for further information.&#65533;More information about the GB2RS News Service, along with a

news reader application form, can be found in the Members' Area of the RSGB web site by clicking on "News".

On Monday 22 November Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 22 November Leicester Radio Society is having a lecture. Contact Alex, G8FCQ, on 0753 120 1640.

On Wednesday 24 November Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 25 November South Bristol Amateur Radio Club is having an on the air evening. Contact Len, G4RZY, on 01275 834 282.

On Thursday 25 November Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 25 November Yeovil Amateur Radio Club is having a Yeo Project evening and committee meeting. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 26 November North Bristol Amateur Radio Club is having a talk on building the Brendon transceiver by Dick, G0XAY. Details from Dick on 01454 218362.

On Friday 26 November Torbay Amateur Radio Society is having a visit by RSGB General Manager Peter Kirby, G0TWW, who will give a talk on Spectrum Defence. Non members are welcome. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

Long serving QSL sub manager John Harris, GW0MOW has retired. His place has been taken by the current 2W and MW6 manager Lloyd Thomas, 2W00LLT. This is an extremely busy QSL group and RSGB is most grateful to John for his dedicated service to amateurs in Wales. Welsh members are advised that there may be some continued delay whilst Lloyd gets to grips with his enlarged role and clears a small backlog. Full details of these changes, together with contact information, is available on the RSGB Members-Only website.

On Tuesday 23 November Marches Amateur Radio Society is having a presentation on Virtual Radar by Mark Harper, MW1MDH, RSGB Regional Manager for North Wales For more information contact Dave, MW0AYM, on 01691 777242.

On Thursday 25 November Aberystwyth & District Amateur Radio Society is on the air on 145.500 then 145.550 with David, 2W0EDW. Details from Ray, GW7AGG, on 01970 611853.

> ==> + SILENT KEY: JOHN CHAMPA, K8OCL (SK)
>
> John Champa, K8OCL, of Richardson, Texas, passed away from
> complications of cancer on Friday, November 12. He was 66. An ARRL Life
> Member, Champa was the former Chairman of the ARRL HSMM (High Speed
> Multimedia) Working Group and Executive Vice President of AMSAT-NA. He
> was also the High Speed Multi-Media Radio Contributing Editor for CQ
> VHF Magazine. Champa did early work in Amateur Television (ATV) and
> later Amateur Digital Video (ADV). His recent focus was on PropNET,
> Automatic Packet Reporting (APRS) and GPS navigation systems, HSMM
> radio and HF digital modes. Read more here
> <http://www.arrl.org/news/john-champa-k8ocl-sk>.
>

Mr. Champa was a mentor of mine and he will be missed. In addition to the above accomplishments he served as an executive board member of the Richardson Rockwell Collins Amateur Radio Club (w5rok) for a number of years. During the short 3 years I knew him, he served in leadership positions for other local ham radio clubs. It is hard to over estimate his contribution to the amateur radio service.

John was a visionary who understood and enjoyed the advancement of technology. He was a proponent of ham radio's part in advancing the state of the art in communications. He introduced me to the HSMM ham radio world, a technology which holds much promise in advancing local area emergency communications networks by providing high speed IP network services. We can now deliver e-mail, voice, video and other network services apart from traditional network providers for times when "all else fails".

Thank you Dr. Champa.

SARL NEWS - SUNDAY 21 NOVEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

LISENCE RENEWALS

FREQUENCY ALLOCATIONS

AMATEUR RADIO FEATURES ON ASTV

NEWS FOR ZR LISENCE HOLDERS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

LICENCE RENEWAL FOR THREE MONTHS

ICASA advised the SARL at the quarterly liaison meeting held on Thursday last week that radio amateurs will receive a licence renewal invoice covering the period January to March 2011 charged at a pro-rata rate of R6,75. In March 2011 a licence renewal will be sent covering a full year from 1 April 2011 to 31 March 2012. Please do not make a payment until the renewal notice has been received. SARL news will advise listeners when the notices have been posted.

TABLE OF FREQUENCY ALLOCATION

To prevent the impasse of no band plan for amateur radio when the old regulations are repealed, the SARL will submit at the public Frequency Spectrum Regulation hearing a band plan that will replace the one in the current regulations. This band plan could become an addendum to the new regulations or be a permanent band plan. The Council is working on this document and expects it to be available on the web by Thursday 25

November for comment.

CALLSIGNS OF SILENT KEYS

ICASA reaffirmed the agreement with the SARL that a callsign of a silent key will be blocked for re-allocation for the year in which the amateur dies, plus a further one year. This was an AGM decision and agreed to by ICASA.

For example, if a radio amateur passes away in June 2010, his/her callsign will become available for reallocation from 1 January 2012. ICASA will, however, not reserve callsigns. This means that an application can only be submitted on the date that the callsign becomes available for re-allocation. As an alternative it is possible to apply for the callsign with written permission of the family of the silent key.

SATNETWORK TODAY

SA AMSAT's SATNETWORK will on the air today at 19:30 CAT. Eddie Leighton, ZS6BNE, will talk about APRS and the International Space Station. Eddie is well-known for his regular satellite column in Radio ZS. Join Eddie on a repeater near you or on 3 718 kHz.

ZR LICENCE HOLDERS - BE CAREFUL

ZR licence holders should take note of the frequencies allocated to them. Recently a ZR was heard making a contact with a DX station on a 20 m frequency outside the ZR allocation. ZR stations may only use the following 20 m spectrum 14 070 - 14 099 kHz and 14 225 - 14 350 kHz. In other bands ZR's may use 21 070 - 21 120 kHz and 21 300 - 21 450 kHz, and on 10 metres, 28 070 - 28 150 kHz and 28 300 - 28 500 kHz. Operating outside the allocated frequencies constitutes a violation of the licence conditions, which may result in cancellation of the licence - and a fine - or both. Please take note.

MORE DELAYS IN DELIVERY OF SARL KITS

The SARL regrets to announce a further delay in the supply of the three kits discussed during the RTA symposiums earlier this year. The group working on assembling the kits has encountered a further problem with the labelling of some components that had been received in strip form. These components have to be packed and labelled individually, as there are no easy identifiable markings on the components. This would make assembly by kit builders very difficult. The December holiday period will be utilised to finalise this task. Delivery can now be expected for the third week of January. The SARL can not take new orders until the backlog has been erased; SARL News will keep you informed of progress.

If you would like to do some kit building, the SA Amateur Radio Development Trust has Lightning Predictor kits available for immediate delivery. Visit www.amateurradio.org.za for details.

2011 HARDCOVER ARRL HANDBOOK NOW IN SA

The SA Amateur Radio Development Trust has a limited stock available of the 2011 ARRL Handbook. Get details from www.amateurradio.org.za.

AMATEUR RADIO FEATURES ON ASTV

NaSonop, a new actuality programme in the ASTV bouquet of the new TOPTV satellite service, will air a lengthy insert regarding amateur radio on Saturday 27 November. Riaan Greeff, ZS4PR, was interviewed and also demonstrated a VHF contact with Frik Wolff, ZS6FZ, as part of the studio interview. In an additional item a visit to the QTH of Johan Steyn, ZS4SS, is portrayed. The public does seldom realise the potential our hobby has to offer in terms of its rich experiences. This opportunity was jumped at to fully use our advantage. Recordings will be made available for amateurs who would like to use the insert for promotion of amateur radio. Contact Riaan on zs4pr@qsl.net if you are interested in obtaining a copy. If there is enough positive feedback to this insert and topic, more specific topics may be recorded to promote specific radio amateur activities.

ZS6BB ACHIEVES THE FIRST ZS WAGS AWARD FOR ALL 83 GRID SQUARES

Pierre van Deventer, ZS6BB, recently achieved the top ZS WAGS award with his submission for all 83 grid squares on mixed bands and modes. Getting the last grid square took him many months, and was only completed by a contact with a Botswana station for KG25, a grid with a very small footprint in Southern Africa.

To achieve this award Pierre had to take full advantage of mobile stations for many grids in which there are very few no resident amateurs, and included contacts on SSB, CW, Satellite and even PSK31.

The ZS WAGS operating award was launched in early 2009. To date, a total of 35 hunters' awards have been issued, as well as 17 awards for stations that activated rare grid squares.

The ZS WAGS award is operated by the Sandton Amateur Radio Club. For the rules and complete records of all awards go to http://www.zs6stn.org.za/zswags/.

COMPETITION NEWS

HERITAGE DAY 2010 RESULTS

The results of the 2010 Heritage Day contest held on 24 September have been published. Only six log sheets were received. No blockhouse station was active. ZS6PTA was the only Heritage station. Five general class logs were received. Due to the low number of logs received, it was decided to reward each participant with a participation certificate. The top three scorers will still receive the placement certificates. Contact Riaan zs4pr@qsl.net if you have sent a log and it does not appear on this list. Congratulations to the winners and thank you for the entries.

The winners are: ZS6PTA operated by ZS6PJH, ZR6RAF, and ZS6BTY from Fort Skanskop with 378 points achieved. The results the five general logs are as follows:

Wessie Wessels, ZS2A, 138; Pam Momberg, ZS6APT, 124; Mitch Rundle, ZS2DK, 120; Derek Stuart, ZS2J, 58 and Theunis Potgieter, ZS2EC, 36.

SARL SPRING QRP RESULTS

According to the logs received there were 62 stations on the air. Conditions were not favourable for long distances. The sad part is that only 5 logs were received. The results are as follows:- 1st - ZS6BB - Pierre v Deventer - 819 points (SSB / CW); 2nd - ZS2PE - Andre Le Roux (ZS2AL) - 576 points (SSB);

Andrew Prideaux(ZS2PA) / Peter Flynn (ZS2PF) (SSB) 3rd - ZS6GRL - Geoff Levey - 375 points (SSB); 4th - ZS6APT - Pam Momberg - 184 points (SSB); 5th - ZS2J - Derek Stuart - 12 points (SSB).

CLUB NEWS

ZS6PTA will hold another mega flea market on Saturday 27 November from 08:00 at the Pretoria Motor Club in Silverton.

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 4 December at their clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip, ZS6PVT, at 083 267 3835.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The extended minimum has now unquestionably come to an end, but the sun is still sputtering along. All three sunspot regions (1 124, 1 126 and 1 127) have remained quiet. The effective sunspot number is expected to be less than 25 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoon conditions will be good towards Europe on 15 m, later to be followed by good 20 m openings. Late afternoon and early evening 15 m contacts with the USA are possible. Contacts with Australia are likely at sunset on 20 m. 15 m openings to Brazil and South America are achievable during the afternoons. With the good 15 and 20 m openings 17 m may also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the workhorse for contacts around the country with 20 and 30 m also being very valuable for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS FOR THE WEEK

Today 21 November - 10:00 UTC, field day weekend and ZS85SARL closes; Also today 21 November - 19:30 SAT, SATnetwork on the air; 27 November - ZS6RTB Club meeting together with other radio operators; 27 November - NaSonop: actuality program about Amateur Radio in ASTV Bouquet on the new TOPTV satellite service; 27 November - ZS6PTA mega flea market at the PMC in Silverton from 08:00; 28 November - YL net starts at 15:00 CAT on 145,750 MHz in Pretoria.

SARL News invites clubs and individuals to submit terms of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

Lastly: Jannie, ZR6PHD, reports that SARL News has received several constructive suggestions from quite a few sources about a suitable translation for the term "podcast" in Afrikaans. "However, we have not yet received a satisfying alternative. We will continue looking until we find an appropriate description," Jannie reported. SARL News is still of the opinion that the Afrikaans "potgooi" is not elegant and descriptive enough. If you have a more creative suggestion, please forward it to Jannie, email address, janniedb@mweb.co.za or to any editorial member.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN, and edited by Jannie, ZR6PHD.

Thank you for listening, 73.

****
Please think of the environment before printing this e-mail
>From The Business Manager ZL2TDM
Debby says...
Repeater Licensing Fees
Doug ZL2TAR will have sent all those branches who are due to renew their annual repeater and beacon licenses a reminder to do so. For those who have received and paid this fee, I have sent an invoice back to the branch, stamped as having been paid. If your branch is unsure if a payment has been made, please check to see if you have received this stamped invoice from me. The addresses used to forward these receipted invoices are all taken from Call Book 2010/2011.

Failure to pay the fee will result in your license lapsing.

Many branches choose to pay by direct credit to the NZART bank account, which I do appreciate, however as I am also receiving a considerable number of subscription payments directly into the account, a payment may be overlooked, therefore where possible, please send me an e-mail confirming the date and amount you have submitted for payment for your licenses.

Remits and Elections
Only one month to go before the cut off, for nominations to Council and remit submissions. If your branch is considering submitting a remit, please ensure it reaches this office before 31 December and I have acknowledged receipt in writing either by e-mail or snail mail.

Nominations to Council will also receive an acknowledgement from the Returning Officer Evan Sayer. As Evan does not call into the office on a regular basis, please allow a couple of weeks before you receive this acknowledgement.

Subscriptions Eligible For The Rebate
Only a few more days left for you to be eligible for the $15 rebate on your 2011 subscriptions. If you are paying by regular automatic payment into our bank account, the rebate does not apply.

Talk soon...Debby ZL2TDM

Internet Connected Amateur Radio
Members may recall that the ALO asked in Infoline 210 for input to a paper he was putting together, at Radio Spectrum Managementï¿½s request, on the topic of Internet Connected Amateur Radio.

RSM have now completed their review of this topic and have concluded that no changes are required to the current Amateur General User Radio Licence conditions to accommodate Internet-connected amateur radio modes such as APRS, IRLP, D-Link, etc. provided:

1.. the transmissions are taking place from an Amateur operator's property; and
2.. frequency coordination with non-amateur services is not required.
Normal repeater licensing procedures will continue to apply to those circumstances where frequency coordination is required and/or the internet-connected device is located at a site belonging to a non-amateur third party such as Kordia, Telecom, etc.

Also, in operating Internet-connected systems, Amateurs need to be aware of the provisions of section 5.3 of the Amateur General User Licence (GURL), as well as Regulation 25.2 of the International Radio Regulations:

ï¿½Transmission between amateur stations of different countries shall be limited to communications incidental to the purposes of the amateur service, as defined in 1.56 and to remarks of a personal character.ï¿½

Don Wallace ZL2TLL NZART Administration Liaison Officer (ALO)

20101117

FMTAG Notes For 21 November(2) 2010
Correction
There was an error in the map reference for the Branch 33 application, published in HQ InfoLine 218. The corrected version is:
Branch 33 Rotorua has applied for a 2 metre APRS Digipeater at Makatiti Dome, Topo50 map reference BE38 038.75 730.97. An engineering evaluation confirms that there will be no interference to other stations and that the

transmit and receive frequency will be 144.575 MHz.

MED Licence Renewals - A Reminder
The majority of Beacon, Link, and Repeater Licences are due for renewal before the end of November. At the beginning of November, FMTAG advised all of the Branches involved and advised that payment needed to be made to NZART HQ before the licences would be renewed.

Our thanks go to all Branches who renewed early, to avoid the last minute rush.

There is now one week remaining before the MED SMART system starts cancelling licences due to non-payment. The MED fee for re-instating licences, lost through non-payment, is $408.89.

Some payments may be in transit, such as bank transfers made on Friday the 19th of November, or cheques posted on Wednesday the 17th or Thursday the 18th, or later.

As at close-of-business on Friday the 19th of November, Licence Fee payments had not been received at NZART HQ from the following Branches:

08 Eastern Southland
11 Gisborne
12 Hamilton
26 Nelson
29 North Shore
30 Otago
33 Rotorua
34 South Canterbury
35 South Otago
42 Titahi Bay
49 Westland
51 Eastern Bay of Plenty
56 Christchurch West
60 Taupo
61 Central Otago
62 Reefton-Buller
64 North Otago
66 Auckland VHF
75 Queenstown
78 Far North
87 South Taranaki
CARDS

Proposals
Branch 74 Wellington VHF Group has applied for a Spectrum Licence on TV Channel 39 for its Belmont ATV repeater, to replace its previous Radio Licence, cancelled by the MED as part of the Digital Switch-Over process. The location is Belmont, Topo50 map reference BQ32 568.79 398.86. All of the engineering parameters are unchanged from those of the cancelled licence.

Final Recommendations to NZART Council
None this time

Comments and Applications
Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to:
fmtag@nzart.org.nz?subject=FMTAG_INFOLINE
Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available at:
http://www.nzart.org.nz/fmtag/index.html
Completed forms should be sent by e-mail to:
fmtag@nzart.org.nz?subject=FMTAG_INFOLINE
END

>From November 2010 Business Update: Updating Your Client Record
While updating your client record in SMART is as easy as a phone call to 0508 RSM INFO (0508 776463), we realise that it is easy to forget to do this when your contact details or addresses change.

For radio licence and spectrum licence holders the annual fee payment serves as a reminder. However, there are a range of other clients (notably maritime and amateur call sign holders) that do not receive this memory jog.

We are presently exploring options for a more proactive approach to checking client records on a regular basis - perhaps on a 3-5 year cycle.

In the meantime, if you haven't checked your client details in SMART recently, you are encouraged to log on and do so. If you don't know your log-in, call RSM INFO for assistance.

Radio Amateurs of Canada Vision Statement 2010-11-14
Vision for RAC as unanimously agreed upon by the Board of Directors and Executive of the Radio Amateurs of Canada:

"The Board and Executive of the Radio Amateurs of Canada, committed to the future of Amateur Radio in Canada and to the future of RAC, held a planning meeting in Ottawa from October 29th to October 31st as part of a process to map the future of RAC in the 21st Century. The Board and Executive have unanimously agreed upon a draft Vision for RAC."

See the complete statement at:
http://www.nzart.org.nz/html/2010/06-news.html#nov08

The Doctor is in: Pacemakers and RF
Schley Cox, W4AMW, of Owensboro, Kentucky, told the Doctor that he's headed to see the cardiologist next week about a pacemaker. He's already started researching their use around RF and says he is happy to go all low power (QRP), if that's what's called for. Schley mentioned that he might also be able to operate his rig remotely -- perhaps 20 feet away, but he needs to know how to measure stray RF in the shack itself.

Here's what the Doctor had to say:
I haven't received actual reports of any pacemaker problems and that seems to go along with the info on the ARRL Web site
http://www.arrl.org/pacemaker.
Note that there are no power levels (or field strength) limits noted there, nor have I found any on manufacturers' Web sites. Thus knowing the actual field strength level in the station may not help. If it were me, I would start by talking to my physician. She won't be able to give you power limits, but perhaps could indicate symptoms to watch for while on the air so you could take appropriate action quickly if called for.

I would start with a careful RF safety evaluation, as required by the FCC anyway. While the FCC guidelines were not based on pacemaker interference, they should result in a reasonably safe environment. If your station is properly set up -- without common mode feed line current, for example -- most radiation should surround the antenna and there should not be much RF within the shack.

Calibrated RF field strength meters are available, but are quite expensive. Relative measurement is pretty easy -- look at any recent ARRL Handbook. If you had a simple field strength meter running at all times in the station (I'm thinking the diode and microampmeter type that doesn't require power), you could see if anything changed, and diagnose and repair as needed.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail doctor@arrl.org or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST
http://www.arrl.org/qst,
the official journal of the ARRL.

Fries With That?
McDonald's Australia is launching contactless credit card technology in its stores that will allow customers to pay without swiping, signing or using a PIN.

The technology, to be rolled out later this month, follows a number of other merchants moving into the contactless payment space, including convenient store chain 7-Eleven.

"With Visa payWave, customers see speedier transactions and they can pick up their food with just a wave of their card," McDonald's chief information officer Henry Shiner said in a statement.

A number of banks and financial institutions are already beginning to distribute contactless-payment cards, which operate via radio frequencies. Both the banks and merchants are emphasising the use of up-to-date security measures.

RSGB to Investigate Mystery Signal
Many UK amateurs who operate on 501-504 kHz have reported over the past month reception of an wideband signal between 498 and 502kHz.

The RSGB is investigating the matter, but it is possible that it is an early trial of a so called e-Navigation MFSK system that the maritime service is proposing for this part of the spectrum at WRC-12 preparation meetings.

http://www.rsgb.org.uk/

Metal-Insulator-Metal Diode
Creation of a high-performance 'metal-insulator-metal' diode could change modern electronics.

Researchers at Oregon State University have solved a quest in fundamental material science that has eluded scientists since the 1960s, and could form the basis of a new approach to electronics.

The discovery, just reported online in the professional journal Advanced Materials, outlines the creation for the first time of a high-performance "metal-insulator-metal" diode.

Diodes made previously with other approaches always had poor yield and performance".

Web Update
It is planned to change the NZART Web to a SilverStripe Contents Management System (CMS) during the weekend of 27/28-November-2010. There will be a minimum interuption as the change to the new web system will be transparent to users. Below is some information on the SilverStripe CMS.

SilverStripe CMS
A website editor is a busy person. The editor must be able update the site easily and be confident that changes come out the way the editor intended. Editors may also manage other staff with various technical skills contributing content to they site, and editors don't have a lot of time to train all the contributors.

With the SilverStripe CMS, website editors don't need be familiar with complex web applicationsï¿½or even know HTML. You can get started in very little timeï¿½a typical training session with one of our clients takes no more than an hour or two. You and your staff can quickly start taking advantage of powerful features. For example, you can:

1.. Create new pages and drag and drop them where you want them to be in the sitemap.
2.. Edit and style content in an editor that uses a formatting toolbar that is familiar to anyone who uses word processing software.
3.. Easily insert links, images, Flash animations, and video into your content.
4.. Copy and paste content directly from Microsoft Word.
5.. View a draft of your content changes before publishing them on the live site.
6.. Publish multiple changes to your site with one click.
7.. Assign different user roles and permissions for each section or page

of your site.
8.. View older versions of a page, and roll back to a previous version, if needed.
In addition to these editing features, the SilverStripe CMS generates search-engine friendly and accessible websites. Your website will be easily found by search engines and used by visitors with different abilities and technical setups. All these features are included in the SilverStripe CMS out of the box.

SilverStripe 2.4 Site Editing Overview from SilverStripe on Vimeo.

To see SilverStripe CMS in action, watch the above video for content editors, or try SilverStripe CMS for yourself in our online demo.

Places you may also like to visit:
1.. Silverstripe.org - This is the home for our open source CMS and Sapphire application framework. If you you want to learn about or get involved in our developer community, or learn more about how to develop with our tools then this is the place for you.
2.. Understanding the BSD License - Here you'll find more information about our chosen open source license, Berkeley Software Distribution (BSD), and what it means for you.
3.. Philosophy - What we believe in and why we do what we do.

WELLINGTON EXPO-11
&
VHF CONVENTION
The Wellington Region EXPO-11 is to be held on
Easter Saturday 23rd April 2011
in conjunction with the
VHF CONVENTION
at Tawa College
Admission is $4. This includes a free drink and entry into the various raffle draws.
Listen out for the raffle draws throughout the day by MC ZL2BHF.
This will be the seventh Wellington Region trading of radio equipment. There will be the usual trade displays, trade sales of new amateur equipment and trading tables of used equipment
Refreshments - coffee, sodas, buns & cakes will be available.
All inquiries for the table sale and bookings to:-
Gavin Cross ZL2TVM Email Address: zl2hv@nzart.org.nz

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 21st November 2010

It is with regret that we learned of the recent passing of Mary McCarthy (Nee Wall), Sunrise Crescent, Waterford, mother of John McCarthy (EI8JA).

Ar dheis de go raibh siad

IRTS Committee Meeting

The next IRTS Committee meeting, is being held in Portlaoise next Saturday 27th of November at 11 am.

Affiliated Clubs are reminded that they are entitled to send a representative to the committee meeting. They should advise the IRTS secretary of the name of their nominated representative before the meeting.

Secondary School Transition Year Project

The Society is in discussions with a number of parties with a view to a possible Transition Year Secondary school project based around one of the proposed educational satellites to be launched next year.

If any of our members are teaching at secondary level or have past experience of same, we would welcome their help in designing the content of the project or indeed carrying out a critique on the proposal.

Please contact Paul EI2CA or any member of the committee.

Stan's on the move again

>From November 18th until November 29th, Stan, EI6DX is going to operate from the village of Somone, 70 miles South East of Dakar. Stan's target is to take part in the CQWW contest and hopefully win one of the top 3 places in the selected category.

Outside of the contest it is a holiday style operation with activity mainly on 160 and 80 metres. During CQWW special callsign - 6V7Y - will

be used. 6W/EI6DX callsign was received for activity outside of the contest.

Top Irish, European and North American stations that make the most contacts with 6W/EI6DX will receive a genuine Senegalese miniature painting created by one of the local artists. QSOs per band mode will count for this small award. For more details visit Stan's very interesting website at www.ei6dx.com.

Donated EI Equipment to Pakistan

AREN Recently sought and received equipment from Generous Amateurs and dealers for use in building up communications after the recent disaster. The EI donated equipment is in use with acknowledgement on their website www.pakhams.com

Memoirs of an Irish Radio Officer

Author Jack Lynch's new book "Beyond the Sea, Memoirs of an Irish Radio Officer" These memoirs record the life of a Cobh, Co. Cork boy born in 1927 from infancy to adulthood in the millennium.

Amongst the happy memories are the games and tricks played on each other and his schooling from the convent years to secondary college in Cobh. It is an honest reflection of the heartbreaks and Jack now lives in Malahide. His book is available in all good bookshops

---

DX NEWS

Next weekend (27/28 November) one of the most popular DX Contests takes place. This is the CQ WW CW Contest. Many operators will be travelling to exotic spots and it is a great opportunity to work a few new and /or rare DXCC entities.

For newcomers to the contest scene it can at times seem to be a complete madhouse on the bands during a contest but it can be very rewarding for DX chasers. For this particular contest the contest exchange is signal report plus CQ zone. As EI is in Zone 14 a typical report from here would be 59914.

Stan EI6DX is in Senegal at present signing 6W/EI6DX and during the contest he will use the callsign 6V7Y. QSLs can be sent via the IRTS Bureau.

Other calls to look out for are:-

9L5VT operated by members of the Voodoo Contest Group who have been travelling to west Africa for many years for this contest. This year they are in Sierra Leone and QSL info is via G3SXW.

In the Bahamas three American amateurs will be on as C6AKX on 20m, C6ATA on 40m and C6ARR on 160m.

Morocco will be activated by three Spanish operators using the call 5C5T from the local radio society's HQ station.

Gerd DL7VOG is going to the island of San Andres and will sign HK0GU.

An unusual prefix will be found in Nicaragua when three American visitors use the call H7V during the contest. As you know the regular prefix for there is YN.

Details of many of the stations which will be QRV during the Contest can be found on the NG3K website - have a look at www.ng3k.com/Misc/adxo.html

---

Rallies

Sunday Today 21st November 2010 Event: Mayo Radio Experimenters Network Annual Rally Venue: Welcome Inn, Castlebar, Co. Mayo Doors open at 11:00 a.m. Information: Rally Director: Padraic Baynes, See www.ei7mre.org

Advance notice PHOENIX A.R.C. RADIO RALLY 2011

Phoenix Amateur Radio Club annual rally will be held on Sunday 20th February 2011 in the usual venue, Coolmine Community School, Blanchardstown.

Doors open for Traders at 9.00 am Doors open to public 11.00am Admission 5 Euros. To book tables contact Tony at 0872439997 or Tom at 01-8211043.

Plenty of Parking, Refreshments and Bring and Buy Sale. All usual traders will attend.

This is the First Rally of 2011 come, meet friends and enjoy it.

For further details on Rallies please see www.irts.ie/rallies

---

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th-November, through Sunday, 21st-November there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK2, ZL, ZL8, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3W, VIETNAM. Bruce, XW1B, from Vientiane, Laos, is planning an operation from Danang, Vietnam, around November 29th, using the callsign 3W3B. He states that he will be living in Danang most of the year and anticipates being very active on the bands. At the start of his activity, he will

use a simple station/antenna but plans to improve things later. QSL only via E21EIC. NO eQSLs.

4L, GEORGIA. Operator Omari, 4L5O, will be active during the CQWW DX CW Contest (November 27-28th) a Single-Op/Single-Band (80m) entry. QSL via N3SL.

9J, ZAMBIA. Niko, S53A, will once again be active as 9J3A from The Hippo Lodge, (see http://www.hippolodge.com), Kafue National Park, between November 23-29th. He also plans to be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Low-Power entry. His equipment will be a IC-7000, spiderbeam for the high bands (20-10m), 80m vertical, and a 40m 2 element wire delta loopa. QSL via S57S direct to: Aleksander Zagar, Golisce 132, SI-1281 SLOVENIA.

9L, SIERRA LEONE. Members of the VooDoo Contest Group will operate as 9L5VT in the CQWW DX CW Contest (November 27-28th) as a Multi/2 entry. This year's operation will be dedicated to Vince, K5VT, who became SK recently in April. QSL via LoTW or direct to G3SXW. Operators mentioned are Roger/G3SXW, Fred/G4BWP, Ned/AA7A and Bud/N7CW. The team is expected to start some sporadic activity on November 22nd, and should be in full swing by the 24th. Outside of the contest (before and after), operators will be signing as 9L7NS. Look for operations to be on the lower bands, RTTY and 30/17/12 meters.

A7, QATAR. Members of the Lufthansa Amateur Radio Club (LARC) in cooperation with the Qatar Amateur Radio Society (QARS - A71A) will be active from here between November 27th and December 3th. Activity will be on all bands using CW, SSB and the Digi modes. ADDED NOTE: If internet is available, the German team plans a live transmission from this DXpedition via the German ATV Repeater DB0DLH. You have the possibility to watch this transmission via live stream (a VLC Media Player required) at: http://www.d-atv.net/db0dlh.m3u

AH0, MARIANA ISLANDS. Members of the Aquarius Beach Tower Contest Club will be active as AH0BT during the CQWW DX CW Contest (November 27-28th) as a Multi-2 entry. QSL via 7L1FPU, by the Bureau or direct (w/SAE and 2 USDs) to: Kuniyoshi NAKADA, PMR9292, 3-23-3, Minami-Oi, Shinagawa-ku, Tokyo, 140-0013, JAPAN.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R from Tumon (OC-026, USI GU003S, WLOTA L-0064) during the CQWW DX CW Contest (November 27-28th) as a Multi-Single entry. Operators mentioned are: Masaki/JO1DFG, Mikiawa/JR7OMD, Kazunori/JK3GAD, Osamu/JR8VSE and Nozomu/JE8KKX. QSL via JH7QXJ or LoTW.

CQ COMMUNUCATION NEWS. Richard, W2VU, provided the following press release dated November 17th: "Chip Margelli, K7JA, Named CQ Communications Director of Advertising Sales and Marketing -- Charles H. "Chip" Margelli, K7JA, has been appointed Director of Advertising Sales and Marketing for CQ Communications, Inc., it was announced today by company President and Publisher Richard Ross, K2MGA. Chip will join the CQ staff

on December 1, 2010, and will be responsible for advertising sales for CQ Amateur Radio, CQ VHF and Popular Communications magazines, as well as marketing efforts for all CQ Communications products. Chip succeeds Don Allen, W9CW, CQ and CQ VHF Advertising Manager; and Arnie Sposato, N2IQO, Popular Communications Advertising Manager, both of whom are retiring at the end of 2010. Advertising sales for WorldRadio Online will continue to be coordinated by Jon Kummer, WA2OJK.
Chip brings to CQ more than three decades of experience in the amateur radio industry, including nearly thirty years with Yaesu (now Vertex Standard) and, more recently, four years with Heil Sound. He is fluent in Japanese, German and Spanish (as well as English).
An active ham for more than 45 years, Chip is known worldwide as a champion contester, DXer and DXpeditioner. He is currently active on all amateur bands from 1.8 through 1300 MHz, and is a 2008 inductee into the CQ Amateur Radio Hall of Fame. Chip and his wife, Janet, KL7MF, live in Garden Grove, California. Outside of amateur radio, Chip enjoys photography and astronomy, and is a marathon runner.
'I am absolutely thrilled to be joining the CQ Communications organi-zation,' Chip says. 'The CQ family of action-packed magazines is widely respected throughout the world of amateur radio and shortwave listening, and to be a part of this dynamic communications group is the opportunity of a lifetime!'
'Chip will be able to relate to our advertisers and prospective adver-tisers in a unique way,' notes CQ Publisher Dick Ross, K2MGA, 'having been in their shoes, working for both a major and a mid-sized manufacturer. Plus, he already knows and is well-known throughout the amateur radio industry, so he will be able to hit the ground running.'
'As we welcome Chip,' Ross continued, 'we sadly say farewell and thank you to both Don Allen and Arnie Sposato. Don and Arnie each have represented all three of our print publications over the course of their many years at CQ. Their combined knowledge of the industry and of the people behind the nameplates is unparalleled and we will miss them greatly. We wish them both only the best in retirement.'
CQ Communications, Inc., based in Hicksville, New York, publishes CQ Amateur Radio, CQ VHF, Popular Communications and WorldRadio Online magazines, in addition to CQ books, videos and related products. It also sponsors a comprehensive series of operating awards and contests. Its flagship magazine, CQ Amateur Radio, has been in continuous monthly publication for more than 65 years."

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports: "The following operations are approved for DXCC credit:
5X0CW • Uganda; 2010 Operation
D2QV • Angola; 2010 Operation

EA8, CANARY ISLANDS. Frank, DH5JG, will be active as EA8/DH5JG from Lanzarote, Canary Islands (AF-004, DIE S007), between November 22nd and December 3rd. Activity will be mostly CW on 80-10 meters, with an emphasis on the 30/17/12 meter bands. Operations will also include an entry in the CQWW DX CW Contest (November 27-28th). QSL via bureau to his home callsign.

ER, MOLDOVA. Serge, UT5UDX, will once again be active as ER0WW during the CQWW DX CW Contest (November 27-28th) as Single-Op/All-Band/High-Power entry. QSL via RA4LW.

FO, FRENCH POLYNESIA. Phil, FO8RZ, from Tahiti Island (OC-046), informs OPDX that he will be active during the CQWW DX CW Contest (November 27-28th) as Single-Op/All-Band/High-Power/Assisted (or not) entry. QSL via LoTW or via F8BPN, by the Bureau or CBA. Online log is available at: http://f5phw.hamlogs.net

FY, FRENCH GUIANA. Operator Didier, FY5FY, will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via FY5FY.

HS0, THAILAND. Operators Finn/OZ1HET, Fred/K3ZO, John/W2YR, Sam/SM3DYU, Stig/LA7JO and Champ/E21EIC will be active as HS0AC (the Radio Amateur Society of Thailand [RAST] club station) during the CQWW DX CW Contest (November 27-28th) as a Multi-Single/All-Band entry. QSL via HS0ZFZ.

HS, THAILAND. Don, HS0ZEE, will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. Activity will include 160 meters. QSL via the address on QRZ.com.

IOTA NEWS.....
OC-128. Hiro, JJ5GMJ, who has been on Palawan Island since early November, will be active as DU1/JJ5GMJ during the CQWW DX CW Contest (November 27-28th). Meanwhile, he has been active on 160-6 meters. QSL via JH5RXS direct or via the Bureau to JJ5GMJ (JA Bureau). QSO data will be uploaded to the LoTW at a later date.

SA-057. Members of the Uruguay DX Group and Centro Radioaficionados Montevideo will be active as CW3TD from Timoteo Dominguez Island between December 2-6th. Activity will be on 160-2 meters with an emphasis on the Digital modes. They plan to have 15 operators and four stations on the air. Operators mentioned are Jorge/CX1SI, Gustavo/CX2AM, Jose/CX2AN, Oscar/CX2FR, Wilson/CX2RU, Francisco/CX3BV, Gustavo/CX3CE, Humberto/CX3AN, Luis/CX4AAJ, Julio/CX4AAE, Mario/CX4CR and Rainer/CX8FB. QSL route TBA shortly.

J2, DJIBOUTI. Darko, E70A, will be active as J28AA during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via K2PF or LoTW.

J7, DOMINICA. Operators Dieter/HB9TPQ (J79DP), Kurt/HB9BZG (J79KZ) and Walter/HB9MFM (J79WTA) are now active and are on holiday from the Tamarind Tree Hotel near Salisbury on Dominica (NA-101) until December 11th. Activity will be on all HF bands using SSB and some RTTY. They have one station, using an IC-7000 with 100 watts into a dipole 50m above sea level. QSL via their home callsign, direct or by the Bureau.

JW,SAVLBARD. Francois, F8DVD, will once again be active as JW/F8DVD from Longyearbyen ARC located on Spitsbergen Island (EU-026), between April

1&#65533;8th (2011). His activity will be on all HF bands both CW and SSB. He will use the Longyearbyen Radio Club's equipment which consists of an ICOM 751 and a 500 watts amp into a 5 elements yagi on a 30 meters high tower. QSL via his home callsign, through the French REF-Union Bureau or direct, w/SAE + 1 IRC (or 1 USD for EU, and 2 USDs for elsewhere) to: Francois Bergez, 6, Rue de la Liberte, F-71000 MACON, France.

KH6BZF PROPAGATION FORECAST/REPORT (For November 22-28th)....
Nov 22 HN-AN SOLAR REFERENCE KEYS
Nov 23 AN --------------------
Nov 24 AN BN - Below Normal
Nov 25 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 26 AN LN - Low Normal
Nov 27 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 28 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. A team of operators will be active as LX7I during the CQWW DX CW Contest (November 27-28th) as a Multi-2 entry. QSL via LX2A. They have a completely new setup and are interested in signal reports. Send them to: lx2a@gmx.net
Also, visit the following Web page at: http://www.lx2a.com

MD, ISLE OF MAN. Martin, G4XUM, will be active as MD4K during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (15m) entry. QSL via G3NKC.

MD, ISLE OF MAN. Dave, G3NKC, will be active as MD6V during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (20m) entry. He will be active outside of the contest using GD3NKC/P. QSL via G3NKC.

MW5, WALES. Ian, G3WVG, will be active as MW5B during CQWW DX CW Contest (November 27-28th) as a Single-Operator/Single-Band (80m) entry. QSL via G3TXF.

NH7, HAWAII. Al, NH7A, will be active during the ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ or LoTW.

OE40, AUSTRIA (Special Event). Members of the ADXB-OE (Austrian DX Board) will be celebrating their 40th anniversary by activating their club station OE1XBC on the air between December 15-31st, using the special callsign OE40ADXB. Suggested frequencies are as follows:
80 meters - SSB 3630-3650 kHz and CW 3530-3540 kHz
40 meters - SSB 7125-7150 kHz and CW 7025-7030 kHz
30 meters - CW 10120 kHz and Digital 10140 kHz

20 meters - SSB 14225-14235 kHz, CW 14030-14040 kHz, PSK 14070 kHz
and RTTY 14085 kHz
17 meters - SSB 18120-18130 kHz and CW 18080-18085 kHz
15 meters - SSB 21275-21285 kHz and CW 21030-21040 kHz (if propagation)
12 meters - SSB 24940-24950 kHz and CW 24900-24905 kHz (if propagation)
10 meters - SSB 28400-28450 kHz and CW 28030-28040 kHz (if propagation)

There will be a special QSl card for this special event station. QSL
info is via ADXB: Austrian DX Board, P.O.Box 1000, A-1081 Vienna, Austria.

PJ5, ST. EUSTATIUS (Update). Operators Janusz/SP6IXF and Wlodek/SP6EQZ
are now active as PJ5/homecall from St.Eustatius (NA-145) until December
3rd. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via
their home callsign. For updates and an online log search, visit their
Web page at: http://pj5-2010.dxing.pl/index.html

PZ, SURINAM. Yuri, VE3DZ, will be active as PZ5T from Surinam between
November 23rd and December 1st. Activity includes the CQWW DX CW Contest
(November 27-28th) as a Single-Op/All-Band entry. QSL via his home
callsign.

GM-SPECIAL CALLSIGNS. Scotland has allowed individual hams to have
special contest callsigns this year. Steve, N3SL, manages 2 of these
callsigns: GM2V (GM3WOJ) and GM5X (GM4YXI). Additionally, GM7V, a
long-standing club callsign, is moving to Steve as the QSL Manager.
GM2V and GM5X QSLs are in the process of being printed, but possibly
not "in hand" before the end of the year. GM7V cards are being shipped
to Steve from Scotland; the arrival date is unknown. So, patience,
please. If anyone should need one of these calls confirmed for a 2010

DXCC submission, please send your request with a note, and Steve will confirm with a different GM card. If you've already sent him a request and need a card now, E-mail him at: n3sl@arrl.net

KH6MB QSL ROUTE. Martin, KH6MB, would like to remind everyone that AI4U has not been his QSL Manager since January 1st, 2010. QSL direct to: Joseph M. Barr, 41-863A Laumilo St., Waimanalo HI 96795, USA, or LoTW.

QSLS VIA LoTW: 5V7TT, CU3EJ, DH8WE, G5XV, HK6K, JA1OVD, M2W, PI4COM, PS2T, UR7QM, V44KAI, Z21BB and ZS8M

QSLS RECEIVED VIA MAIL: 4K9W, 7X2GX, 9V1/IK1PMR, A31A, AP2NK, CE9/R1ANF, CN8QY/P, CT3FQ, CT4NH, DS1REE, E4X, IS0E, J28RO, KG4WV, PJ2/K8LEE, PJ5/AH6HY, RA7A, SU1SK, SV9/N0RB, TS7TI/P, UN5J, V85TX, VK4LDX/P, VP2EMR, VP5/N1WON, Z21BB and ZL7J

QSLS RECEIVED VIA THE BUREAU: 5K0T, 8P6CF, 9L7NS, 9Q/DK3MO, 9U1VO, 9Y4/DF8AN, AH0BT, BD1BYV, C4N, C91TX, CT3FT, CT9L, CX1TG, DD7EQ, DF0MU, DJ1CW, DJ5KW, DK0BN, DK5M, DL0GZ/P, DL1EIP, DL1EJD, DL2YCA, DL5KCS, DL7OK, DL7ON, DL7USW/P, DL8DBJ, DM4D/P, DP4D, DP9A, DR0G, DR5N, EA1DR, EA4KD, EA8URL, EK3SA, ES1QR, ES2JJ, ES5QD, F5VKT, F6DRP, F6KCP, FO/OH1RX, GM6TW/P, H40FN, HC2FN, HC8/DF8AN, HG9X, JA7NVF, JA7NVF, KN1DX, LU1YU, LU5FF, LY3UV, LZ3HI, LZ44WFF, LZ9W, M0BRB, M0DLL, M8C, OH5B, OH8X, ON4WY, OP4K, OR7D, OZ1GML, OZ0MJ, P29VCX, P29VLR, PA3CGJ, RW1AI/MM, S51A, SE6Y, SU9ZZ, T2G, T30CW, TF3SA, UA0AZ, VC3O, VE3CR, XR3APEC, Z21BB, ZD7X and ZL1BYZ

SILENT KEY. OPDX was informed that Kurt Heidergott, K7UU, became a Silent Key on October 26th. He has been living with ALS (Lou Gebrig's Disease) for 7 years. OPDX and its readers would like to send out our deepest sympathy to the family and friends of K7UU.

TC3, TURKEY (Contest and WFF Op). Members of the "LZ Contest Group" and the Bulgarian radio club "LZ Flora Fauna" will activate a new WFF reference number in Asiatic Turkey between November 24-30th. Operators mentioned are Nikolay/LZ1NK, Valentin/LZ1WX, Krasi/LZ2UW, Christo/LZ3FN and Bedri/LZ4RR. Look for the special callsign TC3WFF from the National Park Kus Cenneti (Bird Paradise); reference number TAFF-022. Activity will be on the HF bands, 160-10 meters, using CW and SSB. They will also participate in the CQWW DX CW Contest (November 27-28th) as only TC3A and as a Multi-2 entry. QSL TC3A via LZ1NK and for TC3WFF via LZ1ZF.

TC7, TURKEY. Valery, R5GA (ex-RW3GU), will be active as TC7M from the TA7KA club station in Trabzon during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via R5GA.

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQWW DX CW Contest (November 27-28th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

TP60, FRANCE. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) will once again be active as TP60CE, December 3-5th. This will be the

last time they use TP60CE. Activity will be on all HF bands and modes, including the satellites. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

UP7, KAZAKHSTAN. Ruslan, UN7AL, will be active as UP7A during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (40m) entry. QSL via UN7AL, direct or by the Bureau.

VP2E, ANGUILLA. Operators Paul/K1XM, Dennis/W1UE and Charlotte/KQ1F will be active from here between now and November 29th. Activity will be RTTY and CW prior to the CQWW DX CW Contest (November 27-28th). Callsigns are not known as this was being written, but the operators will be a Multi-2/Low-Power entry in the contest. QSL the contest callsign via KQ1F.

VP5, TURKS AND CAICOS ISLANDS. Just a reminder that Dave, W5CW, will once again be active as as VP5/W5CW from the VP5JM Hamlet on the Island of Providenciales (NA-002, WLOTA 1476) between November 24th and December 14th. Activity will include entries in the following three contests using the callsign VP5CW: CQWW DX CW Contest (November 27-28th) as a Single-Op/ All-Band entry, ARRL 160m Contest (December 3-5th) and the ARRL 10m Contest (December 11-12th). QSL via his home callsign (QRZ.com address).

VU2, INDIA. Prasad, VU2PTT, will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via the LoTW or direct using the info on QRZ.com.

Z2, ZIMBABWE. Antonio, DL4EA/EA4KT, will be active as Z24EA from Harare between November 23-30th (dates may vary slightly). Activity will be on 160-10 meters using CW, SSB and RTTY. Also, there may be participation in the CQWW DX CW Contest. QSL via the Bureau to DL4EA, or LoTW, or eQSL.

ZA, ALBANIA (Update). Members of the Hungarian "Haros Radio Club" (HA5HRK) will be active as ZA3HA from Orikum-Radhime Beach in the Bay of Vlora between now and November 29th. Activity will include the CQWW DX CW Contest (November 27-28th) as a Multi-Op/All-band entry. Operators mentioned are: Fatos/ZA1FD, Lazer/ZA1V, Tomi/HA5PT, Fero/HA8MT, Otto/HA5OT, Happy/HA5TMK, Pista/HA5TI and Chris/HA5X. Look for HA operators to sign ZA/homecall outside the contest. QSL ZA3HA via HA5X or LoTW. All other callsigns via the operator's home callsign. A ZA3HA Web page is available at: http://www.za3ha.com

ZK2, NIUE (Update). Operators Andrea/IK1PMR, YL Claudia/PA3LEO, Al/LA9SN, Doug/N6TQS, Alan/K6SRZ, and possibly others are now active as ZK2A from Namukulu cottages <http://www.namukulu-cottages.nu/> until December 3rd. Activity will be focused on Europe, 160-40 meters, 30/17/12 meters, CW and RTTY using four Elecraft with solid state amps with RX antennas. This is a lightweight DXpedition. They will try to limit their extra baggage expenses. To achieve this (and for efficiency and reliability too) they will mainly use wire antennas. QSL via LoTW, PA3LEO direct or by OQRS for a direct or Bureau QSL. A Web site is now available at: http://www.pacificdxpedition.com/index.php?s&#65533;tro
Operators of this operation will go on to operate from Norfolk Island

between December 5-19th. Requested callsign is VK9NN and the QTH will be
from Pacific Palms
<http://www.relaxawayholidays.com.au/norfolk-island/accommodation-informatio
n/pacific-palms/nfpp/pacific-palms>.

ZL50, NEW ZEALAND (Special Event). Members of the Papakura Radio Club
(ZL1VK), NZART Branch 65 in South Auckland, will activate the special
event callsign ZL50VK between January 1st and March 31st (2011). Activity
is to celebrate the 50th anniversary of the club. Look for logs to be
uploaded to LoTW and Club Log. QSL via ZL1VK. Visit their Web page at:
http://www.qsl.net/zl1vk

ZL8, KERMADEC ISLANDS. The ZL8X group is now active from Raoul Island
(OC-039) until December 5th. Activity will be on 160-6 meters using CW,
SSB and RTTY. QSL via DJ2MX. For updates: http://www.kermadec.de

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, reports that he has
been QRT most of the month because his team is moving to the new base.
However, Pierre states that the installation of the new station is almost
complete, and his new SteppIR vertical should be up as you are reading
this. He is expected to be on the air possibly as of November 21st. For
more details, updates, pictures of the new station and to read Pierre's
newsletter online, visit: http://www.iz8epy.it/html/zs8m.html

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

1044. Seeking steel Speed-X baseplate

Newsgroup: rec.radio.amateur.misc
Date: 2010-11-22 23:28:46 UTC
From: davidmylastname@acm.org
Message-ID: <iceube$k7t$1@frotz.eternal-september.org>
Source record: 4963

Does anyone here know where one may find a steel baseplate for a Speed-X
key? The aluminum one seems a bit too light for me.

DXNL 1703 - Nov 23, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

A7 - QATAR
Some members of the "Lufthansa Amateur Radio Club" (LARC) who are
cooperating with the "Qatar Amateur Radio Society" (QARS - A71A) will
be on the air from Nov 27 until Dec 3. Activities will take place in
CW, SSB and digital modes on all bands. If they have internet access
you can listen to a livestream at: http://www.d-atv.net/db0dlh.m3u

C6 - BAHAMAS
Pete,K8PT, will be QRV as C6APT on 40-10m (emphasis on the WARC bands)
from Treasure Cay (Little Bahama Bank Group, NA-080) between Nov 27
and Dec 10. Pete prefers CW but will work also in RTTY. QSL via K8PT.

Bob (N4BP/C6AKQ), Tim (N4UM/C6ARU) and Mike (K4RUM/C6AUM) will show up
from Freeport (NA-080) mostly in CW and digital modes from Nov 30 until
Dec 7. They will take part in the ARRL 160m Contest as well.
QSLs via homecalls.

Brian,ND3F, announced to be active as C6AQQ mostly on the lowbands from
New Providence (Great Bahama Bank Group,NA-001) from Nov 24 till Dec 6.
He will take part in the WWDX Contest and ARRL 160m Contest (Dec 3-5).
QSL via homecall, direct, LoTW or via bureau, which will take some time

EA8 - CANARY ISLANDS, AF-004
Jean,EA8/ON5JV, and Georgette,EA8/ON6AK, are going to hit the airwaves
from Tijoco Bajo on Teneriffa (AF-004) from Nov 26 until Feb 23, 2011.
They will work in CW/SSB on 40m-10m during their evening hours using
an Icom IC-706MKIIG with 100 watts, a 14AVQ vertical and a dipole.
QSL via homecall, via bureau or direct.

FG - GUADELOUPE, NA-102
Jules,ex-FR1AN, is now staying on Guadeloupe (NA-102), the home of his
XYL. His new callsign is FG4NN. He started building antennas a few days

ago so you can expect activity soon, also on 6m.
The QSL manager of Jules is Buzz, NI5DX.

FS - ST MARTIN, NA-105
FS/K9EL and FS/K9NB will be QRV from St. Martin (NA-105) in CW and maybe also SSB and RTTY on 160m-10m from Nov 25 until Dec 1. They will hand out a few points in the CQWW DX CW Contest as well. Skeds welcome! QSLs via their homecalls.

GJ - JERSEY, EU-013
Rich,K2WR, will show up as MJ0AWR a few days before the CQWW Contest. He will join the CQWW as GJ2A in the single OP/allband/high power class
QSL routes: GJ2A via K2WR or GJ3DVC; MJ0AWR via K2WR, direct or bureau.

J7 - DOMINICA, NA-101
Dieter,HB9TPQ (J79DP), Kurt,HB9BZG (J79KZ), and Walter,HB9MFM (J79WTA), are spending their holidays in the Tamarind Tree Hotel near Salisbury on Dominica (NA-101). They are working in SSB and sometimes also in RTTY on all bands using 100 watts and a dipole (50m high) until Dec 11.
QSLs should be sent via their homecalls, via bureau or direct.

PZ - SURINAME
Yuri,VE3DZ, is working as PZ5T from Suriname from Nov 23 until Dec 1, including the CQWW CW Contest. QSL via homecall.

V2 - ANTIGUA AND BARBUDA, NA-100
Bud,AA3B, is expected to show up as V26K from Antigua (NA-100) only in CW from Nov 24-29. He will join the CQWW DX Contest as SOAB/low power.
Bud asks for QSL via his homecall, via bureau, direct, LoTW or eQSL.

V6 - FEDERATED STATES OF MICRONESIA, OC-010
Takuto,JE1SCJ, will be QRV as V63YT from Pohnpei (OC-010) working on 160m-6m from Nov 24-28. He works mainly in CW but also in SSB, RTTY and PSK31. He will join the CQWW CW Contest but has to shutdown his station on Nov 28 around 0900 UTC in order to reach his airplane on time.
He focuses on 160m/30m/17m/12m before the contest especially on:
1.824 (QSX up/down)
3.510 (QSX up)
7.010
10.110
14.010
18.080
21.010
24.900
28.010 and
50.090 MHz.
Takuto works with 100 watts and wire antennas.
QSLs via his homecall, direct or via JARL bureau.

VP5 - TURKS AND CAICOS ISLANDS, NA-002
Dave,VP5/W5CW, has rented the shack of VP5JM on the island of Providenciales (NA-002, WLOTA 1476) from Nov 24 until Dec 14.

He will take part in the these contests: CQWW DX CW Contest,
ARRL 160m Contest (Dec 3-5) and ARRL 10m Contest (Dec 11/12).
QSL cards should be sent via his homecall.

XV - VIETNAM, AS-128
Sigi,DL7DF, and his XYL Sabine are going to spend their holidays on
Phu Quoc (Gulf of Thailand Group, AS-128) between Nov 26 and Dec 6.
Sigi will be QRV as XV4SP in CW, SSB, RTTY, PSK31 and SSTV on 160m-10m.
His equipment includes a K2 transceiver, lowband verticals, dipoles,
an HF9V and Beverage antennas. QSL via bureau or direct to DL7DF.

YN - NICARAGUA
Cal,YN2EA (WF5W), Paul, YN2PF (W5PF), and Bill,YN2WF (K5WAF), will be
QRV from Nicaragua from Nov 25-30, including the CQWW CW Contest as H7V
in the multi/single/low power category. They are working with two
stations in SSB, CW and RTTY on 10m-160m.
The QSL route for all calls is W5PF, via bureau, direct or LoTW.
For more information please click on: http://www.tdxs.net/yn2-tdxs.html

Z2 - ZIMBABWE
Antonio,DL4EA, is staying in the capital Harare and works as Z24EA
from Nov 23-30. He plans activities in CW, SSB and digital modes on
10m-160m and maybe he also joins the CQWW DX CW Contest.
QSLs via bureau, direct or LoTW to his homecall.

ZA - ALBANIA
Some members of the "Haros Radio Club" (HA5HRK) are working as ZA/HA5X,
ZA/HA5PT, ZA/HA5TI, ZA/HA8MT and ZA/HA5TMK from Nov 20-29. They will
sign ZA3HA in the CQWW DX CW Contest supported by ZA1G, ZA1FD and ZA1V.
The team also got a second license: ZA/HG6M.
QSL for ZA3HA via HA5X or LoTW. All others via their homecalls.
More information is available at: http://za3ha.com

5Z - KENYA / 5X - UGANDA
Nick,G3RW, is expected to show up as 5Z4LS from Kenya from Nov 23-28.
His next stop will be Uganda as 5X1NH from Nov 30 until Dec 5.
Nick works mostly in CW. QSLs via G3RWF, also via LoTW.

6W - SENEGAL
Stan,6W/EI6DX, will be QRV again from Somone, 70 km southeast of Dakar.
He is working mainly in CW on 160m, 80m and 30m before and after the
CQWW Contest. During the CQWW he will sign 6V7Y as SO/AB/high power.
QSL via RX3RC, via bureau or direct.
Please take a look also on his website: http://www.ei6dx.com

9J - ZAMBIA
Niko,S53A, is working from the Hippo Lodge (http://www.hippolodge.com)
in the Kafue national park signing 9J3A from Nov 23-29. He will join
the CQWW Contest as single OP/low power. His equipment includes an Icom
IC-7000, Spiderbeam for 20-10m, 80m vertical and a 2ele 40m Delta Loop.
QSL via S57S, direct: Aleksander Zagar, Golisce 132, SI-1281 Slovenia.

9L - SIERRA LEONE
Some members of the "VooDoo Contest Group" will take part in the
upcoming CQWW DX CW Contest as 9L5VT. This operation is dedicated to
Vince,K5VT, who was a member of this group for a long time and passed
away last April. You can expect activities before (starting Nov 22) and
after the contest where they will sign 9L7NS (QSL via AA7A) mainly on
the WARC bands and in RTTY.
QSL for 9L5VT via bureau, LoTW or direct to G3SXW.

9M6 - EAST MALAYSIA
Tony,9M6/KM0O, will stay in Kinarut on Sabah (OC-088, WLOTA 0119) from
Nov 26-30 and plans to join the CQWW CW Contest as single OP/allband.
Tony will focus especially on 80m and 160m beofre and after the CQWW.
QSL via KM0O, via bureau, direct or per LoTW.

WFF activities: Christoph,ZL/DK2CRN, and Georg,ZL/DL1ECG, are using the
improving condx for an activation of several ZLFF counters. From Nov 25
until Dec 15 they will activate following ZLFF numbers (variations are
possible due to route changes): ZLFF-002, ZLFF-004, ZLFF-007, ZLFF-009,
ZLFF-011, ZLFF-012, ZLFF-014. This is a "holiday style" activity!
Equipment: TS-480 (100 watts), Double Zepp and Outbacker antennas for
80m-10m. QSL cards should be sent via bureau to their homecalls.

LZ1NK, LZ1WX, LZ2UW, LZ3FN and LZ4RR are going to activate the
Kuscenneti national park (TAFF-022) in SSB as TC3WFF (QSL via LZ1ZF)
from Nov 24-30. They will sign TC3A (QSL via LZ1NK) in the CQWW.

DXCC: 5X0CW (Uganda, operation in 2010) and D2QV (Angola, 2010) are approved
for DXCC credit now.

SILENT KEYS: Following DXers passed away during the past weeks:
Paul E Wynne (AF5M), Walter Farrar (G3ESP), Fortunato Fontana (IK8HVJ),
William A Borgstrom (N9TN), Richard H Hendrickson (K7CVL),
Kurt Heidergott (K7UU), John J Champa (K8OCL), Glenn E Schultz (W0IJR),
Konstantin Kryachek (UA9OU), FOC-Mitglied Jack C. Chapman (W0HZ),
the former CQ WPX Awards Manager Norman V. Koch (WN5N),
Ernest Feist (WA4CCP), Charles R Mills (W8MNL), Ron Klukan (W8WH),
Richard R Grayson (W9DDX), Thomas A Appleby (5B4AGP) and
Vlastimir Vrabeca (9A4HK).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Nov 27/28: CQWW DX Contest, CW

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

AF-004, EA8, Lanzarote/Canary Islands: Frank,EA8/DH5JG, will be active from
Lanzarote (DIE S007) mostly in CW on 10m-80m (WARC bands preferred)
from Nov 22 until Dec 3. He will join the CQWW DX CW Contest as well.
QSL via bureau to his homecall.

AF-029, ZD9, Tristan da Cunha Islands: Dieter,DJ2EH, is working as ZD9T
from Tristan da Cunha between Nov 20 and Dec 8. QSL via homecall.

EU-023, 9H, Malta Group: Olaf,DL4HG, and Holger,DL5XAT, are working as
9H3TX from Gozo Island from Nov 23-30. QSL via DL5XAT (bureau/direct).

OC-039, ZL8, Kermadec Islands: A group of German HAMs is active as ZL8X
from Raoul Island (aka Sunday Island) between Nov 19 and Dec 5.
More information is available at: http://www.kermadec.de

Lighthouse activities (WLOTA/ARLHS/ILLW)

Lanark ARES Balloon Launch 2010-11-20

(Via: Norm Rashleigh, VE3LC - RAC VP Industrial Liaison)

The Lanark Amateur Space Agency comprised of members of the Lanark North Leeds ARES Group launched an Amateur High Altitude Balloon from Perth Ontario on 20 November 2010. This launch undertaken by VA3ZKS, VE3ZBO, VA3KAI, VE3BSB and Zach McCracken the son of VA3ZKS was an attempt at the world height record for amateur balloons.

The flight was designated LASA 8 and transmitted as VE3REX-11 via APRS. VHF transmitted flight parameters including location, height, direction and speed were picked up by the extensive network of APRS digipeaters and gated to the internet so that Amateurs could follow the flight in real time. Feed back indicates that the flight had a large following.

Following the launch, chase cars which included VA3ZKS, VA3ZBO, VE3BSB, VE3OAX, VE3ICF and VE3JGL tracked the flight on in car computers equipped with VHF receivers, tncs and the UI View tracking program.

VA3QV of Ottawa ARES organized a group of amateurs to provide down range communication support to assist the chase cars with additional tracking and recovery. Thanks to VA3NPL of Prescott-Russell ARES, VE3AFV of Seaway Valley ARES, VE3XID and VE3RMJ for their patient monitoring of the down range repeaters and the HF comms frequency.

The tracking transmitter package included a Garmin 18 LVC GPS an Argent Data Surface Mount Open Tracker and a 300 miliwatt MX 146 transmitter. Power was provided by 3 AA batteries outputting 5.4 volts at launch.

VE3REX-11 attained a record setting altitude of 39,899 meters or 130,903 feet before bursting and descending by parachute to land in Jay, Maine. The balloon reached speeds of 256 kilometres per hour and travelled a flight distance of 598 kilometres.

VA3ZKS and VA3ZBO located the flight package during the evening by picking up beacons directly from the flight package which had landed in a tree a few meters from the edge of a river. They returned in the daylight to retrieve the package and return to Perth.

The flight package contained a picture of John W1AKV who had assisted the Vermont recovery of LASA 7 launched 7 Nov 2009. John who was 90 and became a silent key 7 Nov 2010. The picture is being sent as a

memoriam to his friend K1XV in Vermont

Many thanks to all Amateurs and Clubs that have shown an interest in
this aspect of Amateur Radio and have provided financial support for
the flight consumables.

73 Barrie VE3BSB

1047. [RAC-Bulletin] RAC Bulletin 2010-034 E - News from CARAB on Electrical Interference

Newsgroup: rec.radio.amateur.misc
Date: 2010-11-23 21:57:36 UTC
From: rac-bulletins@eton.ca
Message-ID: <4CEC35EB.4070508@rac.ca>
Source record: 4966
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2010-034 E - CARAB News on Electrical Interference
2010-11-23

The Canadian Amateur Radio Advisory Board [CARAB] is a joint Radio Amateur of Canada [RAC]/Industry Canada [IC] consultation body which met last October 28th in Ottawa. In addition to items noted previously in a previous RAC Bulletin, RAC had raised the issue of utility electrical interference.

IC communicated the following to CARAB members after its November 2nd meeting with the Canadian Electrical Association."

Geoff Bawden VE4BAW, Co-Chair, CARAB / President, Radio Amateurs of Canada

---

On November 2, 2010, the annual Transmission Telecommunications Task Group (TTTG) meeting between Canadian Electricity Association (CEA) and Industry Canada was held. Industry Canada took the opportunity to relay to the Association concerns that had been raised at the October 28, 2010 Canadian Amateur Radio Advisory Board (CARAB) meeting relating to electrical interference.

CEA representatives were reminded of requirements under Industry Canada?s Interference Causing Equipment Standards (ICES) - 004 and given examples to demonstrate that, fundamentally, a clean electrical utility is beneficial for the utility.

CEA representatives indicated that front-line electrical utility staff may not be familiar with the requirements of ICES-004. It was noted that many utilities may not always have the expertise available to locate sources of electrical interference, however, some specific utilities indicated that they do in fact have experts in this field.

Industry Canada pointed out to Association members that radio amateurs can be a resource as they may have skills that could be used to help identify sources.

The CEA thanked Industry Canada for bringing CARAB?s concerns to the meeting and acknowledged that there are benefits to locating sources of electrical interference. Industry Canada indicated that the CARAB would appreciate receiving the CEA's views and reaction to this matter and the Association agreed it would respond.

****
The ARRL Contest Update

Published by the American Radio Relay League
****

November 24, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Ditsplosion! - CQ WW CW
- Top Banders Jamboree - ARRL 160 Meter
- Categorical Reminder from CQ WW Committee
- Do It Yourself Survey
- Extreme Breadboarding
- ARRL Contest Branch Online Update
- Bacterial Reconstruction
- Propagation eBook from RSGB
- You Can Go Home Again

NEW HF OPERATORS - THINGS TO DO

New HF operators often shy away from Top Band (160 meters) thinking the demands of the band too severe for modest stations and antennas. No need for that! There is lots of potential for Top Band excitement for the Little Pistol - load up anything you can and see what happens! This weekend's CQ WW CW and then the ARRL 160 Meter Contest are great opportunities to try 160 Meters On A Budget <http://www.eham.net/articles/21292>.

BULLETINS

Don't forget that this year's ARRL 10 Meter Contest <http://www.arrl.org/10-meter> will add the 32 Mexican states as multipliers! Be sure your logging software and CTY files are up to date, avoiding unpleasant mid-contest surprises.

BUSTED QSOS

A golden issue last time!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Nov 27-28

- CQ World Wide CW Contest
- SKCC Straight Key Sprint (Nov 24)

Dec 3-5

- ARRL 160 Meter Contest--CW
- Top Band Sprint--CW (Dec 2)
- NS Weekly Sprint--CW
- TARA RTTY M[illegible]e
- Top Operators Activity Contest--CW
- AWA Bruce Kelly QSO Party--CW
- ARS Spartan Sprint--CW (Dec 7)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

CQ WW DX Contest <http://cq-amateur-radio.com> Director, Bob K3EST emphasizes rules pertaining to the Single-Operator Assisted category and the use of a CW Skimmer which is permitted for all Multi-Operator stations, as well:

- The use of a personal skimmer located within the distance rule limitations of your QTH (500 meter rule) is OK.
- The use of a remote, personal skimmer is NOT allowed. This is the same as a using a remote receiver outside the 500 m station circle, which is not allowed for any category.
- If you are a single-op entry and access the Reverse Beacon Network <http://www.reversebeacon.net/> (RBN), you MUST submit your log as ASSISTED.

Speaking of CQ, contester Chip Margelli K7JA is moving from Heil Sound to CQ Communications <http://www.eham.net/articles/24957> where he will be Director of Advertising Sales and Marketing for all of the CQ family publications. Chip is a member of the CQ Hall of Fame and is well-known in contest circles. Congratulations, Chip!

It has also been announced that Hi-Z Antennas <http://www.hizantennas.com/> will be partnering with Array Solutions <http://www.arraysolutions.com/> for sales, service, and marketing. Hi-Z manufactures a number of innovative receive antenna products and the new partnership will allow Hi-Z to focus on manufacturing and new product development.

Pete N4ZR has just published two articles on the RBN blog <http://reversebeacon.blogspot.com/> at that will be worthwhile reading for anyone planning to use this resource in Assisted or Extreme mode in the CQ WW CW this weekend. One explains how to connect to the RBN Telnet node and gives step by step instructions on how to use CC User to set up your filters exactly as you want them. The other addresses fail-safes just in case the RBN team hasn't fixed the server and it goes down during the contest. The RBN can also be used to compare your signal against those of other stations and between antennas of your own in real time.

The Getscores <http://www.getscores.org/> live scoreboard at is now set up for the CQWW CW contest this weekend. Please check out your logger software's interface early, remembering that the developers are probably hoping to be eating Thanksgiving dinner and watching football Thursday rather than fixing bugs. The WriteLog <http://writelog.com/support2/getscores-org> Web site has been updated by author W5XD to help post scores from that program, including using the Universal Posting Application. Note that if you have WriteLog 10.74 or later it is now much easier to set up to post scores than older versions. (Thanks, David K1TTT)

Don't forget to stop by the ARRL Contest Soapbox <http://www.arrl.org/soapbox> page for some amusing and interesting tales. Drop in a few photos and words of your own - we'd love to see them, especially the contest results writeup authors!

These "space bubbles <http://www.telegraph.co.uk/science/space/8125127/Giant-space-bubbles-baffle-astronomers.html>" look like something familiar to hams - maybe it's the Universe's largest Hertzian antenna! (Thanks, Bill WY3A)

More sky-ward events are occurring in December. The most visible is a "high eclipse" of the Moon, in which the complete sequence of a total lunar eclipse will be visible across North America on the night of December 20-21. This is the first such eclipse in nearly three years. Just before the eclipse, the Geminid Meteor shower of mid-December is eagerly anticipated by the meteor scatter aficionados known as "ping jockeys". Often surpassing even the better-known, late-summer Perseids, the Geminids are one of the year's best showers. This would be a good time to investigate getting your station set up for FSK441, part of the K1JT WSJT <http://physics.princeton.edu/pulsar/K1JT> software suite. For more information on both events, keep an eye on the Spaceweather <http://spaceweather.com/> and Sky and Telescope <http://www.skyandtelescope.com/> Web sites.

We'd all like to see more CW activity from new HF hams, so plan on spending some time with the ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> on Sunday, December 19 from 1800-2400 UTC. It's a CW contest this time... get on with a straight key, QRS and work the CW newbies! (Thanks, Sean KX9X)

Sam K5OAI, Dawid SQ6EMM, and Petr, OK1RP came up with a list of several on-line "Web receivers" that can be listened to over the Internet: websdr <http://www.websdr.org/>, hb9fx-websdr <http://hb9fx-websdr.dyndns.org>, oe3mzc receivers <http://www.qsl.net/oe3mzc/receivers.html>, smeter.net <http://www.smeter.net/receive/receive.php>, ralabs.com webradio <http://www.ralabs.com/webradio/>, and globaltuners <http://www.globaltuners.com/>. Remember the restrictions on use of Web receivers when choosing a contest category!

The CQ WW SSB story of Hurricane Tomas
<http://lists.contesting.com/pipermail/3830/2010-November/208467.html>
by 8P5 operator Tom W2SC makes for fascinating (and scary) reading!

A new release of the Super Check Partial database files
<http://www.supercheckpartial.com/> is now available from Bob WA1Z.
Update your logger files right away so you aren't scrambling right
before or during the contest. The files contain more than 40,000 call
signs (10,000 for RTTY). If you want to check the version of the SCP
files you are using, look for a call beginning with "VER". Every SCP
file includes the version number in the list of calls. In the format
"VERYYYYMMDD".

Web Site of the Week - A team at Carnegie Mellon University has
published the results of a large-scale survey
<http://www.instructables.com/id/A-Few-Insights-into-DIY-Projects-Communities-and-/>
of more than 2600 members of six do-it-yourself communities;
Instructables, Etsy, Dorkbot, Ravelry, Adafruit and Craftster.
Creativity, learning, and open sharing are key values of these
communities - that sounds a lot like ham radio, doesn't it? Contesters
are resourceful individuals, so maybe "Do It Yourself" (DIY)
competitions
<http://www.designnews.com/blog/Gadget_Freak/40076-DIY_Contests_of_Interest.php>
would be of interest!

WORD TO THE WISE

Move and Pass - ask a station to QSY to another band temporarily to log
a new multiplier there. In 2003 Jim AD1C wrote the program PASS
<http://software.ad1c.us/pass/> to find passes in contest log. It takes
a Cabrillo log file and finds two or more QSOs with the same station
(on different bands) within a given window of time (default is 5
minutes). This enables you to see how many passes you made during a
contest. The program is command-line based and will (should) run either
in DOS or in a CMD window under the various flavors of Windows except
for 64-bit versions.

==> SIGHTS AND SOUNDS

Tim K3LR sent a picture of a strange-looking broadcast transmitter and
a little research dug up the related Web site describing home-brew
projects <http://www.rwonline.com/article/69826> like these. In case
you are wondering, those are 833A tubes. (Thanks, Tree N6TR)

Take a few minutes to watch this map animation track 1000 years of
European history <http://www.youtube.com/watch?v=DrZvn1qckIs>! Imagine
trying to keep the European DXCC list up to date! Contesters missed out
on some serious multiplier proliferation a few hundred years ago. Then
think about communications coming to a place for the first time as
described in this photographic essay about the trans-Pacific cable
<http://micsem.org/photos/media%20and%20messages/01.htm> found by Tim
K3LR.

If there had not been Sporadic-E clouds all throughout Europe, the WRTC 2010 competitors would probably not have enjoyed what has been called a flat-out "European rate fest." N6BV explores the effects of Sporadic-E on 20/15/10 meter propagation during WRTC 2010 using propagation-prediction tools and actual ionograms in this latest of the Potomac Valley Radio Club video Webinars <http://www.pvrc.org/webinar/wrtc2010prop.htm>. (Thanks, Dean N6DE)

==> RESULTS AND RECORDS

A table of results of ARRL contests downloadable in CSV format <http://www.arrl.org/database-downloads> is now online. The secret word for the night is "Rover!" in the online results of the 2010 ARRL August UHF Contest <http://www.arrl.org/contest-results-articles> by John K9JK. You can also find the updated records for the ARRL 10 Meter Contest by Ken WM5R on the ARRL Contest Branch Web site and on Ken's Web site <http://www.wm5r.org/arrl10/>. Curtis K9AKS has also delivered a complete, updated package of records for the ARRL June VHF QSO Party. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Results from the November ARRL Frequency Measuring Test <http://www.b4h.net/fmt/fmtresults201011.php> (FMT) have been posted online, as well. As hoped for, two "cross-pond" measurements were submitted by G3WW and PA3FWM - nice going! The Method and Soapbox comments make for some very good reading. Thanks to the FMT team led by K5CM for running the event and to WA7BNM for providing the reporting compilation page.

Radio-sport.net <http://www.radio-sport.net/> has a bunch of new stories about recent and upcoming contests, including the news of the first European CQ WW SSB Single-Operator, All-Band High-Power win in 52 years! Keep an eye on NS3T's site for more great writing about radiosport activities.

Official results for the 2010 EU HF Championship <http://lea.hamradio.si/scc/euhf/euhfc.htm> are now ready, verified by the SCC Contest Committee and published on the SCC Web page. All UBN reports are publicly available as usual, too. (Thanks, SCC Contest Manager, Robert S57AW)

Marc ON7SS/OO9O reports that the results of the 2010 UBA Contest - SSB <http://www.uba.be/en/hf/contest-results> are online now. To receive your contest certificate, follow the instructions on the results page.

The results have been posted for the 2010 Connecticut QSO Party <http://www.ctqp.org/> and certificates are printed and ready for mailing. (Thanks, Bob W1IG)

The list of logs received for the 2010 NY QSO Party <http://www.nyqp.org/logs2010.php> has been posted - if you have sent a log, please check and make sure we have received it and that we have your information correct. (Thanks, Ken N2ZN)

OPERATING TIP

It has been noted that 40% of the ARRL CW Sweepstakes Top Ten didn't get a sweep. 100% of the next 38 stations all got sweeps but had lower scores than the Top Ten. This might indicate it is better for your score to keep running than to go off looking for that last section. (Thanks, Rich KL7RA)

==> TECHNICAL TOPICS AND INFORMATION

A research team at the University of Newcastle in the United Kingdom have engineered a new type of bacteria <http://www.msnbc.msn.com/id/40201539/ns/technology_and_science-green_innovation/> that can be used to patch cracks in concrete structures. Injected into the crack, three types of cells produce calcium carbonate, act as reinforcing fibers, and generate a glue to hold it all together. The next task for these mighty mites is growing the tower!

Information about coaxial receiving loops can be found online from authors such as K9FD <http://topband.blog.cz/0612/receiving-loops-part-i-by-merv-k9fd>, W8JI <http://topband.blog.cz/0612/receiving-loops-part-ii-comments-by-tom-w8ji>, and GU4YOX <http://topband.blog.cz/0612/receiving-loops-part-iii-by-bob-gu4yox>. These small antennas can be helpful in Top Band operating from small lots or when portable. (Thanks, Petr OK1RP)

Uwe DL9NC checked nearly 20 different transceivers to see which output high-power transients when the transmitter is activated in CW or SSB. The article <http://www.ov-n15.de/joomla/images/zoom/DL9NC/pz_32.pdf> is in German, but the diagrams speak for themselves!

Gene AD3F references an online archive QST article <http://www.arrl.org/arrl-periodicals-archive-search> from August 1996 (page 35) that shows the proper way to attach a tower to a house by using a wall bracket.

How good are the Shure E2C <http://www.amazon.com/Shure-E2c-Sound-Isolating-Earphones/dp/B0000CE1UO/ref=sr_1_cc_1?ie=UTF8&qid=1290548704&sr=1-1-catcorr> and SE-115 <http://www.amazon.com/Shure-SE115-K-Isolating-Earphones-Microspeaker/dp/B001TDMVO0/ref=sr_1_1?s=electronics&ie=UTF8&qid=1290548726&sr=1-1> ear buds? Bob W5OV says, "The first pair I got were stolen by my wife because of how much better they made her ITouch sound." While they are not cheap, they are comfortable, have good sound quality, and have a connector at chest level to let you disconnect and move around without taking them out. Tree N6TR recommends the less-expensive Yamaha Inner Ear headphones <http://www.amazon.com/gp/product/B002UHKN6M/ref=oss_product>. Both got high marks in recent contests.

Here is a detailed description of a 90-foot vertical <http://www.seed-solutions.com/gregordy/Amateur%20Radio/Experimentation/160mVertical/Verti

calIntro.htm>
for 160 meters by Greg W8WWV. (Thanks, Tim K3LR)

Are the HAM-IV and Tailtwister pin connections the same and can the same controller be used for either type of rotator? According to tower climbing pro, Steve K7LXC, the answer to both questions is "Yes." You still have to write down the wire colors in your station notebook, though!

The technically-inclined reader interested in cognitive radio should look up a copy of the August 2010 issue of the IEEE Antennas and Propagation Magazine. The article "Cognitive-Radio Systems for Spectrum, Location, and Environmental Awareness" presents an overview of system-level issues and an exhaustive bibliography of detailed papers on the subject.

These thin-film energy storage devices from Infinite Power Solutions <http://Infinitepowersolutions.com> won't power your full-gallon amplifier, but they can harvest energy and store it from all sorts of nano-power sources. QRPPPers might benefit sooner than QROers. (Thanks, Jack N3ALO <http://www.ganssle.com/> from his "Break Points" column in Embedded Systems Design <http://www.eetimes.com/design/embedded>)

Ameritron <http://www.ameritron.com/> is a good source of amplifier parts for builders and repairs. On the home page, select "Amplifiers", then model, and at the bottom of the page is a parts list. If you download the MFJ catalog <http://www.mfjenterprises.com/> in PDF format, you can find the parts there, too.

EMI from switchmode power supplies is a growing problem. This EE Time Design article
<http://www.eetimes.com/design/power-management-design/4210090/Why-consider-a-power-BJT-rather-than-a-MOSFET->
by Yong Li of iWatt <http://www.iwatt.com/> about using BJT instead of FET to reduce EMI and costs of controlling EMI is a good start.

Technical Web Site of the Week - RSGB's Propagation Studies Committee has released Understanding LF and HF Propagation <http://www.infotechcomms.co.uk/Understanding_LF_and_HF_propagation.pdf>, a free eBook written by G0KYA and G3NYK and available for download. The book is a compilation of Technical Feature articles written by the authors for the RSGB's Radcom <http://www.rsgb.org/radcom> magazine. (Thanks, Mark K6UFO)

==> CONVERSATION

You Can Go Home Again

As many of the Contest Update readers prepare to head over the river and through the woods to Grandma's house for Thanksgiving festivities, I'm here to report on a ham radio equivalent. While Norman Rockwell may not have painted
<http://www.best-norman-rockwell-art.com/norman-rockwell-saturday-evening-post-article-1943-03-06-freedom-from-want.html>

it, the charm and goodwill of sharing the Sweepstakes operating duties at one's alma mater club station certainly captures the same essentials.

I was fortunate to make contact with my former club at the Missouri University of Science and Technology, W0EEE <http://w0eee.mst.edu/>, and secure an invitation for Phone Sweepstakes. This year's rule change to allow alumni to operate School Club category stations made possible my personal "ham radio homecoming". So early Saturday morning, I loaded the car with toolbox, spare gadgetry, and a bag of cough drops (don't ask) to make the 100-mile journey down I-44.

Right on schedule, I met club president Barry KC0YDZ for a hamburger and we adjourned to the Electrical Engineering building to which weekend access had been arranged. The station had been relocated from the stone basement of the venerable Rolla Building, once adorned with a 60-foot tower perched on the granite chimney and a Mosley Classic 36 tri-band Yagi at the 100-foot level, a legendary 80 meter dipole stretched completely across the campus quadrangle, the last dime glass-bottle soda machine in central Missouri, and a brigade of belfry bats to bamboozle beam builders. These days, the club has much more modern quarters with a tower gracing another building's roof and a great shot to the horizon in all directions. The bats stayed behind.

As the club's HF beam had been destroyed by a recent ice storm, a multi-band dipole was going to be the antenna of choice, but for Sweepstakes that's not the handicap it might have been for a DX contest. Indeed, it proved to be more than up to the job! A different challenge was presented by a piece of equipment that I knew well and was still on the job - a grizzled veteran of many electromagnetic campaigns, the club's SB-220. Yes, everything still lit up properly without a whisper of complaint but keying the amp proved to be problematic. Until the small toggle switch labeled "Standby / Active" was discovered. One click of the antenna relay and an upward flick of the power meter later, we knew we had a winner.

250 contacts later, my roborant homecoming came to an end over a shared pizza. There were contacts to celebrate and future projects to consider. I have three new friends at W0EEE and they have a new one not far away. Already, alumni of our old rivals at Kansas State, W0QQQ, are thinking about another Sweepstakes challenge. I'd like to put that "dit dit dit" back on the air during a big contest, too. We shall see. I am grateful to the club members - Barry KC0YDZ, Jim KD5TPH, and Andreas KC0SU - who stuck around on the beginning of Thanksgiving break to humor an enspirited alumnus somewhat soggy with nostalgia and let him hog the operating chair for the day. I'll be back, guys, thanks!

While appreciating the plenteous season, though, let us not forget that all is not an exuberant Thanksgiving cornucopia. Many are slicing what they have extra thin this year and relying on the generosity of others to get them through every day. Rockwell painted <http://www.best-norman-rockwell-art.com/1943-thanksgiving-girl-praying.html>

that scene, too. Share ham radio's weal of helpful kindness and have a great holiday season, no matter how you celebrate it.

73, Ward N0AX

==> CONTESTS

24 November through 7 December

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

SKCC Straight Key Sprint--CW, from Nov 24, 0000Z to Nov 24, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the fourth Wednesday UTC. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 3 days. Rules <http://www.skccgroup.com/sprint/sks>

CQ World Wide CW Contest--CW, from Nov 27, 0000Z to Nov 28, 2400Z. Bands (MHz): 1.8-28. Exchange: RST and CQ zone. Logs due: Dec 21. Rules <http://cq-amateur-radio.com/>

Top Band Sprint--CW, from Dec 2, 0000Z to Dec 2, 0600Z. Bands (MHz): 1.8. Exchange: RST, S/P/C, ARCI number or Power. Logs due: 30 days. Rules <http://qrparci.org/contests>

NS Weekly Sprint--CW, from Dec 3, 0230Z to Dec 3, 0300Z. Bands (MHz): 1.8-14. Frequencies: Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

ARRL 160 Meter Contest--CW, from Dec 3, 2200Z to Dec 5, 1600Z. Bands (MHz): 1.8. Exchange: RST and ARRL/RAC section if US/VE. Logs due: Jan 4. Rules <http://www.arrl.org/contests>

TARA RTTY M�l�e--Digital, from Dec 4, 0000Z to Dec 4, 2400Z. Bands (MHz): 1.8-28. Exchange: RST and State/Province or serial. Logs due: Jan 1. Rules <http://www.n2ty.org/seasons/tara_melee_rules.html>

Top Operators Activity Contest--CW, from Dec 4, 1600Z to Dec 5, 1559Z. Bands (MHz): 3.5-28. Exchange: RST, serial, and TOPS/PRO number. Logs due: Dec 31. Rules <http://www.procwclub.yo6ex.ro/>

AWA Bruce Kelly QSO Party--CW, from Dec 4, 2300Z to Dec 5, 2300Z and Dec 11, 2300Z to Dec 12, 2300Z. Bands (MHz): 3.5,7. Frequencies: Multiple operating periods. Exchange: RST, Xmtr type, power, name. Logs due: 30 days. Rules <http://www.antiquewireless.org/>

ARS Spartan Sprint--CW, from Dec 7, 0200Z to Dec 7, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

VHF+ CONTESTS

SKCC Straight Key Sprint--CW, from Nov 24, 0000Z to Nov 24, 0200Z.

==> ARRL BOARD OF DIRECTORS: NEW VICE DIRECTOR FOR SOUTHEASTERN
DIVISION; SOUTHWESTERN, WEST GULF DIVISIONS REMAIN UNCHANGED

ARRL Southeastern Division members have chosen a new Vice Director
for the ARRL Board family. Andrea Hartlage, KG4IUM, is already a
familiar face to many, but on January 1, she will become the youngest
serving ARRL Vice Director in modern times -- and possibly in history.
On November 19, ballots were counted in the races for Director and Vice
Director in the Southeastern and West Gulf Divisions and Director in
the Southwestern Division. Hartlage, 21, of Grayson, Georgia, was
declared the new Vice Director in the Southeastern Division, defeating
incumbent Jeff Beals, WA4AW, of Loxahatchee, Florida.

Director Greg Sarratt, W4OZK, of Huntsville, Alabama, won re-election
as the Director in the Southeastern Division. Dick Norton, N6AA, of
Topanga, California will stay as Southwestern Division Director. In the
West Gulf Division, Dr David Woolweaver, K5RAV, of Harlingen, Texas and
John Robert Stratton, N5AUS, of Austin, Texas, will continue as
Director and Vice Director, respectively. Terms for Directors and Vice
Directors begin at noon on January 1, 2011 and run for three years.
```

Read more here
<http://www.arrl.org/news/southeastern-division-gets-new-vice-director-southwestern-west-gulf-divisions-remain-unchanged>.

==> ARRL SECTION MANAGERS: 2010 FALL SECTION MANAGER ELECTION RESULTS

ARRL members in Western Pennsylvania, Missouri and South Carolina have re-elected their Section Managers -- John Rodgers, N3MSE, Dale Bagley, K0KY, and Marc Tarplee, N4UFP, respectively -- for another two year term. Votes were counted on Tuesday, November 23 at ARRL Headquarters. In Eastern Massachusetts, the only nominee for Section Manager was Phil Temples, K9HI, of Watertown. Temples previously served as the Eastern Massachusetts Section Manager for terms from 1994-1996 and again from 2001-2004. The following incumbent ARRL Section Managers did not face opposition and were declared elected for their upcoming terms of office: Art Zygielbaum, K0AIZ, Nebraska; Mike Lisenco, N2YBB, New York City-Long Island; Thomas Dick, KF2GC, Northern New York; George Strayline, W2GSS, Southern New Jersey, and Dee Turner, N4GD, West Central Florida. New terms of office will begin on January 1, 2011. Read more here
<http://www.arrl.org/news/2010-fall-section-manager-election-results>.

==> ON THE AIR: WARM UP YOUR CHILLY DECEMBER WITH THE 2010 ARRL 160 METER CONTEST

The ARRL 160 Meter Contest <http://www.arrl.org/160-meter> -- an all-CW event -- is tremendous fun! As the object of the contest is for DX stations to contact American and Canadian stations (and vice versa), everyone will be seeking you (especially if you live in a rare section like North Dakota, Nebraska or any of the rare sections from November's Sweepstakes contests).

In this contest, Alaska (KL7) and Hawaii (KH6) count as DX, as do the Caribbean US possessions (KP1-KP5) and all of the Pacific Ocean territories (KH0-KH9). According to ARRL Contest Branch Manager Sean Kutzko, KX9X, if you don't have an antenna for 160, you should just load up whatever you have through an antenna tuner and give "top band" a try -- even a 40 meter dipole through a tuner will make QSOs.

Since ARRL and RAC Sections are worth 2 points each and count as multipliers, the ARRL 160 Meter Contest is a good way to begin working -- or finishing up! -- your Worked All States (WAS <http://www.arrl.org/was>) award. But don't forget about those DX stations -- each DXCC entity is a multiplier and is worth 5 points.

The ARRL 160 Meter Contest runs from 2200 UTC Friday, December 3 through 1559 UTC Sunday, December 5. Logs must be e-mailed <160meter@arrl.org> or postmarked no later than 1600 UTC Tuesday, January 4, 2011. Paper logs should be sent to ARRL 160 Meter Contest, 225 Main St, Newington, CT 06111.

==> AMATEUR RADIO IN SPACE: ARISS AIMING TO RAISE ITS EDUCATIONAL PROFILE

NASA will assume more direct sponsorship of the Amateur Radio on the International Space Station (ARISS) program as an educational project. Among its activities, ARISS oversees the project that enables schoolchildren to speak via ham radio with astronauts aboard the International Space Station. NASA also will embrace ARISSat as an educational project for the ISS National Lab. A reconfigured, yet-to-be-named education planning group will pick up the mission of the ARISS Communications Council. These changes were among the outcomes of a meeting of NASA and ARISS International officials who gathered November 12-13 at ARRL Headquarters. Read more here <http://www.arrl.org/news/ariss-aiming-to-raise-its-educational-profile>.

==> AMATEUR RADIO IN SPACE: HAMS INVITED TO LISTEN FOR NEW SATELLITES

Five research satellites were carried to orbit on November 19 aboard a Minotaur V rocket from Kodiak Island, Alaska. All the satellites use Amateur Radio frequencies and hams have been invited to participate in their missions by monitoring and collecting data.

Two of the satellites are FASTRACs -- relatively small "nanosatellites" -- built by students at The University of Texas in Austin. They enter orbit as a single spacecraft, but then separate into FASTRAC 1 (known as "Sara Lily") and FASTRAC 2 (referred to as "Emma"). Both satellites use 1200 or 9600 baud AX.25 digital communication and transmit at 1 W output, so they should be receivable with omnidirectional VHF or UHF antennas and decodable by ordinary packet radio hardware and software. After their scientific missions are complete, the satellites will be reconfigured to function as digipeater relays for Amateur Radio use, as part of the Automatic Packet Reporting System (APRS). Read more here <http://www.arrl.org/news/hams-invited-to-listen-for-new-satellites>.

==> ARRL TO CLOSE IN OBSERVANCE OF THANKSGIVING HOLIDAY

ARRL Headquarters will be closed November 25 and 26 in observance of Thanksgiving. There will be no W1AW bulletins or code practice transmissions those days <http://www.arrl.org/w1aw-operating-schedule>. The ARRL Letter <http://www.arrl.org/arrlletter/> is being published a day early, but there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> this week. ARRL Headquarters will reopen Monday, November 29 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> OUT AND ABOUT: "COMING HOME" TO HAMJAM 2010

On November 13, Georgia hams and others enjoyed HamJam 2010. According to HamJam organizer Mack McCormick, WB4MAK, the event's goal is to encourage members of Amateur Radio clubs in the region to come together for a day of learning and fellowship. Members of more than a dozen clubs from Alabama, Florida, South Carolina, Tennessee -- and of course, Georgia -- were on hand. "HamJam is an example of how the traditional hamfest is evolving to incorporate education and social elements," said H. Ward Silver, N0AX, who attended as a guest speaker.

"Change hasn't left behind the traditional raffle prizes, as high-end manufacturers sponsored equipment donations, allowing attendance to be free, with Georgia Tech providing the meeting space." Read more here <http://www.arrl.org/news/coming-home-to-hamjam-2010>.

==> SOLAR UPDATE

Tad "For I have the warmth of the Sun <http://www.youtube.com/watch?v=70psCljGnXM>" Cook, K7RA, reports: Sunspot numbers declined this week, and it looks like the average daily sunspot number will be less than half the value reported last week <http://www.arrl.org/news/the-k7ra-solar-update-139>. Solar flux was in the 90s a week ago and is now around 75. The predicted solar flux from NOAA/USAF shows levels continuing around 75 through December 1, and then rising gradually and returning to 90 around December 12-14; quiet geomagnetic conditions are predicted for the near term. This week's bulletin will be available as usual on Friday from the ARRL Web site, but it won't go out from W1AW or via e-mail until Monday, November 29. Look for more information on the ARRL Web site on Friday, November 26. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Beach Boys' The Warmth of the Sun <http://en.wikipedia.org/wiki/The_Warmth_of_the_Sun>.

==> ARRL RECOGNIZES: DEADLINE CLOSING FAST FOR NOMINATIONS FOR ARRL'S LEONARD AWARD

Television, radio, magazines, newspapers, blogs, Webcasts -- Amateur Radio has been featured in all of them in 2010. And now it is time to thank the professional media people who made it happen by nominating them for the Bill Leonard, W2SKE, Professional Media Award. This national level annual award sponsored by the ARRL, honors three professional journalists whose outstanding coverage in audio, video and print formats best reflect the enjoyment, importance and public service value of the Amateur Radio Service. The deadline for nominations is December 10. Read more here <http://www.arrl.org/news/deadline-approaching-for-nominations-for-arrl-s-leonard-award>.

==> ARRL RECOGNIZES: NOMINATION DEADLINE FOR 2010 ARRL INTERNATIONAL HUMANITARIAN AWARD APPROACHING

Nominations are open for the 2010 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. The deadline for nominations is December 31, 2010. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-2010-arrl-humanitarian-award>.

==> THIS WEEK ON THE RADIO

This week:

- November 26 -- QRP Fox Hunt
- November 27-28 -- CQ Worldwide DX Contest (CW)
- December 1 -- QRP Fox Hunt
- December 2 -- ARCI Topband Sprint

Next week:

- December 3 -- NCCC Sprint
- December 3-5 -- ARRL 160 Meter Contest
<http://www.arrl.org/160-meter>
- December 4 -- TARA RTTY Melee
- December 4-7 -- ARS Spartan Sprint
- December 8 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 4-5, 2010 -- ARRL West Central Florida Section Convention <http://www.fgcarc.org/>, Palmetto, Florida
- January 8, 2011 -- ARRL Delta Division Convention <http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention <http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention <http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention <http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here <http://www.arrl.org/hamfests>.

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER of the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2010-11-25
We attempt to distribute our Newsletter one or two times per week.
For further detail please be so kind and refer at our "News"-page
http://www.mmmonvhf.de/latest.php - welcome and enjoy...

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF 144 MHz Meteorscatter Sprint Contest 2010 Results **

The VHF-DX-Portal MMMonVHF in cooperation with the magazines
DUBUS & Funk-Telegramm (by Joachim, DL8HCZ) did invite you in
August 2010 (PERSEIDS) to take part in our 144 MHz Meteorscatter
Sprint Contest. Please do welcome the RESULTS now H E R E:
http://www.mmmonvhf.de/ctest2010.php
Congrats to all participants and special to the TOP 3 in each
section (QRP: LZ1KQ/1, ON6NL and YO5PLD - QRO: LY2WR, HB9FAP and
LZ9X and in class VINTAGE: DH6DAO (only participant that group))
73 de Erwin, DK5EW, Sprint-Contest-Manager, Team of MMMonVHF

** MMMonVHF Meteorscatter Predicitions December 2010 **

December is, as usual, characterized by the return of one of the
most active (and probably the most reliable) major annual showers
The Geminids. Geminids maximum is expected to occur on December
14th, 11h UT, with ZHR = 120 hr-1 at peak. The Geminids peak is
typically quite broad (thus ensuring a several-days-long period
of good MS activity) , although the rates sometimes decay fairly
quickly after the maximum. Have a look to Geminids predictions
and tips, as well as those for other minor showers in December
2010 at our MS-Propagationpage: http://www.mmmonvhf.de/ms.php
Moreover, HERE you will be able to find the latest NEWS and an
ACTIVITY-MAP regarding the activities during the BCC-MS-Contest:
www.bavarian-contest-club.de/contest/ms-contest/
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** MMMonVHF is looking for additional technical support! **

With a rising number of tools and sections on our web portal
MMMonVHF.de the required programming and maintaining effort of
those is also getting more. Due to the fact, that this is as of

today a "one-man" show, we are looking for some addtional
volunteer (s) for supporting us in this topic. So, if you are
willing to spend some of your free time with developing new web
tools and maintaining the existing web/database structure and
you have some advanced knowledge / experience in php / mysql
javascript you are very welcome to contact us (we would preferred
german language speaking people for that issue) - For details you
may contact Ansgar, DG2KBC (dg2kbc"at"mmmonvhf.de) direct...
SOURCE: Ansgar, DG2KBC, on behalf of the MMMonVHF Team

BW/DL3OCH qrv from BV (WW-Loc: PL04) on 1296.090 MHz (RX on
my own echo freq) in Mode JT65C (TX first)
DU9/DL3OCH qrv from DU9 (WW-Loc: PJ18) on 1296.090 MHz (RX on
my own echo freq) in Mode JT65C (TX first)! I might be online
during operation but the internet is not very reliable or
sometimes super slow. I will announce the exact operating time
here on mmmonvhf. Please check for updates. Due to other family
activities especially during christmas, i wont be able to operate
for many hours. However, I will try my best to get a QSO with
everyone who wants to work DU on 23cm.
SOURCE: tnx to Bodo, BW/DL3OCH, direct to MMMonVHF

** SABLE ISLAND (CY0, FN93-GN03) next trial... **

The operational team for the 6-13 December DXpedition to Sable
Island [425DXN 1017] will consist of N0TG, AA4VK, and WA4DAN.
They will be active as homecall/CY0 on 160-6 metres CW, SSB and
RTTY. The preferred QSL route is via the Online QSL Request
Service available at www.cy0dxpedition.com. Traditional direct
requests for all callsigns should be sent to N0TG (Randy Rowe,
3017 Coventry Lane, Waxahachie TX 75165, USA). Traditional
bureau cards will be via each operator's home call.
SOURCE: David, BRS25429 via USKMG Announce

** ZK2 - NIUE and VK9/N - NORFOLK ISLAND HF & 50 MHz Operation **

Operators Andrea IK1PMR, Claudia PA3LEO, Al LA9SN, Doug N6TQS, Alan K6SRZ, Tom SP5UAF and others will be active from the Namukulu cottages, Niue Island (OC-040, WLOTA L-2139), as ZK2A between 20 November and 3 December, 2010. They will use 4 Elecraft K3s 160m-6m and solid state amps. Focus will be on Europe, 160m-40m + WARC CW/RTTY with RX antennas. QSL direct to PA3LEO (QRZ.com). Notes: The ZK2 team will proceed to Norfolk Island (VK9N, OC-005, WLOTA 1469) and plan to be QRV 5-19 December 2010 (expected callsign VK9NN). Website: www.pacificdxpedition.com/index.php?s=intro
SOURCE: [NG3K] via ICPO Bulletin (19-26 November 2010)

** Pohnpei Island (WW Loc. QJ96DX) qrv HF & 50 MHz **

Takuto, JE1SCJ will activate Pohnpei Island (OC-010, WW Loc. QJ96DX) as V63YT from 24 November until 28 November 2010. He will participate in CQWW DX CW Contest, but will have to QRT around 0900z on the 28th due to flight schedule. QRV 160-6 metres mostly CW with some SSB, RTTY and PSK31, using 100W with wire antennas and a yagi for 6 metres. QSL via bureau or SASE direct to JE1SCJ (www.QRZ.com).
SOURCE: [NG3K] via ICPO Bulletin (19-26 November 2010)

** Next HF and 50 MHz activities from HAMLET, North Caicos **

Dave, W5CW will once again be active from the VP5JM HAMLET, North Caicos, island of Providenciales (IOTA NA-002, WLOTA 1476) between 24 November and 14 December 2010 as VP5/W5CW. He will enter three contests during his stay in VP5 - CQWW DX CW Contest (27-28 Nov.) ARRL 160-METER Contest (3-5 December) and the ARRL 10-METER Contest (11-12 December), using the callsign VP5CW. Outside the contests he will be QRV on 160-6m CW and SSB. QSL direct to his home callsign. SOURCE: ICPO Bulletin (19-26 November 2010)

** Z24EA from Zimbabwe qrv HF and 50 MHz **

Antonio, EA4KT (DL4EA) will be active as Z24EA from Zimbabwe on 21-30 November, including an entry in the CQ WW DX CW Contest. He will operate on 160-6 metres CW, SSB and possibly some digital modes. QSL via bureau to DL4EA, plus LoTW and eQSL
SOURCE: [TNX Z21BB] 425 DX News #1020

** V73RRC Expedition #2 **

...to activate uninhabited Ujelang Atoll in Republic of Marshall Islands, IOTA new-one, OC-278. Timeframe: around December 9-12, 2-3 days on Ujelang atoll 6-40m CW and SSB December 5-16th Enewe-tak atoll (OC-087). Team: Tim NL8F and Yuri N3QQ Will operate on 160m from Enewetak Atoll. Updates/live GPS tracking at www.oc-278.ucoz.com QSL route: N7RO for V73RRC and V73QQ

Text edition:

WIANEWS FOR WEEK COMMENCING NOV 28 2010.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING NOVEMBER 28 2010

A NOT SO SMART IDEA

Smart Meters - WPC modem uses 2 - 4 MHz

A French company Watteco has developed a new powerline modem based on Watt Pulse Communication (WPC) that transmits across the 2 - 4 MHz segment of the precious HF spectrum.

The small, low cost, low power consumption modem can be used for any type of data communication applications such as Smart Meters, Home Control and Street Lighting it transmits a wideband signal across 2-4 MHz completely covering the Amateur Radio 80m band.

(Watteco http://www.watteco.com/)

BP

No not BP as in Broadband over powerlines but BP as in Blood Pressure.

A new procedure which takes just 45 minutes involves a doctor inserting a catheter into an artery in the upper thigh, then threading it into an artery next to the kidney.

There, they use low-power radio waves to heat up and effectively turn off specific nerves which are known to play a role in high blood pressure.

Professor Markus Schlaich from the Baker IDI Heart and Diabetes Institute in Melbourne was a principal investigator in an international trial which involved 106 patients across 24 separate sites in Europe and Australia.

After the first ten patients or so were treated, they really were quite confident that this is a fantastic new technology that allows lots of people out there who have trouble with their blood pressure.

How long will it be before this treatment is available to people in Australia?

They are quite hopeful that certainly within the next year, this radio wave treatment for High Blood Pressure should be available for clinical use.

DON'T WORRY ABOUT CAR 54 -- CHANNEL 4 WHERE ARE YOU?

Some households in the Mansfield Shire, South West Victoria, will get digital only television transmissions at the end of the November.

The Bonnie Doon and Howqua analogue transmitters will be switched off on November 29.

It is the second area in the country to go to digital only, after Mildura was switched over on June 30 this year.

The rest of regional Victoria will be switched to digital only on May 5 2011.

RESEARCH RESULTS

Telstra's recent research on Aussie Home Gadgets has revealed that when it comes to purchasing gadgets for the home, older Australians (55+ years) are most likely to base their decision on whether the product is desired by their peers (42% vs 29% of 18-35 year olds).

Comparatively, younger Australians (18-35 years) are more likely to wait for the initial rush of people to buy and review a gadget before making their decision (21% vs 14% of 55+ years).

While women are more likely than men to give up installing a new gadget because they find the instructions daunting, men are more likely to break their new gadget before they've got it working.

When it comes to getting the most out of home gadgets, Queenslanders rate themselves highest in terms of using all the advanced features, comparatively, Northern Territorians are the biggest offenders for only using the basic functions of their home gadgets.

ARNSW Secretary Norm VK2TOP, tells how the old Ozemail account and its VK2WI address was terminated last Friday week. A few people were still occasionally using this address so Norm will attempt to contact them by email and advise the current addresses that have been in place for some time.

The various addresses to contact Amateur Radio New South Wales include - office - membership - disposals or news - followed by @arnsw.org.au

WIA Centenary

Further analysis of the VK100WIA logbook yields interesting statistics

With the log book now finalised at 24,440 contacts David Park VK3JDA has carried out some further in-depth analysis of its 611 pages.

The 40m band had 10,500 contacts, followed in popularity by 80m with 5,000, 20m 4,100 and 2m just over 3,000. In fact 12 bands were used by VK100WIA ranging from 160m through to 23cm.

Looking at the modes used, as would be expected SSB comes up triumphs with 19,000 contacts, and CW got a very good pounding with nearly 1400 QSOs

logged.

Others listed as modes in the log were AM, IRLP, D-STAR, PSK, JT65C, SSTV, ATV, APRS and one EME or moon bounce contact.

Thank you to David VK3JDA for the analysis report, which appears in full with graphs on the WIA website, and the WIA affiliated clubs who put VK100WIA on air.

SARC CHRISTMAS PARTY - Sunday 5 December.

This will be held as usual at the Clubrooms from about 1200 Local.

BBQ type lunch followed by the usual assorted goodies.

Those attending are requested to bring a plate or similar of a variety of extra good things to eat. Use your imagination, add variety to the table.

St. George Amateur Radio Society

This group will hold their final meeting for the year Wednesday December 1. Although meetings normally start at 7:30pm, interested amateurs are invited to come early and take part in the BBQ in the park.

The meeting venue is 1st Kyle Bay Scout Hall, Donnelly Park, next to the sailing club.

Put this on your calendar now, the major amateur radio event in Victoria returns to the Kyneton Racecourse, only an hour from Melbourne, Ballarat and Bendigo Sunday the 13th of February.

The Centre Victoria RadioFest No. 4 follows in the tradition this unique event initiated by Amateur Radio Victoria in 2007 when it became an instant success.

The major commercial traders have given it their endorsement. Second-hand sellers like the event too because it is strategic location and low cost. Perhaps you have unwanted equipment and bits of pieces now taking up space in your garage or a room at home? Then make a sales table or car-boot space booking now.

A warm invitation is also extended to all clubs and groups to be part of the popular Club Corner Precinct.

For more information do check out the home page of the Amateur Radio Victoria website www.amateurradio.com.au

See you at the Centre Victoria RadioFest, Kyneton Racecourse on Sunday the 13th of February.

I'm Bruce Lees and you're listening to VK1WIA.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking about growing club membership.

Over the years we have seen some radio clubs "dis-incorporate" as numbers and interest in specific areas has dropped off. Some of these former bodies continue as social entities and this raises the questions of size and continuity. If our club is too small, it is extremely hard to complete the necessary organisational tasks as well provide the social glue that binds a group. Also it often means that certain people become fixtures in doing those jobs and training up others to keep the group running in coming years, just doesn't happen.

Like many other things, it is really not whether the jobs are being done well but whether they are recognised as being done, well or not. As club members we need to be honest enough to give praise when it works and ask the right questions when it falters.

As club members we need to nurture our comrades and gather new faces. We need to involve the converted and invite the interested.

Have you told some-one about amateur radio, this week?

I'm Geoff Emery and that's what I think......how about you?

CLUBBING -

we have been informed of a Xmas get-together for Cairns Amateur Radio Club members & family to be held at 6:30pm, Brothers League Club, Cairns on 13th Dec.

Two days prior on the 11th of December we have the Gold Coast break-up, this is at 10am in the clubrooms. A BYO and please bring a plate to share as well. The Christmas break-up at the Gold Coast will also have all the fun of a FOX-HUNT.

VK4WIP Club Station is now back on the air after many years of absence from HF.

The tower project has now been completed and the erection of the 9 Element Log Periodic has taken place. Rigs currently in use at the club station are : Yaesu FT-101Z, Yaesu FT-101E, Yaesu FT-1000D & Yaesu FT-1000MP Mark V.

The Rotator is a Yaesu G-1000DXC housed in a custom "cage" with thrust bearing to handle the weight and wind load of the antenna. The club will be purchasing a NEW rig to complete the station in the not to distant future.

They are also on Facebook and the photos of the tower and antenna are viewable there. The Club Station will try to be active most weekends

and for those wanting a QSL Card they are in the process of designing a Special QSL for Direct & Bureau requests.

(VK4WIP via QRZ.com)

FOUNDATION LICENSEES STRUT THEIR STUFF

Good to see all the Foundation class licensees helping out by running the Townsville Amateur Radio Club.

At their just held AGM we see the 2011 Management Committee executive having 75% " Foundation'ers".

Vice President - Gavin Reibelt VK4ZZ
Treasurer - Joan McDonell VK4FTVL
Secretary - Eldon Bryant VK4FNQA

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

Mal, VK4UMS released the details of a proposed trip for all amateurs to 2011 Dayton Hamfest as well as showing slides of his visit earlier this year. Mal said that he did not want to be the tour guide for the trip but just wanted to offer others the chance of going with him. Mal is leaving on 6 May 2011 and his plans include tours of the Boeing plant in Seattle, the Smithsonian Aerospace museum in Washington DC, the US Air Force museum and of course Dayton from the 20-22 May 2011. The return trip to home starts on the 23rd of May and arrives back in Brisbane on 25 May.

If you can't go for the whole trip, Mal will meet you in Dayton just for the Hamfest. A local travel agent has all the other details including accommodation costs and flight costs for whatever type of trip you might plan. If you are interested please contact Mal, VK4UMS via his web site VK4UMS@leeke.com.au for further details.

Big congratulations to Jayne, the wife of Peter, VK4EA who passed her regulations and theory exams for the upgrade to her full call last weekend. Jayne is the voice of the Redcliffe repeater and did extremely well in both papers. The club has now over a half a dozen members where both partners, spouses have their amateur call signs. Well Done Jayne!

Club members have also been advised that Kev, VK4UH will be part of the VK9NA expedition that is returning to Norfolk Island in January 2011. The focus is on all bands from 50 MHz to 10GHz. Kev said that the group will have the addition of 2 metre EME.

So it looks like an exciting VHF/UHF time in the January period and Club President David, VK4DC has also been busy by setting up a large 2 metre yagi to put out a big signal in the next few weeks. The 12 element beam will be driven with about 400 watts to make those contacts both south and east to VK3, Kiwi land and of course Norfolk Island.

Both John VK4YJB and Peter VK4EA will be setting up antennas for VHF and invite others who may be interested to join them for hopefully many contacts to all points south.

Another reminder about the club's Christmas party, that is to be held on Saturday 4 December at Jamieson Park, Scarborough.

Until next time 73 from Ray, VK4CF.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

Well another contest has been and gone. As reported last week TREC was active in Atherton for the Spring VHF/UHF field day.

Yes, band conditions were poor and yes the weather was lousy but that didn't stop TREC members from having an enjoyable time. We made over 174 contacts and put together a reasonable score given our location here in the Far North of the state.

Sadly the propagation was not there over the weekend but on Monday morning the bands picked up. That's the way of things I guess.

Still we have the Summer VHF/UHF field day to look forward to in January.

Planning is in hand for our annual break-up/Christmas party to be held in December, which looks like being another fun filled day.

This has been Dale VK4DMC and you are listening to the WIA news.

Miena Mayhem!

It's just about here!

Myenna Hamfest. This is the biggest event on the VK7 Ham Radio calendar and not to be missed.

The Ham Fest which is coordinated by the Central Highland Amateur Radio Club of Tasmania is set down for the 4th of December commencing at 10.00 am and will cost $5.00 dollars per person or family and goes towards the cost of running the event and will include free tea and coffee, soft drinks will also be available for sale, food will be on sale from approximately 11.00am and will include the famous Miena Saveloys and sauce together with hamburgers and sausages in bread all made from the finest local ingredients.

The location for this event is the well equipped Miena Community Hall that can be found in Haddon's Bay and is adjacent to the Ambulance and Fire Service building.

This modern venue is well equipped and despite what global warming throws at us (or those that believe global warming is for real) it is very comfortable.

The local wireless repeater will be monitored for everyone losing their way and its frequency is 438.500.

(sourced to vk7wi news)

HOME OF THE GOOD GUYS

Amateur Radio club makes donation to stricken centre.

Members of Grantham Amateur Radio Club handed the generous donation of £170 to a community centre which is trying to get back on its fee

I think I could easily go on record as saying although we hear of Radio Clubs receiving donations, this is arguably the first of a Radio Club helping their local community in such a tangible manner.

Well done the Good Guys (and gals) at Grantham.

A Facebook page has been launched to drum up support for fund-raising efforts. http://tinyurl.com/savethecentre

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Arrests follow Papuan clashes over ring tone

Indonesian police say they have arrested three men after two Melanesian tribes clashed with machetes and arrows over a mobile phone ring tone.

Hundreds of Wamena tribesmen descended on members of the Yoka tribe after learning that Yokas were sharing a ring tone which insulted Wamenas.

The ensuing clash reportedly left 23 houses burned to the ground, another 56 damaged and 12 vehicles set ablaze.

The situation calmed down after police arrested three men for allegedly composing the ring tone which had a reggae beat and offensive lyrics about the neighbouring Wamena tribe.

On line newspaper ARNnet are reporting on a study which suggests radiation from WiFi networks is harmful to trees, causing significant variations in growth, as well as bleeding and fissures in the bark.

The study in the Netherlands looked at the city of Alphen after officials found unexplained abnormalities on trees that couldn't be ascribed to a virus or bacterial infection.

The study exposed 20 ash trees to various radiation sources for a period of three months. Trees placed closest to the WiFi radio demonstrated a "lead-like shine" on their leaves that was caused by the dying of the upper and lower epidermis of the leaves. This would eventually result in the death of parts of the leaves.

The researchers urged that further studies were needed to confirm the current results and determine long-term effects of wireless radiation on trees.

The United States has revealed the details of a startling breakdown in cyber security in April when fifteen percent of the world's internet traffic was diverted through China.

For 18 minutes emails and internet material sent from the Pentagon and NASA was re-routed via Chinese servers. A US government report doesn't blame China for intentionally hacking into the system but experts say it's a sign of the security risks ahead.

This breach affects every country that is hooked into the Internet that communications that was re-routed includes that from the United States to third parties and so it's not simply American information that has been made vulnerable, but that of allies including Australia.

US Defence Secretary Robert Gates described potential attacks as a huge future threat and a considerable current threat.

==========

RSGB NEWS FROM G4NJH

Understanding LF and HF Propagation

RSGB Propagation Studies Committee members Steve, G0KYA and Alan, G3NYK have released a free e-book called Understanding LF and HF Propagation.

In 2008 and 2009, Steve and Alan wrote a series of features on LF and HF propagation for RadCom, consisting of a month-by-month look at each HF band in turn. They showed the reader the propagation modes behind each band and explaining some of the technicalities of ionospheric propagation.

The RSGB has allowed the PSC to put them together into a single document, which is now freely available for amateurs worldwide to download. You can download your free copy of Understanding LF and HF Propagation at g0kya.blogspot.com.

==========

NEWS FROM ARNEWSLINE

HAM RADIO IN SPACE: FM SIMPLEX DAMAGING SPACE COMMUNICATIONS

FM operators are once again being asked to not use 145.8 to 146.0 MHz for terrestrial, point to point casual communications. This is because such operations are devastating to weak signal ground to space and space to ground satellite operations. Take a listen:

Actual QSO audio.

That's from the FM interference on HO-68 uplink as recorded by OZ9AEC on November 9th. Two FM stations can be heard speaking in Russian. The one

speaker is barely audible in the noise but the stronger one holds the potential of capturing the HO-68 receiver and blocking weak signal operations using CW, SSB band narrowband digital modes.

OZ9AEC has posted the full QSO between these stations operating on the HO-68 uplink to YouTube dot com.

It very graphically illustrates the problem that operating FM simplex operation on 145.8 to 146 and 435 to 438 MHz can cause for ham radio satellite operations.

It can be heard at tinyurl.com/35yqkhl

ROLE REVERSAL: OPPONENT OF HAM TOWERS SEEKS HELP FROM THE ARRL

In a total role reversal, a group of not-so-nearby neighbours trying to stop a Tivoli, Illinois ham from erecting eleven towers on his property say that they will appeal to the ARRL for help. This after being denied a chance to officially offer arguments against a proposed cluster of ham radio towers on private property in rural Tivoli Township.

The Peoria County Planning and Zoning Commission approved the permit request by Craig Thompson, K9CT, in July for 11 towers that range in height from 30 feet to 195 feet on property he owns. Opponents of the towers are now searching for ways to slow or stop construction that already is under way.

John Martin is the nearest neighbour of the property that's situated among the rolling farm fields and woodlands south of Tivoli. He tells the local newspaper that there is likely little that people in the area can do to stop construction. He then goes on to say that those opposed to the towers are trying to form a grassroots organization to let the American Radio Relay League know their position and get them to agree that what Thompson plans to do is excessive. Martin adds that his hope is to convince the ARRL to show Thompson that it is in his best interest to scale back his plans.

But Martin has also taken his opposition to the towers to the local community. He has posted flyers and bought space in the local weekly shopper newsletter that includes a photograph of a cluster of towers and the caption "Stop this from happening in your town!"

Thompson's attorney is Fred Hopengarten, K1VR, of Massachusetts. He is an expert in telecommunications law and helped convince the state's attorney office that the county zoning law was trumped by Federal Communications Commission mandate that allowed for construction of ham radio towers. Hopengarten and Thompson and both say that the flyers are an exaggeration.

So far there has been no word from the ARRL if it has received a request from Martin to assist in stopping construction of Thompson's tower farm in rural Tivoli, Illinois.

G5HF - WW2 UK COUNTERSPY

Harry Heap G5HF's story as a World War 2 Voluntary Radio Interceptor has now been told by the Essex Chronicle newspaper.

Heap was first licensed in 1932 as 2BZZ. He was issued the callsign G5HF in 1933. Following the outbreak of war he moved to Chelmsford where during the day he worked at Crompton on devices to neutralize magnetic mines and during the evenings worked as a Voluntary Radio Interceptor listening in to secret Nazi messages. The information he collected was passed to Bletchley Park for decoding.

Heap later became President of the Chelmsford Amateur Radio Society and retired from that role only a few weeks ago at the tender young age of 93.

You can read more about this ham radio World War 2 hero at tinyurl.com/23s86xe

CITIZEN BUYS POLICE INTERNET DOMAIN TO FIGHT RED LIGHT CAMERAS

And finally this week the story of how one citizen has taken communications with public officials to a new height. This, by purchasing the Internet domain name of the police department whose red light camera issued him a ticket.

We have more in this report:

Most of the time, if you or I get a speeding ticket we just grumble about it and pay the fine. Oh we can fight it in court but for most people those are the only two options.

However, after receiving a $90 speeding ticket in Bluff City, Tennessee, Brian McCrary discovered a third. It seems that the Bluff City Police Department had forgotten to renew its Internet domain name of bluffcitypd.com

It had expired so McCrary bought the domain for $80. He then posted his side of the story along with information about speed traps in Bluff City and the $250,000 per month the system was costing the town's 1,500 residents.

The police department had no idea their domain name had expired and that McCrary owned it. That was until October 8th when reporters started calling them to ask about it.

Bluff City Police Chief David Nelson said the city may approach McCrary about buying the domain back from him, but admits Chief Nelson, the city is not very optimistic that a deal can be made.

For the Amateur Radio Newsline, I'm Bruce Tennent, K6PZW, and trying to avoid the Red Light Cameras in Los Angeles.

McCrary says that his goal is to get enough attention to put pressure on the local government to remove the traffic enforcement cameras in Bluff City.

==========

WEIRD AND WONDERFUL

Shortwave radio frequency causes amnesia

Hello I'm Jim Linton VK3PC with another from the Weird 'N Wonderful File. Taking on the shape of an urban myth are stories of people suffering loss

of memory after tuning their radios to 6955 kHz.

Apparently this is where numbers stations exist, originally thought to be coded messages for spies but now there's a new theory that they are automatically generated, a key to the universe, existed since the earth began, and even Marconi heard them in his early experiments.

The fascination with the frequency and beliefs now developing around it can be traced to a science fiction show called Fringe in the United States which has dramatically promoted the fanciful 6955 phenomenon.

The story goes that 15 people suffered amnesia after listening to the same frequency. They suffered some kind of convulsion and their memories were wiped.

So is there a moral or warning in all this for radio amateurs. Yes, stay without our band limits, and don't be tempted to sandbag beyond the lower edge of the 40m band, just in case.

(Jim Linton VK3PC)

WIA NATIONAL NEWS - THE WRITTEN WORD
Ham Radio Fair in Lisbon

The Association of Radioamadores of the Village of Moscavide are holding their Exposition Ham Fair in Lisbon today, November 28.

If you are in the region, make it along to one of the biggest events of Ham radio in Portugal

(A.R.V.M. arvm@arvm.org)

WIA NATIONAL NEWS - THE WRITTEN WORD

The Sun's missing spots

The CGC Communicator, a newsletter for broadcast engineering professionals in California, has published an article titled 'The Sun's missing spots'.

The 11-year solar sunspot cycle has been clicking along for decades. Then, all of a sudden, something that was not predicted happened. During the past few years, there have been very few sunspots. In fact, we have had 800 days with no sunspots and that has not happened in 300 years.

This could have profound implications for worldwide weather patterns to say nothing of HF radio propagation in the 3-30 MHz region.

Maunder Minimum is what that period 300 years ago was called and paintings from that era show wintry weather in areas where it's not typical, like carnivals held on frozen rivers and people playing on the ice. There are historical accounts of rivers in Europe frozen over, and civilizations almost perishing due to the harshness of winters....

http://tinyurl.com/MissingSunSpots-Part1
http://tinyurl.com/MissingSunSpots-Part2
http://en.wikipedia.org/wiki/Maunder_Minimum

Keep in mind that although sunspots have vanished for now, some experts still believe they will make a rapid and sudden return later in the current cycle. Only time will tell.

CGC Communicator website

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010-11

Dec 10 ARRL 2010 ARRL 10 Meter Contest 0000 U-T-C through Sunday evening December 12th at 2359 U-T-C.

Jan 15/16 WIA Summer VHF-UHF Field Day
Includes "Microwave Challenge", with special certificates to
be awarded to the participants on microwave bands.
John Martin VK3KM tac@wia.org.au

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

VK9NA Norfolk Island DXpedition 2011 7-21 January.

We made mention of this "return to Norfolk" in last weeks news and pointed out how the prime focus this time are the elusive microwave QSO's on 2.4 GHz thru 10 GHz back to VK and ZL.

Well don't despair because the team will again have 6 meters, 2 meters, 70 cm & 1296 MHz.

A team of serious microwavers, Colin Hutchesson VK5DK, Trevor Niven VK5NC and Les Janes VK5JL, will set up at Port Macquarie on the VK2 coastline. Because of the sizable distances involved and the finicky nature of the propagation, the WSJT digital modes will more than likely offer the best possible chance of success.

However, 2m, 70cm & 23cm via tropospheric ducting will be used as propagation indicators for the microwave bands.

(Jim Linton VK3PC)

CHATHAM ISLANDS, ZL7.

Active is ZL7VR till 30th November on the HF bands.

Also active as ZL7V in this weekends CQ WW CW contest.

QSL both calls to OH1VR.

Sierra Leone DXpedition

Members of the Voodoo Contest Group are operating as 9L5VT in this weekends
CQWW DX CW Contest (November 27-28th) as a Multi/2 entry.
QSL via LoTW or direct to G3SXW.

After the contest, operators will be signing as 9L7NS.
Look for operations to be on the lower bands, RTTY and 30/17/12 meters.

The Grand Prairie ARC (KF5CZR) will host a special event station for the
"World Championship Duck Calling Championship Contest."

"on air" Saturday November 26th from 10am Central USA time till 3pm Central
around 14.265 on 20 meters.

A colour qsl card if you send a self addressed stamped envelope.

grandprairiearc@yahoo.com

OPERATIONS APPROVED FOR DXCC CREDIT.
Uganda, 5X0CW, 2010
Angola, D2QV, 2010 operation.

AWARDS

ZS6BB ACHIEVES THE FIRST ZS WAGS AWARD FOR ALL 83 GRID SQUARES

Pierre van Deventer, ZS6BB, recently achieved the top ZS WAGS award with his
submission for all 83 grid squares on mixed bands and modes. Getting the last
grid square took him many months, and was only completed by a contact with a
Botswana station for KG25, a grid with a very small footprint in Southern Africa.

To achieve this award Pierre had to take full advantage of mobile stations for
many grids in which there are very few no resident amateurs, and included
contacts on SSB, CW, Satellite and even PSK31.

The ZS WAGS operating award was launched in early 2009. To date, a total of 35
hunters' awards have been issued, as well as 17 awards for stations that
activated rare grid squares.

The ZS WAGS award is operated by the Sandton Amateur Radio Club. For the rules
and complete records of all awards go to http://www.zs6stn.org.za/zswags/.

Radio Pretoria licensed after 17-year wait

Afrikaans station Radio Pretoria has finally been granted a five-year
broadcasting licence by the Independent Communications Authority of
South Africa (Icasa), after a 17-year wait.

"After a sustained battle of 17 years, Radio Pretoria (104.2 FM) has received its broadcasting licence," the station's media spokesman Henk Joubert said. "It is clearly written on the licence that the station will serve 'an Afrikaner, farmer-based community'," he said.

An Icasa spokesman confirmed the station had been granted a licence. It had been broadcasting on temporary licences for nearly two decades. Joubert said the station had an audience of up to 750 000.

MEDIA WATCH
www.wiaq.com/admin/uploads/weeklytally.rtf
www.cq-amateur-radio.com/WorldRadio.html

Now for a look at some of the contents of Amateur Radio magazine for December.

There's a report on WICEN Tasmania (South) providing communications for the inaugural Hobart 'Run the bridge' with 14-hundred running and walking competitors.

In doing so WICEN won praise for its contribution while showing the flag for amateur radio emergency communications.

There's no shortage of technical articles this month:

A matching-system for two 23-centimetre antennas is explained in detail. That article is based on the recent experience of Peter Cossins VK3BFG in setting up the digitised Melbourne television repeater VK3RTV.

Roderick Wall VK3YC describes how to build a 150 watt RF dummy load using a terminator chip.

A simple method of separate the centre conductor and braid of coax cable is described by Hank Prunckham VK5JAZ.

In Foundation Corner the topic is 'Homebrewing without a headache' by Geoff Emery VK4ZPP and Ross Pittard VK3CE. And following on that theme is Jim Tregallis VK5JST who presents ideas on doing 'Metal work at home'.

Amateur Radio magazine, a WIA membership service with copies also available at selected newsagents.

April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

Telecom NZ has gifted its now-surplus radio antenna to the Auckland University of Technology, to be converted into a radio telescope.

AUT has been granted a license to operate the Warkworth 2 antenna, located near Auckland, as what will become New Zealand's largest radio telescope.

It will be used by the university's Institute for Radio Astronomy and Space Research to help study star formation, the centre of the Milky Way and gaseous galactic objects.

The dish had until now been used by Telecom NZ to send and receive satellite communications, including phone calls, data, internet traffic and TV content.

Five new Amateur Radio Satellites in orbit

FASTRAC-1, FASTRAC-2, NanoSail-D2, O/OREOS and RAX were launched last week Nov 20, and reports of signals are needed.

So far signals have been reported only from
FASTRAC-2 (Emma), O/ORES and RAX.

Nominal Frequencies:

- FASTRAC-1 "Sara Lily" 437.345 MHz FM AX.25 1200bps

- FASTRAC-2 "Emma" 145.825 MHz FM AX.25 1200bps

- RAX-1 437.505 MHz

- O/OREOS 437.305 MHz

- Nanosail D2 0.5 sec beacon every 5 sec on 437.275 MHz.

Amateur Radio Newsline(tm) Report 1737 - November 26 2010

Amateur Radio Newsline report number 1737 with a release date of
Friday, November 26th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Five new ham radio satellites are now in
space. We have their story. Also, Internet connected ham radio is
found to be legal in New Zealand, Skywarn Recognition Day is December
4th and a new form of diode could revolutionize the future of
electronic design. Find out the details on this Thanksgiving week 2010
Amateur Radio Newsline(tm) report number 1737 coming your way right
now. (Billboard Cart Here)

HAM RADIO IN SPACE: NEW HAMSATS ARE ON ORBIT

A cluster of new ham radio satellites are now on-orbit. Amateur Radio
Newslines Norm Seeley, KI7UP, has the latest on these new birds:

--

Five new satellites are on-orbit. Four are of interest to ham radio
and one has already been heard. Take a listen:

--
RAX Audio Here

--

That was RAX-1 as it was heard on 437.505 MHz as it flew over Hawaii on
Saturday, November 20th at about 06:00 local time. The bursts of
static you hear between the band noise is the 9600 baud RAX-1
transmitter.

But RAX was not alone when it was launched into space at 01:24 UT on
Nov 20th. The other for birds are FASTRAC-1 "Sara Lily" transmitting
on 437.345 MHz FM using the AX.25 packet protocol at 1200 bits per
second.

Then there is FASTRAC-2 "Emma" is its 2 meter counterpart downlinking
on 145.825 MHz with the same mode and protocol as FASTRAC-1.

Next up is O/OREOS is 437.305 MHz.

Last but by no means least is Nanosail D2 that transmits a half second
beacon beacon every 5 sec on 437.275 MHz.

All of these new birds were sent to orbit on-board a Minotaur-4 launch vehicle from the Kodiak Launch Complex in Alaska. All of the the satellites are in a 400 mile high circular orbit.

And less we forget, some of these new ham radio satellites has its own web page. You will find links to each on in this weeks printed Amateur Radio Newsline report.

With thanks to Ron Hashiro, AH6RH, for providing the audio of RAX, I'm Norm Seeley, KI7UP, reporting on these new satellites from Scottsdale Arizona.

--

The web sites for the satellites are as follows:

FASTRAC Twitter http://www.twitter.com/fastracsats/ O/OREOS http://www.crestnrp.org

NanoSail-D2 http://nanosaild.engr.scu.edu/dashboard.htm

More on the new satellites in future Amateur Radio Newsline reports. (AMSAT, AH6RH)

**

RADIO RULES: INTERNET CONNECTED HAM RADIO LEGAL IN ZL

Some good news for hams in New Zealand. The government regulatory agency has completed is review of Internet connect ham radio systems and has concluded that no changes are required to the current Amateur General User Radio License conditions to accommodate amateur radio modes such as APRS, IRLP, D-Link, and the like.

According to a government release, normal New Zealand repeater licensing procedures will continue to apply to those circumstances where frequency coordination is required and/or the internet-connected device is located at a site belonging to a non-amateur third party. Also, in operating Internet connected systems, New Zealand amateurs need to be aware of the provisions of the Amateur General User License as well as Regulation 25.2 of the International Radio Regulations The latter says that transmission between amateur stations of different countries shall be limited to communications incidental to the purposes of the amateur service. (NZART)

**

RESCUE RADIO: NEW WORKING AGREEMENT SIGNED BETWEEN RSGB AND RAEN

A new agreement between the Radio Society of Great Britain and the Radio Amateurs Emergency Network will improve emergency response in the

U-K. Jeremy Boot, G4NJH, is here with the details:

--

The Radio Amateurs' Emergency Network, the UK's principal organization of volunteers providing radio communications in time of need, and the Radio Society of Great Britain (RSGB), the UK's national society for Amateur Radio, are pleased to announce the signing of a formal agreement between the two organizations providing a framework to progress the closer working relationship between them.

The Network Chairman, Cathy Clark, said "I am delighted to sign this agreement, which promises to bring the two organizations closer together for the benefit of our members and the service they provide to our many User Services."

RSGB President Dave Wilson, said "I would like to thank all those who've been working behind the scenes on what was undoubtedly not an easy task to get us to the position we are today."

The signing of this agreement cements on-going co-operation between the two organizations. Joint working will continue to ensure the smooth implementation of the Principles of Co operation described in the agreement.

I'm Jeremy Boot, G4NJH.

--

The agreement, which had unanimous acceptance by both the RSGB Board and the Network's Committee of Management, was signed on Saturday 20th November 2010 during the RSGB Spectrum Forum meeting in which all parties consider frequency planning and usage issues. (GB2RS)

**

RADIO RULES: IC SUGGESTS CANADIAN HAMS CAN HELP ELECTRICAL INDUSTRY LOCATE INTERFERENCE

Canadian hams could be called upon by that nations power industry to help find sources of interference emanating from power lines and associated devices.

At a November 2nd meeting between the Canadian Electricity Association and telecommunications regulator Industry Canada, the subject of the power industry properly controlling interference from its generators, power transmission line or annularly gear was discussed. Such interference is governed under an Industry Canada document titled Interference Causing Equipment Standards number 004.

Canadian Electricity Association representatives indicated that front line electrical utility workers may not be familiar with the requirements of the document. They also noted that many utilities may not always have the expertise available to locate sources of electrical

interference

In response, Industry Canada pointed out to Canadian Electricity Association that radio amateurs can be an invaluable resource in these cases. This is because hams may have skills that could be used to help identify interference sources.

The interference discussion with the Canadian Electricity Association was the result of a meeting last October 28th of the Canadian Amateur Radio Advisory Board. This is a joint Radio Amateur of Canada and Industry Canada consultation body which meets to discuss matters of mutual concern. (RAC)

RESCUE RADIO: NC HAM ASKS HELP IN LOCATING MISSING 14 YEAR OLD DAUGHTER

The 14 year old daughter of David Westphalen, KJ4ENS has gone and he is asking hams nationwide to be on the lookout for her. Tabatha Marie Self was last seen in the Delway area of Sampson County, North Carolina on Thursday November 11th. She stands about 5 foot 5 inches tall, weighs about 140 lbs, has blue green eyes and multi colored red, blonde and brown hair that she usually wears up most of the time. If you spot Tabatha Marie Self, please call Sergeant Sanchez at the Sampson County, North Carolina Sheriff's Department at area code 910-592-4141. Photos of Tabatha are on- line at tinyurl.com/22or3gp (QRZ.com)

**

ENFORCEMENT: MOVIE-MOVIE - NOT

Lots of enforcement action in the past few weeks, but none of it directly involving ham radio. In fact, a lot to do with the motion picture industry and all of it in California and a unit called the Modulus UHF wireless video assist device.

Able Cine Tech of Burbank, South Bay Film and Video Services of Redondo Beach and Wolf Seeberg Video of Marina del Rey, have all been issued a Citation for the alleged illegal marketing of the Modulus un-certificated radio frequency device.

The Modulus is a wireless unit designed to transmit composite video-in and retransmit it to a wireless video monitor and eliminating the need for hard wire coax cable between the two. (FCC)

**

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION TO HOBBY LOBBY INC.

The FCC has issued an Official Citation to Hobby Lobby International, Inc.. This, for marketing unauthorized radio frequency devices in the United States.

In a November 22nd release, the FCC said that it found that Hobby Lobby had been selling a product known as the JETI Duplex 2.4 GHz System for radiocontrolled models. These units, built in the Czech Republic had not been approved by the FCC for sale in the United States.

The FCC warned Hobby Lobby that future violations of its rules in this regard may subject the company to substantial monetary penalties, seizure of equipment, and criminal sanctions. It also gave the company the usual 30 days to file a reply to the citation. (FCC)

**

RESCUE RADIO: SKYWARN RECOGNITION DAY DECEMBER 4th

The 2010 SKYWARN Recognition Day event will take place Saturday, December 4th. Cosponsored by the National Weather Service and the ARRL, SKYWARN Recognition Day is the National Weather Service's way of expressing its appreciation to Amateur Radio operators for their commitment to keep communities safe. Over 100 National Weather Service regional offices will be participating in this year's event to recognize the community service of ham radio operators who volunteer to provide this vital severe weather watch service. (NWS, ARRL)

**

BROADBAND NEWS: COX CABLE LAUNCHES CELLULAR NETWORK

Cox Communications which is the nations thirdlargest cable company, is launching its new cellular telephone network in three scattered areas on Friday, November 26th.

Initially, the Cox cellular service we only be available in Orange County, California., Omaha, Nebraska and Hampton Roads, Virginia. These are cities where Cox is the local cable company but Cox plans to expand the network sometime in the future.

It is public record that Cox has spent $550 million to buy rights to use wireless spectrum in and around Atlanta, New Orleans, San Diego, and Las Vegas as well as much of Kansas and southern New Mexico. Those areas represent about 23 million potential wireless customers that the cable giant likely hopes to entice to join its service. (B&C)

**

THE SOCIAL SCENE: PRCARC HAMFEST DECEMBER 11 IN MISSISSIPPI

The Pearl River County Amateur Radio Club in Poplarville, Mississippi, holds is annual hamfest on Saturday, December 11th starting at 8 a.m.

local time. The venue is the National Guard Armory in Poplarville, and will feature commercial sales, VE testing, forums and much more. For information take your web browser to tinyurl.com/2592362 or e-mail Larry Wagoner to N5WLW (at) arrl dot net. (AE5DW)

**

NAMES IN THE NEWS: W1JNR TO SPEAK ON DECEMBER 6TH

Some names in the news. The Hartford Current newspaper reports that area hams, broadcasters and the public are invited to a slide show and talk by John Ramsey, W1JNR, chief technical officer of WCCC Radio and general manager of FM station WWUH. In his presentation, Ramsey will play memorable air checks and give his own recollections of outstanding radio events interspersed with slides of studios, transmitter towers and related sites.

By way of background, John Ramsey is chairman of the Society of Broadcast Engineers local chapter and webmaster of HartfordRadioHistory.com and Coldwar-ct.com. He is also president of Ramsey Communications Services a broadcast engineering consulting firm and also holds an Advanced Class Amateur Radio license as well as an FCC Radio Telephone First Class Commercial license. He started in broadcasting in1971 as a DJ and board operator at the former WEXT radio in West Hartford.

This free event is presented by Newington Amateur Radio League. More information is available at 860-667-2864. (NARL)

**

NAMES IN THE NEWS: 2004 YHOTY RECIPIENT KG4UIM ELECTED ARRL SOUTHEASTERN VICE DIRECTOR

And a word of congratulations to 2004 Amateur Radio Newsline Young Ham of the Year Andrea Hartlage, KG4IUM, of Grayson, Georgia. This, on her election as ARRL Vice Director Southeastern Division.

Andrea was declared the winner after garnering 3573 votes and ousting incumbent Jeff Beals, WA4AW, who garnered only 1615 votes. Beals was appointed Vice Director in June 2009 upon the death of Vice Director Sandy Donahue, W4RU.

At age 21, Hartlage is believed to be the youngest person ever elected to this high a position in the ARRL political structure. She is currently a student at Georgia Tech studying Aerospace Engineering with hopes of eventually joining the United States Astronaut Corps.

In the same election Brian Mileshowsky, N5ZGT, of Albuquerque, New Mexico, who was the 1997 Young Ham of the Year recipient was re-elected as Director of the League's Rocky Mountain Division for his second term.

A complete list of this falls ARRL election winners can be found at the Leagues website at www.arrl.org. (ARNewsline(tm), ARRL)

EMERGING TECHNOLOGY: NEW DIODES COULD REVOLUTIONIZE FUTURE ELECTRONICS

Researchers at Oregon State University have solved a fundamental problem in material science that has eluded researchers since the 1960s. One that could form the basis of a new approach in electronic designs.

The discovery, just reported online in the professional journal Advanced Materials, outlines the creation for the first time of a new high performance "metal-insulator-metal" diode. Creation of such a device could change modern electronics. This is because these so called next generation diodes previously made with other approaches always had poor yield and sub-standard performance.

As one of the basics of electronics, diodes are an important part in all future circuit designs. You can read more about this fascinating discovery is on-line at tinyurl.com/28tqqzm (Science OnLine)

**

ON THE AIR: XR33M CELEBRATES CHILEAN MINE RESCUE

On the air, word that members of the Radio Club de Copiapo are active through the end of December as XR33M. This in celebration of the rescue of 33 trapped miners near San Jose in Chile. The XR33M call will also be used during the CQ World Wide DX CW Contest the 27th and 28th of November, and the ARRL 10 Meter Contest on December. 11th and 12th.

On a historical note, club members offered their support to the rescue effort by providing communications in the desert region where the copper mine is located. That support enabled links to various authorities with emergency equipment inside the San Jose site and also with family and authorities in the City Of Copiapo. (Various)

**

DX

In DX word that G3PJT will be active stroke J6 from the northeast corner of St. Lucia between March 8th and the 15th. His activity will

be holiday style using an Elecraft K2 transceiver and vertical antennas. QSL direct to G3PTJ.

Bill Moore NC1L, the Awards Branch Manager at the ARRL has announced that two DXpeditions from earlier this year have been approved for DXCC credit. These are the 2010 5-X-ZeroC-W operation from Uganda and the 2010 D-2-Q-V operation from Angola.

RD3A will be active from Bonaire island as PJ4G during the ARRL DX CW Contest which runs from February 19th to the 20th. He will be a Single-Op All-Band HighPower entry. QSL via K4BAI.

N3QQ says that NL8F will join him on the DXpedition to Marshall Islands only a few weeks from now. Both operators will arrive on Majuroon November 30th and they will stay in V73-land until December 17th. The operators will operate from Enewetak Atoll where some of the equipment is already pre-positioned. More on this one is on line at www dot oc278 dot ucoz dot com.

OH1VR will be active from Chatham Island as ZL7VR through November 29th. His operation will be on all of the high frequency bands and will also include the CQ World Wide DX CW Contest on November 27th and 28th. QSL via OH1VR.

W2GD will operate P40W from Aruba through December 1st. He plans to join the World Wide DX CW Contest in the single Operator all band category with his focus on 160 meters and the WARC bands before and after the contest. QSL via Logbook of the World or direct to N2MM.

And lastly, the trio of VK3KH, VK4UH and VK3XPD are returning to Norfolk Island after

their inaugural VHF/UHF and

Microwave band DXpedition of last

summer. The dates for the next

outing are the 7th to the 21st of

January. The prime focus this time

is for those elusive microwave

QSO's on 2.4 GHz thru 10 GHz to

Australia and New Zealand. The

team will also carry gear for 6

meters, 2 meters, 70 cm and 1296

MHz. QSL as directed on the air.

(Above from various DX News Sources)

**

RADIO FROM SPACE: MARS HOPPER COULD REPLACE MARS ROVER And finally this week, word that researchers at the University of Leicester are developing a conceptual motor design for a Mars 'hopping' vehicle which should lead to a greater understanding of the 'Red Planet'.

The hopper can collect fuel between hops by compressing gas from the Martian atmosphere and can fly quickly between sites, powered by a longlife radioisotope power source. It could therefore study hundreds of locations over a lifetime of several years and continually radio its findings back to Earth.

The Leicester research is focused on

the rocket motor, looking at its size

and materials. A video illustrating

the concept is available on YouTube

at tinyurl.com/22ujspj

(SD)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, N3SL, NG3K & ADXO, N4AA & QRZ DX, KL7JR, K8GI, K8YSE, W8GEX (60m News), AT International, CO8TW, DF4SA, DL1SBF, DL7MAE & The DX News Letter, DX-World.Net, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, OH2BN, OH6BG, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RN3RQ, RSGB IOTA Web Site, SP5UAF, UA9CDV, VA3RJ & ICPO, VE8EV, VHF-DX-Portal (MMMonVHF), VK3PC and VU2PAI for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 20th-November, through Friday, 26th-November there were 231 countries active. Countries available: 3A, 3B8, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK2, ZL, ZL7, ZL8, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3B8, MAURITIUS. Jacques, F1BCS, will once again be active as 3B8/F1BCS from Mauritius (AF-049) between November 29th and December 17th. Activity will be on 20/17/15 meters using SSB, RTTY and PSK. He will be using an IC-7000 into a 3 element beam. QSL per operator's instructions.

3V, TUNISIA. Andrei, RA9CKQ, will be active as 3V3A during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power entry. Activity will only be during the contest and possibly a little before. QSL per operator's instructions.

4W6, TIMOR-LESTE. "DX-WORLD.NET" reports that Stuie, VK8NSB, is currently in the planning stages at the moment for a DXpedition to Timor-Leste (OC-232) in July 2011 (possibly for the IOTA Contest). He is inviting any interested amateurs in joining the DXpedition team by E-mailing him at: vk8nsb@hotmail.com

5Z, KENYA (Update). Sig, NV7E/ZS6SIG, who has now relocated from Pretoria, South Africa, to Nairobi, Kenya, is now signing 5Z4EE for the next four years. Sig originally had the 5Z4EE callsign back in the 1980s. Activity will be on all bands 160-10 meters. Look for Sig to be in the ARRL DX CW Contest (February 19-20th) and ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/High-Power entry. Please QSL via NV7E or at the address shown for 5Z4EE on QRZ.com.

5Z, KENYA. Nick, 5Z4LS (aka G3RWF), will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op entry and using a special callsign 5Z1N for the contest. QSL via his home callsign.

A7, QATAR (Update). Members of the Lufthansa Amateur Radio Club (LARC) in cooperation with the Qatar Amateur Radio Society (QARS - A71A) will be active as A71DLH from here between November 27th and December 3th. Activity will be on all bands using CW, SSB and the Digi modes. ADDED NOTE: If internet is available, the German team plans a live transmission from this DXpedition via the German ATV Repeater DB0DLH. You have the possibility to watch this transmission via live stream (a VLC Media Player required) at: http://www.d-atv.net/db0dlh.m3u

B7, CHINA. A Chinese team of operators will activate B7P from Foshan City (WW. Grid OL63NA), nearby Guangzhou City, during the CQWW DX CW Contest (November 27-28th) as a Multi-Single entry. Operators mentioned are Terry/BA7NQ (leader), JinQuan/BD7JC, Chow/BA7JK, Yang/BD7IXG, Paul/BA7JS, Wu/BA7IA and Junxiang/BD7IN. All QSLs will be sent via Bureu. For direct cards, please QSL via their manager BD7IXG.

CN, MOROCCO. Stefano, IK2QEI, will be active as CN3A from Safi during the CQWW DX CW Contest (November 27-28th) as a Single-Op entry. QSL via LoTW or via I2WIJ.

CO, CUBA. Look for the following Cuban stations to be active in the CQWW DX CW Contest (November 27-28th):
CO8LY - Operator Eduardo as a Single-Op/Single-Band (15m)/Low-Power.

QSL via EA7ADH.
CO8TW - Operator Juan as a Single-Op/All-Band/Low-Power. QSL via HB9SVT. An online log will be available after the contest at: http://www.qsl.net/co8tw

CR3, MADEIRA ISLANDS. Jose, CT1BOH, will be active as CR3E from Madeira Island (IOTA AF-014, Grid IM12JU, ITU Zone 36) during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band. QSL via W3HNK. Visit his contest page at: http://www.qsl.net/ct1boh/cr3e.htm

DX0, SPRATLY ISLANDS (Update - The Spratlys DXpedition gets wings!).
Jim Linton, VK3PC, Public Affairs for the DX0DX DXpedition, sent out the following press release on November 26th: "With just over 40 days to go before the month-long DX0DX DXpedition, comes news that the operators will now fly to Thitu (Pag-Asa) Island rather than taking a 30 hour plus trip by sea.
Team Leader, Chris Dimitrijevic, VK3FY & DU8/VK3FY, said while flying had been an option in early planning, when the boat that would have ferried the operators was damaged in heavy sea and needing substantial repairs, aviation transport to and from the island became available.
The charter of a twin-engined aircraft adds to the expense of the DXpedition and the personal costs for all taking part in it. Smaller sea transport will still be used to get equipment and supplies to the island.
The 37 operators from 15 countries are ready to arrive and take part in three teams to put DX0DX on air from 6 January to 1 February 2011, including the CQ World Wide 160m CW Contest. The special DX entity The Spratlys Islands (IOTA AS-051) will have a big presence on all bands.
Chris, VK3FY & DU8/VK3FY, said, 'There is a real excitement within the amateur radio community about this particular DXpedition, and most of the operators just can't wait to be part of action.
It is much more than activating a rare DX spot. There is no doctor or health service on the island. As part of a humanitarian contribution, two DXpedition members who are doctors, Josette Docherty/VK2FXGR and Edward Soriano/4F1OZ, will provide medical checks to the island's residents.'
It was announced today that Amateur Radio Victoria, VK3WI, had voted to make a substantial donation directly to purchase medical supplies for use as part of the humanitarian effort.
In other news, Chris Dimitrijevic, VK3FY & DU8/VK3FY, announced that for the 160m band DX0DX will have two 65 foot Top Hat phased verticals and a back-up Titanex V1602E antenna.
'The DXpedition will be doing its utmost to satisfy the demand for contacts on the Top Band, as demonstrated by it having the highest sought after rating in the DX0DX website online survey,' he said.
All equipment for the DXpedition will have arrived in The Philippines.
Earlier it was reported how eight HF Yagi antennas had been pre-assembled and tuned, ready for construction and erection on the island.
The Philippine Amateur Radio Association (PARA) has appointed DX0DX team member, Dindo Garcia, DV1UD, as the PARA liaison person to handle all Bureau of Customs requirements.

Thank you to the generous corporate sponsorship that makes the DXpedition possible by providing equipment and other needs, plus funding support from DX groups, clubs, and individual radio amateurs.
For more information about the DXpedition please check out the
www.dx0dx.net
website which has just been extensively updated."

EA6, BALEARIC ISLANDS. Juan, EA5BM, will be active as EA6FO during the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (15m) entry. Operation will be from formerly EA6IB QTH.

ED9, CEUTA & MELILLA. Operators Paul/DF4SA, Andreas/DL9USA and possibly some EAs will be active as ED9M from Ceuta during the CQWW DX CW Contest (November 27-28th) as a Multi-? entry. QSL via DL9USA.

ED9, CEUTA & MELILLA. Operators Jorge/EA9LZ, Zoli/HA1AG, Lacy/HA3NU, Andreas/DL9USA and Con/DF4SA will be active as ED9M during the CQWW DX CW Contest (Novemebr 27-28th) as a Multi/Single entry. The team arrived on Wednesday, and installed two fully equipped stations using 2 Spiderbeam Yagis for 20-10 meters, dipoles for 40 meters and a fiber-glass/wire verticals for 160/80 meters. They will install a 40m Mono-band Spiderbeam before the contest, and are looking forward to working everyone on all bands! QSL via HA1AG. They will confirm all QSOs auto-matically via the Bureau.

H4, SOLOMON ISLANDS. Shane, VK4KHZ, is expected to be active as H44DA and arrive in Honiara on Guadalcanal Island (OC-047), January 6th and depart on January 16th (2011). Activity will be holiday style primarily on 6 meters on a daily basis, subject to favourable conditions, but he will also do some activity on the HF bands as time permits. He will use a Yaesu FT847 with a 500 watt amp into a 3 element yagi for HF and 3 element yagi for 6m. QSL via VK4KHZ.

HI, DOMINICAN REPUBLIC. Operators Yukon John/KL7JR and XYL Claire/WL7MY will be active as HI3/KL7JR from Hispaniola Island (NA-096) between March and May in 2011. Activity will be on 80-10 meters SSB. QSL via info QRZ.com (CBA). E-mail for skeds at: kl7jr@yahoo.com
Antenna farm links: http://www.hamuniverse.com/kl7jrhorizminibeams.html
http://www.hamuniverse.com/kl7jrslopingdelta806.html

HS8, THAILAND. Voravut, HS8JYX, in southern Thailand, is planning to be in the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (15)/Low-Power entry. QSL via HS8JYX, LoTW or eQSL. Visit his Web page at: http://www.hs8jyx.com

IOTA DXPEDITION. The MS0INT group, which activated the Flannan Isles (EU-118) in June this year, is planning another operation for next year but will activate several islands this time between June 15-22nd. The team will once again be led by Col/MM0NDX. The other members of the team will include George/EA2TA, Christian/EA3NT, Vincent/F4BKV, Simon/IZ7ATN, Bjorn/SM0MDG and possibly two more operators. The islands to be activated are: Benbecula (EU-010), Grimsay (EU-010), Baleshare (EU-010),

North Uist (EU-010), Berneray (EU-010), St. Kilda (EU-059)and Monach Isles ((EU-111). Their plans could change quite suddenly due to weather and seas in the area. More details are available on the MS0INT Web page at: http://www.ms0int.com
A new Web page with the full details will be activated soon. QSL Manager will again be Tim, M0URX.

IOTA NEWS.....
AN-018. Mike, VP8DMH, hopes to be able to be active from the Fossil Bluff Base Station on Alexander Island early next year. This depends if he can fly out to visit for a while. If so, he will only be able to operate casually.

EU-012. (Update) Barring any weather or ferry problems, Chris, GM3WOJ/ ZL1CT, departs Wednesday morning, November 24th, for the Shetland Islands (GM) where he will be a Single-Op/All-Band/ High-Power entry in this week's CQWW. The callsign will be the rarely used GZ7V. Logs will be uploaded into LoTW, and that is the ONLY method of QSLing for this operation. No paper cards will be printed. Various Web sites listing N3SL as the QSL Manager are incorrect. For updates, check the Web page at: http://www.gm7v.com

NA-129. John, VE8EV, will be on Banks Island (Grid CQ71) between November 27-28th. He is expected to be active as VE8EV/p. He states,"I am not sure which satellite passes I will be on, but I will try to at least be on all the HO-68 (SSB) and AO-51 passes that favor North America and Europe." He will also be on the HF bands, mostly SSB and some activity in the CQWW DX CW Contest. QSL via his home callsign, direct, by the Bureau or LoTW. Watch for possible updates on his Blog page at: http://ve8ev.blogspot.com

OC-139. Operators Ben/VK5ZMM and Dirk/VK5AUQ will be active from Kangaroo Island between November 28th and December 1st. Activity will be modes SSB (VK5AUQ) and Digital (VK5ZMM). QSL both callsigns via PA2C. Look for cards to be printed after their operation in mid-December.

SA-008/
SA-091. After his activity on Riesco Island (SA-091) on November 26th, look for Jean-Pierre, F5AHO, to be active as LU/F5AHO from Ushuaia, Tierra del Fuego (SA-008), between December 2-5th. He may also activate two other IOTAs. Activity will be on 20 and 17 meters using SSB and PSK. QSL via F5AHO.

J6, ST. LUCIA. Guy, N7UN, one of "The "Buddies in the Caribbean" DXpedition group (see OPDX.984), will be active as J68UN between December 5-13th. Activity will be on the HF bands. QSL via his home callsign, direct or LoTW.

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (15m)/High-Power entry. He states, "USA please look long path 1300z". QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

KH6BZF PROPAGATION FORECAST/REPORT (For November 29-December 5th)....
Nov 29 AN SOLAR REFERENCE KEYS
Nov 30 AN-HN --------------------
Dec 1 AN BN - Below Normal
Dec 2 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 3 AN LN - Low Normal
Dec 4 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 5 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP3, PUERTO RICO. Felipe, NP4Z, will be active as KP3Z during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via N4AO.

NAQCC NEWS RELEASE (NAQCC - Lifetime membership is FREE!!): "Want to be part of the largest QRP CW club in the world? (4,800+ members from 85+ countries!) With winter coming up in the Northern Hemisphere, it's an ideal time to join the NAQCC and participate in its many varied activities. Perhaps you are looking for someone to "Elmer" you? Then we have just what you need to develop and improve your CW skills, including QRS nets perfect for the new CW op. Or maybe you would like to volunteer your time and become an 'Elmer' to help one of those fellow hams new to Morse code. And how about a Sprint or two thrown in for good measure? We have them too, for those of you who like a little friendly contesting. Our last 8 sprints have each garnered well over 100 logs from 150+ participants, making them among the most popular ever 2 hour sprints. Want something that lasts a little longer than a sprint? We have challenges that last a whole month with a different theme each month. Into awards? Our extensive awards program has something for everyone. Many of our sprints, challenges, awards, and other club activities involve handsome prizes donated by our members. Best of all, this and more can be yours at NO COST just by joining the NAQCC (North American QRP CW Club). Lifetime membership is FREE!! As different as we may be, we all share one thing in common, and that is our love for CW. Now is the time to get involved! Join our group that includes 'Big Gun' contesters, hard-core QRPers, experimenters, ragchewers and SWLers; young and old alike. We welcome all who want to help support CW and have at least some interest in using QRP from time-to-time. Help us on our mission to preserve and encourage CW activity on our amateur bands. Sign up today and help keep CW alive and well. Don't wait, do it now! Visit <http://home.windstream.net/yoel/> to sign up and receive your

FREE lifetime membership number and certificate......
On behalf of: Tom, WY3H - NAQCC President
John, K3WWP - NAQCC Vice President
Paul, KD2MX - NAQCC Recruitment Officer
Dave, VA3RJ/VE3JDR - NAQCC Publicity Officer"

NEW QSL ROUTE. Jack, RN3RQ, announces that he will be receiving all
the logs (since 2000) from Slava for UA2FL and R750Y. He is now the
QSL Manager for Slava and will have the full colored QSLs printed up
after the CQWW DX CW Contest.

VU2PAI ON LoTW. Pai, VU2PAI, informs OPDX that he has uploaded about
100,000 QSOs to the LoTW dating back from 1995. He states, "It is of
course not complete as I still have a lot of logs which are on paper
(especially from my IOTA activations to AS-096 and AS-161). I will try
and convert them into electronic logs, but it will be a time consuming
process!" Pai also mentions that he still has QSL cards for the following
activations: VU2PAI/c, AT0PAI, AT2PAI, VU2PAI/50, IOTA cards for St.
Marys Island (AS-096) and Sacrifice Rock Island (AS-161). He will be
happy to QSL any of these older contacts. However, he suggests, "Please
do not send green stamps or IRCs while sending QSL cards to me! IRCs
are fine, no problem at all in the regular mail, but mail with dollars
comes damaged or goes missing. Sending a QSL with green stamps must be
sent via registered mail only!!! But there is no need for that at all."

He states, "I would prefer is if you can stick 2 or 3 beautiful stamps on your envelope when you send your card to me. But please do not forget a Self Addressed Envelope or a address sticker along with your QSL card. I still like to collect paper QSL cards as I like the personal touch. I have also been a keen collector of postage stamps from round the world since I have been a school boy! I will of course be uploading future logs to LoTW when QSOs are logged into the electronic logs." If you have any quries, please send him an E-mail at: vu2pai@gmail.com

QSLS VIA LoTW: 5V7TT, CE4CT, CN3A, CX/N3BNA, DL1CLM, DL5DF, DL5IAH, DU1/F4BKV, F1MWV, F8BJI, FJ/SM5ENX, FJ/SM5FUG, FO8RZ, FP/KV1J, G0DBE, G0WRE, GM2V, GM4WZL, HB9BIN, HB9MEJ, HG7T, HH2/OH2TA, HK6K, J39BS, JA1BOQ, JA1BPA, JA1CLW, JA1CQK, JA1FJL, JA1GHH, JA1WPX, JA2IVK, JA2MOG, JA8BNP, JA8TGI, JE1FQV, JE2OVG, JH1FVE, JH7VHZ, JL1SAM, JN4MIV, JO1WKO, KL7/N0HJZ, KL7RA, LY2YR, OA4SS, OE6IMD, OE9MON, OH7MN, OK1WCF, OK5W, OL1C, OM4EX, OY6FRA, PA3CSG, PA3PCV, PC4U, PC5W, PW7T, PZ5RA, R1ANC, RA3CQ, RA7A, RU9UC, RV3LO, RW0CR, RW0LT, RZ3FW, SP5XOV, SP6CIK, SP9ODY, SV1BTK, SV1AVD, SV1GYG, SV1OZ, SX25JMO, TF3Y, UE3XFF/3, UU2JQ, UY5AA, V26B, VE1OP, VE1VOX, VE6PL, VK4KW, VK5NE, VP2MDG, VP5DX, VP5T, VU2PAI, XU7ADI, YJ0HA, YO2DFA, YO4CSL, YS1ZC, ZK2DL and ZM4T

QSLS RECEIVED VIA MAIL: 5J0BV, 5T5AZ, 5T5BV, 9M6DXX/P, 9M6XRO/P, A71EM, AL7A, IS0E, J3/AA8LL, JA1WPX, JA2AH, KH2/N2NL, OM5MF, PJ2/OH1VR, PJ4N, PJ5/AH6HY, M0URX, V47KP, VB1H, V44KAI, VK4KW, VK4LDX/P, VK4UC, XW1B and YL2BJ

QSLS RECEIVED VIA THE BUREAU: NONE Reported This Week!

RADIO ARCALA WILL AIR THEIR STATION NETWORK FOR CQWW CW! A press release by Jarmo, OH2BN, on November 23rd, states: "The 2010 CQWW CW will shortly be dominating the bands, only to prompt several OHs to leave their Northerly fireworks and head South. But at the same time, the fire is set at the home of OH8X, Radio Arcala, Northern Finland, right next to the Santa Claus Village in the spirit of Christmas. <www.santaclausvillage.info>
So, the mother OH8X will be operated by Pasi, OH6UM, while the Azores, CR2X will have Toni, OH2UA, at the helm, and the OH2BH station will be piloted by Ilkka, OH1WZ, all in the Single-Op, All-Band category. Traveling to Turkey, TC4X will be Pertti, OH2PM, for a Single-Band effort while Pekka/OH2TA, Juha/OH1ND and Martti/OH2BH will fire up OH0X, Aland Islands, for a Multi-Op, Single-TX entry.
Adding to the OH CQWW fun from these rare ones will be Olli, OH0XX, from Madagascar as 5R8WW, Marko/OH6DO/N5ZO from Ascension Island as ZD8O and Jorma/OH2KI from Gibraltar as ZB2X.
Radio Arcala and their associates are here to contribute to the premier contesting event of the year and offer you another round of exciting multipliers."
QSL routes are:
OH8X via OH2UA ZD8O via OH0XX
CR2X via OH2BH ZB2X via OH2KI
TC4X via OH2BH OH0X via OH2TA
5R8WW via OH0XX

T8, PALAU. Katsumi, JS1OHI, will be active as T88KO between January 1-2nd (2011). Activity will be on 40/17/15/6 meters SSB only. QSL via JS1OHI (JA stations: JARL Bureau or direct with SASE; DX stations: By the Bureau or direct with SASE + new IRC - NO USD). There will be NO e-QSL and LoTW. Direct address is: Katsumi Ochiai, 457-22 Shimoosaka, Kawagoe City, SAITAMA, 350-0812 JAPAN.

TM, FRANCE. Dominique, F5SJB, will be using the callsign TM5CW until December 6th. He will also participate in the CQWW DX CW Contest (November 27-28th). QSL via F5SJB direct or by the Bureau to receive a special QSL. This card counts for the CW award for the city of Lons le Saunier.

UU5, UKRAINE. Members of the Crimean Contest Club will be active as UU5A during the CQWW DX CW Contest (November 27-28th) as a Multi-? entry. QSL via LoTW or K2PF. Operators mentioned are: UU0A, UU2JQ, UU3JX, UU5DX, UU5JR and possibly others.

V7, MARSHALL ISLANDS (Update/IOTA Op). Operators Yuri/N3QQ and Tim/NL8F will be in the Marshall Islands between November 30th and December 16th. Both operators will arrive on Majuro (OC-029) on November 30th. They will stay in V73-land until December 17th. The operators will travel to Enewetak Atoll (OC-087) where some of the equipment has already been prepositioned. Activity from OC-087 will take place between December 5-16th. Look for some possible 160m operations from Enewetak Atoll. The duo will activate the uninhabited Ujelang Atoll (OC-278 - an IOTA new-one) sometime around December 9-12th, for 2-3 days. Activity will be on 40-6 meters using CW and SSB. Yuri's callsign will be V73QQ on Enewetak Atoll and V73RRC on Ujelang Atoll (OC-278). Tim, NL8F, will be active as V73CF from Enewetak Atoll (OC-087), Majuro Atoll (OC-029) and from Ujelang. QSL V73RRC and V73QQ via N7RO. QSL V73CF via K8NA. For updates/live GPS tracking, watch: http://www.oc-278.ucoz.com

VE, CANADA (Zone 2). Oleksiy, VE2XAA, will be active as VE2XAA/2 during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band entry. QSL via LoTW or VE2XAA.

VOACAP ONLINE (Update). Jari/OH6BG and the VOACAP Online team now offers coverage area predictions at: http://www.voacap.com/coverage.html
There is a new addition to the VOACAP Online HF prediction toolbox which has coverage area maps. The coverage area map service uses a familiar Google Maps interface with an added possibility to choose the TX QTH from a DXCC-type of a list of over 470 pre-defined locations all over the globe. Also entering a Maidenhead locator in the Name field and setting a coordinate point as the user's default TX location are supported. The result map shows the probability to achieve a CW QSO from a TX site to a grid of RX sites. The prediction is plotted on a map of equidistant cylindrical projection, together with the grayline terminator and the position of the Sun.
This service should be of particular interest to DXpeditions and contest operators who want to find the most suitable times of operation on different bands. If a more accurate HF prediction between two locations is needed, then VOACAP-based point-to-point predictions are available at: http://online.voacap.com

VP8, FALKAND ISLANDS. Look for VP8SCC to begin transmitting in Digital modes during December 2010. Activity is from the Falkland Islands Sea Cadet Corps unit. This is a young person's organization and is run with a nautical theme based on the traditions of the Royal Navy. The VP8SCC station is managed by John, VP8CWQ. QSL via: Falkland Islands Sea Cadet Corps, c/o PO Box 785, Stanley, FIQQ 1ZZ, Falkland Islands.

VP9, BERMUDA. Hans, SM3TLG, will be active as VP9/SM3TLG from Bermuda (NA-005) between December 1-5th. Details about bands/modes activity was not provided. QSL via his home callsign.

VU2, INDIA. Pai, VU2PAI, in Mangalore, will be active during the CQWW DX CW Contest (November 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via VU2PAI direct (QRZ.com address). Also, see note under "QSL INFO AND NEWS".

Z2, ZIMBABWE. Mirek, VK6DXI (aka SP5IXI, 9M8DX, 9V1XE etc.), will once again be in Zimbabwe and will active as Z21DXI. He will arrive in Bulawayo on December 6th and leave on December 17th. As was the case in February during his first visit, this time it's also a business trip. Mirek said that this time he will be busier than during his February visit, so the time for operation on bands will be very limited. But Mirek always tries to do his best to be active. QSL Z21DXI via SP5UAF, by the Bureau, direct or an E-mail request. All direct QSLs for the February Z21DXI activity are now answered on a daily basis. Cards via the Bureau are sent usualy twice a month.

ZD9, TRISTAN DA CUNHA (Update). Dieter, DJ2EH, is now active as ZD9T from Tristan da Cunha (AF-029) until December 8th. Activity will be on CW, SSB and RTTY on all bands. He is using a vertical for 160-30 meters and a 3 element wire beam. QSL via DJ2EH.

ZL8, KERMADEC ISLANDS (Update). The ZL8X group continues to be active from Raoul Island (OC-039) until December 5th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via DJ2MX. For updates: http://www.kermadec.de An online log search is now available for the ZL8X Kermadec DXpedition at: http://www.kermadec.de/service/online_log/index.php

---
The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 27-28th, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2010 CQWW DX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

GB2RS NEWS

Sunday 28th November 2010

The news headlines:

Hull man convicted of radio offences

RSGB Region 4 Election closes soon

RSGB Museum sale drawing to a close

A Hull resident was sentenced at Hull Crown Court on 22 November for causing deliberate interference to amateur radio users in the Hull region of Humberside between June and November 2009. The defendant was also convicted of unlawfully using radio equipment without a licence from Ofcom, which was installed in his van and driven around the region to interfere with legitimate users of the local amateur frequencies. He was sentenced to four months imprisonment suspended for 18 months, a curfew between 7pm and 7am for 3 months via a means of electronic tagging and forfeiture of his van and radio transmitters to Ofcom.

Commenting on the sentence, Paul Mercer, Head of enforcement at Ofcom, said: ``There are around 900 amateur radio users in and around the Hull area, who have been deliberately disrupted for more than four years. Ofcom is very pleased with this result, which will hopefully give these users some welcome relief, as well as sending a very strong signal to those that abuse the airwaves. This followed a dedicated investigation by Ofcom involving six enforcement officers working day and night to bring the culprit to court.''

Mr Sheldon, the Court Recorder commended Ofcom for the quality of the evidence that had been collated and the quality of file presented in court. RSGB General Manager Peter Kirby, G0TWW, said "RSGB volunteers co-operated closely with Ofcom in gathering evidence for this case. This conviction shows that deliberate interference will not be tolerated and can have serious consequences for the perpetrator."

RSGB members in Region 4 are reminded that their Regional Election closes at midday on Thursday 2 December when votes will be counted. Details of the candidates were published in the November RadCom and the results will appear online and in the January RadCom. You can vote online at www.votebyinternet.com/rsgb10, that's rsgb one zero. You will need your callsign and membership number to vote. Members may instead vote by post using the envelope that came with November's magazine.

The RSGB Museum Surplus Equipment Sale is set to continue for one more week. Auctions closing today include a Kenwood TS-950S and an Icom IC-2KL linear amplifier. The final sale, which will include some surprise items not previously disclosed, commences later this evening and finishes next Sunday. All the proceeds of the sale go to the National Radio Centre at Bletchley Park.

IARU Region 1 reports that the Spanish administration has authorised six stations to use the band 501-504kHz until 31 May 2011 with a bandwidth of 100Hz and a power of 5 watts.

Five research satellites were carried into orbit recently aboard a Minotaur V rocket from Alaska. All the satellites use amateur radio frequencies and amateurs have been invited to participate in their missions by monitoring and collecting data. The FASTRACs are two relatively small nanosatellites built by students at the University of Texas-Austin. They enter orbit as a single spacecraft, but then separate into FASTRAC 1, known as Sara Lily and FASTRAC 2, referred to as Emma. Both satellites use 1200 or 9600 baud AX.25 digital communication and transmit at 1W output, so they should be receivable with omnidirectional VHF or UHF antennas and decodable by ordinary packet radio hardware and software. Full details can be found on the news pages of the ARRL website.

GB3PF, the 70cm voice repeater near Blackburn in Lancashire on channel RB0 will shortly be closing down. It is with sadness that the North Western Repeater Group has had to make this decision. However, as the site owners, after many years of charging a nominal site fee for radio amateurs, suddenly decided to increase the site fee to more than ?6000 per annum. Funding continued operation from the same site is beyond the means of the small group of amateurs. If a suitable alternative site can be found within a few kilometres of the existing site at NGR SD707313, a site move may be possible. So, if you live on top of hill within a few kilometres of the Sunny Bower area of Blackburn and would not mind hosting a 70cm repeater, please contact Mark Walmsley, G0VOF via e-mail to mark@brownhill.demon.co.uk or on 01254 245 468.

The RSGB online survey of amateur radio will be collecting data for one more month. The online questionnaire will be available until midnight on 31 December. All those interested in radio communications within the UK are invited to participate. You don't have to fill it out in one session; you can store the questionnaire and return at a later time. You'll find the survey at www.rsgb.org/survey.

And now for the details of rallies and events for the coming week

The final rally of the year is the Bishop Auckland Radio Amateurs Club Rally that takes place today, 28 November, at the Spennymoor Leisure Centre, Co Durham DL16 6DB. There is plenty of car parking and talk-in is on S22. Doors open at 10.30am and admission is ?1.50, although accompanied under 14s are free. There will be trade stands and a Bring & Buy. Details from Mark, G0GFG, on 01388 745 353.

The first rally of 2011 will be on 16 January. The Red Rose Winter Rally will be held at the George H Carnall Leisure Centre, Kingsway Park, M41 7FJ. There is free car parking available and doors open at 11am. There will be trade stands, a Bring and Buy as well as an RSGB bookstall. Details from Steve on 07502 295 141.

Now for the news of special events

The second day of a weekend of operating GB4CHC by Crewe Heritage Centre ARC will take place today, 28 November. It's on the air to commemorate 50 Years of the Class 37 locomotive. For more info contact John, M0JCD on 01270 619034.

And now the HF DX news compiled from 425 DX News and other sources

A SOTA activation will take place from 3 to 5 December from the Akramitis mountain on the island of Rhodes. Using the callsign J45V, the Dodecanese DX Group will be using CW and SSB on as many bands as possible. The SOTA reference for the mountain is SV/AG-055.

Frank, EA8/DH5JG, will be active from Lanzarote until 3 December. Using mostly CW on the bands between 10 and 80m, with a preference for the WARC bands, he will also take part in the CQWW DX CW Contest that finishes at midnight tonight, Sunday 28 November. QSL via the bureau to his homecall.

Dieter, DJ2EH, is working as ZD9T from Tristan da Cunha until 8 December. QSL via his homecall.

A group of German amateurs will be active as ZL8X from Raoul Island, also known as Sunday Island until 5 December. More information is available at www.kermadec.de.

In celebration of the 50th anniversary of Independence of the Democratic Republic of Congo, a team of mostly Belgians and one Dutch will be active as 9Q50ON from the DRC from 3 to 12 December, all bands CW and SSB. QSL via ON4BR.

Tony, IK1QBT and Emilio, IZ1GAR will be active as IH9/IK1QBT and IH9/IZIGAR from Pantelleria, which is IOTA reference AF-019, until 30 November. They will participate in the CQ WW DX CW Contest as IH9X on 80 metres and IH9R on 40 metres. QSL via their home calls.

Now the contest news

The CW leg of the CQWW contest finishes at midnight tonight, Sunday 28 November. Expect the CW segments of the HF contesting bands from 80m to 10m to be busy for the whole weekend, even the upper HF bands. Taking place from 0000 to 2350UTC, the exchange is signal report and Zone, with the UK being Zone 14.

30 November sees the 70MHz UK Activity Contest taking place between 2000 and 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The first event of December is the ARRL 160m contest, taking place on Friday 3rd to Sunday 5th. It is a slightly unusual event in that the duration is 42 hours. The good thing is that those 42 hours include two full nights, which is when there is likely to be propagation between Britain and North America. There are categories for single-op, QRP, low-power, high-power and multi-op. At one time you needed a pretty good 160m station to stand a chance of making a transatlantic QSO, but these days people with modest setups often find themselves able to work the big boys over there, who have excellent receiving systems. Even so, trying to work across the pond on 160m QRP is quite a challenge.

The 144MHz Affiliated Societies Contest takes place on Sunday 5 December. It's the first of the new Super League series. If you operate as a member of a club in an AFS event there's no need to be a member of RSGB, although the club must be affiliated. However, if you partake as an individual, you do need to be a member, although check logs from non members are always welcome. There's a limit of five members per team, but active and ambitious clubs are welcome to field multiple teams. The contest takes place between 0900 and 1700UTC and the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 15th to the 21st of November, compiled by Neil Clarke, G0CAS on the 22nd of November

First this week, the latest smoothed sunspot numbers for February, March and April 2010, which are 10.6, 12.3 and 14.0 respectively.

The solar disc had several sunspot groups visible every day. One of these groups produced a C class solar flare on the 15th. Otherwise, solar activity was at very low levels. Solar flux levels declined from 92 units on the 16th to 78 by the 21st. The average was 86. The 90 day solar flux average remains at the same level as last week at 81 units. As the small active region rotated out of view, X-ray flux levels declined from B1.6 units on the 15th and the 16th to A7.1 by the 21st. The average was B1.1 units. Despite a small coronal hole disturbance at the start of the period, geomagnetic activity was quiet every day with the Ap index in single figures everyday. The average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline 700 kilometres per second on the 15th to 330 by the 19th. Particle densities were low every day. On the 19th and the 20th densities were below 1 particle per cubic centimetre. Bz never varied more than minus and plus 6 nanoTeslas throughout the period.

And now the solar forecast. Looking back over the last six solar rotations when this side of the Sun is looking towards Earth it has produced at least C class solar flares and, on occasions, M class flares. Even though this does not guarantee more of the same for this week, the signs are there. Solar activity is expected to be at low levels on some days. Solar flux levels should be in the 80s for most of the week. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to India should have a maximum usable frequency with a

50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 0900 and 1300 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

M0OCT Amateur Radio Society is holding an Advanced exam next year close to Chesterfield and places are still available for external candidates. Applications will be accepted up to 10 January 2011. Contact Steve, G6IBQ on 01246 205072 for more information.

On Monday 29 November Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 29 November South Birmingham Radio Society is having an aerial working party. Contact Don, on 0121 458 1603.

On Tuesday 30 November Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 1 December Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 1 December Midland Amateur Radio Society is on the air in the shack and running training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 1 December South Birmingham Radio Society is having an open meeting, ragchew and planning the Christmas party. Contact Don, on 0121 458 1603.

On Wednesday 1 December Telford & District Amateur Radio Society is having a committee meeting. HQ is closed. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 2 December Salop Amateur Radio Society is having a mini talk on frequency standards and a calibration night for radios with Ken, G8DIR & Richard, G3VZG. Details on the club website at www.salop-ars.org.uk.

On Thursday 2 December South Birmingham Radio Society continues its Foundation training classes with Dave, G8OWL. Contact Don, on 0121 458 1603.

On Friday 3 December Coventry Amateur Radio Society is having a talk by the Projected Picture Trust. Contact John, G8SEQ, on 07958 777363.

On Friday 3 December Nunsfield House Amateur Radio Group is holding a junk sale. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 3 December South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 4 December Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 29 November Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 29 November Macclesfield & District Radio Society is having a film night. More information from Roger Bell, M0GMG, on 0771 258 9163.

On Monday 29 November Scarborough Amateur Radio Society is having a talk by G0WHO on constructing the Elecraft K2 transceiver. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 29 November South Manchester Radio and Computer Club is having its monthly technical forum and invites members to bring along their projects and problems. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 29 November Thornton Cleveleys Amateur Radio Society is having a talk by Colin, G0EPY, entitled My Darker Side. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Tuesday 30 November Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Tuesday 30 November Halifax & District Amateur Radio Society continues its Foundation and Intermediate Licence training, and looks at the continuing development of PSK31 interfaces, using the club's rig on the air and Morse practice. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 1 December Hornsea Amateur Radio Club is holding its AGM. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 1 December Maltby & District Amateur Radio Society is having a talk by Keith, G1PQW, entitled Morse's Code - or was it? Contact Keith, G1PQW, on 07701 156 678.

On Wednesday 1 December Mid-Cheshire Amateur Radio Society is holding a committee meeting. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 2 December Ripon & District Amateur Radio Society is having a discussion on the perfect shack toys for Christmas. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 2 December South Manchester Radio and Computer Club is having a talk on heterodyne frequency meters by Ged, G8RSI. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 3 December East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

Mid Ulster Amateur Radio Club will be running a 12 week Intermediate course from January 2011. It is essential that any interested persons register on Wednesday 15 December 2010 between 7pm and 8.30pm. More information can be found on the club website, www.muarc.com or by contacting the exam secretary, Martin, MI0YMF, on 02838 348451.

On Monday 29 November Greenisland Electronics Amateur Radio Society is having a talk on EMC, PLA and PLT. Details from MI5JYK, by e-mail to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND

On Tuesday 30 November Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 1 December Paisley YMCA Amateur Radio Club is having a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 1 December West of Scotland Amateur Radio Society is working on construction projects and licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 2 December Aberdeen Amateur Radio Society is holding a junk sale. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 3 December Cockenzie & Port Seton Amateur Radio Club a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 3 December West of Scotland Amateur Radio Society is having presentations, guest speakers, a raffle & quiz. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 28 November Bittern DX Group commences its Foundation course. Details from Linda, G0AJJ, on 01692 404154.

On Tuesday 30 November Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 30 November Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 1 December Chesham & District Amateur Radio Society is having a general meeting and planning for the AFS Contest. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 1 December Havering & District Amateur Radio Club awards its Constructors Cup 2010. Contact John, M0UKD, on 07817 365354.

On Wednesday 1 December Norfolk Amateur Radio Club is having a talk on basic aerial theory, use and practice by Pat Gowen, G3IOR. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 1 December Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Wednesday 1 December Worthing & District Amateur Radio Club has its annual what-is-it quiz by Peter, G8MSQ. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 2 December Cray Valley Radio Society is having a look back at CVRS special events M2000A, GB50 and GB200T by Bob, M0MCV and Dave, G4BUO. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 2 December Horsham Amateur Radio Club is holding its AGM. Details are on the web at www.harc.org.uk.

On Thursday 2 December Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 2 December Verulam Amateur Radio Club is having an informal social at the Queens Head, Sandridge. Details from Ralph, on 01923 265572.

On Friday 3 December Cambridge & District Amateur Radio Club is having a talk on the vibration of aerials by Arthur, G3BMI. Details from Lawrence Micallef, M0LCM, on 07941 972724.

On Friday 3 December Crystal Palace Radio and Electronics Club is having a seasonal evening on the air. Contact Bob, G3OOU, on 01737 552 170.

On Friday 3 December Loughton & Epping Forest Amateur Radio Society has its Christmas buffet and bring & buy table top sale. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 3 December Mid-Sussex Amateur Radio Society Club is having its Christmas dinner. Contact Peter, G4AKG, on 01444 239371.

On Friday 3 December Radio Society of Harrow is holding its Construction Contest. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 3 December Reading & District Amateur Radio Club has its annual Dinner. Places should be booked with Vin, G4JTR. Details from Pete, G8FRC, on 01189 695 697.

On Friday 3 December Wey Valley Amateur Radio Group is having a talk on Australia, food, antennas and crocodiles by David Jefferies. Details on

the web at www.weyvalleyarg.org.uk.

On Saturday 4 December Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Saturday 4 December Cambridge & District Amateur Radio Club Training weekend Foxton. Details from Lawrence Micallef, M0LCM, on 07941 972724.

On Saturday 4 December Chelmsford Amateur Radio Society CARS Christmas Lunch at The Glades Restaurant. Contact Martyn, G1EFL, on 01245 469 008.

On Saturday 4 December Horsham Amateur Radio Club Christmas Dinner. Details are on the web at www.harc.org.uk.

On Sunday 5 December Bittern DX Group continues its Foundation course. Details from Linda, G0AJJ, on 01692 404154.

NEWS FOR THE SOUTH WEST

On Monday 29 November Bristol RSGB Group is having a talk on the air interface of cellular phones by Matt Besant, G4RKY. Details from Robin, G3TKF, on 01225 420442.

On Tuesday 30 November West Devon Radio Club is having a talk on radio maintenance and repair by Jules Cuddy, M1AGY. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 1 December Cornish Radio Amateur Club has its Christmas party. Details from Steve, G7VOH, on 01209 844939.

SARL NEWS - SUNDAY 28 NOVEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

SARL TO TABLE DRAFT BAND PLAN

DOES AMATEUR RADIO NEED INNOVATION?

NOMINATIONS FOR AMATEUR AWARDS INVITED

MOBILE TV COMES TO SOUTH AFRICA

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL TO TABLE DRAFT BAND PLAN

Following discussions with ICASA at the quarterly liaison meeting, it was agreed that the SARL would table a band plan at the public hearing. This will overcome a potential problem that, when the old regulations are repealed and before the new regulations are gazetted, there is no agreed band plan until the new band plan is published in the Government Gazette.

The SARL has drafted a band plan in terms of the Table of Frequency Allocations that was gazetted earlier this year. No deviation from this is permissible. For instance, expansion of the 160 m band is a totally different suggestion and would first have to be agreed to by ICASA and then submitted as a change to the Table of Frequency Allocations, which then has to be approved by the Minister of Communication. Once the Table of Frequency Allocation has been changed, can the Amateur Radio Band plan be changed to allow for the expansion.

Increase in output power is another complex issue and may not carry the approval of the broader membership. It is suggested that members who believe that an increase in the output power limit on certain - or all bands - is required, are advised to prepare an item for discussion and a motivation therefore at the SARL's AGM. Such a document needs a proposer and seconder and should be submitted for inclusion in the AGM agenda before 31 January 2011.

The draft band plan can be downloaded from www.sarl.org.za. Click on ARMI and follow the links. Comments are invited and should be sent to armi@sarl.org.za before midnight today. The final document will be published on the web on Tuesday 30 November and presented to ICASA on 1 December.

DOES AMATEUR RADIO NEED INNOVATION?

Innovation is a much debated topic at both academic and industrial level. The question now arises that, if everyone around us is focusing on innovation, should we as radio amateurs not be doing the same? The question is, "Do we need innovation in Amateur Radio"? Join us on Intechnet on Sunday 5 December at 19:30, when we will debate the question of innovation in amateur radio.

NOMINATIONS FOR AMATEUR AWARDS INVITED

Members and clubs are invited to submit nominations to Council for the following SARL awards.

Honorary Life Membership - the SARL's highest honour.

Willie Wilson Gold Badge For the amateur that gave exceptional and meritorious service to the League.

Jack Twine Award To recognize qualities such as unselfishness, clean operating and a genuine interest in Amateur Radio and its affairs. This prestigious Award will be made to Amateurs who, in the opinion of their fellow amateurs and the League's Council, exemplify the qualities desirable in a Radio Amateur.

Arthur Hemsley 2 metre Trophy For a Radio Amateur for his/her individual achievements with transmissions in the 2 metre amateur band. This award is made for extraordinary performance on EME or modes such as tropospheric propagation. It is not for the longest distance worked but rather for persistence in achieving something special on 2 metres.

Barney Joel Trophy For any member of the SARL for the best performance during the year whilst working HF mobile. This award could be made for performance by an individual in rally or other public event communication etc.

Icom Excellence Award This award is bestowed annually on the amateur who through his/her activity in the Amateur Service has brought international recognition to South Africa by either the achievement of a VHF/UHF long distance record which is internationally recognized by the IARU, or by service to the Republic of South Africa or the SARL in

the field of scientific research using the amateur spectrum, or in promoting the amateur service internationally or as Council may determine from time to time.

Joseph White Plaque For any member of the SARL for exceptional achievements in the 432 MHz band during the past year. This is not awarded for the longest distance worked, but for all round achievements.

Bert Buckley Six metre Trophy For any radio amateur for his/her individual achievements with transmissions in the six metre amateur band. This award is not for the longest distance worked but for outstanding work or activity on six metres.

Clubs and individuals please submit your nominations as soon as possible to secretary@sarl.org.za.

MOBILE TV COMES TO SOUTH AFRICA

Mobile TV has arrived in South Africa with the launch of a broadcast network by Multichoice covering the main centres of South Africa. The fully digital TV network is aimed at cell phone and notebook users. Several phones on the market are already equipped to receive the new TV service that ultimately will support 15 channels. Currently there are seven channels on DSTV and two on ETV.

The system utilizes several high sites in each area in what is called a single frequency transmission system. Through a complex synchronization system each site complements the others. This means that you may be receiving signals from various sites but, unlike analogue systems, the signals do not interfere with each other but add-up to provide the best possible reception. A dongle called Drifta is available which allows the signal to be received on a notebook or non-mobile TV cell phone, facilitated by the Wi-Fi transmitter built into the dongle.

RADIO ZS ON THE WEB

The September/October edition of Radio ZS is available on the web. Several production delays have been experienced which caused further delays in printing. It should be in the mail soon.

In the edition there is an interesting range of interesting articles, such as: "enkele eksperimente met 'n 741"; creating a QSL card using MS PowerPoint; what does the term "ham spirit" really mean?; a Moxon-Yagi beam antenna for 15 and 20 m; Amateur Radio Satellite to be placed into space, and a universal PC/radio interface for digital operation. Download your copy now. If you are not a member of the SARL yet and would like a trial copy, send an email to armi@sarl.org.za with Radio ZS in the subject line.

The November/December edition will soon be ready for printing with an expected mailing date around mid December.

COMPETITION NEWS

RESULTS OF THE 2ND RaDAR CONTEST

Seventy three call signs were logged during the contest. Band conditions for long distance communication were not good. From logs received to date, most activity took place on 40 m as well as a few LEO FM satellite contacts and one PSK contact on 20 m. All ZS divisions were active. The rain and other circumstances made it difficult to be active for the full six hours. Darkness only set in towards the very end, much unlike the winter contest.

Only six logs were submitted and the results are as follows:

X1: All home stations using normal antennas and mains power: Theunis, ZS2EC, (QRP) 25 points;

X2: All home stations not relying on their normal antennas or mains power: No entry;

X3 : Portable operation i.e. away from a normal home station; not relying on mains power. (This includes all mobile stations.): Christo, ZR6LJK, (QRP) 75 points; Derek, ZS2J, (QRP) 66 points.

X4: True RaDAR portable operations not relying on existing antennas or mains power: No entry.

X5: True RaDAR portable operations, as above, and using QRP. Output power limited to 5 watt PEP. Stephen, ZS6SKY, (QRP) 125 points; Eddie, ZS6BNE, (QRP) 100 points; Pierre, ZS6BB, (QRP) 75 points.

Contacts were made using digital modes by Christo, ZR6LJK, and via Satellite by Eddie, ZS6BNE, and Stephen, ZS6SKY, which each scored a bonus 5 points for their first contact.

It appears that many participants enjoy taking part in this dynamic contest, more for the fun of it than for the competitive aspect. The scoring method has been revised for future contests and has been updated in the SARL "Blue book" (the Competition Manual).

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 127 remains quiet as it transits the northern hemisphere of the sun. A small new sunspot has rotated into view and could be numbered 1 128 soon. The effective sunspot number is expected to be less than 20 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoon conditions will be fair towards Europe on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible at sunset on 20 m. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS FOR THE WEEK

Today 28 November - YL net starts at 15:00 CAT on 145,750 MHz in the Pretoria area; 5 December - Intechnet at 19:30 - debate on innovation in amateur radio; 20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms; 30 January 2011 - Closing date for phase 1 of the construction competition.

SARL News invites clubs and individuals to submit terms of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN, and edited by Jannie, ZR6PHD.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 28th November 2010

CQ CQ calling news items

If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

DX Activity

Active DXers have had plenty to keep them occupied in recent times. A number of major DXpeditions are underway, also several groups preparing for the CQWW CW contest this weekend have been testing their equipment, while teams in the four new DXCC entities created following the breakup of the Netherlands Antilles have also been active.

One of the bigger DXpeditions on the air at present is the ZL8X group activating Kermadec Island, which is North of New Zealand. The group consisting of mainly German operators has been on the air since 19th November and is planning to continue the operation until early December. Many EI call signs are already in their log; topping the list at the time of writing is John EI7BA, with 7 QSOs, mostly CW.

Another operator has appeared from Tristan da Cunha with the call ZD9T. This is DJ2EH who will be there till 8th December. QSL info is via his home call in Germany.

A station to commemorate the 152nd anniversary of the birth of Sir Jagdish Chandra Bose who is known as 'the Father of Radio Communication' will be on the air from India until 5th December. The call is AU2JCB which will be of interest to prefix chasers as the normal prefix for India is VU.

The well-known DXer Sigi DL7DF will be QRV from Vietnam as XV4SP until 6th December. He is operating from Phu Quoc Island which counts as AS-128 for the IOTA Award. QSLs are via his home call.

Members of the Russian Robinson Club plan to operate from the Ujelang Atoll in the Marshall Islands probably during the period 7th to 12th December. The callsign will be V73RRC. QSL Manager for this one is N7RO.

Nick G3RWF who was active recently as 5Z4LS in Kenya will pay a short visit to Uganda in the coming week and will sign 5X1NH until 5th December.

Shannon Basin Radio Club

The Shannon Basin Radio Club will be holding its AGM on Friday 3rd December at 20.20.

The venue is Hannons Hotel Roscommon Town. All members are requested to attend and anybody wishing to join the club is more than welcome to turn up on the night.

For further information please contact Brian EI8IU on 0862514822 or any club member.

Rallies

Advance notice PHOENIX A.R.C. RADIO RALLY 2011

Phoenix Amateur Radio Club annual rally will be held on Sunday 20th February 2011 in the usual venue, Coolmine Community School, Blanchardstown.

Doors open for Traders at 9.00 am Doors open to public 11.00am Admission 5 Euros. To book tables contact Tony at 0872439997 or Tom at 01-8211043.

Plenty of Parking, Refreshments and Bring and Buy Sale. All usual traders will attend.

This is the First Rally of 2011 come, meet friends and enjoy it.

For further details on Rallies please see www.irts.ie/rallies

DX Special Bulletin No. 987.1
BID: $OPDX.987.1
November 28, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, N3QQ, K8YSE, and CX3ZAN for the following DX information.

IOTA SA-057 (Update). Just a reminder that members of the Uruguay DX Group and Centro Radioaficionados Montevideo will be active as CW3TD from Timoteo Dominguez Island between December 2-6th. Activity will be on 160-2 meters with an emphasis on the Digital modes. They plan to have 15 operators and four stations on the air. Carlos, SM0KCO, is the newest operator to join the team of Jorge/CX1SI, Gustavo/CX2AM, Jose/CX2AN, Oscar/CX2FR, Wilson/CX2RU, Francisco/CX3BV, Gustavo/CX3CE, Humberto/CX3AN, Luis/CX4AAJ, Julio/CX4AAE, Mario/CX4CR and Rainer/CX8FB. QSL via David, EB7DX.

IOTA OC-171 (Update). Craig/VK4LDX will be active as VK4LDX/p from Magnetic Island between December 10-12th. He states, "The focus will be SSB, I don't do CW, but I may do some RTTY and PSK31 if I'm not getting through on SSB. I'll be using a 40m dipole favoring North America, full size aluminium vertical dipole for 15m and the HF9V multiband vertical for 10, 15, 20 and 40m. So there's no need to worry about beam headings, it's all up to band choice and propagation." The operating schedule for his operation is now published on his Blog page at: http://vk4ldxoc171.blogspot.com QSL via his home callsign, by the Bureau or direct to: Craig Edwards, PO Box 487, Belgian Gardens, Queensland 4810, Australia. Diect QSLs, please send a SAE with 2 USDs or an IRC (VK operators - just send a SASE). He does not do eQSL or LoTW.

V7, MARSHALL ISLANDS (Update/IOTA Op). Just a reminder that Russian Robinson Club members Tim Tilleman/NL8F (V73CF) and Yuri Sushkin/N3QQ (V73QQ) are off to the Marshall Islands to activate three IOTAs including a new uninhabited island. Activity will be between November 30th and December 16th. Yuri has provided OPDX with the following updated tentative schedule:
Nov. 30th-Dec. 1st - Callsigns V73CF and V73QQ from Majuro Island (OC-029), in the Ratak Chain.
December 2-4th - Callsigns while traveling to Enewetak Atoll are

V73CF/mm and V73QQ/mm.
December 5-7th - Callsigns to be used on Enewetak Atoll (OC-087)
are V73CF and V73QQ.
December 8-11th - Callsign to be used on the uninhabited Ujelang Atoll
(OC-278, a new IOTA) is V73RRC.
December 12-16th - Callsigns to be used on Enewetak Atoll (OC-087)
are V73CF and V73QQ.

PLEASE NOTE: After Majuro all dates are subject to change due to
transportation availability and weather. Activity will be on 160-6
meters using CW and SSB. Their station equipment will consist of an
IC-7600 and IC-7000 and two Ameritron ALS-600S amplifiers. Antennas
will be full size vertical dipoles for 20/15/10m and 1/4 wave vertical
for 30/40/80/160m. QSL V73RRC and V73QQ via N7RO. QSL V73CF via K8NA.
For updates/live GPS tracking, watch: http://www.oc-278.ucoz.com
Yuri and Tim state, "We would like to thank Mike/K9AJ for vaccinations
and local customs information, Dick/N7RO for QSL management, Andy/RZ3EM
for maintaining of Website <www.OC-278.ucoz.com>, Yuri/UA9OBA for moral
support and guidance, Shu/JN6RZM for organizing the financial support
from Japan, IREF and all individual donors worldwide. No need to mail
QSL for donors, contacts will be confirmed direct, no postage is
necessary. All bureau cards will be confirmed via Bureau."

CY0 - SABLE ISLAND, NA-063
The DXpedition to Sable (NA-063) Island which has been well planned
and postponed for several times will take place from Dec 6-13 now.
The team includes Ron,CY0/AA4VK, Randy,CY0/N0TG, and Murray,CY0/WA4DAN.
Murray only takes part because the DXpedition has been postponed a few
times. They plan to work with three stations simultaneously on 160m-6m
in CW, SSB and RTTY. They will use a "Battle Creek Special" on 40m, 80m
and 160m but have also three verticals, at least one wire and a yagi.
All direct QSLs should be sent to N0TG, bureau QSLs via the homecalls.
They ask everybody to use the "Online QSL Request Service" (OQRS) on
the DXpedition website for direct- or bureau QSLs. Please click on
"How to QSL" at: http://www.CY0dxpedition.com
CY0 bandplan (QRGs in MHz):

J6 - ST LUCIA, NA-108
The group "Buddies in the Caribbean" successfully makes DXpeditions
```

with 100 watts or less and will do so again from St. Lucia (NA-108)
from Dec 5-13. The team (including Budd,W3FF, Guy,N7UN (J68UN),
Wey,K8EAB, Bill,W7ZT, Todd,N4LA, Kent,K4MK, Gary,NX8L, and Tom,W4OKW)
will be active as J68UN or J6/homecalls in CW, SSB and RTTY on 160m-10m
using special ultra light Buddipole portable antennas. They also plan
to take part in the ARRL 10m Contest on Dec 11/12 signing J6BP.
QSLs via LoTW, eQSL or direct to their homecalls.
The homepage of the expedition team can be found at:
http://sites.google.com/site/caribbeanbuddies

TP - COUNCIL OF EUROPE
The "Council of Europe Radioamateur Club" (TP2CE) will use the special
callsign TP60CE in all modes on all bands (including satellite) for the
last time on Dec 3, Dec 5 and Dec 8. QSL via F5LGF, also via bureau.
More information can be found at http://ewwa.free.fr

V7 - MARSHALL ISLANDS
Yuri,N3QQ, and Tim,NL8F, will activate several IOTA islands between
Nov 30 and Dec 16. They will be QRV in CW and SSB on 40m-6m as:
V73CF & V73QQ Nov 30-Dec 1 Majuro, Ratak chain, OC-029
V73CF/mm & V73QQ/mm Dec 2-Dec 4 enroute to Enewetak
V73CF & V73QQ Dec 5-Dec 7 Enewetak atoll, OC-087
V73RRC Dec 8-Dec 11 Ujelang atoll, OC-278 (new one)
V73CF & V73QQ Dec 12-Dec 16 Enewetak atoll, OC-087
QSL cards for V73RRC and V73QQ via N7RO, QSLs for V73CF via K8NA.
Find more information online at: http://www.oc-278.ucoz.com

VP8/A - ANTARCTICA, AN-016
Mika,OH2FFP, is member of the Finnish scientific team which will stay
at the Aboa station on Queen Maud Land during December and January.
He will be on the air as OJ1ABOA and will show up also from the Swedish
base "Wasa" and "Svea" during Xmas. QSL cards via his homecall.

VP8/F - FALKLAND ISLANDS, SA-002
VP8SCC will be activated in digital modes by British marine soldiers
in December. Responsible for the station is John,VP8CWQ.
QSL via: Falkland Islands Sea Cadet Corps, c/o PO Box 785, Stanley,
FIQQ 1ZZ, Falkland Islands.

VP8/SH - SOUTH SHETLAND ISLANDS, AN-010
A group of Italian students led by Prof. Julius Fabbri is starting an
expedition to the South Shetland Islands (AN-010) in December to honour
the Italian adventurer Renato Cepparo and his team who founded the
"Giacomo Bove Camp" (WAP ITA-02) 35 years ago. They will be active on
HF with the expedition call sign of Renato Cepparo I1SR.
More information and photos of the "Giacomo Bove Camp" can be found at:
http://www.waponline.it/NewsInformation/tabid/178/Default.aspx
General information at: http://www.adriantartica.it

VP9 - BERMUDA ISLANDS, NA-005
Hans,VP9/SM3TLG, is working in SSB and CW from Hamilton Parish (NA-005)
from Dec 1-5. QSL via bureau or direct to his homecall.

Z2 - ZIMBABWE
Mirek,VK6DXI, will be QRV as Z21DXI from Bulawayo from Dec 6-17. Since
this is a business trip he will have only little time for our hobby.
Please send your QSLs via SP5UAF.
OM Tom confirms QSL cards via bureau, direct or via e-mail request to
sp5uaf@sp5zcc.net

ZL7 - CHATHAM ISLANDS, OC-038
Hiro,JF1OCQ/W1VX/ZL1WY, will be active as ZL7A and ZL7/W1SY from the
Chatham Islands (OC-038) from Dec 2-9. Hiro will work in CW, SSB, RTTY,
PSK and FM on 160m-6m (with focus on 160m and 6m). He will have also
a beacon on 50.117 MHz.
QSL cards for ZL7A should be sent via JF1OCQ, for ZL7/W1SY via JE1SYN.
Find more information at: http://w1vx.net/pedition/zl7/2010ZL7.htm

3B8 - MAURITIUS, AF-049
Jacques,3B8/F1BCS, is working from Mauritius (AF-049) using an IC-7000
and a 3ele yagi in SSB/RTTY/PSK on 15m/17m/20m from Nov 29 till Dec 17.
QSL via F1BCS or via eQSL.

6W - SENEGAL
Mark,6W/AA1AC, is working from La Somone from Dec 1-7.
QSL cards should be sent via bureau or direct to his homecall.

9Q - DEMOCRATIC REPUBLIC OF CONGO
Patrick,ON4HIL, Theo,ON4ATW, Marc,ON6CC, Luc,ON4IA, Wim,ON4CIT, and
Ronald,PA3EWP, are going to hit the airwaves as 9Q50ON from Dec 3-13.
The number 50 in their callsign stands for 50 years of independence of
the Democratic Republic of Congo. Activities are planned in SSB and CW
on 160m-10m. The QSL manager ON4BR confirms via bureau or direct.
For more information visit their website at: http://www.9q50on.be

FRANCE, SPECIAL EVENT STATION
Dominique,F5SJB, is using the special callsign TM5CW until Dec 6.
QSL via bureau or direct to F5SJB.
The special QSL counts for the CW award of the city of Lons le Saunier.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Dec 3-5: ARRL 160m Contest
Dec 4: TARA RTTY Melee
Dec 4/5: TOPS Activity Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
NA-080, C6, Little Bahama Bank Group: Pete,K8PT, is working as C6APT from
Treasure Cay between Nov 27 and Dec 10. QSL via homecall.

NA-080, C6, Little Bahama Bank Group: Bob,C6AKQ (N4BP), Tim,C6ARU (N4UM), and Mike,C6AUM (K4RUM), are active from Freeport on Grand Bahama Island from Nov 30 until Dec 7. QSL via homecall.

OC-139, VK5, SA State East Centre Group: Ben,VK5ZMM, and Dirk,VK5AUQ, are activating Kangaroo Island from Nov 28 until Dec 1. Both QSLs via PA2C.

SA-008, LU, CE8, Tierra del Fuego: Jean-Pierre,LU/F5AHO, will show up from Ushuaia on Tierra del Fuego from Dec 2-5. QSL via homecall.

SA-057, CX, Colonia Department Group: Some HAMs of the "Uruguay DX Group" and the "Centro Radioaficionados Montevideo" will be QRV as CW3TD from Timoteo Dominguez Island from Dec 2-6. QSL direct via EB7DX.

RAC Bulletin 2010-035E - Important News About the RAC Insurance Program
2010-11-30

For several years the Radio Amateurs of Canada has been able to offer the RAC Insurance Program to its members and incorporated Affiliated Clubs on a cost recovery basis. This program provided liability insurance coverage for participating RAC Affiliated Clubs and their members as part of the Radio Amateurs of Canada master insurance policy. The RAC has been fortunate in being able to offer this coverage without change for some time. Nothing however is ever permanent in this world and insurance is no different.

Recently, the Insurance Broker who had been providing the insurance has informed the RAC that the Insurer will no longer be offering this type of insurance coverage. As a result, the RAC Insurance Team has been scouring the market on your behalf to obtain the best coverage and value that can be found. The Team has been successful and liability insurance will continue to be available for RAC Affiliated Clubs and their members. Details for 2011 coverage are being emailed separately to participating RAC Affiliated Clubs.

The RAC members of an Affiliated Club that participates in the RAC Insurance program will receive additional liability coverage for their personal, non Club related amateur radio station activities at no extra cost. Note that to be eligible for personal coverage, RAC members must also be a member of an Affiliated Club that participates in the RAC Insurance program. This is due to changes in insurance availability and requirements of the Insurer.

An exciting new addition to the RAC Insurance Program for 2011 is radio equipment loss/damage coverage. We will now be able to offer this coverage for RAC Affiliated clubs that are participating in the liability insurance program and RAC members in the Club. This insurance will be available at extremely competitive prices and provides loss/damage coverage for amateur radio equipment such as Club repeaters and stations.

Complete details of this new Insurance Program will be posted shortly on the RAC website at www.rac.ca. For further information or questions, please contact Jerry Beneteau, the RAC Insurance Manager, at ve3ext@primus.ca.

RAC Bulletin 2010-036 E Barry MacKenzie VE5TRF . New Section Manager
for Saskatchewan
2010-11-20

It is with great pleasure that I announce the appointment of Barry MacKenzie VE5TRF Section Manager for Saskatchewan effective immediately. Barry has a military background, and is currently active in Moose Jaw, Sask.
Barry is the current President of the Moose Jaw Amateur Radio Club, an accredited examiner as well as Club webmaster. I would like to thank Barry for taking on this important role, and thank him for his continued support of the Radio Amateurs of Canada.

Doug Mercer VO1DTM CEC
Vice President Field Services

Greetings All

As part of my effort to promote Ham Radio in ZL land, I publish a monthly newsletter.

Feel free to download Decembers Issue of ZL Ham Band Scope from the ZL Ham web site. Enter the URL below into your browser or ftp client.

ftp://zlham.geek.nz/Bandscope/bandscope-2010-3.pdf

Items of special interest to ZL radio hams are always welcome and of course overseas members are always welcome to join our little community down under.

```
****************************************
The ARES E-Letter

Published by the American Radio Relay League
****************************************

December 1, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY
```

After-action reports on the Bike MS <http://www.nationalmssociety.org/raceMap.aspx>-150 ARES® communications effort held in October here in northeastern Florida have been released. East Coast District DEC Mike Lee, WB6RTH, said "Crown District DEC Doug Carter, N4FPS, and I cannot stress enough the success that was achieved by all. This was the first inter-district event in the Daytona Beach-Jacksonville area, and it worked as a seamless group of volunteers with a common mission, common training and an outstanding result. In the words of the event organizers, 'this was the best participation from Amateur Radio by far.'"

```
Planning is already underway for next year's event. Lee: "We expect
that even more responsibility will be given to radio amateurs in 2011."
Lee said they will "do it bigger and better next year" and that he
looks "forward to serving with all participants again, starting from
the preparations and planning - all the way through game day."

Across the country, MS-150 support efforts by amateurs reached a new
high water mark in 2010, and there's no reason to believe that it will
not continue to rise in 2011. Here is the report from the MS-150 event
so that others might gain some insight as they plan their own event
participation for next year: 2010 SET Report East Coast - Crown-1
<http://nefl-dstar.com/blog/wp-content/uploads/2010/11/2010-SET-Report-East-Coast-Crown-1.
pdf>.
More information and photos here <http://nefl-dstar.com/blog/>.
Congratulations to the northeastern Florida ARES MS-150 communicators
on a job well done.

------------

I just received the following note: "I recently subscribed to the ARES
E-letter, but I think I may have subscribed to something that does not
pertain to me. I noticed that the beginning of the publication always
starts with "The View from Flagler County." I have never heard of that
```

county and I cannot figure out why it is so important that it dominates a newsletter that (I thought) was dedicated to ARES, not a particular county. What am I missing?" -- Scott Plude

Scott, the goal of this column is to provide readers with a slice of life, kind of like a reality show, of our ARES program here in Flagler County, Florida, which is located between historic St. Augustine and famous Daytona Beach on the upper east coast of the state. I suspect that we go through many of the trials and tribulations that most ARES groups experience across the country. Many may identify with us here in what I feel is a typical county ARES program. We suffer the same personality and club dysfunctions, which are part and parcel of all human and organizational behavior, but also share the triumphs and rewards of doing a job well for the public benefit. We have our ups and downs. Other groups may learn from our mistakes and our victories, or at the very least, enjoy an all-knowing chuckle when they see the same thing that happens to them happening to us.

==> SKYWARN RECOGNITION DAY THIS SATURDAY, DECEMBER 4

The 12th Annual SKYWARN Recognition Day (SRD <http://www.crh.noaa.gov/hamradio/index.php>) Special Event will take place this Saturday, December 4, 2010. SRD is co-sponsored by the ARRL and the National Weather Service (NWS <http://www.weather.gov/>) as a way to recognize the commitment made by Amateur Radio operators in helping to keep their communities safe. According to SRD Coordinator David Floyd, N5DBZ, Amateur Radio operators can visit their local participating NWS office <http://www.crh.noaa.gov/hamradio/participating_offices.php>, working as a team to contact other hams across the world throughout the 24 hour event.

In 1999, Meteorologist-in-Charge of the Goodland, Kansas NWS office Scott Mentzer, N0QE, worked with then ARRL Field Services Manager Rick

Palm, K1CE, to find a way to recognize the valuable contributions storm spotters make to the National Weather Service. "Since many of those storm spotters were also hams," Floyd told the ARRL, "it seemed like a natural fit for the recognition to be centered on Amateur Radio."

With the approval of NWS headquarters and a commitment to participate from many local NWS offices across the country, the first National Weather Service Special Event took place on November 27, 1999. "At the end of the event, almost 16,000 QSOs were logged, with contacts made to all 50 states and 63 countries," Floyd recounted.

Floyd said that feedback from that first event was "overwhelmingly positive" from both the NWS staff and the local ham clubs: "Many local club members who came to that first event had never visited an NWS office before. When they came for the special event, they learned the value of their reports and how they were used in conjunction with existing technology." And so began an annual tradition.

In 2001, the name of the event was changed to SKYWARN Recognition Day, a name Floyd said better conveyed what the day was all about: "Each year since the inception of SRD, the number of NWS offices participating with local ham clubs has increased; more than 100 offices sign up each year to take part.

Station call signs have also changed over the years. Floyd said that some NWS offices and clubs apply for a special event call sign, "such as W3B in Brownsville or N0Y in Aberdeen, South Dakota. Other call signs hint at office location, including WX9GRB in Green Bay and WX4NHC at the National Hurricane Center. Still others represent more of the big picture, as in KC0SKY in Pleasant Hill, Missouri."

Floyd has seen a greater use of digital communications in addition to CW, RTTY and packet radio: "Each year, more and more contacts are being made using EchoLink, Winlink and the use of e-mail reflectors." In keeping with the NWS setting, stations are asked to include a weather report of their location <http://www.wrh.noaa.gov/mtr/hamradio/opsprocedures.php> in their exchange.

2010 SKYWARN Recognition Day will be held on December 4 from 0000 UTC-2400 UTC. Even if you make just one QSO to an NWS office, you are eligible to receive a certificate. Just submit a list of the station(s) you worked (along with a self-addressed stamped envelope) to SKYWARN Recognition Day, 920 Armory Rd, Goodland, KS 67735. Many NWS offices also send out special QSL cards for this event. If you haven't yet joined in the fun of SKYWARN Recognition Day, make 2010 your year to do so!

[Storm Spotting and Amateur Radio is a resource for Amateur Radio operators seeking more information about severe weather reporting and SKYWARN. Storm Spotting and Amateur Radio is available from ARRL publication dealers <http://www.arrl.org/arrl-publication-dealers/>and

from the ARRL Online Store

Letter

==> VETERAN FLORIDA EC AA4BN -- SK

James P. "Jimmy" Sparks, AA4BN of Clewiston, Florida, became a silent key on November 6. He was 85. The ARES Emergency Coordinator for Hendry County, Florida for 43 years, he was also RACES Radio Officer for the county. Sparks was honored by his peers at the Melbourne Hamfest upon his 40th anniversary of service as Hendry County EC. He was a former Navy radio telegraph operator during the Second World War and following the war was involved in radio communications for the Navy during nuclear weapons testing in the South Pacific. Sparks

received special commendations from Admiral William Halsey for his radio communications expertise, as well as medals for his service in the Pacific Theater during the war.

Sparks was a member of the ARRL for over 40 years, and also served on the Emergency Service Council for Hendry County. His most recent efforts were in the establishment of communications to and from Haiti to coordinate earthquake relief efforts. A memorial service was conducted by Rev. Samuel S. Thomas, W3ALE, of Clewiston who was also Jim's Assistant Emergency Coordinator. -- Thanks, Jeff Beals, WA4AW, ARRL Southeastern Division Vice Director

==> GEORGIA SSB NET CELEBRATES 50 YEARS - TONIGHT!

Fifty years ago when most voice amateur transmissions were conducted by amplitude modulation (AM), a small group of Georgia hams began to use a new mode of transmission called Single Sideband Suppressed Carrier, now called SSB, or Single Sideband. On December 1, 1960, the Georgia Single Sideband Net started its first session with 27 amateurs checking in. In celebration of the 50th Anniversary of the net, a special session will be called tonight with the original roll call list. Several of the original members are still around, and they will be welcomed into the net. Many Silent Keys have passed but they will also be called in honor and respect for their contribution to the net, and to Amateur Radio. The Georgia Single Sideband Net will be called into this special session tonight at 6 PM (EST), Wednesday, December 1, on the frequency 3975 kHz. -- Charles Pennington, K4GK, Section Traffic Manager; Director, Georgia Single Sideband Association
<http://sumterpc.com/gssaradio/>

==> ARES/RACES AND THE TEXAS RAPID RESPONSE TASK FORCE

In 2006, Texas Executive Order RP57
<http://governor.state.tx.us/news/executive-order/3631/> created mobile rapid response task force teams and placed the Texas Department of Public Safety (TDPS) in charge of command, control and communications. There are now three light teams and one heavy team. Dallas, Waco and Austin are the light team staging areas while the heavy team stages in

San Antonio. Each team takes its name from its staging location.

The Texas Division of Emergency Management (TDEM) created a Communications Coordinating Group (CCG) as part of the statewide response plan. Under this group, Amateur Radio "Communicators" have been given a role in the response plan. The teams will each have Amateur Radio Communicators from the Military Auxiliary Radio Service, State RACES and local ARES/RACES groups. Each group has an assignment in the response plan.

The Communications Coordinating Group

The CCG operates from Austin and coordinates the communications needs of the task forces. There are Amateur Radio coordinators assigned to work in the CCG to direct the response of the Amateur Radio Communicators required by the task force. There is a coordinator for each element of the Amateur Radio response. MARS, State RACES and ARES/RACES each have a coordinator. The ARES/RACES element is coordinated by the ARES Emergency Coordinator.

The RRTF Dallas and RRTF Waco are comprised of personnel and equipment from around North and West Texas Regions, Texas Military Forces, Department of Public Safety, major telecommunications providers and FEMA. These are professionals from a variety of disciplines. All phases of task force operations are guided by ICS and NIMS protocols.

Task Force Amateur Radio Communicators are fully equipped and capable of providing support required for the mission task at hand. Each amateur is self sufficient for the first 36+ hours and has the tools and equipment to support the various modes needed in support of the task force. MARS operators are embedded and support the Texas State Military Forces; Texas State RACES supports the State Operating Center (SOC) and Disaster District Offices; and ARES/RACES supports the task force, local government and served agencies in the affected area as well as backing each other. The ARES/RACES element is comprised of radio amateurs from local ARES and RACES groups and operate as a united ARES element. In addition, the TF Amateur Radio Communicator may be required to use new equipment and modes, assist other agencies, and take additional training and upgrade their medical profile.

For a typical hurricane scenario, the State Emergency Operations Center will activate the Task Force based on intelligence concerning a potential disaster or incident. A typical planned activation is as follows:

- Between 120 and 72 hours before landfall Pre-Deployment activities begin.
- At 48 hours before landfall deploy to staging area.
- Self supporting for 36 hours.
- At 24 hours before landfall deploy convoy operations.
- Arrive at impact area.
- Operations Activity (Duration is incident dependent).

The Amateur Radio Communicator intake form can be found at: Task Force EmCom Responder Form <http://garlandr.s412.sureserver.com/Task%20Force/TTF%20Com%20Input.html>. A list of frequently Asked Questions can be found here: Dallas - RRTF F.A.Q. <http://garlandr.s412.sureserver.com/Task%20Force/Dallas%20RRTF%20FAQ.html> The TF Communicator Documents can be found here: Task Force Documents <http://garlandr.s412.sureserver.com/Task%20Force/Dallas%20RRTF%20Team%20Docs.html> -- permission for publication from John Galvin, N5TIM <n5tim@arrl.net>, who reports that the above information is for the North Texas Section team. In the South Texas Section Jim Russell, NQ5L is the lead and for the CCG, Glen Reid, K5FX is the overall coordinator.

==> RSGB SIGNS AGREEMENT WITH RAYNET IN THE UK

The Radio Society of Great Britain is the IARU Region 1 member-society. The RSGB recently signed a "parity of esteem" agreement <http://www.rsgb.org/news/pdf/special/raen-rsgb-agreement-2010.pdf> with The Radio Amateurs' Emergency Network (RAYNET), the UK's emcomm group. RAYNET is a national voluntary communications service provided for the community by licensed radio amateurs. Formed in 1953 following severe coastal flooding, it now has 2,000 members who provide communication assistance for hundreds of events each year. From its Web site: RAYNET offers a unique range of emergency communication services to user services. Coupled with members' endless resourcefulness, RAYNET is regarded as a professional support organization by both the statutory and volunteer emergency service organizations.

Their Web site exists to promote the work of RAYNET in the UK, provide information for prospective users of RAYNET's services, act as a link with the membership and provide support at all levels. See more on RAYNET here <http://www.raynet-uk.net/main/>. - RSGB, RAYNET sources

==> LETTERS

Flagler County's FEMV

Concerning last month's "View from Flagler County," here in Portage County, Ohio, our RACES operation fits the same bill as the FEMV. Three years ago our EMA director asked me to start the RACES program. It took a lot of work, including working through an interim EMA director, getting a plan approved by the county commissioners, and then getting the program running under the newly hired director.

We presently have 18 active RACES members. We meet monthly, have true training nets every other week, and hold quarterly drills/exercises. All members have completed background checks and are required to take the FEMA ICS 100, 200, 700 and 800 courses plus the ARRL's Level I emcomm course.

Our Assistant EMA Director truly had the vision for how he could make the fullest use of our members, realizing that the EMA had a critical need for support. Like most EMA's, they have no real support staff. There are only the Director, Assistant Director, and an administrative

assistant. We have supported a Volunteer Reception Center, trained for H1N1 anti-viral vaccine distribution, and, most importantly, been put to use running the EMA's mobile command post, a fully functioning communication center containing communication gear for all local, regional and state agencies.

We had the opportunity to provide supportive communications for Operation Talon Shield in August. This was the largest multi-agency training exercise ever held in Ohio, involving local, regional, state and federal assets plus the Ohio National Guard. The Ohio EMA After-Action Report gave the communications team an excellent review. I had the privilege of serving as COML for the exercise and participate on the county's Incident Management Team.

The EMA upgraded its radio room with new Amateur Radio gear. They offer us training opportunities, plus 24/7 access to the EOC and the Mobile Command Post. We interact with police, fire and county hospital staff and demonstrate our capabilities to them, and, most importantly, we have been able to maintain the relevancy of ham radio volunteers. It is a harsh reality, but there is not the same demand for purely ham radio operations as there has been in the past.

Our program is virtually the same concept as the FEMV, just with a different name: RACES. Congratulations on the FEMV program. Your team will be riding the wave of the future. -- Jim Aylward, KC8PD/AAM5EOH, Radio Officer, Portage County EMA/RACES EC, ARES of Portage County; Emergency Operations Officer, Ohio Army MARS

After working with ARES and RACES since 1999, I think this program is excellent. There are a lot of hams that are willing to help when something
happens but are totally unprepared to work within the NIMS/ICS protocols that all agencies must now follow. Their lack of training or understanding of procedures becomes a burden to the Incident Commander when trying to orchestrate his planning and implementation of the emergency action plan. FEMV is on the same page as we are up here in Passaic County, New Jersey. -- Fred Buchner, KO2FB, Hawthorne, New Jersey

In re Flagler County's new volunteer program, congratulations! It is long past time for someone to actually step up and make a commitment. My complaint for a full decade now has been that ARES has no training requirement. An EC can require training, but ARES as a national program does not. I applaud the change! - Pat Lambert, W0IPL, Longmont, Colorado

Regarding the volunteer plan that Flagler County has initiated, it's needed. I've been a member of various volunteer organizations (American Red Cross, Civil Air Patrol, REACT) and they tend to share one common trait, what an Air Force pilot buddy referred to as all thrust, no vector. We all want to do the right thing as long as it doesn't interfere with doing "our thing, our way." As a police officer

(retired), I've been on the other side of sometimes having too much help, well-intentioned but lacking direction. The Flagler County plan seems to be well-organized and reasonable. - Howard Estes, WB4GUD, Franklin, North Carolina

The description of your Flagler County ARES emcomm group sounds like RACES. The VCO is simply an RO under a different name. Wear the ARES hat for the bicycle tour, wear the RACES hat when the county calls you out. -- Nick Rylatt, AA3T, Marysville, Pennsylvania

ICS-213 Form

I'm not sure I understand the reasoning behind trying to merge the ARRL

radiogram and IC-213 form. Our served agencies (including the Department of Emergency Management for the State of Texas, the State Operations Center, and a variety of city and county EOCs) are all requiring that we be able to process (deliver and reply to) a signed IC-213. There is no option to deliver such a message by ARRL radiogram or any other transcribed message.

We may not agree that this should be the case (and there are lots of ARES members who tell us to get the State to change the rules), but they
are the served agency and if we want to participate, we have to figure out how to do that. The physical signature is an important component that means we use scanned IC-213 forms sent as attachments to a Winlink e-mail. If the signature isn't required, it is still far more efficient

to send a standard e-mail, even if it is copied and pasted into an IC-213
for deliver. -- Jim Russell, NQ5L, South Texas Assistant SEC, Texas Rapid Response Task Force Operations

==> INTERNATIONAL HUMANITARIAN AWARD NOMINATIONS OPEN

Nominations are open for the 2010 ARRL International Humanitarian Award <http://www.arrl.org/international-humanitarian-award>. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. A committee appointed by the League's President recommends the award recipient(s) to the ARRL Board, which makes the final decision. The committee is now accepting nominations from Amateur Radio, governmental or other organizations that have benefited from extraordinary service rendered by an Amateur Radio operator or group. The ARRL International Humanitarian Award recognizes Amateur Radio's unique role in international communication and the assistance amateurs regularly provide to people in need.

Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying

statements from at least two people having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (for example, the American Red Cross, The Salvation Army or a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include the names and addresses of all references.

All nominations and supporting materials for the 2010 ARRL International Humanitarian Award must be submitted in writing in English to ARRL International Humanitarian Award, 225 Main St, Newington, CT 06111 USA. Nomination submissions are due by December 31, 2010.

While no award was conferred in 2009, the 2008 ARRL Humanitarian Award was given to the Amateur Radio operators of the Sichuan Radio Sports Association, the Chinese Radio Sports Association (CRSA <http://www.crsa.org.cn/english.php>) -- that country's IARU <http://www.iaru.org/> Member-Society -- and the many Amateur Radio operators in China who assisted with communications support in the aftermath of the May 2008 earthquake <http://www.arrl.org/news/hams-called-to-action-in-aftermath-of-china-quake> in the Wenchuan area of China's Sichuan province. In conferring the award, the committee noted that the hams' "immediate actions and use of Amateur Radio rendered assistance to victims" of the earthquake and the "long-term relief operation mounted by these organizations exemplifies the highest level of dedication to public service."

==> EMCOMM LEVEL ONE (EC-001) BEING REVISED

We've been answering a number of inquires related to the transition from the existing Emergency Communications (AREC) Level 1 course to the revised course which will be called "Introduction to Emergency Communications." The new course is expected to be released online on a new online platform in early 2011.

The last registrations for the current online Level 1 course were accepted in July 2010 to allow time for students to complete the course before the old online platform was retired. However, field instruction and exams for the Level 1 course will continue to be supported through December 31, 2010.

We expect to beta test the new course on the new platform in January 2011 and release it for enrollment shortly thereafter. We plan to produce course books for the new course after we've had time to receive feedback on the new course content. We expect the new course books will be available by mid-year.

Please review the FAQ's posted on our website at http://www.arrl.org/cep-news-and-announcements for specific information about how this transition will affect those who have supporting roles for the AREC program, including EmComm Mentors, Field Instructors and Field Examiners.

==> K1CE FOR A FINAL

The 2010 hurricane season <http://www.noaanews.noaa.gov/stories2010/20101129_hurricaneseason.html>ended yesterday, November 30. It was a busy season, but no hurricanes struck the U.S. mainland. We were just lucky. The insidious danger of a quiet season here is the development of complacency. We cannot allow that to happen. The off-season is the time to re-double your efforts on preparedness both personally and organizationally at all levels. Train, exercise, and attend the numerous hurricane conferences that occur early next year. Look at the trends in NIMS/ICS training and protocols, emergency management both at the local and State levels, and adapt your personal and local ARES planning accordingly. Believe me, it won't seem long before we are all staring down the throat of the 2011 hurricane season, when we might not be as lucky as we were this year.

Happy Holidays from all of us here on the editorial and production staff (too numerous to mention individually) here on the main corporate campus of the ARES E-Letter office suites here in Flagler County, Florida! See you next year! 73, Rick K1CE

ARRL - Your One-Stop Resource for Amateur Radio News and Information

Join or Renew Today! <http://www.arrl.org/join> ARRL membership includes QST <http://www.arrl.org/qst>, Amateur Radio's most popular and informative journal, delivered to your mailbox each month.

Subscribe to NCJ - the National Contest Journal <http://www.arrl.org/ncj>. Published bimonthly, features articles by top contesters, letters, hints, statistics, scores, NA Sprint and QSO Parties.

Subscribe to QEX - A Forum for Communications Experimenters <http://www.arrl.org/qex>. Published bimonthly, features technical articles, construction projects, columns and other items of interest to radio amateurs and communications professionals.

Free of charge to ARRL members: Subscribe <http://www.arrl.org/myarrl-account-management#%21/edit-info-email_subscriptions> to The ARRL Letter (weekly e-letter filled with news and features), the ARRL Contest Update (bi-weekly contest newsletter), Division and Section news -- and much more!

ARRL offers a wide array of products <http://www.arrl.org/arrl-store> to enhance your enjoyment of Amateur Radio. Visit the site often for new publications, specials and sales.

Donate <https://www.arrl.org/arrl-donation-form> to the fund of your choice -- support programs not funded by member dues!

1065. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2010-12-01 07:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1291186801@panix.com>
Source record: 4984
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

==> + PUBLIC SERVICE: ARES®, SKYWARN ACTIVATED AS TORNADOS SWING THROUGH THE SOUTH

```
<http://www.arrl.org/images/view/News/MississippiTornados.JPG> On
the evening of Monday, November 29, a series of severe storms swept
through Louisiana, Mississippi and Alabama, and hams provided support
from the National Weather Service office in Jackson, Mississippi.
According to the NWS, seven tornados were embedded in the storm system,
with at least six counties reporting damage. There were no deaths in
```

the latest storms, though 15 people were hurt in Mississippi and buildings were badly damaged there and in Louisiana. Schools were closed in Alabama and tornado watches were posted in Tennessee and parts of North and South Carolina on Tuesday as the storms moved east. Read more here <http://www.arrl.org/news/ares-sup-sup-skywarn-activated-as-tornados-swing-through-the-south>.

==> + BPL: ARRL STRENGTHENS THE CASE FOR MANDATORY BPL NOTCHING

The ARRL filed an ex parte submission with the FCC on November 30, providing additional support for its position that the FCC should require mandatory notching of the amateur bands by Broadband over Power Line (BPL). The ARRL's filing stated such devices can cause harmful interference to Amateur Radio operators, and requested that the FCC "establish rules that are appropriate for unlicensed BPL systems and which minimize the interference potential."

After the FCC released its Request for Further Comment and Further Notice of Proposed Rule Making in July 2009, the ARRL filed comments and reply comments and made oral and written ex parte filings, urging the adoption of Part 15 Rules which reflect both the capabilities and practices of the bulk of the BPL industry, and which are sufficient to protect licensed radio services in the HF and VHF bands.

"It has been painfully apparent that the present rules permit the deployment of BPL in configurations which cause severe, ongoing harmful interference if operated on radio spectrum that is in use locally," the ARRL asserted in its filing. The ARRL, in its numerous filings on this issue has "strenuously urged" the FCC to require full time, mandatory notching of all amateur allocations to at least 35 dB notch depths. "This level of notching is both achievable by present BPL systems and is typically, but not universally, implemented by the BPL industry." Read more here <http://www.arrl.org/news/arrl-strengthens-the-case-for-mandatory-bpl-notching>.

==> + AMATEUR RADIO IN SPACE: ISS EXPEDITION 24/25 CREW BACK ON TERRA FIRMA

After more than 160 days in space, ISS Expedition 25 Commander Doug Wheelock, KF5BOC -- along with Flight Engineers Shannon Walker, KD5DXB, and Fyodor Yurchikhin, RN3FI -- has returned to Earth from the International Space Station (ISS). Their Soyuz spacecraft landed in Kazakhstan on Friday, November 26. While on board the ISS, both Wheelock and Walker participated in the Amateur Radio on the International Space Station (ARISS) program, and made 22 ISS-to-school and ISS-to-camp QSOs. In addition, Wheelock averaged about two dozen casual QSOs each week while on board the ISS. Read more here <http://www.arrl.org/news/iss-expedition-24-25-crew-back-on-terra-firma>.

==> + ON THE AIR: SOAR HIGH IN THE ARRL 10 METER CONTEST

The highest of the HF bands will be the central operating focus of many amateurs in the ARRL 10 Meter Contest, December 11-12. During the event, many propagation modes will be available: Sporadic-E will help you work stateside stations, a touch of meteor scatter in the morning will give you split-second chances to work stations -- you'd better be quick, though! -- and DX stations could find their way into the log, thanks to some recent signs of life from the F-layer. "Ten meters was open from the United States to Africa, Europe and South America during the CQ World Wide DX CW contest on the weekend of November 27," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "Let's see if those conditions remain for the second weekend in December." Read more here <http://www.arrl.org/news/soar-high-in-the-arrl-10-meter-contest>.

==> ON THE AIR: THE SPRATLY ISLANDS DXPEDITION GETS WINGS

The 37 operators from 15 countries who make up the DX0DX DXpedition Team that will go to the Spratly Islands is finalizing preparations for the almost month-long DXpedition that begins January 6, 2011. Instead of going by boat, the team will instead fly to Thitu Island where they will set up their operation. Thitu is the second largest island in the Spratly Islands. The Spratlys are a group of more than 750 reefs, islets, atolls, cays and islands in the South China Sea between Vietnam, the Philippines, China, Malaysia and Brunei. They comprise less than 4 square kilometers of land area, spread out over more than 425,000 square kilometers of sea. Read more here <http://www.arrl.org/news/the-spratly-islands-dxpedition-gets-wings>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of November -- includes ARISS activities ; new licensing exam software; elections of Board members and Section Managers; and on-the-air events. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-28>.

==> SUPPORT ARRL: ARRL THANKS DONORS WITH PUBLICATION GIFT CERTIFICATES

The end of 2010 is fast approaching and ARRL is poised to close the books on December 31! Many members wait to make contributions at the end of the year -- these contributions are important to the ARRL funds that are not supported by member dues.

But wait! There's more! When you make a contribution of $30 or more before December 31, you'll receive a complimentary $10 gift certificate* on your next publication sales purchase at ARRL. You can make your gift on our secure Web site <http://www.arrl.org/donate>, by mail or by phone at 860-594-0397 and we'll send your $10 gift certificate right away.

You may designate your contribution to one or more of the following funds:

- The ARRL Diamond Club <http://www.arrl.org/the-arrl-diamond-club> (to renew your ARRL membership and make a contribution!)
- The Spectrum Defense Fund <http://www.arrl.org/spectrum-defense-fund>
- The Education & Technology Fund <http://www.arrl.org/education-and-technology-fund>
- The Lab Fund
- The Historic Preservation Fund <http://www.arrl.org/historic-preservation-fund>
- The ARRL General Fund.

You may decide to make a monthly credit card contribution of $10 or more on the ARRL Web site to support one of the areas listed above. For more information, contact ARRL Chief Development Officer Mary Hobart, K1MMH, via e-mail <mhobart@arrl.org> or by phone at 860-594-0397. Your year-end contribution is tax deductible to the extent allowed by law. ARRL is an IRS designated 501(c)(3) organization holding tax identification number 06-6000004.

* About ARRL Gift Certificates: After making your contribution of $30 or more, your $10 ARRL Gift Certificate will be promptly mailed to you. Certificates must be redeemed by April 30, 2011. It is easy to redeem your certificate online, by mail or phone. This offer is valid on all sale and regular-priced ARRL publications.

==> + AMATEUR RADIO ENFORCEMENT: BRITISH MAN CONVICTED FOR DELIBERATE INTERFERENCE, OPERATING WITHOUT A LICENSE

Clive McMurray of the British town of Hull (located about 45 miles southwest of York) was convicted and sentenced on November 22 for causing deliberate interference to Amateur Radio users and unlawfully using radio equipment without a license. According to the Radio Society of Great Britain -- that country's IARU Member-Society -- McMurray caused interference to operators in the Hull region of Humberside between June-November 2009. Read more here <http://www.arrl.org/news/hams-invited-to-listen-for-new-satellites>.

==> + AMATEUR RADIO ENFORCEMENT: FCC ISSUES RETAILER SECOND CITATION IN 18 MONTHS FOR MARKETING NON-COMPLIANT RF DEVICES

On November 23, the FCC issued a Citation <http://www.fcc.gov/Daily_Releases/Daily_Business/2010/db1123/DA-10-2220A1.pdf> to Hobby Lobby International (HLI <http://www.hobby-lobby.com/>) for marketing non-compliant radio frequency devices. According to the Commission, these devices were in violation of Section 302(b) of the Communications Act of 1934, as Amended and Section 2.803(a)(1) of the Commission's Rules <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr2.803.pdf>. In July 2009, HLI was also issued a Citation <http://www.arrl.org/news/fcc-issues-citation-to-part-15-marketer> for the same reason. This time, HLI was found to be selling an unauthorized radio frequency device, specifically the JETI Duplex 2.4 GHz System <http://www.hobby-lobby.com/jeti-duplex.htm> for radio-controlled

models. This system consists of a transmitter and receiver used for remote control of model aircraft, boats, and cars. The FCC Citation warned that if, after receipt of the Citation, HLI violates the Communications Act or the Rules "by engaging in conduct of the type described herein, the Commission may impose monetary forfeitures...as well as criminal sanctions, including imprisonment." HLI has 30 days to respond to the Citation, either through a personal interview at the FCC office in Atlanta or via a written statement.

==> SOLAR UPDATE

Tad "Holding you close is like holding the summer Sun <http://www.youtube.com/watch?v=E8SsSlak5xE>" Cook, K7RA, reports: The average daily sunspot numbers for the seven days -- November 25 through December 1 -- were up 1.3 points to 25.9, compared to the prior seven day period. The predicted solar flux for the next 10 days, December 2-11 is 88, 90, 90, 90, 88. 88. 86, 86, 85 and 85. The predicted planetary A index for the same period is 5, 10, 8, 7, 5, 5, 5, 5, 5 and 7. The three-month moving average of daily sunspot numbers changed from 28.9 to 33 and 35.6 for the periods centered on August, September and October (ending in September, October and November). This shows a continued slow upward trend in sunspot activity. Look for more information -- including some news on Long Delayed Echoes (LDE) -- on the ARRL Web site on Friday, December 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Billy Joel's This Is the Time <http://www.youtube.com/watch?v=E8SsSlak5xE>.

==> ARRL HOMEBREW CHALLENGE HAS NEW DEDICATED WEB PAGE

The original announcement of the Third ARRL Homebrew Challenge -- as seen on page 47 in the November 2010 issue of QST -- referred readers to the QST-in-Depth Web page for updates and rules clarifications. We have now established a dedicated Web page for the ARRL Homebrew Challenge <http://www.arrl.org/homebrew-challenge>. This page not only has the original and updated rules and clarifications to the third challenge, but also has information about the earlier contests. For additional clarifications, just e-mail <w1zr@arrl.org> QST Technical Editor Joel Hallas, W1ZR.

==> + ARRL RECOGNIZES: JOE TAYLOR, K1JT, AND BRUCE WALKER, W1BW, WIN NOVEMBER QST COVER PLAQUE AWARD

The winners of the QST Cover Plaque Award for November are Joe Taylor, K1JT, and Bruce Walker, W1BW, for their article "WSPRing Around the World." Congratulations Joe and Bruce! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the December issue today.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=Qh6lH5vqw-Y> This week:

- December 3 -- NCCC Sprint
- December 3-5 -- ARRL 160 Meter Contest
<http://www.arrl.org/160-meter>
- December 4 -- TARA RTTY Melee
- December 4-7 -- ARS Spartan Sprint
- December 8 -- CWops Mini-CWT Test

Next week:

- December 10 -- NCCC Sprint Ladder
- December 11 -- Feld Hell Sprint
- December 11-12 -- ARRL 10 Meter Contest
<http://www.arrl.org/10-meter>; International Naval Contest; MDXA PSK
Death Match
- December 11-16 -- NA High Speed Meteor Scatter Winter Rally
- December 12 -- SKCC Weekend Sprint; CQC Great Colorado Snowshoe Run
- December 15 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 4-5, 2010 -- ARRL West Central Florida Section Convention
<http://www.fgcarc.org/>, Palmetto, Florida
- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF - Change of contact person in different Sections **

We would like to inform you that we did change the editors of
some sections at MMMonVHF: Responcable in future for the section
"Meteorscatter" are Massimo, IV3NDC and Jani, HA5CRX while Guido
"Guy" DL8EBW change into the EME section to help bit to Peter,
OZ1LPR, to get up the EME page at all... So please do welcome the
change in aim of more activity and attractivity... In future you
will find here more RUMORS and INFOS taken by CHATS and direct
from USER announces - you are welcome to send your input! Please
do use our Contact Form to reach the editor!

** B C C - MS - CONTEST 2010 **

The Bavarian Contest Club (BCC) invites all active meteor scatter
enthusiasts to join the MS contest hold during the Geminids shower
2010. The aim of the contest is to generate more activity on the
random frequency and make MS random operation more popular. It
will also provide interesting information about MS propagation
at various times of the shower. And it will give the little pistols
a chance to work the big guns, who are usually just out for square
hunting. Contest period: 11 Dec 2010, 20:00 UTC to 15 Dec 2010,
02:00 UTC Find the Links to the RULES in GERMAN or in ENGLISH at:
http://www.mmmonvhf.de/latest.php?id=3611

Use our REVIEW: www.mmmonvhf.de/review.php CLICK: BW/DL3OCH

Hello friends, last weekend there was the first 23cm EME activity
ever from Taiwan. I worked from two different locations. The first
was extremely noisy so I could barely do any QSOs. Weak stations
had no chance. The second location was at BU2AQ's house, which is
very nice for EME. We will be more active from here, thats for
sure. Please use the activity report at www.mmmonvhf.de/review.php
I want to thank all my friends over here that made this possible,
such as BU2AQ, BV2KI, BU2AI and BM2APH. They are all vy interested
in EME and I am sure there will be alot more EME activity from
Taiwan in the near future. As well here some FOTOs online...

** Activity from H4, SOLOMON ISLANDS (QI90) **

Shane, VK4KHZ, is expected to be active as H44DA and arrive in
Honiara on Guadalcanal Island (OC-047), January 6th and depart on
January 16th (2011). Activity will be holiday style primarily on
6 meters on a daily basis, subject to favourable conditions, but
he will also do some activity on the HF bands as time permits.
He will use a Yaesu FT847 with a 500 watt amp into a 3 element
yagi for HF and 3 element yagi for 6m. QSL via VK4KHZ.
SOURCE: Ohio/Penn DX Bulletin #987

** IOTA SA-057 Activity **

A large group of operators from the Uruguay DX Group and Centro
Radioaficionados Montevideo will operate as CW3TD from Timoteo
Dominguez Island (IOTA SA-057, Grid Loc. GF05) on 2-6 December
2010. There will be four stations active on 160-2 metres, with an
emphasis on digital modes. QSL route TBA.
SOURCE: ICPO Bulletin (26 November-02 December 2010)

** HF and 50 MHz Activity from T8, PALAU **

T8, PALAU. Katsumi, JS1OHI, will be active as T88KO between
January 1-2nd (2011). Activity will be on 40/17/15/6 meters
SSB only. QSL via JS1OHI (JA stations: JARL Bureau or direct
with SASE; DX stations: By the Bureau or direct with SASE +
new IRC - NO USD). There will be NO e-QSL and LoTW. Direct
address is: Katsumi Ochiai, 457-22 Shimoosaka, Kawagoe City,
SAITAMA, 350-0812 JAPAN. SOURCE: Ohio/Penn DX Bulletin #987

** 5K3B Special Event Station **

8th of December... 5K3B Special Station from La Candelaria on
Colombia. A five Colombian radio amateur team, will activate
this special call sign in cw, phone, and digitals modes, in
bands from 80m throught 6m, including 2m fm. we are participating
of 50 better sites of Colombia diplom -DXCOL50HK-,you can consult
rules on www.macodex.com/bases.htm Next Activation (8-dic-2010):
it will be from the traditional district of the Candelaria in the
historical center of Bogota District Capitol, with its gorgeous
colonial houses, witness of the most important facts of national
history, will be adorned with antennas of Bicentenary Colombian
Independence Special Call Sign Station 5K3B, activating this
beautiful site within the frame of the 50 better sites of Colombia
Diploma. We wait for you beginning at 14:00 UTC of the 8 of Dec.
of 2010. Frecuency Plan: Phone: 3.790, 7.065, 7.150, 14.195, 21295
28.495, 50.105 - CW: 3.524, 7.024, 10.104, 14.024, 18.074, 21.024
24.904, 28.024, 50.105 - Digi: 7.038, 10.142, 14.084, 18.100

Amateur Radio Newsline(tm) Report 1738 - December 3 2010

Amateur Radio Newsline report number 1738 with a release date of
Friday, December 3rd 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A jammer of ham radio communications is convicted in a United Kingdom
court but nobody knows why he did it. We have the details. Also, a
new broadband threat to ham radio on 75 and 80 meters in a tiny modem
from France and its time to say goodbye to an old friend from Sony.
Find out the details on Amateur Radio Newsline(tm) report number 1738
coming your way right now.

ENFORCEMENT: UK REPEATER JAMMER CONVICTED AND SENTENCED

It's taken the better part of four years, but a jammer of amateur radio
of repeater operations in the United Kingdom has been brought to
justice. Jeremy Boot G4NJH, is in Nottingham with the details:

--

A Hull resident was sentenced at Hull Crown Court on 22 November for
causing deliberate interference to amateur radio users in the Hull
region of Humberside between June and November 2009. The defendant was
also convicted of unlawfully using radio equipment without a license
from Ofcom, which was installed in his van and driven around the region
to interfere with legitimate users of the local amateur frequencies. He
was sentenced to four months imprisonment suspended for 18 months, a
curfew between 7pm and 7am for 3 months via a means of electronic
tagging and forfeiture of his van and radio transmitters to Ofcom.

Commenting on the sentence, Paul Mercer, Head of enforcement at Ofcom,
said: "There are around 900 amateur radio users in and around the Hull
area, who have been deliberately disrupted for more than four years.
Ofcom is very pleased with this result, which will hopefully give these
users some welcome relief, as well as sending a very strong signal to
those that abuse the airwaves. This followed a dedicated investigation
by Ofcom involving six enforcement officers working day and night to
bring the culprit to court.''

Mr Sheldon, the Court Recorder commended Ofcom for the quality of the
evidence that had been collated and the quality of file presented in

court. RSGB General Manager Peter Kirby, G0TWW, said "RSGB volunteers co-operated closely with Ofcom in gathering evidence for this case. This conviction shows that deliberate interference will not be tolerated and can have serious consequences for the perpetrator."

I'm Jeremy Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

The British newspaper The Register identifies the perpetrator as 63 year old Clive McMurray. According to the newspaper he has so far not explained why he spent all this time harassing the ham radio community in the area. More on this case is on-line at tinyurl.com/2fwmnu7 and tinyurl.com/2a425df (GB2RS, various UK news reports)

**

THE BPL WARS: NEW WPC MODEM OPERATES ON 2 - 4 MHZ

A new threat to the 75 meter ham radio band. This as a French company called Watteco has developed a new powerline modem based on Watt Pulse Communication or W-P-C technology that the Wireless Institute of Australia says transmits across the 2 to 4 MHz segment of the High Frequency radio spectrum.

Described as a small, low cost, low power consumption modem, the device can be used for any type of data communication applications such as Smart Power Meters, home lighting and appliance control and street lighting to name only a few. According to the WIA News, the unit reportedly transmits a wideband signal that completely covers the amateur radio 75 and 80 meter ham bands and effectively rendering them useless anywhere in the proximity of the device.

For those interested, technical data on the modem can be found on-line at tinyurl.com/2u24lae. (WIA News)

**

ENFORCEMENT: FCC GOES AFTER MAINLAND CHINA CELLULAR JAMMER SUPPLIER

Back in the United States, the FCC has issued an Official Citation the mainland China based company Jammer World and its on-line subsidiary TheJammerStore dot com. This, for marketing unauthorized radio frequency devices in the United States in violation of the Communications Act and Section 2.803(a)(1) of the Commission's rules. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

According to the FCC Citation, this past July 20th an agent from the Enforcement Bureau's Columbia Office viewed Jammer World's web site. There he observed an advertisement for a device listed as a "Handheld GPS and Cell Phone Jammer Mini GPJ."

On July 21, 2010, the agent made an undercover buy on-line, and received the device through the mail from New Century Technology Limited. The agent conducted tests and confirmed that the device jams signals in the Cellular Telephone Band from 845 to 975 MHz, the PCS Band from 1800 to1996 MHz and G-P-S frequency of 1575.42 MHz.

Based on this and other findings, the FCC Citation tells Jammer World that if it continues to violate the Communications Act or the Rules by engaging in sales to customers in nthe United States, the Commission may impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to $112,500 for any single act or failure to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment through forfeiture actions, as well as criminal sanctions, including imprisonment.

The only problem with this citation is that the company is located in Shenzhen China and the Chines government has a long record of not cooperating with the United States in matters involving on-line sales by mainland China based companies. Without the Chinese governments cooperation, collecting a fine or forcing the company to not sell mail order to customers in the United States may be an impossible task.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

As we go to air, TheJammerStore dot com was still offering cellphone and GPS jamming devices for sale, worldwide. (FCC)

**

HAM RADIO NEAR SPACE: MEXICAN HAMS LAUNCH CROSSBAND BALLOON REPEATER EXPERIMENT

A recently launched Mexican near space crossband repeater carried on a high altitude balloon has been deemed an overwhelming success.

The SARSEM-ICARUS II Mexican Aerostatic Sub-Space Repeater System was launched on November 20th. According to flight controllers, the balloon reached an altitude of 94,301 feet during which time 103 contacts where made using the crossband repeater. Ground stations reported it having coverage of 551 miles across 13 States of Mexico.

The balloon's payload consisted of a UHF to VHF repeater, temperature and voltage sensors, a flight computer, and a secondary backup system including another GPS and control system. Also on board was a video camera transmitting live video bacxk to the ground on 900Mhz.

This is a second ham radio balloon flight success for the Amateur Radio Club of the State of Guanajuato. The group has already announced its planning a third flight in 2011. (ARCSJ)

**

WORLDBEAT: BROADCAST TRANSMITTER SITE IN WALES IS VANDALIZED

Vandalism to a transmitter temporarily forced a broadcaster in Wales off the air. What are described as hooligans attacked the radio transmitter site and caused BBC Radio Wales on 882 KHz to shut down for three hours. The exact nature of the vandalism was not revealed. The site in north Somerset broadcasts across much of Wales. The damage also hit services from other broadcasters who share the site. (Soiuthgate)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4DUX repeater serving Port Charlotte Forida.

(5 sec pause here)

**

RESCUE RADIO: HAMS REUNITE MISSING HORSE WITH OWNER

An Alabama amateur radio operator's weekend trek into a national forest turns into an experience he and members of one family will never forget. Rex Free, KN4CI, had no idea he was in for a bloody scene that would lead to a storybook happy ending. As Amateur Radio Newsline's David Black, KB4KCH reports from our Southeastern Bureau, the entire episode depended on amateur radio:

--

Thanksgiving weekend was the perfect time for Rex Free and two fellow hikers to set out exploring North Alabama's Bankhead National Forest. It's something Free and his friends have done many times before, but they ran across this time left them stunned:

--

Free: We were in the middle of the wilderness area, probably about three miles from the vehicle, exploring bluffs and looking at tree carvings and all the sudden..wham..we come upon a full size horse with blood on it dragging a saddle. And we're like okay...(laugh)"

--

There's no one around, and with no cell phone coverage, no one to call.

--

(Free/bite 2) Free: "After we got the saddle off we started thinking that there could be a person around here or there could be a body around here. We didn't know how to handle it or what to think of it. So we had to scope the area out to try to find somebody but we didn't didn't see anybody, thank goodness."

--

As a frequent visitor to the forest, Free always takes his amateur radio handy talkie with him. He uses the Bankhead Amateur Radio Club's repeater, and asks a monitoring ham to notify law enforcement. Free learns that the horse named Joe Dirt had been reported missing more than 3 weeks earlier by owner Pam Coan:

--

Coan: "I was devastated. I was so worried that something had happened to hurt him. That he ewas out there hurt and that there was nothing I could do to help him."

--

It will be the next day before the animal can be rescued; in the meantime, Free uses ham radio to communicate with the owners:

--

Free: "At the campsite at night we were relaying traffic to the owners and what they neededе to bring in to get the horse; what condition the horse was in. That the saddle was destroyed and details that they needed to know."

--

The following morning, Pamela and the horse she named Joe Dirt--because he loves to roll in the dirt--are reunited.

--

Coan: "I never thought that I'd see him again, and then there he was standing. I couldn't get to him fast enough just to touch him. You know, it was just such a high that you can't explain it. Its just to know that he was okay."

--

Joe Dirt's rescue brings a happy end to Pam Coan's emotional roller coaster ride. And she's thankful, too, for the key role Free and his fellow hams played.

--

Coan: "They're a blessing. They're heroes. I don't even know how to thank them for what they've done."

--

As for Joe Dirt, he's home, happy and doing well...rolling in the dirt as he loves to do.

>From the South East Bureau in Birmingham, Alabama, Im David Black, KB4KCH, for the Amateur Radio Newsline.

--

Joe Dirt appears to have followed the same advice hikers are given about what to do if they get lost which is to just stay put. Rescuers say by doing that, and the fact that he was found by ham radio operators with communications capability are the likely reasons he survived. (KB4KCH)

**

HAM RADIO IN SPACE: EXPEDITION 24 ALL HAM CREW RETURNS HOME

Members of the Expedition 24 and 25 crews that spent 160 days on-orbit on board the International Space Station has returned to soild ground. On Friday, November 26th Commander Doug Wheelock, KF5BOC along with Flight Engineers Shannon Walker, KD5DXB, and Fyodor Yurchikhin, RN3FI landing in Kazakhstan on flying home in a Russian-built Soyuz space vehicle.

While on-orbit, both Wheelock and Walker collectively made 22 ARISS contacts with schools around the world. In addition, Wheelock was on the air making one on one contacts as his time and work schedule allowed. Before leaving the ISS, Wheelock recorded a 20 minute video tour of part of the space station that included a live demonstration of his making contacts with hams on Earth. OIne seemed especially memorable for Commander Wheelock. Take a listen:

--

Contact audio here. Hear it on the MP3 edition of this weeks newscast downloadable at www.arnewsline.org

--

You can hear and see that entire video including the I-S-S tour on-line at tinyurl.com/3yep54f (ARISS, NASA)

**

HAM RADIO IN SPACE: TWO HAMS IN NEW ISS CREW SOON TO LAUNCH

Meantime, replacements for the now returned space adventurers will soon be on their way to orbit. On December 17th a new trio of flight engineers are expected to arrive at the I-S-S following a December 15th launch. They are identified U.S. astronaut Catherine Coleman, KC5ZTH, the European Space Agency's Paolo Nespoli, whose call is IZ0JPA and Russian cosmonaut Dmitry Kondratyev. And we will have more ham radio related space news later on in this weeks Amateur Radio Newsline report. (ARISS, NASA)

**

RADIO LAW: FCC EXTENDS NEW EAS-CAP COMPLIANCE DEADLINE

The FCC is giving broadcasters, cable operators, satellite radio and television operators and wireline video service providers more time to

implement the next generation emergency alert system. The commission announced on November 18th that it will move the deadline for compliance from March 29, 2011, to September 30, 2011.

In 2007, the FCC set a communications industry compliance deadline of 180 days after FEMA adopted the standard for the Common Alerting Protocol or C-A-P formatted emergency messages. Since then the agency has extended that date based on public comment and a specific recommendation by the FCC's Communications Security, Reliability and Interoperability Council.

This latest extension is to give broadcasters, cable operators and others sufficient time for development, testing and potential certification of the new equipment. The FCC added that in making the decision that it took into account the cost of buying the new compliant equipment in extending the Common Alerting Protocol adoption deadline.

While its been reported that a handful of amateur repeaters carry EAS alerts, there is no law or rule that requires them to do so. (FCC)

**

RADIO CONFERENCES: ESA TO AWARD TEN SCHOLARSHIPS TO STUDENTS PRESENTING BAT SPACE CONFERENCE

An Italian astronomic study group has announced that the European Space Agency Education Office has offered ten scholarships. These for students who present papers at the 1st International Academy of Astronautics Conference on University Satellites Missions and the Cubesat Conference to be held in Rome from January 24th to the 29th of 2011. Students selected by the ESA Education Office will also be reimbursed their conference registration fee and awarded a maximum stipend of 300 Euros to help cover travel and accommodation expenses. More information is on line at tinyurl.com/25wouy5. (ANS)

**

NAMES IN THE NEWS: N6GHZ APPOINTED AS AMSAT DIRECTOR OF LAUNCH OPPORTUNITIES

Some names in the news. First up is Bill Ress, N6GHZ, of Camino, California. He has been appointed to the newly created post as AMSAT's Director of Launch Opportunities by the organizations President Barry Baines, WD4ASW. In his new capacity, Ress will serve as the central point for managing Fox Launch Opportunities, Ride Share Opportunities as well as coordinating AMSAT's presence at small satellite conferences. Supporting Ress efforts will be a volunteer task force to help coordinate and compile launch information. (ANS)

**

NAMES IN THE NEWS: MARK RODWELL TO RECEIVE IEEE-SARNOFF AWARD

Mark J.W. Rodwell will receive the 2010 I-Triple-E David Sarnoff Award at a meeting in San Francisco in December. Rodwell is a research scientist who developed indium phosphide heterojunction bipolar transistors that are capable of operating at very high frequencies.

According to an I-Triple-E release, in doing so Rodwell set the guidelines for further improvements enabling powerful radio, optical communications and imaging applications. The award specifically recognizes his development of millimeter-wave and sub-millimeter-wave indium phosphide heterojunction bipolar transistors and associated integrated circuits. (RW)

NAMES IN THE NEWS: VE5TRF NAMED RAC SASKATCHEWAN SM

And Barry MacKenzie VE5TRF has been appointed Radio Amateurs of Canada's Section Manager for Saskatchewan effective immediately. MacKenzie has a military background, and is the current President of the Moose Jaw Amateur Radio Club, an accredited examiner as well as the clubs webmaster. MacKenzie's appointment was announced on November 20th by Radio Amateurs of Canada's Doug Mercer, VO1DTM, who is the organizations Vice President for Field Services. (RAC)

EMERGING TECHNOLOGY: LONG DELAYED ECHOS CAPTURED ON 40M

Another case of Long Delayed Echo's of a ham radio signal being heard by the originating station has been reported and this time the ham had enough time to capture the sound to a recording. Amateur Peter Brogl, DK6NP, reports hearing Long Delayed Echos on 7 MHz during a geomagnetic storm on November 27th. This is part of one of the recordings he made:

--

Long Delayed Echo audio: Hear it on the MP3 edition of this weeks newscast downloadable at www.arnewsline.org

--

What you just heard was what DK6NP heard forty-six seconds after he transmitted his call sign at 7 MHz, he received an echo of his own transmission. Brogl said that ast first he thought someone was playing

on him so he changed frequency, re-keyed his call and got another echo. This went on for more than an hour, enough time for Brogl to make several recordings.

Long Delayed Echo's are not a new phenomena. They were first reported in 1927 by Norwegian civil engineer Jorgen Hals but happen rarely and are not really understood. Most researchers believe that unusual propagation conditions linked to solar storms may be one of many possible explanations. Others can be seen on Shlionskiy's Long Delayed Echo page at tinyurl.com/355lvc6. Audio recordings made by DJ6NP of the 7MHz Long Delayed Echos can be heard at brogl.net/audio. (Space Weather, Southgate)

**

HAM RADIO IN SPACE: UK SPACE AGENCY TO USE AMSAT-UK FUNCUBE BOARDS ON NEW BIRD.

The United Kingdom's Space Agency is proposing to use the AMSAT-UK designed FUNcube boards. This, as part of its innovative new UKube-1 CubeSat satellite slated for launch in December 2011.

The baseline design for this new bird includes a set of FUNcube boards to provide the educational outreach for the project. AMSAT-UK is presently discussing the precise details of an arrangement with the UKube-1 project team. If adopted, use of these boards will enable a much higher level service to be provided for Science, Technology, Engineering and Mathematics outreach to schools than would be possible with other spacecraft designs.

More on this project is on-line at tinyurl.com/27cotj6 (AMSAT-UK)

**

WORLDBEAT: VK100WIA - THE FINAL SCORE

Some interesting statistics from down-under. This, as the Wireless Institute of Australia closes the logbook on its centenary station VK100WIA. Graham Kemp, VK4BB, is here with some very interesting numbers:

--

With the log book now finalized at 24,440 contacts David Park VK3JDA has carried out some further in-depth analysis of its 611 pages. The 40 meter band had 10,500 contacts, followed in popularity by 80 meters with 5,000, 20 meters 4,100 and 2 meters just over 3,000. In fact 12 bands were used by VK100WIA ranging from 160 meters through to 23 cm.

Looking at the modes used, as would be expected SSB comes up triumphs with 19,000 contacts, and CW got a very good pounding with nearly 1400 QSO's logged. Others listed as modes in the log were AM, IRLP, D-STAR, PSK, JT65C, SSTV, ATV, APRS and one EME or moon bounce contact.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

And less we forget a final word of congratulations to our friends at the Wireless Institute of Australia on this 100th anniversary achievement. (WIA News)

**

WORLDBEAT: MAJOR SITE RENTAL INCREASE FORCES UK REPEATER TO GO QRT

The GB3PF 70 centimeter voice repeater near Blackburn in the United Kingdom is be closing down. This, after its operator, North Western Repeater Group, was notified of a site rental cost increase that would have the club paying more than £6000 a year for site space. That's over $9300 in U-S dollars and is beyond the means of the small ham radio group. Until now, the group was paying what was described as a small nominal site rental fee.

**

DX

In DX, ZS6SIG has relocated to Nairobi, Kenya is now signing 5Z4EE and will be doing so for the next four years. He will operational on 160 through 10 meters. Please QSL via NV7E or at the address shown for 5Z4EE on QRZ.com. By the way, this is the same call that he originally held back in the 1980s.

Russian Robinson Club members NL8F and N3QQ are off to the Marshall Islands to activate three Islands On The Air including a new uninhabited island. Their operation will continue through December 16th. QSL V73RRC and V73QQ via N7RO and V73CF via K8NA.

F1BCS, will be active as portable 3B8 from Mauritius through December 17th. His operation will be on 20, 17 and 15 meters using SSB, RTTY and PSK. QSL per the operator's instructions.

VK8NSB, is currently in the planning stages at the moment for a DXpedition to Timor-Leste in July 2011. He is inviting any interested amateurs in joining the DXpedition teamto e-mail him at vk8nsb at hotmail dot com.

VK4KHZ, is expected to be active as H44DA when he arrives on Guadalcanal Island January 6th. He will be there through January 16th operating holiday style primarily on 6 meters on a daily basis, subject to favorable conditions. He may also operate on the High Frequency bands as time permits. QSL via VK4KHZ.

DJ2EH is on the air as ZD9T from Tristan da Cunha until December 8th. No operating schedule was made public. QSL via his home call.

And lastly, listen out for VP8SCC to begin transmitting using various digital modes during December. His operation will be from the Falkland Islands Sea Cadet Corps unit. This is a young person's organization and is run with a nautical theme based on the traditions of the Royal Navy. The VP8SCC station is managed by VP8CWQ. QSL to the Falkland Islands Sea Cadet Corps, c/o PO Box 785, Stanley, FIQQ 1ZZ, the Falkland Islands.

**

THAT FINAL ITEM: THE SONY WALKMAN - SK

And finally this week, as the holiday gift giving season approaches we are kind of sad to report that the famed Sony Walkman will likely be on dealer shelves for the last time this year. This is because Sony has announced that the thirty-one year old cassette tape based unit is being phased out of production. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with our final goodbye:

--

The Sony Walkman -- the cassette tape player that forever changed music listening habits before becoming outdated by digital MP3 players --has become a sort of silent key, this after Sony announced on October 25th that it has stopped production of the cassette tape player in Japan -effectively sounding the death knell of the now-obsolete portable audio device.

If you're looking to put a date in the Walkman's tombstone, then October 25, 2010, is as good as any. Perhaps October 23, 2001, the day the Apple iPod was launched, is the better date. But none of the success of Apple's portable music players and those of other manufacturers would have ever happened without the Sony cassette tape Walkman.

Some 220 million Walkman players were sold since the first model, the TPS-L2, debuted in July 1979. It was developed under the stewardship of Sony founders Akio Morita and Masaru Ibuka. Morita insisted the device be focused on high quality mobile playback which was considered a relatively odd idea at the time.

Originally called the "Soundabout" in the U.S., Sony quickly replaced the Soundabout name with the Walkman designation. It retailed for around $200 was an immediate sensation. In fact, it was quickly hailed by supporters as a total revolution in mobile music listening.

But more than just portability, the Walkman fostered a personalization of one's music. In fact, the Walkman was also the father of the so-called mixtape. For the first time, music listening was something you could make very personal by arranging songs in the order you wanted to hear to them. It was also a way of courting a future spouse or love interest during the 1980's and 1990's.

For those of you too young or simply unfamiliar with this process, making a mixtape typically entailed gathering songs, putting them all on a cassette in the order you wanted them played, labeling the tape with care and giving it to a love interest in school or elsewhere.

The Walkman didn't disappear as much as it was improved upon by its creators and others. Sony continued to use it as a brand, but the company long ago surrendered style to Apple and the ubiquitous iPod. But one day the iPod will likely go the way of the 45 RPM record, the L.P. and the Walkman. When that happens in some far distant time, that generation will be waxing nostalgic about its passing just as we are today about the Walkman as it becomes a part of electronic history.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, looking for my earphones and cassette tapes in Los Angeles.

--

The Walkman is survived by the CD-based Sony Discman and hundreds of Chinese-made knock-off tape based players. It's also revered by those music listeners who think using a Walkman in this day-and-age is charmingly out-of-touch. (Compiled from various published news reports)

GB2RS NEWS

Sunday 5th December 2010

The news headlines:

RSGB extends its Amateur Radio Survey to National Clubs

Final RSGB Museum Sale

GB2RS broadcasts for the end of the year

The RSGB has launched a short set of questions for national clubs to address. The questions are available on www.rsgb.org/survey and responses are requested by 31 January 2011. Members will be interested to know that steady progress has been made with the numbers completing the online questionnaire. It is likely by this weekend we will have broken through the 2,500 responses. Unexpected maintenance work on the questionnaire's internet server these past two weekends, which made the questionnaire unavailable for a short while, will hopefully not need to be repeated. One aspect of the maintenance is that the server has a much greater capacity than before. The individual survey closes on 31 December, so if you haven't completed it yet there is still time.

The high level of interest in the RSGB Museum Surplus Sale caused the RSGB eBay account to reach an activity ceiling of which we were not aware. Regrettably, the RSGB eBay account has been shut down and the final auction could not go ahead as planned. The Society is making alternative arrangements to continue the eBay sale and hopes to offer the final set of items starting today, Sunday 5 December. Links to the listings will appear on the auction section of the RSGB website, www.rsgb.org.uk/auction. As usual, all monies from the auction will go to the National Radio Centre at Bletchley Park.

Please note that there will be a GB2RS bulletin as usual on Sunday 19 December, but not on the two following Sundays, 26 December and 2 January. The first GB2RS of the New Year will be on Sunday 9 January. Anyone with news of events taking place between now and 9 January should send it to the RSGB by e-mail to gb2rs@rsgb.org.uk as soon as possible. We would like to thank all those who regularly send in items for GB2RS and look forward to hearing from you in 2011. We would also particularly like to thank the network of Main and Reserve Newsreaders, without whom the News would not be heard.

Professor Sir Maurice Wilkes, G5VF, died on Monday aged 97. He led the Cambridge University team that built the world's first operational

stored-program computer. After obtaining an amateur radio licence he constructed radio equipment in his holidays. He stayed on at Cambridge to do a PhD on the propagation of radio waves in the ionosphere. When war broke out, Wilkes left Cambridge to work with R Watson-Watt and JD Cockroft on the development of radar. Later he became involved in designing aircraft, missile and U-boat radio tracking systems. He was a member of the Cambridge University Wireless Society from its very early days and, we understand, was the first holder of the club's callsign, G6UW.

Pai, VU2PAI has uploaded about 100,000 QSOs to the Logbook of the World, dating back from 1995. It is not complete as he still has a lot of paper logs, especially from his IOTA activations to AS-096 and AS-161. Please do not send cash or IRCs while sending QSL cards; he would prefer it if you can put two or three beautiful stamps on your envelope when you send your card. He's been a keen collector of postage stamps from round the world since he was a schoolboy. Please include a self addressed envelope or an address sticker along with your QSL card. Pai can be reached by e-mail to vu2pai@gmail.com.

Eddie Murphy, G0VVT is a GB2RS news reader for the North and last Sunday, 28 November, the news was read on 433.525MHz and GB3SX, the Stoke-on-Trent 6m repeater. Eddie was using solar power charge batteries and would like to know if that's a first for GB2RS and would welcome any news of other news readers using solar power. You can contact Eddie by e-mail to eddie@g0vvt.freeserve.co.uk.

And now for the details of rallies and events for the coming week

The first two rallies of 2011 will both be on Sunday 16 January.

Dover Radio Rally will be held at Whitfield Village Hall, Dover CT16 3LY which is on the A2 just outside of Dover. The event was revived last year and was such as success that they have hired extra space for the rally this year. The focus will be on radio related items not other electronic bits and bobs. The website www.doverradiorally.com has all the usual information required.

The Red Rose Winter Rally will be held at the George H Carnall Leisure Centre, Kingsway Park,

M41 7FJ. There is free car parking available and doors open at 11am. There will be trade stands, a Bring and Buy as well as an RSGB bookstall. Details from Steve on 07502 295 141.

Now for the news of special events

Ripon and District Amateur Radio Society will be on the air today, Sunday 5 December, celebrating their 30th Anniversary using the callsign GB2RIP. All QSOs will be acknowledged with a commemorative QSL card. Details from Rob Hall, M0RBY on 0787 608 5631.

Saturday 11 December marks International Mountain Day. For the second year a group of amateurs will climb their local mountain, Montg&#65533; in the Alicante province in Spain. They are encouraging other amateurs to climb to the top of their nearby mountain. Weather permitting, they will be active from the summit at noon with EH5MM on 145,475MHz +- QRM as well as the HF bands. Montg&#65533; is reference EA5/AT-029 for the Summits On The Air programme.

And now the HF DX news compiled from 425 DX News and other sources

The Buddies in the Caribbean DXpedition group, which specialises in 100 watt or less radios and the Buddipole portable antenna systems, will be back on the island of St Lucia from 8 to 13 December. QSL via Logbook of the World, eQSL, or post to the individual operator's home callsign with a self addressed stamped envelope.

Members of the Russian Robinson Club plan to operate from the Ujelang Atoll in the Marshall Islands during the period 7 to 12 December. The callsign will be V73RRC. QSL Manager one is N7RO.

The 37 operators from 15 countries who make up the DX0DX DXpedition Team that will go to the Spratly Islands are finalising preparations for the almost month-long DXpedition that begins 6 January 2011. The Spratlys are a group of more than 750 reefs, islets, atolls, cays and islands in the South China Sea between Vietnam, the Philippines, China, Malaysia and Brunei. They comprise less than 4 square kilometres of land area, spread out over more than 425,000 square kilometres of sea. The DX0DX Team is keen to give out contacts on 160 meters and will have two 65 foot phased verticals and a back-up antenna for this.

The DXpedition to Sable Island, which is IOTA reference NA-063, that has been well planned and postponed for several times, will take place from 6 to 13 December. They plan to work with three stations simultaneously on 160m through to 6m in CW, SSB and RTTY. All direct QSLs should be sent to N0TG, and bureau QSLs via the home callsigns.

Now the contest news

The ARRL 160m contest is the first event of the December and finishes tonight, Sunday 5 December. It is a slightly unusual event in that the duration is 42 hours. The good thing is that those 42 hours include two full nights, which is when there is likely to be propagation between Britain and North America.

The 144MHz Affiliated Societies Contest takes place today, Sunday 5 December. It's the first of the new Super League series. If you operate as a member of a club in an AFS event there's no need to be a member of RSGB, just the club. However, if you partake as an individual, you do need to be a member, although check logs from non members are always welcome. There's a limit of five members per team, but active and ambitious clubs are welcome to field multiple teams. The contest takes place between 0900 and 1700UTC and the exchange is signal report, serial number and locator.

7 December sees the 144MHz Activity Contest take place between 2000 and 2230UTC. Using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 22nd to the 28th of November, compiled by Neil Clarke, G0CAS on the 29th of November

Solar activity was very low with no solar flares taking place. However, on the far side of the Sun several coronal mass ejections occurred from active regions that were caught by the STEREO spacecraft and the images were spectacular. Solar flux levels were 75 units on the 22nd and the 23rd, but gradually increased to 80 by the 28th when a new sunspot region emerged on the visible disc during the 27th. The average was 77 units. The 90 day solar flux average on the 28th was 81 units. That's the same level as last week, although earlier in the week it was 82 units. X-ray flux levels increased from A4.3 units on the 22nd to A6.5 by the 28th. The average was A4.9 units. Geomagnetic activity was quiet, the Ap was down to only 2 units on the 26th. Then, during the evening of the 27th, a coronal hole disturbance arrived. The Ap index on the 27th was 12 units, this would have been much higher if the disturbance had arrived earlier in the day. The next day the Ap was 6 units. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 520 kilometres per second on the 23rd to 310 during the morning of the 27th. During the afternoon speeds increased to peak at 500 kilometres per second later in the evening. Particle densities were low until the 26th and the 27th when densities increased to 20 particles per cubic centimetre. Bz on the quiet days varied between minus 2 and plus 3 nanoTeslas and between minus 13 and plus 14 nanoTeslas at the height of the disturbance during the evening of the 27th.

And now the solar forecast. This week, solar activity could increase to low levels with the chance of C class solar flares taking place. Solar flux levels should be in the 80s for most of the week and with a chance of going even higher into the 90s at some stage. Geomagnetic activity is expected to be quiet every day. MUFs during daylight hours at equal latitudes should be about 25MHz for the south and 22MHz for the north. Darkness hour lows are expected to be around 8MHz. Paths this week South Africa should have a maximum usable frequency with a 50 per cent success rate of around 29MHz. The optimum working frequency with a 90 per cent success rate will be about 23MHz. The best time to try this path will be between 1100 and 1500 hours. The 28MHz band could well be worth a check around midday for any Sporadic-E taking place. A good number of days have witnessed openings recently. Take a look for any openings at www.vhfdx.info, click on real time QSO and propagation maps at the bottom of the page, then click on Europe and 28MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

M0OCT Amateur Radio Society is holding an Advanced exam next year close to Chesterfield and places are still available for external candidates. Applications will be accepted up to 10 January 2011. A limited number of places are also available on the club Foundation and Intermediate courses that will run in the New Year. Contact Steve, G6IBQ on 01246 205072 for more information.

On Monday 6 December Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 6 December South Birmingham Radio Society is reviewing the aerials for field day. Contact Don, on 0121 458 1603.

On Tuesday 7 December Friskney and East Lincolnshire Communications Club is having its Christmas meal and a talk by Tony, G3ZPU on commercial radio. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 7 December Loughborough & District Amateur Radio Club is having a paper plane contest. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 8 December Hinckley Amateur Radio Society is holding its AGM and Christmas party. Details from John, M0JAV, on 07836 731544.

On Wednesday 8 December Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 8 December Midland Amateur Radio Society Short is holding a committee meeting followed by its Christmas social at 8 pm. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 8 December Telford & District Amateur Radio Society is having a talk on Echolink & repeaters by M0VRR. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 9 December Brigg & District Amateur Radio Club is having a talk on making radio-related YouTube videos by Dave, M0OGY. Details from John, 2E0III, on 01652 632938.

On Thursday 9 December Salop Amateur Radio Society is having its Christmas meal at The New Inn, Hook A Gate. Details on the club website at www.salop-ars.org.uk.

On Thursday 9 December South Birmingham Radio Society continues its Foundation training classes with Dave, G8OWL. Contact Don, on 0121 458 1603.

On Friday 10 December Coventry Amateur Radio Society is having a pub games night. contact John, G8SEQ, on 07958 777363.

On Friday 10 December Nunsfield House Amateur Radio Group is having its Christmas party. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 10 December South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 11 December Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 6 December Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 6 December Scarborough Amateur Radio Society is having a surplus equipment sale and surprise subject talk by G4DAX. Details from Jerry Scarr, G6LBL, on 01751 476601.

On Monday 6 December Sheffield Amateur Radio Club is having a talk and demo on light waves by G3PHO. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 6 December Thornton Cleveleys Amateur Radio Society is on the air and having a natter night. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Tuesday 7 December Chester & District Amateur Radio Society is holding its construction contest at Burley Hall. Details from Barbara Green on 07957 870770.

On Tuesday 7 December Halifax & District Amateur Radio Society is planning the club's on-air and /P activities during 2011. Contact Martin, M0GQB, on 01422 341317.

On Tuesday 7 December Preston Amateur Radio Society taking part in the 144MHz SSB Club Contest using the new mobile shack. Contact Richard, M0RDZ, on 0785 587 3566.

On Wednesday 8 December Hornsea Amateur Radio Club is holding a committee meeting. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 8 December Maltby & District Amateur Radio Society is closed due to the QTH not being available.. Contact Keith, G1PQW, on 07701 156 678.

On Wednesday 8 December Mid-Cheshire Amateur Radio Society is having a surplus equipment sale. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 9 December Preston Amateur Radio Society is having an antenna surgery with Bill, G3NQX. Contact Richard, M0RDZ, on 0785 587 3566.

On Thursday 9 December Ripon & District Amateur Radio Society is holding its Christmas quiz. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 9 December South Manchester Radio and Computer Club has a PC clinic with Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 7 December Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 8 December Lothians Radio Society has its Christmas curry night. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com.

On Wednesday 8 December Paisley YMCA Amateur Radio Club is having a talk on home brew linear amplifiers for HF and VHF by GM3UCI. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 8 December West of Scotland Amateur Radio Society is working on construction projects & Licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Friday 10 December Kilmarnock & Loudoun Amateur Radio Club is having a quiz at the Barr Castle Social Club, Henrietta Street, Galston. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Friday 10 December West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 5 December Bittern DX Group commences its Foundation course. Details from Linda, G0AJJ, on 01692 404154.

On Monday 6 December Basingstoke Amateur Radio Club is having a family evening. Details from Clive, G4ODM, on 01256 326050.

On Monday 6 December Braintree & District Amateur Radio Society is having a club social. For more information contact John, M5AJB, on 01787 460 947.

On Monday 6 December Burnham Beeches Radio Club is having its Christmas dinner. Contact Dave, G4XDU, on 01628 625 720.

On Monday 6 December East Kent Radio Society is having an illustrated talk on Bletchley Park by Eileen and Karl. Details from Karl Davies, M1DFM, on 01227 710120.

On Monday 6 December Southdown Amateur Radio Society is holding its Christmas social at Chaseley. Details from John, G3DQY, on 01424 424 319.

On Monday 6 December Surrey Radio Contact Club is having a presentation by Darren Parvin, M0PRV, of the Croydon Airport Model Flying Club. Contact John, G3MCX, on 020 8688 3322.

On Monday 6 December Verulam Amateur Radio Club is holding a committee meeting. Details from Ralph, on 01923 265572.

On Tuesday 7 December Andover Radio Amateurs Club is invites members to bring in their military equipment for a discussion and workshop evening. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 7 December Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 7 December Chelmsford Amateur Radio Society is having a talk on the joy of contesting by Mark Haynes, M0DXR. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 7 December Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 8 December Aylesbury Vale Radio Society and Chesham & District Amateur Radio Society are having a joint Christmas party, hosted by Roger, G3MEH.. Details from Roger, G3MEH, on 01442 826 651.

On Wednesday 8 December Darenth Valley Radio Society Quiz Night plus Fish & Chips. For more information send an email to Ray, G0FDU@G0KDV.com.

On Wednesday 8 December Harwich Amateur Radio Interest Group is holding its AGM & Christmas social. Details from Kevan, 2E0WMG, on 07766 543784.

On Wednesday 8 December Havering & District Amateur Radio Club is having an informal evening. Contact John, M0UKD, on 07817 365354.

On Wednesday 8 December Norfolk Amateur Radio Club is having an informal, construction and workshop evening. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 8 December South Essex Amateur Radio Society is having its Christmas social and DVD show. Contact Norman, M0FZW, on 01268 692776.

On Wednesday 8 December Southgate Amateur Radio Club is holding its AGM. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 8 December Worthing & District Amateur Radio Club is having a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 9 December Bittern DX Group is having an informal club meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 9 December Echelford Amateur Radio Society is holding its Christmas party. Contact John, G4GSC, on 01784 451898.

On Thursday 9 December Edgware & District Radio Society is holding its grand junk sale. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 9 December Lowestoft & District PYE Amateur Radio Club has the Jack Walker Construction Trophy and quiz night. Details from Lee, 2E1LJL, on 01502 564242.

On Thursday 9 December Reading & District Amateur Radio Club is holding its AGM followed by a cheese & wine or beer soiree. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 9 December Shefford & District Amateur Radio Society is having a mince pie evening. Details from David, G8UOD, on 01234 742 757.

On Friday 10 December Cambridge & District Amateur Radio Club is watching Mirror in the Sky, a film on shortwave propagation. Contact Ron Huntsman, on 012233 501712.

On Friday 10 December Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371.

On Friday 10 December Wimbledon & District Amateur Radio Society is having its Christmas Social. Contact Andrew Maish, G4ADM, on 020 8335 3434.

On Saturday 11 December Newbury & District Amateur Radio Society is having its Christmas Dinner. For more information contact Rob, G3LMW, on 01635 862737.

NEWS FOR THE SOUTH WEST

On Tuesday 7 December Blackmoor Vale Amateur Radio Society is having a VHF evening in the club shack. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 8 December Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 8 December Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 9 December South Bristol Amateur Radio Club is preparing for its Christmas social. Contact Len, G4RZY, on 01275 834 282.

On Thursday 9 December Swindon & District Amateur Radio Club is holding its Christmas dinner. Contact Den, M0ACM, on 07810 317750.

On Thursday 9 December Yeovil Amateur Radio Club is having a Yeo Project evening. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 10 December Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Sunday 12 December Blackmoor Vale Amateur Radio Society is holding its Christmas dinner. Contact Tony, G0GFL, on 01258 860741.

NEWS FOR WALES

On Monday 6 December Dragon Amateur Radio Club is having a talk on government secret bunkers by Les Hayward, MW0SEC. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Tuesday 7 December Wrexham Amateur Radio Society is having its club dinner. More information is on the web at www.wrexham-ars.co.uk.

On Thursday 9 December Aberystwyth & District Amateur Radio Society is having its Christmas dinner at Aberystwyth Cliff Railway. Details from Ray, GW7AGG, on 01970 611853.

SARL NEWS - SUNDAY 05 DECEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

CALL FOR PAPERS FOR 2011 SA AMSAT SPACE SYMPOSIUM

TONIGHT'S INTECNET WILL FOCUS ON INNOVATION IN AMATEUR RADIO

SARL PRESENTATION AT THE ICASA HEARING WELL RECEIVED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

CALL FOR PAPERS FOR 2011 SA AMSAT SPACE SYMPOSIUM

The 2011 SA AMSAT Space Symposium will be held in Gauteng on Saturday 26 March 2011 at Vodaworld in Midrand. This is the first call for papers. Authors are invited to submit a synopsis in a MSWord document not exceeding 300 words. The synopsis should be mailed to saamsat@intekom.co.za with Space Symposium 2011 in the subject line. The theme of the conference is Innovation in Space Communication. Closing date for paper proposals and a synopsis is 20 January 2011. For more details visit www.amsatsa.org.za.

TONIGHT'S INTECNET WILL FOCUS ON INNOVATION IN AMATEUR RADIO

Join Hannes Coetzee ZS6BZP and John Willescroft as they debate whether Amateur Radio needs innovation or not! It is on the air at 19:30 on various repeaters around South Africa and on 3 718 HF. It can also be heard on a webcast and Echolink by courtesy of Chris Smit ZS6FCS. Visit www.asrl.org.za and select armi for details.

Clubs wishing to set up a link should send a mail to armi@sarl.org.za before noon today, Sunday 5 December 2010.

SARL PRESENTATION AT THE ICASA HEARING WELL RECEIVED

The SARL presentation to ICASA at the public hearing was well received. The Chairperson, Dr Marcia Socikwa, thanked the SARL for the input which she described as of being of great assistance in preparation of the final regulations.

ICASA did not confirm nor deny if only the Amateur section and the general section applied to radio amateurs, the SARL is therefore preparing a supplementary submission to ensure that other sections of the draft regulations do not adversely impact. The SARL will submit the supplementary submission on Wednesday 8 December. It will be available for comment on Monday 6 December.

To download the SARL presentation visit www.asrl.org.za and you will find a link in the news item.

SARL WEB MOVED TO A NEW SERVER

Continuing problems with the SARL web has prompted the ISP, Imaginet, to move the SARL website to another server. It is still too early to judge whether this has improved the situation. Comments can be sent to armi@sarl.org.za.

24 CPUT STUDENTS PASS THE RAE

24 Students, of which 22 are part of the Cape Peninsula University of Technology, passed the class A Examination and the HF assessment test and are now the proud owners of brand new ZS1 call signs. Congratulations. A special examination and HF assessment sessions were arranged at the University.

HABEX 3 TO FLY ON 18 DECEMBER 2010

On 18 December the HABEX team will be launching a third high altitude balloon, carrying various payloads in preparation for a schools launch in 2011 consisting of about 8 schools. The Sci-Bono discovery centre in conjunction with the Gauteng department of education initiated this project to support the Electrical Technology Curriculum and provide expanded opportunities to learners in this field.

The payload is made up of 4 separate modular units. The primary part of the payload is the controller board which has been locally designed and built and contains an APRS unit which will provide the balloon location during the flight.

Also on the board are 8 inputs and outputs that can be configured for analogue or digital operation. This will allow various sensors to be attached and monitored as well as certain actions to be taken. An example is activating the release mechanism which will separate the payload from the balloon. All the data will be transferred via the APRS packets.

Also in the payload will be a beacon transmitting a message in CW on 7 023 MHz. Listeners are encouraged to send QSL cards to ZS6SCI if the beacon was heard.

A Parrot repeater on 438,500 which includes a backup APRS unit is also onboard. During the flight, if the parrot repeater is not in use, the APRS unit will transmit its data.

Lastly, a GSM APRS unit will also be flying at the bottom of the payload string. If listeners are interested, there are a number of activities they can partake in. Firstly, the balloon can be tracked live via the internet. Go to "aprs.fi" and type in ZS6SCI-3 into the "track callsign" box. By clicking on the "Google Earth KML" URL, the flight can be monitored in Google earth and the listener is allowed to not only track the balloon over the ground, but to also tilt the axis and watch the altitude at the same time.

The Habex team is finalising the data sheet and listeners are encouraged to visit the HABEX web site at www.habex.za.net.

THE PEARS HF QSO PARTY

The annual PEARS HF QSO Party will be run this afternoon from 12:00 UTC to 16:00 UTC. It is a SSB only contest with activity on 3 603 - 3 650 and 3 700 - 3 800 kHz and 7 060 - 7 100 and 7 135 - 7 200 kHz.

There are four entrance categories: Novice - Stations in South Africa with ZU prefixes; Restricted - Stations in South Africa with ZR prefixes; Unlimited - Stations in South Africa with ZS prefixes and; DX - stations outside of South Africa.

There are no limitations on the power of stations, or the number of operators, or the location of station equipment except that all operators shall operate within the limits of their licenses at all times.

The exchange is call signs, signal report and the operator's names. Logs must be sent to PEARS QSO Party, PO Box 10402, Linton Grange, Port Elizabeth 6015, South Africa or via email to contest@pears.ham-radio-op.net. The closing date for submission of logs is 31 December. The complete rules can be found on page 38 of the 2010 SARL Contest Manual.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. New sunspot 1 131 is big but so far quiet. The effective sunspot number is expected to be less than 25 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europa on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible at sunset on 20 m. 15 m openings to Brazil and South America are possible

during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS FOR THE WEEK

5 December - PEARS HF QSO Party from 12:00 UTC to 16:00 UTC; 5 December - Tonight, Intechnet at 19:30 - debate on innovation in amateur radio on repeaters and 3 718 kHz; 18 December - Launch of third HABEX high altitude balloon, parrot repeater on 438,500 MHz and CW beacon 7 023 kHz; 31 December - Closing date for submission of los for the PEARS HF QSO Party to contest@pears.ham-radio-op.net; 20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms; 20 January - Closing date for submission of proposals and synopsis of papers for 2011 SA AMSAT Space Symposium to saamsat@intekom.co.za; 30 January 2011 - Closing date for phase 1 of the construction competition.

SARL News invites clubs and individuals to submit terms of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

Official Broadcast Has Been 25 Years Under The Control of ZL2BHF
On 19-December-2010, the date for the last Official Broadcast (OB) for 2010,
celebrates the twenty-fifth year that the OB has been under the control of
Jim Meachen ZL2BHF.

Jim has prepared all the OBs during this time and has presented most of
them.

For the 19-December OB, Jim has compiled from his archive, some memorial
broadcasts from presenters that are not with us now.

The NOV/DEC Break-In is to have a report on Jim's quarter-century of work
with and devotion to the OB.

Congratulations Jim, from all of us:
Amateurs in New Zealand and around the World

>From The Business Manager ZL2DL
Debby says...
Break In: will be mailed out on Friday 10th December. This is due to ensuring the accuracy of the errata list of missed call signs in Call Book and production of the CD Rom call Book. Included on the CD Rom will be a complete list of Break In from 2005 to end of 2010.

Remits: please send your branch remits to me no later than the 31 December 2010. I need time to collate and prepare them in Council papers for the February meeting.

Elections: Please forward all nominations for Council and President by the 31st December. Please note, the last date for acceptance of any nominations will be 11am on the morning of the first working day back after new year. I.E January 5, 2011 at 11am.

Calendars: The Amateur Radio Calendar sold well at the 2010 Conference but has dropped off your radars. In order to avoid a loss we have reduced the price and hope to end up at break even having provided a service to the amateur community. It is Christmas time when calendars are traditional gifts and the price of $5 each plus postage (now $1.80 for up to 3 copies) reflects that it now only has 6 months to run up to the next Conference. You never know, this may become a collectors item.

Orders may be sent to Peter Loveridge, ZL1UKG at peterlov@ihug.co.nz or by phone to 09-3773398 or by mail at 5 Mostyn Street, Kingsland, Auckland 1021.

The contents of this calendar is shown below.

HQ Closed: Headquarters will be open through the short weeks of Christmas and the new year, however will be closed from Monday 10th January to Tuesday 25th January.

And finally, in memory of the Pike River Miners, I would like to share the following that was sent to me.

1) They came from near and far away
The men of Pike to work that day
The afternoon shift way down deep
Beneath the mountains oh so steep

2) The afternoon shift sets about
A job not flash but hard and trying
A job that holds the risk of dying

3) From seventeen to sixty two
They start their shift to see it through
For one his first, for all their last
How could they know there'd be a blast?
For all at once no siren whining
Suddenly the worst in mining

4) Dust and rubble fill the air
A loader driver thrown clear
Just one other finds the light

The rest are hidden from our sight

5) And so we learn as news is spread
The news that mining families dread
It's up at Pike there's an explosion
Faces drop and hearts are frozen
Who, how many, where and why ----
Will they make it ---- will they die

6) Fathers, husbands, brothers, sons
Coasters, Kiwis, Aussies, Poms
Mates and friends who we are seeking
Methane gas from coal seams leaking

7) Vents exploded, phones unheeded
Level heads and strength are needed
The world above unites as one
To bring the missing to the sun

8) Rescue teams are standing by
As holes are drilled and experts try
To find a way that's safe and sound
To rescue those beneath the ground

9) Could robots work where men are mortal
To pierce the dangers of that portal
But alas all effort fails
The darkness of the mine prevails

10) A second blast of rock and thunder
Hope and prayers are rent asunder
A nation weeps and Coasters mourn
Pike falls silent, dark, forlorn

11) A hole remains within the ground
Devoid of joy, of life, of sound
Another hole within the heart
Of those forever set apart
From those they loved who went to toil
Digging coal beneath the soil

12) Those who gave their lives that day
To work a shift for honest pay
They wait at rest within their mine
The men of Pike, the Twenty Nine

Written by Sean Plunket

Talk soon...Debby ZL2DL (yep I have changed my call sign!)

Call Book News
As members will be aware, there are a number of errors in the callsign
listings in the 2010 Call Book.

These listings are based on information extracted from SMART for us by the MED. Unfortunately, the final list supplied by the MED omitted a number of callsigns that had appeared on previous lists. It is not clear at this stage what caused this to occur but the MED has written to us apologising for the errors.

Such an error should not happen again as the MED is planning to introduce a new facility to SMART during 2011 called "web services". This will enable us to extract our own callsign listings from SMART.

A full copy of the email received from the MED is available on this link http://www.nzart.org.nz/council/policies/2010-2011-nzart-call-book/ for those that would like further information.

There will be an errata sheet containing corrections to all the callsigns that we have been able to resolve in the November/December Break In along with the Call Book on CD which will also incorporate the corrections. These corrections have been arrived at from membership records, and also those errors reported to the Call Book team.

The item above has come from two sources. Principally from a summary of correspondence with RSM by the ALO (Don Wallace), and from the Call Book Editor (Lorne Douglas).

Phil King
NZART Council

Digital Amateur Television (DATV) Update
The data compression, inherent in all forms of digital television, permits the simultaneous transmission of many video and audio streams in the bandwidth previously occupied by one analogue television transmission. This technique is a feature of Broadcast digital television.

On Saturday, the 4th of December, 2010, a group of Wellington and Hutt Valley Amateurs simultaneously multiplexed four video and audio streams into one digital television transmission, using low cost equipment.

The transmission was centred on 1282 MHz, in accordance with the NZART bandplan (page 4-11 of the latest Call Book), and occupied 1274 to 1290 MHz, the same bandwidth as one analogue FM television transmission. The DVB-S modulation format was used, receivable on an unmodified satellite TV set-top box.

Further development and testing is planned, with the aim of transmitting the four video and audio streams within an 8 MHz bandwidth, half that used by the above tests, using the DVB-T modulation format, receivable on an ordinary Digital Terrestrial television receiver.

The team was led by Doug, ZL2TAR, assisted by Gavin, ZL2TVM, Dick, ZL2TGQ and Phil, ZL2TIQ.

A 23 cm Repeater For Upper Hutt - Climie 200
Just to advise for your records and maps on the NZART web site, the licence for the 23CM Repeater has been approved and paid for, so is now live. The new repeater,is called Climie 200 - using the standard naming conventions

from FMTAG.

The actual repeater will be on site soon we hope!
ZL2UFI

PG&E (California) Considers Smartmeter*** Compromise
Wireless SmartMeters Jeopardize Health would be another heading for this article. (ED)

Pacific Gas and Electric Co. (PG&E) is considering options for customers who fear that the utility's new, wireless SmartMeters jeopardize their health, although company representatives won't say what those might be.

"We want those customers to understand that we take their concerns seriously," said PG E spokesman Jeff Smith. "We're still in a preliminary stage of review, including weighing the costs of any options. We will make this information public in the coming months as we develop it."...
See link below for the full article:
http://www.nzart.org.nz/news/2010-news/nov-2010-news/#nov10

***A smartmeter is an advanced meter (usually an electrical meter) that records consumption in intervals of an hour or less and communicates that information at least daily via some communications network back to the utility for monitoring and billing purposes (telemetering). Smartmeters enable two-way communication between the meter and the central system.

DX Code of Conduct Power Point Slide Show
This letter is being sent to all who signed up as Code Supporters. I want to give you an update on our activities and tell you about a new resource.

1.. Since April we have had the Code translated into some 30 languages so as to reach EVERYONE.

2.. We have also been working with the various national societies and clubs to spread the word to their constituencies...

For more information please goto:

Web Update
Change to a CMS Web Site
The change of the NZART Web to a SilverStripe Contents Management System (CMS), was done on Saturday of 27-November-2010. Other than having to refresh your browser window after the change was made, the change over ran very smoothly. Thank you Jim ZL2IA, for the work on the SQL databases.

Weird and Wonderful
Shortwave Radio Frequency Causes Amnesia
Hello Iï¿½m Jim Linton VK3PC with another from the Weird ï¿½NWonderful File.
Taking on the shape of an urban myth are stories of people suffering loss of
memory after tuning their radios to 6955 kHz.

Apparently this is where numbers stations exist, originally thought to be
coded messages for spies but now thereï¿½s a new theory that they are
automatically generated, a key to the universe, existed since the earth

began, and even Marconi heard them in his early experiments.

The fascination with the frequency and beliefs now developing around it can be traced to a science fiction show called Fringe in the United States which has dramatically promoted the fanciful 6955 phenomenon.

The story goes that 15 people suffered amnesia after listening to the same frequency. They suffered some kind of convulsion and their memories were wiped.

So is there a moral or warning in all this for radio amateurs. Yes, stay without our band limits, and doni¿½t be tempted to sandbag beyond the lower edge of the 40m band, just in case.

(Jim Linton VK3PC)

>From The Radio Amateurs of Canada Web Site
"Amateur Radio exists as a frequency spectrum user because it qualifies as a service. Its continued existence depends to a great degree not on the service it has performed in the past, or on its simple potential for service, but on what service it is performing now and will continue to perform in the future."

Radio News Bulletin
Sunday 5th December 2010

Silent Key

It is with great sadness that we have been informed of the recent passing of Fintan Murphy EI8C.Fintan will be sadly missed by his family and friends.

May he rest in peace.

IRTS Outgoing QSL Service

Due to further recent losses with batches of QSLs in the post system, Tony EI8JK the IRTS Outgoing QSL Manager, has started a service whereby if he is made aware of cards being sent to the Outgoing Bureau via email, Tony will in turn advise when the cards have been received.

It is thought that already about 50% of Bureau users are already doing this and if the number can be increased it will add to the comfort of not only the Bureau Manager expecting batches but also the user being made aware of when the cards have been received etc.

For members who wish to avail of this service please email Tony him once cards have been sent, Tony's email address is ei8jk /at/ amsat.org

---

ARRL 10 Metre Contest

The annual ARRL 10 metre contest, which takes place this coming weekend (11th and 12th December) has always been popular with EI operators as a way of working some of the rarer US states and Canadian provinces. Band conditions over the past few years have not been particularly favourable for Northern European stations, but given that conditions have continued to improve as Solar Cycle 24 progresses, perhaps this year will be better.

For 2010, for the first time, the 32 Mexican states will count as multipliers. The other multipliers in this contest are the US states, Canadian provinces and DXCC countries. The contest is an "everyone works everyone" contest, for both phone and CW. See the ARRL web site for full details.

DX News

It is 50 years since what is now the Democratic Republic of the Congo gained independence from Belgium. A group of Belgian operators will be QRV from their former colony as 9Q50ON (Nine Queen Fifty Oscar November) from now until 13th December. QSLs go via ON4BR.

The DXpedition to Sable Island off the coast of Canada which had to be rescheduled recently due to mechanical trouble with their aircraft is now due to start on 6th December. Operation will take place until 13th December. The calls to look for are N0TG, AA4VK and WA4DAN with of course the /CY0 (Stroke Charlie Yankee Zero) addition to their call. This should be a popular expedition for DXCC chasers as Sable Island does not show up that often on the bands.

Zimbabwe is a country that is appearing more often nowadays and following the recent activity by Z24EA during November another visitor in the shape of VK6DXI will be there on a business trip till 17th December. He will be using the call Z21DXI and QSL info is via SP5UAF.

Following on from their successful trip to the island of Niue where the callsign ZK2A was given a good airing the same group of intrepid expeditioners is now operating as VK9NN from Norfolk Island until 19th December. QSL info is via PA3LEO. DXers will immediately associate Norfolk Island with the late Jim Smith VK9NS the celebrated DXer who lived there for many years till his death in February 2009.

A group of American operators who go under the name of The Buddies in the Caribbean DXpedition Group are returning to the island of St Lucia this month and will be active as J6/home call until 13th December. Their speciality is that they operate with 100 watts or less and use the Buddipole portable antenna system.

This week in History

1902 Marconi transmits from Cape Breton Is. to Cornwall. Recorded on tape.

1924 First photo facsimile transmitted across Atlantic by radio

---

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or
more likely a "BUSTED CALLSIGN". As always, you never know - "Work
First Worry Later" (WFWL).

5K3, COLOMBIA. A team of five Colombian radio amateurs will activate the
special callsign 5K3B on December 8th. Activity is to celebrate the
Bicentenary Colombian Independence from the district of La Candelaria,
in the historical center of Bogota. Operations will be on 80-2 meters
```

using CW, SSB and the Digital modes. QSL via HK3O. Suggested frequencies are:
CW - 3524, 7024, 10104, 14024, 18074, 21024, 24904, 28024 and 50105
SSB - 3790, 7065, 7150, 14195, 21295, 28495 and 50105
Digi - 7038, 10142, 14084 and 18100 kHz

Activity is good towards an award for the 50 best, most interesting and beautiful sites in Colombia. See: http://www.macodex.com/bases.htm For more info/details, see QRZ.com.

6W, SENEGAL. Dave, WJ2O, will be active as WJ2O/6W during the ARRL DX CW Contest (February 19-20th) as a Single-Op/All-Band/High-Power entry. Dave informs OPDX that he will arrive in Senegal on February 17th and will be leaving on the 23rd. Activity outside of the contest will be 100% on CW and mostly on the 30/17/12 meter bands. Logs can be viewed in an "almost real-time" at <wj2o.com>. QSL via WJ2O.

9L, SIERRA LEONE (Update). Stephen, G7BXU, will be spending the Christmas and New Year holidays in Freetown between December 19th and January 7th. He hopes to be on air most days using the callsign 9L1BXU. His equipment will be a FT-897 and a G5RV antenna. QSL via his home callsign after his return.

A6, UNITED ARAB EMIRATES. By the time you read this Don, N1DG, is expected to leave Qatar (where he was active as A71A) to arrive in U.A.E on December 5th, for three days because of his job. However, his activity will be limited due to his work; he is expected to operate from the A61AD station once again, possibly on 12 and 17 meters using CW, SSB and RTTY. The A61AD station does have a 4 element SteppIR for 20-6 meters, so Don's activity will be limited to those bands. Logs will be uploaded to LoTW upon conclusion of his trip.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA. Visit his Web page at: http://blog.yam.com/bx5aa

C6, BAHAMAS. Drew, N2RFA, will once again be active as C6ABB from Nassau (NA-001) between February 7-17th. Activity will be on 80/40/20/17 meters. He plans to operate on some of the Digital modes (PSK31, RTTY and possibly SSTV). QSL via his home callsign.

CY0, SABLE ISLAND (Update). By the time you read this, the CY0 team should be in Halifax, NS, Canada, completing the final logistics. The latest report states that all equipment and supplies have already arrived in Halifax - the departure point to Sable Island. The charter flight to Sable Island is scheduled for an early morning departure on Monday, December 6th. The CY0 team is hoping to be "ON THE AIR" by 2100z, Monday, December 6th. Operators Randy/N0TG, Ron/AA4VK and Murray/WA4DAN will sign homecall/CY0 through December 13th. Suggested frequencies are as follows (listening up, unless noted - also +/- QRM):
CW - 1826 (down for JA), 3523 (up or down), 7023, 10106, 14023, 18072,

21023, 24892, 28023 and 50090 kHz
SSB - 1843, 3781 (and JA window), 7135 (up or down), 14130, 14190 (alternate), 18145, 21295, 24945, 28450 and 50125 (listening freq.)
RTTY - 3585, 7050 (up or down), 10140 (down), 14080 (down), 21089 and 28089 kHz
QSL "all" callsigns DIRECT via N0TG or the preferred QSL route is via the "ONLINE QSL REQUEST Service". QSL instructions and options are listed on our Web site: http://www.CY0dxpedition.com (Click on How to QSL)

DXCC NEWS (From "DX-World.Net"). Bill Moore, NC1L, Awards Branch Manager, reports that the following eight operations from Africa have been approved for DXCC credit:
9Q/DK3MO - Democratic Republic of the Congo; 2007 through the present
3C0C - Annobon; 2010 Operation
3C9B - Equatorial Guinea; 2010 Operation
3V9A - Tunisia; 2010 Operation
3V0A - Tunisia; 2010 Operation
TS7TI - Tunisia; Also includes /p operation; 2010 Operation
TS8P - Tunisia; Also includes /p operation; 2010 Operation
TS9A - Tunisia; 2010 Operation

E51, SOUTH COOK ISLANDS. Andy, AB7FS, is now active as E51AND from Arorangi on Rarotonga Island (OC-013) until January 1st (2011). He plans to operate on or around 14260 kHz (IOTA Frequency) using 100 watts into a vertical and/or long wire. However, there was a 15 meter spot reported on the cluster network. PLEASE NOTE (via QRZ.com): Andy states the following: "I'm NOT a DXer - much more of a rag-chewer - so please have patience with my operating procedures -- I'm on the air to have fun, not to score the maximum number of contacts in the shortest time. I don't collect QSL cards or awards, but will happily QSL to people who send an SASE or IRC." QSL via his home callsign. See QRZ.com for some pictures he has taken from past visits.

E2E, THAILAND. Charly, HS0ZCW/K4VUD, will operate the ARRL 10 Meter Contest (December 11-12th) as E2E on CW and SSB. QSL to HS0AC.

E51, SOUTH COOK ISLANDS. Compton, VK2HRZ, will be active as E51HRX from Rarotonga Island (OC-013) between December 13&#65533;20th. Activity will be on 40/20/6 meters SSB only. QSL via VK2HRX.

FREE MAGAZINE. A Spanish ham radio magazine is now free to download in digital format from: http://www.radionoticias.com
You can now download the December issue. The magazine includes info on transceivers, receivers, antennas tests and much more. Also, DX, contest, shortwave, propagation and plenty of radio information is included. The publication is also interactive, including videos and direct links to the importers.

II7, ITALY (Special Event). Look for special activity by the members of the ARI Taranto Section to celebrate the "Italian Ships Nave Cavour" (II7IASM) and Nave Duilio (II7IADU) between now and December 31st. QSl via IK7WDS. For more info, see: http://www.aritaranto.it

IOTA NEWS.....
NA-138. John, K8LJG, will be active as K8LJG/4 from Amelia Island
between now and January 4th (2011). Activity will be on the
regular CW and SSB IOTA frequencies usinh a Kenwood TS50s
and a G5RV antenna. QSL via K8LJG.

OC-130. By the time you read this Peter, DK2PR, is expected to be on
the Island of Mindanao (WLOTA 2803) in the Philippines until
January 3rd, 2011. The Island of Mindanao is called "The Land
of Promise". He hopes to be active on all HF bands. He may
also activate other Philippine islands. QSL via his home
callsign, direct or by the Bureau.

SA-031/
SA-097. (Update to OPDX.984) Operators Cezar/VE3LYC and Johan/PA3EXX
will attempt a very challenging expedition to Wollaston Islands
(SA-031) and Diego Ramirez Islands (SA-097) between approx.
January 7-22nd. The team will have three transceivers (w/100
watts) and two Multi-band verticals (with and without traps).
QSL via VE3LYC, by the Bureau or direct (mail or PAYPAL; see
Web page for details). A Web page is now active at:
http://ce9iota.weebly.com/index.html
This is not only a difficult but also a very expensive oper-
ation. At this time the team seeks enthusiastic groups and
individual donors who wish to be part of this effort. Financial
support can be sent by mail to Cezar/VE3LYC or PayPal to:
tiberius.trifu@gmail.com
All contributions to this project will be acknowledged.

KH6BZF PROPAGATION FORECAST/REPORT (For December 6-12th)....
Dec 6 AN SOLAR REFERENCE KEYS
Dec 7 AN-HN --------------------
Dec 8 AN BN - Below Normal
Dec 9 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 10 AN LN - Low Normal
Dec 11 HN-AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 12 HN-AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OA, PERU. Martijn, PA3GFE, will be here for a month and plans to be active
as OA4/PA3GFE sometime between December 28th and January 28th. Activity
will be holiday style on 40-15 meters, possibly 80m, using mainly CW and
the Digital modes. QSL via his home callsign, by the Bureau or direct.

PJ2, NETHERLANDS ANTILLES. Members of the Caribbean Contesting Consortium
(CCC) will once again activate Signal Point Station on Curacao (SA-006,

WLOTA LH-0942) as PJ2T during the CQWW DX 160m CW Contest (January 28-30th, 2011) as a Multi-Op/High-Power entry. Operators will be Jeff/K8ND and Jim/W8WTS. QSL via LoTW or direct to N9AG.

TDXS NICARAGUA LOG SEARCH WEB PAGE NOW ONLINE. Steve, W9DX, informs OPDX that he now has the November 2010 "Texas DX Society's" (TDXS) DXpedition log search for Nicaragua activated online at:
http://www.tdxs.net/h7v/logsearch.htm
The CQWW DX CW Contest QSOs are included. Logs include H7V, YN2EA, YN2PF and YN2WF. QSL Manager for all callsigns is W5PF.

LOTW UPLOAD. Flaviano, I2MOV, informs OPDX that he has uploaded about 80,000 QSOs on LoTW with the following callsigns: I1MOV, IK2MOV, I2MOV, 3A/I2MOV and IS0/I2MOV.

QSLS VIA LoTW: 3B9/IZ4AKS, 3B9C, 4Z5LA, 5V7TT, 6V7Z, 7M4CDX, A25SL, BD2RJ/2, C6AKX, CE3FZ, CT1EKY, DL1YD, DL5DSM, E74A, E79D, EA3GHZ, EA3GLB, ER0FEO, ES1BA, EU7SA, EY8MM, F1MWV, F2DX, FJ/SM5ENX, G4SOF, GM6Z, HA2EOA, HB9BGV, HB9JNM, HB9LCW, HV4NAC, JA1GHH, JA1MRM, JA7OUV, JE1LFX, K1AR, K8PO, KG4QW, KH6LC, KH6MB, KH6ZM, KL8DX, LA3ANA, LN9Z, MU0GSY, MW5B, N1IW, NP3CW, OE1DXA, OE9MON, OK3R, P33W, P40L, P49Y, PA/ON6CQ, PA7TWO, OX3XR, RW9C, SP7FFY, SP8HXN, SV1GYG, SV1JG, T70A, UN1L, US5CB, W3LPL, VA3JWR, VA3MJR, VA7AM, VE3QN, VE1AL, VE3IQ, VK6ANC, VU2PAI, XF1RCS, ZA3HA, ZC4LI and ZK2DL

QSLS RECEIVED VIA MAIL: 5V7TT, 9X0TL, AA4V/VP9, BA8AG, BA8AG/4, BV1EJ, CE6TC, CP4BT, E20AS, ER3ZZ, FS/N4ECW, FWD2A, OD5/DL6SN, PJ4I, TO7ZG, TX5TES, UK8OM, V63CJB, VE3AXW, VE7KDU, VK0KEV, VP2V/N3DXX, VP2MAH, VY0X, XR6T, XW1B, YB0/WK1S, YB0NFL, YB9/WK1S, YP2U and ZK3OU

QSLS RECEIVED VIA THE BUREAU: CE6M, JW5LJA, TM5EL, TO2HI, TO4D and TO5SM/p

S2, BANGLADESH. Operators Zorro/JH1AJT, Ted/JJ1LIB, Jon/KL2A, Lee/DS4EOI and A51HI will be active as S21FGC from Dhaka between December 16-21st, with the support of Dr. Zahudul Haque Shipon, S21VA, Vice President of Bangladesh Amateur Radio League, IARU member society. Activity will be on 160-10 meters using CW and SSB. However, they might concentrate on 160/80/40 meters CW. QSL via JH1AJT.

T8, PALAU. Ryosei, JH0IXE/KH0C will be active as T8CW between December 22th and January 6th (2011). Activity will be on 160-6 meters with most operations on the Digital modes, but he will use CW, SSB, RTTY, PSK31, WSJT(JT65A) and SSTV. QSL via JH0IXE.

T8, PALAU. Operators Hitosh "Jin"/JA1LPH and Himeko "Hime"/JG1IDX will be active as T88SC and T88SQ, respectively, from Palau Island (OC-009) between December 8-12th. Activity will be on 20/15/10 meters SSB only. QSL via their home callsigns, direct or by the Bureau.

V3, BELIZE (IOTA Op). German operators Joe/DJ1JB and Max/DJ4EL will be active as V31ML and V31ME, respectively, from four of Belize's islands during January 2011. The duo plan to activate the following IOTAs on the following dates: January 10-11th - Ambergris Caye (NA-073)
January 11-14th - Caye Caulker (NA-073)
January 14-18th - Long Caye (NA-123)
January 18-26th - Tobacco Caye (NA-180)
Activity will be on 80-10 meters SSB using two stations with 100 watts into homemade Quads, a wire antenna and a vertical. QSL via their home callsign, by the Bureau or direct.

V7, MARSHALL ISLANDS (Update/Callsign Change/IOTA Op). The Russian Robinson Club members Tim Tilleman/NL8F (V73TM - not V73CF as first reported) and Yuri Sushkin/N3QQ (V73QQ) are now traveling to Enewetak Atoll and are expected to be there on Monday, December 6th. Their plan is to be on the uninhabited Ujelang Atoll (OC-278, a new IOTA) as V73RRC between December 8-11th. Remember, all dates are subject to change due to transportation availability and weather. Activity will be on 160-6 meters using CW and SSB. QSL V73RRC and V73QQ via N7RO. QSL V73TM via K8NA. PLEASE NOTE: Yuri states, "DO NOT SUBMIT OTHER QSL REQUESTS WITH THOSE FOR SA-031 / SA-097, AS THEY WILL BE AUTOMATICALLY REPLIED VIA THE BUREAU." For updates/live GPS tracking, watch: http://www.oc-278.ucoz.com

VQ9, CHAGOS ISLANDS. Larry, VQ9LA, informs OPDX that he will depart the British Indian Ocean Territory (BIOT), Diego Garcia (AF-006), on January 24th. He states, "My plans are to operate as much as possible up to the last day, will try and put as much low band and RTTY on the air as possible

before my departure date. All logs will be updated to LoTW, direct/Bureau QSL cards via N0QM will also be fine. Sending cards to my Diego address may or may not be lost in the mail due to the post office mishandling of mail. After my departure from VQ9, I will be living in the Philippines part of the year and USA part of the year. All QSL cards after January 2011 will be handled once I make it back to the states next year (May 2011). Once the proper paperwork is filed with the RP Government I will operate a Elecraft K2 transceiver 40-10 meters CW/RTTY. Low band ops will not be possible the first year due to a small house. My callsign should be DU3/N0QM. QSL via N0QM and LoTW."

WH0, MARIANA ISLANDS. Operators Teri/JN7GLC and Kazuhiro "Kaz"/JE7DMH are now active as WH0/WH7C from Northern Mariana Island (OC-086) until December 6th. Activity will be on 80-6 meters using CW, SSB and FM. QSL via JE7DMH. QSO will be uploaded to LoTW/eQSL. Visit their Web site at: http://www.aizuno.com/WH7C

XU7, CAMBODIA. Nob, JA1FMZ, will be active as XU7FMZ between December 9-22nd. Activity will include the ARRL 10M Contest (December 11-12th). QSL via his home callsign, direct (see QRZ.com), LoTW or e-QSL. Visit his Blog page at: http://DXvacation.com

XW, LAOS. Hiroo, JA2EZD, will once again be active as XW2A for another year (specific dates not provided). Activity will be on the HF bands using an IC-706 and TL922 amplifier. QSL via: Hiroo Yonezuka, Box DD153, Huang Sathai, Vientiane, Laos.

ZL8, KERMADEC ISLANDS. By the time you read this, the ZL8X group should be going QRT from Raoul Island (OC-039). QSL via DJ2MX. As of print time, ZL8X has made 143,211 QSOs (81407/CW, 45849/SSB and 15955/RTTY). For updates: http://www.kermadec.de
An online log search is now available for the ZL8X Kermadec DXpedition at: http://www.kermadec.de/service/online_log/index.php

1083. [RAC-Bulletin] RAC Bulletin - 2010-038E - RAC Maple Leaf Operators Membership and changes to International Membership fees

Newsgroup: rec.radio.amateur.misc
Date: 2010-12-06 14:39:41 UTC
From: rac-bulletins@eton.ca
Message-ID: <4CFCF595.8030607@rac.ca>
Source record: 5002
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin - 2010-038E - RAC Maple Leaf Operators Membership and changes to International Membership fees
2010-12-06

The RAC Board is currently looking at the RAC membership rate structure. Among the changes to be made is the introduction of a new membership class and the adjustment of international rates; stay tuned in future bulletins for more exciting developments.

Many members have told us that they place a high value on RAC activities and have asked for a premium membership. RAC is pleased to announce the new Radio Amateurs of Canada Maple Leaf Operators Membership. Members in the first year will receive a signed RAC Maple Leaf Operators Certificate, be listed in TCA, be recognized on the RAC website, and receive a RAC pin with their call sign and more.
The RAC Maple Leaf Operators Membership is $100 per year and is available on automatic renewal. Members who want to can .top up. their existing multi-year memberships at $50/yr. Our RAC office will be happy to help out members who want to upgrade their membership.

The cost of mailing TCA to the United States is roughly equal to the current annual membership fee. The new rate for US memberships is $90 which now covers the mailing costs associated with sending TCA to the US.

The cost of international mailing other than to the US considerably exceeds the current annual membership fee. The new rate for International memberships is $130 which now covers the mailing costs associated with sending TCA Internationally [other than to the United States].

These two rate increases apply only where TCA is mailed. Memberships without TCA are not effected [family, blind, etc.].

Stay tuned for more membership developments!

Geoff Bawden, VE4BAW
President - Radio Amateurs of Canada

ITU-R SG5 Meetings in Geneva

Dale Hughes VK1DSH attended the Study Group 5 of the International
Telecommunications Union meeting in Geneva last month, representing
YOU as a member of the Wireless Institute of Australia as part of an

eight person Australian delegation.

Among the agenda items covered at the meeting was WRC 12 Agenda Item 1.23 "Allocation of about 15 kHz in parts of the band 415-525.6 kHz to the amateur service on a secondary basis".

Preliminary indications are that an amateur frequency allocation is unlikely to be made in the range of 490-510 kHz and that another range of frequencies in the range of 415-490 kHz may be sought.

During the meetings a number of other issues that may affect amateur radio operations were monitored:

1. "Power Line Telecommunications". This topic is related to the "Broadband over Power Lines" problem that amateurs have faced.

2. "Oceanographic Radar" another potential problem as it uses parts of the High Frequency spectrum to observe ocean conditions, ships etc.

THIS FROM JACK VK3WWW

Some months ago I was checking my email and I received a forwarded message from one of the ARDF Group members regarding Foxhunting in VK2. This message was from a Norwegian Television show called "The Golden Goal" which is part of the Rubicon TV Network out of Oslo.

I explained to the enquirer that most of the regular ARDF and Foxhunting activities are in Melbourne and Victoria but they still asked if I could find an event to attend in VK2. I then sent an email off to a a club in VK2 that I know in the past have been active in regular foxhunting. After a couple of weeks the Norwegian contact asked how the hunt was going , I explained that there was no reply from VK2 and suggested again that VK3 was where the most activity is.

They must have gone off and had a think about it and came back with the comment "we are now coming to Melbourne can you arrange an event for us to attend" I gave them some options and they suggested that the foxhunt on December the 10th suited them perfectly. I then explained that an ARDF event would be far better than a vehicle based foxhunt and they thanked me for my suggestion but their decision was made.

Worried that this may be a bit of a prank I had Bruce VK3TJN who was attending the World ARDF Championships in Croatia speak to one of the Norwegian team members who confirmed that "The Golden Goal" is a high rating sports show and they like to show unusual sports or things that happen associated with sport. I expect the Norwegian sporting enthusiast enjoys watching all kinds of sports.

In Melbourne over the last 20 years we have had several occasions where television crews have attended our local foxhunt so this is not a new thing for us. "The Golden Goal" are sending 2 Presenters, 2 Cameramen a Producer and a Director quite an expensive exercise for out local foxhunt.

Their intention for the event will be to have the 2 presenters and cameramen join 2 of the teams and compete against each other. We are not the only sports they are attending, I do know that they will attend a pre-season training session at the Melbourne AFL Football Club and the day before arriving in Melbourne they will be in VK4.
VK3WWW Jack.

Top End WIA Annual Conference

A number of WIA members have asked that we publish as soon as we could the details of the next WIA Annual Conference, that weekend in May when we combine the AGM and Open Forum with other activities.

On the 15th September we announced that Darwin as the venue for 2011 and that the weekend would be Friday 27, Saturday 28 and Sunday 29 May.

I said then that the Board was much influenced by the fact that the venue was proposed by the Darwin Amateur Radio Club, well known for its success in hosting the SeaNet conference.

Now more than adequate details will be in the December AR and there is already information including an online registration and booking form on www.wia.org.au

There is a link on the WIA home page to the Darwin pages.

We have done a very good deal with the Travelodge Mirambeena Resort in Darwin, for accommodation and for the meetings and dinner on the Saturday. Details are on the website, including details of who to speak at the Mirambeena to make a booking.

So far as travel to Darwin is concerned, Jetstar is well worth investigating. You can book on line now, and when I looked recently, it was less than $400 return from Melbourne.

I am sure that this will be a fantastic weekend, with the Darwin Amateur Radio club as the host club, led by the wonderful Spud Murphy VK8ZWM a quiet, shy guy, and with some pretty exciting visits.

Please register on the WIA website and book travel and accommodation just as soon as you can. That will certainly help us!

We will acknowledge your registration by sending you a copy of the Essential Top End Holiday Guide, so you can work out what else you will do in the Top End.

And I can promise you a memorable weekend.

NEC and The University of Melbourne have been awarded a $4 million grant from the Australian Research Council for research on future broadband wireless technologies.

Gordon Gay, general manager of NEC Australia's Mobile Global Development Group, said: "NEC is already developing devices for 4G, and recognise the need to look even further afield to shape the standards and technology for 5G and beyond in response to the global appetite for mobile broadband."

Citing CSIRO's multimillion dollar fees from its WiFi patents, Gay said: "The intellectual property is becoming more and more critical.

We hope that by going early we will come up with solutions and intellectual property that we both benefit from."

VKG Roundup http://www.police.nsw.gov.au/news

Gosford's "Express Advocate" are reporting on how one Kevin Mead and his partner have spent $100,000 over the past five years on what is probably the Central Coast's most extravagant Christmas lighting display.

Hundreds of people make a point each year of checking out the display at 2 Plateau Rd, North Gosford, with its synchronised music and moving exhibits and its thousands of lights and Christmas figures.

Mr Mead says "2005 we began displays with an FM radio transmitter broadcasting synchronised light and music shows."

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

How great are the forces of nature.

One force that sustains the planet is inertia. This is the force that prevents a body flying off under the attack of a butterfly's wings or stops the mountains from walking across the landscape. Yes inertia is a real force to be reckoned with and maybe we can harness it to keeping our hobby in check.

Just think if people were really enthusiastic, they might stimulate activity.
Just think if people introduced novel ideas, they might walk paths that we haven't trod.
Just think if people had a sense of adventure, they might even go far enough to fall off the edge of the known world.
Just think if people became so enthused they might even try and recruit new members.

We must protect the traditions that have made the Ancient Order of Smoke Signallers and Mirror Flashers what it is today. Give inertia the respect it deserves.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING -

GOLD COAST

11th of December we have the Gold Coast break-up at 10am in the clubrooms. A BYO and please bring a plate to share as well. The Christmas break-up at the Gold Coast will also have all the fun of a FOX-HUNT.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au

Secretary Clive 4928 1173
http://www.radarc.cjb.net/

Greeting from The Rockhampton and District Amateur Radio Club, the RADAR club.
This is Les VK4VIL reporting.

Here's something that may be a first for Queensland and perhaps Australia, a diamond wedding anniversary for two lovely people, both open licence holders with a combined licence duration exceeding 90 years.

On 7th December, that's Tuesday, two long standing members of our club and the WIA celebrate their Diamond Wedding anniversary. Both are proud to advise they're 84 years young.

Gordon Adams VK4GM and his wife Mary VK4PZ were married at the Holy Trinity Church in Blackall in 1950, spending several years there before moving down the road to Jericho where they established a service station. In 1984 they shifted to the big smoke of Rockhampton, before settling at the Caves on a block of land in 1996 where they replanted their antenna farm, probably too conspicuous at their QTH in the developing city.

Gordon obtained his initial licence VK4ZGA in 1963 with Mary taking out a listener's licence in 1968. Mary laughingly explains that she was not theory minded as she calls it and took 10 years to gain her licence after Gordon finally dusted down her books and herself to complete a course. Proudly, Mary was one of four to be successful from an initial class intake of 54.

They have both been continuous members of the WIA since licencing and Mary will stack up 30 years of membership with ALARA in March 2011.

I asked Mary about their radio gear. She explained that she doesn't have old gear, with her pet set an FT101E.

Only about three years behind the diamond couple are John McLean VK4KDN and his wife Estelle and Brian VK4LH and his wife Merrell VK4HAJ. All regular participants at club functions.

Congratulations and the best for the future!

I'm Les VK4VIL on behalf of the Rockhampton and District Amateur Radio Club.

VK6

The Hills Amateur Radio Group will hold a Swap meet on April 9 at their club rooms on Sanderson Rd Lesmurdie.
Entry will be $5 and includes a door prize and tables will be free but MUST be booked.

(vk6zms@iinet.net.au)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Are you a Foundation Licensee wanting to upgrade?

Amateur Radio Victoria is holding another of its popular Standard Licence Bridging Courses to be held in February.

To enrol you need to have the Foundation Licence and make a commitment to attend on four Wednesday evenings, plus a weekend.

The training delivered by Kevin Luxford VK3DAP is structured to assist Foundation Licensees increase their theory knowledge to the Standard level. It also requires some self-study in between classroom nights.

These bridging courses have been popular so early enrolment is recommended.

Inquires and enrolments contact Barry Robinson vk3pv@amateurradio.com.au or phone 0428 516 001.

SILENT KEYS

Alan Shawsmith VK4SS author of Halcyon days has become Silent Key aged 93years and One Day. His Funeral service held last Monday was conducted by VK4BSH the Reverend George Roberts.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

INTERNET CONNECTED HAM RADIO LEGAL IN ZL

Some good news for hams in New Zealand. The government regulatory agency has completed is review of Internet connect ham radio systems and has concluded that no changes are required to the current Amateur General User Radio License conditions to accommodate amateur radio modes such as APRS, IRLP, D-Link, and the like.

A word of congratulations to 2004 Amateur Radio Newsline Young Ham of the Year Andrea Hartlage, KG4IUM, this, on her election as ARRL Vice Director Southeastern Division.

Andrea was declared the winner after garnering 3573 votes and ousting incumbent Jeff Beals, WA4AW.

At age 21, Andrea is believed to be the youngest person ever elected to this high a position in the ARRL political structure. She is currently a student at Georgia Tech studying Aerospace Engineering with hopes of eventually joining the United States Astronaut Corps.

The motion picture industry in California and a unit called the Modulus UHF wireless video assist device is in trouble!

Several companies have been issued Citations for the alleged illegal marketing of the Modulus un-certificated radio frequency device.

The Modulus is a wireless unit designed to transmit composite video-in and retransmit it to a wireless video monitor and eliminating the need for hard wire coax cable between the two, a boon for the motion flick industry.

The FCC has issued an Official Citation to Hobby Lobby International, Inc.. This, for marketing unauthorized radio frequency devices in the United States.

The FCC said that it found they had been selling a product known as the JETI Duplex 2.4 GHz System for radio controlled models. These units, built in the Czech Republic had not been approved for sale in the United States.

The FCC warned of substantial monetary penalties, seizure of equipment, and criminal sanctions. It also gave the company the usual 30 days to file a reply to the citation.

==========

RSGB NEWS FROM G4NJH

Hull man convicted of radio offences

A Hull resident was sentenced at Hull Crown Court on 22nd November for causing deliberate interference to amateur radio users in the Hull region of Humberside between June and November 2009.

The defendant was also convicted of unlawfully using radio equipment without a licence from Ofcom. He had transmitters installed in his van and drove around the region to interfere with legitimate users of the local amateur frequencies. He was sentenced to four months imprisonment suspended for 18 months, a curfew between 7pm and 7am for three months via a means of electronic tagging and forfeiture of his van and radio transmitters to Ofcom.

Commenting on the sentence, Paul Mercer, Head of enforcement at Ofcom, said: "There are around 900 amateur radio users in and around the Hull area, who have been deliberately disrupted for more than four years. Ofcom is very pleased with this result, which will hopefully give these users some welcome relief, as well as sending a very strong signal to those that abuse the airwaves. This followed a dedicated investigation by Ofcom involving six enforcement officers working day and night to bring the culprit to court."

Mr Sheldon, the Court Recorder, commended Ofcom for the quality of the evidence that had been collated and the quality of file presented in court. RSGB General Manager Peter Kirby, G0TWW, said "RSGB volunteers co-operated closely with Ofcom in gathering evidence for this case. This conviction shows that deliberate interference will not be tolerated and can have serious consequences for the perpetrator."

The Radio Amateurs' Emergency Network, the UK's principal organization of volunteers providing radio communications in time of need, and the Radio Society of Great Britain (RSGB), the UK's national society for Amateur Radio, are pleased to announce the signing of a formal agreement between the two organizations providing a framework to progress the closer working relationship between them.

The Network Chairman, Cathy Clark, said "I am delighted to sign this agreement, which promises to bring the two organizations closer together for the benefit of our members and the service they provide to our many User Services."

RSGB President Dave Wilson, said "I would like to thank all
those who've been working behind the scenes on what was
undoubtedly not an easy task to get us to the position we are today."

The signing of this agreement cements on-going co-operation
between the two organizations. Joint working will continue
to ensure the smooth implementation of the Principles of Co
operation described in the agreement.

I'm Jeremy Boot, G4NJH.

The agreement, which had unanimous acceptance by both the
RSGB Board and the Network's Committee of Management, was
signed on Saturday 20th November 2010 during the RSGB
Spectrum Forum meeting in which all parties consider
frequency planning and usage issues.

NEWS FROM ARNEWSLINE

HAM RADIO IN SPACE: NEW HAMSATS ARE ON ORBIT

A cluster of new ham radio satellites are now on-orbit.
Amateur Radio Newslines Norm Seeley, KI7UP, has the latest on these new birds:

Five new satellites are on-orbit. Four are of interest to
ham radio and one has already been heard. Take a listen:
--
RAX Audio Here --

That was RAX-1 as it was heard on 437.505 MHz as it flew
over Hawaii on Saturday, November 20th at about 06:00 local
time. The bursts of static you hear between the band noise
is the 9600 baud RAX-1 transmitter.

But RAX was not alone when it was launched into space at
01:24 UT on Nov 20th. The other for birds are FASTRAC-1
"Sara Lily" transmitting on 437.345 MHz FM using the AX.25
packet protocol at 1200 bits per second.

Then there is FASTRAC-2 "Emma" is its 2 meter counterpart
downlinking on 145.825 MHz with the same mode and protocol as FASTRAC-1.

Next up is O/OREOS is 437.305 MHz.

Last but by no means least is Nanosail D2 that transmits a
half second beacon beacon every 5 sec on 437.275 MHz.

All of these new birds were sent to orbit on-board a
Minotaur-4 launch vehicle from the Kodiak Launch Complex in
Alaska. All of the the satellites are in a 400 mile high circular orbit.

And less we forget, some of these new ham radio satellites
has its own web page. You will find links to each on in this
weeks printed Amateur Radio Newsline report.

With thanks to Ron Hashiro, AH6RH, for providing the audio of RAX,
I'm Norm Seeley, KI7UP, reporting on these new satellites from Scottsdale Arizona.

==========

WEIRD AND WONDERFUL

Humans may become 'wireless towers' in the future

Hello I'm Jim Linton VK3PC with another from the Weird 'N Wonderful File.

Now here's a development that will send shivers right down the spines of those fearful of wireless radiation, make the blood of some reach boiling point or throw their arms up in the air in pure disbelief.

Researchers at Queen's University Belfast are looking to improve the reliability of modern wireless systems. They believe that humans could be turned into wireless towers to create what they call body-to-body networks.

A five year research project is investigating how small sensors carried by people could communicate with each other to create a ubiquitous wireless networking paradigm.

This would provide enhanced bandwidth needed when too many people use their phone in the same cell area, help the service to penetrate weak signal areas or black holes and counteract drop outs that result from interference.

In a rapidly developing science of body centric communications, new sensors carried by everyone with a mobile phone would interact with each other and wireless devices embedded in local surroundings to transmit data, providing anytime, anywhere mobile network connectivity.

The technology also promises to open up the use of wireless communications in a wider range of activities including law enforcement and first responder teams, sports applications through to medical monitoring of patients in their own homes. (Jim Linton VK3PC)

VK1WIA - THE WRITTEN WORD

Neutron bomb inventor Sam Cohen, who in 1958 designed the nuclear weapon intended to kill people but do minimal damage to cities, has died in Los Angeles at 89 of stomach cancer.

The neutron bomb used tiny particles that could whiz through objects with little damage but still kill we humans.

Cohen also helped build the atomic bomb dropped on Nagasaki, Japan in WW2.

OPERATIONAL NEWS -

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010-11

The first event of December is the ARRL 160m contest, taking place from Friday last, the 3rd to today Sunday 5th. It is a slightly unusual event in that the duration is 42 hours.

There are categories for single-op, QRP, low-power, high-power and multi-op.

Dec 10 ARRL 2010 ARRL 10 Meter Contest 0000 U-T-C through Sunday evening
December 12th at 2359 U-T-C.

Jan 15/16 WIA Summer VHF-UHF Field Day
Includes "Microwave Challenge", with special certificates to
be awarded to the participants on microwave bands.
John Martin VK3KM tac@wia.org.au

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

A SOTA activation has been taking place 3 to 5 December from the island of
Rhodes. Using the callsign J45V, CW and SSB on as many bands as possible.
The SOTA reference is SV/AG-055.

Dieter, is working as ZD9T from Tristan da Cunha until 8 December.
QSL via his home call DJ2EH.

In celebration of the 50th anniversary of Independence of the Democratic
Republic of Congo, a team of mostly Belgians and one Dutch are active as
9Q50ON from the DRC from 3 to 12 December, all bands CW and SSB. QSL via ON4BR.

KC4USV McMurdo Station Antarctica is back on the air.
14.243 on Sundays around 0000 GMT is the best time as that is the Hams only day off.

Also listen up for KC4AAA South Pole and KC4AAC Palmer Station.

AA2IP Herb will be active on Amateur Satellites during his 30 day trip around
Antarctica. He left the Falkland Islands on 30 November, will circumnavigate
Antarctica with a possible stop at McMurdo, then on to Hobart, Tasmania 3 Jan.
He is looking at AO-51 and HO-68 with his Hand Held.

8th of December... 5K3B Special Station from Colombia.

A five Colombian radio amateur team, will activate this special call sign in
cw, phone, and digitals modes, in bands from 80m through 6m.

They should 'hit the air' beginning 1400 UTC 8th of December.

phone: 3.790, 7.065, 7.150, 14.195, 21.295, 28.495, 50.105

CW: 3.524, 7.024, 10.104, 14.024, 18.074, 21.024, 24.904, 28.024, 50.105

MEDIA WATCH

Now for a further look into the pages of the December edition of Amateur Radio magazine.

The full details of the WIA annual general meeting to held in Darwin in
May are published. Need to make travel and accommodation arrangements.
Check out the interesting three day program.

The WIA President Michael Owen VK3KI looks back on the wonderful
centenary year celebration and activities.

There's a report on the annual WIA National President's Luncheon, this time held in Rockhampton where the local radio club has set up an amateur radio station in a heritage village.

Digital DX Modes column by Rex Moncur this month looks at 10GHz and a series of contacts he made recently from six grid squares in Northern Tasmania to Victoria.

What is the best band for optical or light beam communications? Paul Edwards VK7ZAS provides answers to that question.

Robin Harwood VK7RH in his regular Spotlight on Shortwave Listening laments the steady exodus of broadcasters from the HF bands.

There are also a few reports from VK3, VK5 and VK6 on the national field day, tune-in to the world amateur radio gets people talking, public relations event. See what those clubs did to promote amateur radio.

Contest news and results, grid square table, DX happenings and much more summer reading can be found in Amateur Radio magazine, a WIA membership service with copies also available at selected newsagents.

November through March 0900 UTC 7.068 MHz

Italian Radio Ham first to receive O/OREOS

Marco IK1ODO, was the first to report receiving signals on 437.305 MHz AX.25

Approximately 19 minutes after launch, O/OREOS separated from the Minotaur IV rocket and entered low Earth orbit at an altitude of approximately 400 miles. About three hours after launch, amateur radio operator, Marco Bruno, in Torino, received the first signals.

After a spacecraft checkout period, O/OREOS autonomously initiated the first of two experiments, which will last approximately six months and transmit data for as long as a year. The second experiment started Friday, Nov. 26.

http://www.nasa.gov/centers/ames/news/releases/2010/10-109AR.html

MARS HOPPER COULD REPLACE MARS ROVER.

Researchers are developing a conceptual motor design for a Mars 'hopping' vehicle which should lead to a greater understanding of the 'Red Planet'.

The hopper can even collect fuel between hops by compressing gas from the Martian atmosphere and can fly quickly between sites, powered by a long life radioisotope power source. It could therefore study hundreds of locations over a lifetime of several years and continually radio its findings back here to Earth.

A video illustrating the concept is available on YouTube
at tinyurl.com/22ujspj
(arnewsline)

WW SPECIAL INTEREST GROUPS --- IOTA http://rsgbiota.org

Marshall Islands IOTA DXpedition

Tim Tilleman NL8F (V73CF) and Yuri Sushkin N3QQ (V73QQ) are on the Marshall
Islands to activate three IOTAs including a new uninhabited island.

Activity will be between November 30th and December 16th.
STILL TO COME,

December 5-7th - Callsigns on Enewetak Atoll (OC-087) are V73CF and V73QQ.

December 8-11th - Callsign on uninhabited Ujelang Atoll (OC-278, a new IOTA) is V73RRC.

December 12-16th - on Enewetak Atoll again (OC-087) are V73CF and V73QQ.

All dates are subject to change due to transportation availability and weather.

Activity will be on 160-6 meters using CW and SSB.

QSL V73RRC and V73QQ via N7RO.
QSL V73CF via K8NA.

WW SPECIAL INTEREST GROUP --- NAVAL

Want to go "halves'" in a Pirate Radio Venture?

Well UK Aircraft carrier HMS Invincible is for sale by tender.

Laid down in 1973 at Vickers Shipbuilding, Barrow-in-Furness, she was completed in 1980.

So at just 30 years of age she will be a VERY good buy!

She is currently stable for tow, but you will need one heck of a lot of tug boats!

Length - 210m, Draught 5.8m, Height 46m, Engines - Removed, Generators and
Pumps - Generally unserviceable or not working.

For this aircraft carrier please contact the supplier on fax 01869 256 070

Australia has donated a new maritime radio communication system to Indonesia
to help it combat maritime threats and transnational crime.
Minister for Home Affairs, Brendan O'Connor, said the Government was committed
to working with its neighbours to achieve the highest possible level of maritime security.
Mr O'Connor said the Government had donated $2 million for the Global Maritime
Distress and Safety System (GMDSS), which started work last week.

He said the new network consists of four Indonesian Maritime Regional
Coordination Centres with the first opening in Bali.

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

DU - PHILIPPINES, OC-130
Peter,DU9/DK2PR, is staying on Mindanao (OC-130) from Dec 5 until Jan 3 and he also wants to activate more IOTA groups on all bands during this time. QSLs via bureau or direct ot his homecall.

E5 - SOUTH COOK ISLANDS, OC-013
Andy,AB7FS, is active as E51AND from Rarotonga (OC-013) and will stay there until Jan 1. He works with 100 watts, a vertical and a longwire. He is doing amateur radio just for fun and has no need to make as many QSOs as possible in a rather short period of time. His preferred QRG is 14260 kHz. QSL via homecall.

Compton,VK2HRZ, will be on Rarotonga (OC-013) as well from Dec 13-20. He plans to show up in SSB signing E51HRX on 40/20/6m. QSL via VK2HRX.

KH5 - JARVIS ISLAND, OC-081
DXpedition to Jarvis Island (OC-081) organized by Radio Expeditions Inc has been postponed until November 2011. During the first half of 2010 the US Fish Wildlife Service developed a draft "Compatibility Determination for Amateur Radio Operations at the Jarvis Island National Wildlife Refuge". This document contains the rules and constraints for DXpeditions at Jarvis and was made available on 21 Jun 2010 for public comments to arrive not later than 5 July.
The FWS Honolulu office staff reviewed the comments, made a number of changes and submitted a final draft for approval at their regional office in Portland, Oregon. The final version was released on 28 July and revised applications for a permit were accepted until 25 August.
The constraints in the Compatibility Determination required a radical restructuring of Radio Expedition Inc's plans, reducing both the number of stations and the time on the air.
Since more than one amateur radio group submitted an application which met the requirements of the compatibility determination,&#65533;a lottery

among the qualified groups was held at the FWS Honolulu office by the refuge manager on 30 August. Radio Expeditions Inc was fortunate to be selected. However, due to the time required to establish the rules for amateur radio operations from Jarvis, the late selection date, and the lead time required to schedule and prepare the MV Braveheart, the expedition has been postponed one year. November remains the best month to visit Jarvis Island from a propagation standpoint, with the largest combination of openings predicted to Europe on both 160/80m and 12/10m.

T8 - PALAU,OC-009
Hitosh "Jin",JA1LPH/T88SC, and Himeko "Hime",JG1IDX/T88SQ, will be active in SSB on 20m/15m/10m from Palau (OC-009) from Dec 8-12. QSLs direct or via bureau to his homecall.

XU - CAMBODIA
Nob,JA1FMZ, will show up as XU7FMZ from Dec 9-22. He also plans to take part in the ARRL 10m Contest. QSL via homecall, LoTW or eQSL. See also: http://DXvacation.com

AUSTRIA, SPECIAL EVENT STATION
The special event station OE40ADXB celebrates the 40th anniversary of the ADXB-OE (Austrian DX Board, OE1XBC) from Dec 15-31. Activities will take place in SSB and CW on 80m-10m, and digital modes on 30m and 20m. QSL via OE1XBC (Austrian DX Board, PO Box 1000, 1081 Vienna, Austria).

COLOMBIA, SPECIAL EVENT STATION
Five HAMs are celebrating the bicentennial anniversary of Colombia's independence using the special callsign 5K3B on Dec 8 starting around 1400 UTC. QSL via HK3O. Activities will take place on following QRGs:
CW: 3524, 7024, 10104, 14024, 18074, 21024, 24904, 28024, 50105 kHz
SSB: 3790, 7065, 7150, 14195, 21295, 28495, 50105 kHz
digi: 7038, 10142, 14084, 18100 kHz

ITALY, SPECIAL EVENT STATION
Some members of the ARI section Taranto are using the special callsigns II7IASM and II7IADU until the end of the year. Both QSLs via IK7WDS.

DXCC: A long letter to NC1L with the proper documents helped a lot: From now on all QSLs of 9Q/DK3MO will be accepted for DXCC credit retroactively from 2007. OM Otto is staying in Bukavu at the moment - a war zone.

SILENT KEYS: Following DXers were announced as silent keys:
Andreas Pavlidas (5B4AC), Henry F. Zimmerman (K4FU),
Jose Queiroz Souto (PR7NJ), Vladimir A. Kryganov (UA3ZK) and
John H. Possehl, Jr. (W3KV)

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Dec 11/12: UBA Low Band Winter Contest
Dec 11/12: ARRL 10m Contest
Dec 11/12: 28 MHz SWL Contest
Dec 11/12: International Naval Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
OC-171, VK4, Queensland State South: Craig,VK4LDX, plans to activate
Magnetic Island as VK4LDX/p from Dec 10-12. QSL via homecall.
See also: http://vk4ldxoc171.blogspot.com

SA-039, CX, Maldonado/Rocha Dep. Group: CW5R will be the expedition call of
YY4AND, PY5EG, PY5CC, PY2EL, CX1ABB, CX6ABC, CX6DAP, CX6ACY, CX8BBA,
CX5BW, CX5BE, CX7BZ and CX2ABC from Isla de Lobos (WLOTA 0799, ARLHS
URU-002) from Dec 8-13. The team will be QRV in CW, RTTY, PSK31 and SSB
on 80m-6m. QSL via CX2ABC.

(L) Logbook of the World (LoTW)
(r) E-mail request

QSL IT9DAA: Corrado,IT9DAA, discontinued his post box due to drastically
increased costs. Corrado is QSL manager for several stations and you
can send mail to him to:
Corrado Ruscica, Via Capitano Salemi 41, 96019 Rosolini SR, Italy.
He also confirms via the bureau very reliably.

QSL 9Y4W: QSL cards for 9Y4W in the CQ WWDX CW 2010 (OP: N6TJ) should be
sent via DL4MDO, bureau preferred. The new QSLs are at the printer now.

QSLs arrived direct: YN4SU and H74LEON (via TI4SU), 5V7TT (via I2YSB)

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF2RG, DF6EX (WIN-QSL),

1087. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.misc
Date: 2010-12-07 07:05:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1291705500@panix.com>
Source record: 5006
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

December 7, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K8YSE and N0TG for the following DX information.

CY0, SABLE ISLAND (Update).
"Monday evening - 2300 UTC. 6 December

There is a small chance of flying to Sable tomorrow afternoon (Tuesay); a more likely chance on Wed 8 Dec, around 1300 UTC.

The storms were fierce Sunday night, however, beach damage not as bad as expected. Water Drainage and temperatures above freezing need to continue.

The team is ready and standing by.
73,
Randy N0TG

DX Special Bulletin No. 988.3
BID: $OPDX.988.3
December 7, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K8YSE and N0TG for the following DX information.

CY0, SABLE ISLAND (Update). Randy and the CY0 Team report: " BAD News! We have just been advised that the beach will not be suitable for landing this week nor next week. Then after next week, that puts us into the holiday period. Thus, we have no choice but to return home, regroup and come up with a new re-schedule. What a bummer!! Certainly 'tis discouraging, expensive, and we know disappointing to all the Dxers following the DXpedition and looking forward to having fun. We will assess the situation over the next couple of weeks and layout our new plan at that time. Sorry. Very 73......"
ANOTHER UPDATE FROM CY0 WEB SITE: "Sable Island DXpedition Update (1545 UTC, December 07, 2010) -- CY0 DXpedition Delayed
We were informed this morning by the Officer-in-Charge (OIC) for Sable Island that the "beach runway" is not suitable for landing and is not expected to be available, at least, through next week. This is a big disappointment to the Team, but we understand that safety for our pilot and the Team is most important.
The Team has met and has agreed that we will reschedule and try again. We will meet with Maritime Air and our pilot in an hour to arrange for storage of our equipment until we can reschedule.
We are committed to our foundation and club supporters and the many individuals that have contributed to this dxpedition, as well as to the many thousands of hams that need CY0 for a new DXCC country or band-country. We also thank those who have visited our website and provided encouragement by 'signing' our Guestbook.
We would like to express our appreciation to the OIC, Sable Island, Maritime Air, VE1RGB,the HARC, and the Canadian amateur radio community for extending their hospitality and having offered us the unique oppor-tunity to visit and operate from CY0, Sable Island.
The Team will return to the US on Wednesday morning. We will announce our new schedule, as soon as possible..... The CY0 Team"
For updates, watch: http://www.CY0dxpedition.com

IOTA SA-039 (Update). A group of South American operators will activate
Isla de Lobos (WLOTA 0799, ARLHS URU-002) as CW5R between December 8-13th.
Operators mentioned are YL Andreina/YY4AND, Atilano/PY5EG, Peter/PY5CC,
Rick/PY2EL, Hugo/CX1ABB, Lupo/CX6ABC, Jorge/CX6DAP, Nelson/CX6ACY,
Enrique/CX8BBA, Bano/CX3ABC, Pedro/CX5BW, Julian/CX5BE, Lupo/CX2ABC,
Federico/CX7BZ and Aparicio/CX1BM. Activity will be on 80m-70cm using
CW, SSB, RTTY and PSK31. Some possible 160m operations will take place
if the summer QRN permits. The team will also be in the ARRL 10M Contest
(Decemeber 11-12th). QSL direct to CX2ABC. Visit their Web page for more
info, logs, photo and video online at: http://www.cw5r.net

NEW HF OPERATORS - THINGS TO DO

The ARRL 10 Meter Contest <http://www.arrl.org/10-meter> is an
excellent way to break into HF contesting, especially for the
Technicians and remaining Novices who may have never experienced a 10
meter band full of signals. On the next weekend, try out your CW skills
in the ARRL Rookie Roundup's <http://www.arrl.org/rookie-roundup>
inaugural CW edition!

BULLETINS

Log due dates for two major contests are (or were) earlier this year:
The deadline for ARRL Phone Sweepstakes logs WAS 0300Z on 7 Dec
(yesterday) and the deadline for CQ WW CW logs is 21 December.

BUSTED QSOS

None reported!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Dec 11-12
```

- ARRL 10 Meter Contest
- CWops Mini-CWT Test (Dec 8)
- Feld-Hell Happy Birthday Sprint
- NA High-Speed Meteor Scatter Contest
- 28 MHz SWL Contest
- PSK Death Match
- UBA Winter Contest
- Straight Key Weekend Sprint
- Great Colorado Snowshoe Run--CW
- Russian 160 Meter Contest (Dec 16)

Dec 18-19

- ARRL Rookie Roundup--CW
- OK DX RTTY Contest
- RAC Winter Contest
- Lighthouse Christmas Lights QSO Party-
- Croatian CW Contest
- Stew Perry Top Band Distance Challenge--CW
- Holiday Spirits Homebrew Sprint--CW
- Run For the Bacon--CW (Dec 20)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Be sure to update your logging software to handle the ARRL 10 Meter Contest's new XE multipliers. Here are the earliest versions of several popular programs that fully support the new multipliers including correct output format:
N1MM - version 10.11.2
Writelog - version 10.77
Win-Test - version 4.7.0
CT - user group's instructions
<http://lists.contesting.com/pipermail/ct-user/2010-December/010396.html>
NA - user group's instructions
<http://lists.contesting.com/pipermail/na-user/2010-December/subject.html>
TRLog - version 6.96
TR4W - version 4.231
SD - version 15.25
N3FJP - version 3.1

Ken WM5R emphasizes that you need to help get new folks (and other casual HF contesters) interested in playing along this weekend. "Talk up the contest with your friends. Post something to your local club and mention the new XE multipliers. Grupo DXXE's reference sheet <http://www.dxxe.org/concurso/xe-mults.pdf> for Mexican multipliers can be downloaded and remember that in addition to the XA-XI prefix block, Mexico is also assigned prefixes in the ranges 4A-4C and 6D-6J." Hector XE2K/AD6D says that DXXE is also encouraging operators to activate the rare and semi-rare states - you can get an idea of who to look for in the online activity page <http://www.dxxe.org/arrl10m/>. Now if we can just get some propagation!

Here is the list of Mexican states and the abbreviations to use for logging them in the ARRL 10 Meter Contest <http://www.arrl.org/10-meter>: (from Rule 5.2.3 of the contest rules) Aguascalientes (AGS), Baja California (BAC), Baja California Sur (BCS), Campeche (CAM), Chiapas (CHI), Chihuahua (CHH), Coahuila (COA), Colima (COL), Distrito Federal (DF or DFE), Durango (DGO), Estado de México (EMX), Guanajuato (GTO), Guerrero (GRO), Hidalgo (HGO), Jalisco (JAL), Michoacán (MIC), Morelos (MOR), Nayarit (NAY), Nuevo León (NLE), Oaxaca (OAX), Puebla (PUE), Querétaro (QRO), Quintana Roo (QUI), San Luis Potosí (SLP), Sinaloa (SIN), Sonora (SON), Tabasco (TAB), Tamaulipas (TAM), Tlaxcala (TLX), Veracruz (VER), Yucatán (YUC), Zacatecas (ZAC).

Want to encourage new blood in CW contesting? The ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup> on Dec 19th is your chance to break out a straight key and QRS to speeds a new CW operator can manage. Here's your chance to experience those wonderful Morse-filled experiences of days gone by - like glass elbow and hand cramps, but I digress. Slow down and put your call in a Rookie's log or help a Rookie master CW at your station!

Are you traveling to a DX location? Here are the TSA rules <http://safetravel.dot.gov/whats_new_batteries.html> explaining what's required of you if any of your electronic equipment contains lithium or lithium-ion batteries. RC modelers <http://idahorc.com/viewtopic.php?f=3&t=4189&sid=4f87acb7b326cb1d6e72c20b41b875d0> deal with this all the time and are very helpful in making sure their battery-powered gear is treated properly. The TSA traveler's assistant <http://www.tsa.gov/travelers/airtravel/assistant/batteries.shtm> Web page lists many do's and don'ts which are mostly common sense, but are helpful in protecting your stuff. (Thanks, Steve KS1G and Stuart K5KVH)

Japanese amateurs are operating RTTY on the low bands an if you're not aware of the band plan there, Rag LA6FJA has relayed an email from Hisami 7L4IOU on the subject:
3.520-3.530 and 3.599-3.612 MHz
3.520 - 3.525 is the main segment
3.525 - 3.530 and 3.599-3.612 has SSB QRM in early evening
7.025-7.045 MHz
7.030 - 7.035 is shared with SSTV

A reversal of the Earth's magnetic poles <http://science.nasa.gov/science-news/science-at-nasa/2003/29dec_magneticfield> would certainly make life interesting for hams. The Geomagnetic North Pole is currently moving north under the Arctic Sea at about 40 km per year, dragging the auroral oval along with it and affecting polar path propagation. While it's been three-quarters of a million years since the last reversal, no one knows whether we are overdue for a flip-flop and the field strength seems quite strong. Pull up a lawn chair, pop open a cool drink, and watch - you never know! (Thanks, Graham VE3GTC, Dana AD5VC, and Ron W2IOL)

Jon W0ZQ and Gabor VE7DXG have reminded the VHF+ community of this great piece by the late Bill Seabreeze on strategy considerations

<http://www.w1rt.us/w3iy/strat.htm> for successful roving.

If you think your amplifier makes the house lights blink, how about when you plug in an electric car? According to this article on power industry concerns <http://www.pressherald.com/business/opportunity-has-power-industry-scrambling-_2010-11-22.html> about supplying all that juice, a high-capacity battery in an electric vehicle (EV) such as the Tesla can draw nearly 17 kW - as much as a house - during the charging period. This will put a lot of stress on the residential power grid substations and distribution equipment. Got fuses?

Extending the discussion of ordinary (O) and extraordinary (X) waves reignited by KL7AJ's interesting article in the December issue of QST, Carl K9LA has written about HF circular polarization in his "Propagation" column in the current issue of World Radio <http://www.worldradiomagazine.com/>. This topic is a well-known concept but has not captured the attention of hams - worth a read!

Spaceweather <http://spaceweather.com/> featured an interesting story on Long-Delayed Echoes (LDE) on 30 November reporting that Peter DK6NP received some LDEs during the recent geomagnetic storm on Nov 27th. I was interested to learn that LDEs were first reported in 1927! If you heard LDEs, please contact Peter as requested in the story.

Web Site of the Week - If you are a casual contest participant and don't want to install a contest logging program, the Cabrillo Forms <http://www.b4h.net/cabforms/> Web site by WA7BNM gives you an on-line option of manually entering your QSOs and sending the resulting log to the contest sponsors in Cabrillo format. (Thanks, Doug KR2Q)

WORD TO THE WISE

Attenuation - reduction of signal level, particularly useful in receivers. As we go into the winter months of low-band activity, make sure your receiver isn't being overloaded by strong local signals and atmospheric noise. You may be surprised at how much you can improve the signal-to-noise ratio (SNR) by reducing input signal level and cutting back on the RF Gain.

==> SIGHTS AND SOUNDS

Where are all those sections you worked in Sweepstakes, anyway? The ARRL has a colorful Worked All States (WAS) map <http://www.arrl.org/files/file/Awards%20Application%20Forms/WASmap_Color.pdf> online that labels all the sections. (Thanks, Norm W3IZ)

Auroras can wreak havoc with HF propagation, but they sure are pretty to look at as shown in this Astronomy Photo of the Day <http://antwrp.gsfc.nasa.gov/apod/ap101124.html> from Norway. Be sure to follow the article links and watch the video, too!

Do you have some photos from CQ WW 2010? Please share them with the contesting community on Contesting.com <http://contesting.com/>. On the right side of the home page, click "Add CQWW 2010" and follow the instructions! (Thanks, Steve N2IC)

These are the most colorful radials you'll ever see - they have excellent taste in France, as F5OHS demonstrates in putting up his vertical antenna <http://f6aoj.ao-journal.com/crbst_373.html> with savoir-faire. (Thanks, Rich KL7RA)

==> RESULTS AND RECORDS

Now that the contest is done, you can evaluate your performance with Bob K0RC's "ARRL 160m Log Analyzer" spreadsheet. Recently updated for new features and faster processing, the latest revision, 1.0.8 <http://tinyurl.com/39pjxtx>, is now available for download. Import your Cabrillo log file and review a variety of statistics.

Soapbox <http://www.eskimo.com/%7Emwdink/3830/> from the recent CQ WW CW contest and others has been compiled for your reading pleasure by Dink N7WA. While you're replaying the recent CQ WW CW contest, a merged list <http://pileup.ru/2010/cqww/top.php?mode=cw> of both 3830 claimed scores and actual log submissions has been compiled by Valery R5GA. Valery is also collecting contest photos for the Web site.

The results of the PreStew warmup <http://web.jzap.com/k7rat/stew.html> for the Stew Perry Topband Distance Challenge held in October 2010 are now posted. Contest manager, Tree N6TR, reminds us that the "big" Stew is coming up in less than two weeks on December 18/19th.

SYLRA Contest 2010 preliminary results <http://contestclubfinland.com/CCF/index.php?option=com_content&task=view&id=94&Itemid=2> are out, just awaiting the final paper logs to be complete. (Thanks, Janne OH6LBW)

Kevin W9GKA has compiled some very interesting VHF reports on distance-based scoring <http://www.w9smc.com/SMC%20VHF/DistanceScoring2009Report.pdf> and a historical data paper <http://www.w9smc.com/SMC%20VHF/uvhfdata.pdf>. Great reading for VHF+ enthusiasts!

OPERATING TIP

Anticipating a lot of new HF operators giving the ARRL 10 Meter Contest a try this weekend, Hank N8XX contributes a few tips for improved contest fun:
1. Call CQ - don't just Search and Pounce. Find a fairly clear frequency, call CQ, and see what happens! This works especially well towards the end of a contest when you are a new station on the bands!
2. On CW, call CQ at your speed, even if that speed is 10, 15, or 20 wpm.
3. Say or send only your call when answering a CQ - you'll get through quicker.
And always remember...

"The worst day of Contesting is infinitely better than the best day working" (Thanks, Tim K3LR and the ZM2M East Coast Contesters)

==> TECHNICAL TOPICS AND INFORMATION

You might think a Hamming Code <http://www.cio.com.au/article/369282/cio_blast_from_past_60_years_hamming_codes/> refers to Morse, but no! 60 years ago, Bell Labs scientist Richard Hamming came up with his method of encoding data to perform computations and telecommunications without errors. This was the beginning of the field of coding theory that combines computation, mathematics, and communication, an important step to the sophisticated digital world that we take for granted today.

Judging from signal levels during contests, it must be tough to be a receiver's front-end input circuit! The original "Front End Saver" circuit was described by KD9SV in Feb 1997 CQ Magazine. The finished product is available from Radio-Ware <http://www.radio-ware.com/frontends.htm> or a circuit board is available from FAR Circuits <http://www.farcircuits.net/>. A similar circuit has been designed by OK1RR <http://www.ok1rr.com/e107_plugins/content/content.php?content.35>, as well. These can save your radio a trip to the repair shop! Another problem with strong signals is caused by overload from local AM broadcast stations. Jack W8OZA at Clifton Laboratories <http://cliftonlaboratories.com/z10020_am_medium_wave_band_reject_filter.htm> has designed two new BC-reject filters - the Z10022 is a high-pass and the Z10020 a band-stop design that also allows reception below 540 kHz for LF and VLF reception. (Thanks, Joe W4TV)

Here's a nice Web article <http://www.repeater-builder.com/astron/ss30-powerpoles.html> that goes into the details as it describes how to add PowerPole™ connectors to an Astron SS-25 or SS-30 switching power supply.

A good January 1995 QST article on tuning T-network tuners <http://www.arrl.org/files/file/Technology/tis/info/pdf/9501046.pdf> by W4ULD can be found in the online ARRL archives. After you figure out the basics, this online Java tuner applet by W9CF <http://fermi.la.asu.edu/w9cf/tuner/tuner.html> will let you practice what the article teaches! (Thanks, Jim W7RY)

If you want to neaten up those multi-cable bundles, but conduit or cable tray is too confining or expensive a solution, try these cable hangers <http://www.tristatetelecom.com/items.asp?Cc=DRING> that allow access to the cables at any point, but still corral them into neat runs. You can buy them at an electrical supply house and a #10 sheet metal screw will suffice for mounting. (Thanks, Dave K9XD)

Technical Web Site of the Week - The recording of last week's PVRC/NCCC webinar on HF Propagation and Sporadic E during WRTC 2010 by Dean N6BV is now available. The video file

<http://www.nccc.cc/misc/N6BV-2010NOV23-PVRC-PROP-SPORADIC-E-WRTC-2010.wmv>
is 50 Mbytes in WMV format and a PDF version of the presentation slides
<http://www.nccc.cc/misc/N6BV-PVRC-NCCC-HFPropSporadicE.pdf> is also
online. (Thanks, Dean N6DE)

==> CONVERSATION

Wild Voices

For those of you that didn't get no satisfaction in Phone Sweepstakes,
here's another mangled melody by Dr Beldar from the Rolling Stones'
"Wild Horses" - 73, Ward N0AX

Band edge running
Is easy to do
The mults will all work me
When I call CQ
Clueless invader
You hear where I am
You know I won't let you
Push me up the band

Wild voices
Couldn't push me away
Wild voices
You'll work me some day

I heard you tuning
Your carrier's plain
Now you're attempting
To drive me insane
No sweeping tuners
Or off-channel lines
Will make your rate better
Or attenuate mine

I know you heard me
You're tellin' a lie
I'm still on the band edge
But we wasted much time
Q's have been busted
Tears must be dried
Let's do some running
Until ending time

Loud voices
Couldn't push me away
Loud voices
You'll work me some day

==> CONTESTS

8 December through 21 December

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Mini-CWT Test--CW, from Dec 8, 1100Z - see Web site, multiple operating periods. Bands (MHz): 3.5-14. Frequencies: Monthly on the second Wednesday, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Feld-Hell Happy Birthday Sprint--Digital, from Dec 11, 0000Z to Dec 11, 2400Z. Bands (MHz): 3.5-28. Exchange: RST, Feld-Hell nr, S/P/C. Logs due: 2 weeks. Rules <http://www.feldhellclub.org/>

ARRL 10 Meter Contest--Phone,CW, from Dec 11, 0000Z to Dec 12, 2400Z. Bands (MHz): 28. Exchange: RS(T) and State/Prov or serial. Logs due: Jan 12. Rules <http://www.arrl.org/contests>

28 MHz SWL Contest--Phone,CW, from Dec 11, 0000Z to Dec 12, 2400Z. Bands (MHz): 28. Exchange: Log ARRL 10 Meter Contest QSOs. Logs due: Jan 31. Rules <http://swl.veron.nl/swlcontest.htm>

PSK Death Match--Digital, from Dec 11, 0000Z to Dec 12, 2400Z. Bands (MHz): 1.8-28, 50. Exchange: Name and S/P/C. Logs due: Dec 25. Rules <http://www.mdxa1.org/deathmatch.html>

UBA Winter Contest--Phone,CW,Digital, from Dec 11, 1700Z to Dec 11, 2100Z and Dec 12, 0600Z to Dec 12, 1000Z. Bands (MHz): 1.8-7. Frequencies: Multiple operating periods. Exchange: RS(T) and UBA section or serial. Logs due: 3 weeks. Rules <http://www.uba.be/en/hf/contest-rules>

Straight Key Weekend Sprint--CW, from Dec 12, 0000Z to Dec 12, 2359Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the second Sunday. Exchange: RST, S/P/C, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/wes>

Great Colorado Snowshoe Run--CW, from Dec 12, 2100Z to Dec 12, 2259Z. Bands (MHz): 14. Exchange: RST, S/P/C, class, CQC number or power. Logs due: 30 days. Rules <http://www.cqc.org/contests>

Russian 160 Meter Contest--Phone,CW, from Dec 16, 2100Z to Dec 16, 2300Z. Bands (MHz): 1.8. Exchange: RS(T), serial, square ID (see Web site). Logs due: Jan 20. Rules <http://www.radio.ru/cq/contest/rule-results/>

OK DX RTTY Contest--Digital, from Dec 18, 0000Z to Dec 19, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and CQ Zone. Logs due: Jan 15. Rules <http://www.crk.cz/ENG/DXCONTE.HTM>

RAC Winter Contest--Phone,CW, from Dec 18, 0000Z to Dec 18, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and province or serial.

Logs due: Jan 31. Rules <http://www.rac.ca/en/rac/programmes/contests>

Lighthouse Christmas Lights QSO Party--Phone,CW,Digital, from Dec 18, 0001Z to Jan 2, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial or ARLHS number. Logs due: Jan 31. Rules <http://arlhs.com/>

Croatian CW Contest--CW, from Dec 18, 1400Z to Dec 19, 1400Z. Bands (MHz): 1.8-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.9acw.org/>

Stew Perry Top Band Distance Challenge--CW, from Dec 18, 1500Z to Dec 19, 1500Z. Bands (MHz): 1.8. Exchange: Grid square. Logs due: Jan 31. Rules <http://jzap.com/k7rat/stew.rules.txt>

ARRL Rookie Roundup--CW, from Dec 19, 1800Z to Dec 19, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: 72 hours after contest. Rules <http://www.arrl.org/contests>

Holiday Spirits Homebrew Sprint--CW, from Dec 19, 2000Z to Dec 19, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, ARCI number or Power. Logs due: 30 days. Rules <http://qrparci.org/contests>

Run For the Bacon--CW, from Dec 20, 0200Z to Dec 20, 0400Z. Bands (MHz): 1.8-28. Frequencies: Monthly on the third Sunday local time. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.com/fpqrprun.php>

VHF+ CONTESTS

ARRL Rookie Roundup--CW, from Dec 19, 1800Z to Dec 19, 2359Z. Bands (MHz): 3.5-28, 50. Exchange: Both calls, name, check, S/P/XE or "DX". Logs due: 72 hours after contest. Rules <http://www.arrl.org/contests>

NA High-Speed Meteor Scatter Contest--Digital, from Dec 11, 0000Z to Dec 16, 0200Z. Bands (MHz): 50-432. Exchange: Both calls, grid square, acknowledgement. Logs due: Jan 15. Rules <http://www.ykc.com/wa5ufh/Contests/2010Contest.htm>

PSK Death Match--Digital, from Dec 11, 0000Z to Dec 12, 2400Z. Bands (MHz): 1.8-28, 50. Exchange: Name and S/P/C. Logs due: Dec 25. Rules <http://www.mdxa1.org/deathmatch.html>

RAC Winter Contest--Phone,CW, from Dec 18, 0000Z to Dec 18, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and province or serial. Logs due: Jan 31. Rules <http://www.rac.ca/en/rac/programmes/contests>

Lighthouse Christmas Lights QSO Party--Phone,CW,Digital, from Dec 18, 0001Z to Jan 2, 2359Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial or ARLHS number. Logs due: Jan 31. Rules <http://arlhs.com/>

==> LOG DUE DATES

8 December through 21 December

December 9 - ARS Spartan Sprint
<http://adventure-radio.org/wiki/index.php?title=Spartan_Sprint_Rules>

December 11 - Wake-Up! QRP Sprint
<http://qrp.ru/modules/sections/index.php?op=viewarticle&artid=7&page=1>

December 11 - PODXS 070 Club Jamboree
<http://www.podxs070.com/2010-jamboree>

December 19 - EPC Ukraine DX Contest
<http://ut7fp.kiev.ua/2010epc-ukr-dx/epc-ukraine-dx-contest-rules.pdf>

December 21 - CQ Worldwide DX Contest, CW
<http://www.cqww.com/CQWW-Rules-2010.pdf>

December 21 - Homebrew and Oldtime Equipment Party
<http://www.qrpcc.de/contestrules/hotr.html>

December 21 - EPC PSK63 QSO Party
<http://eu.srars.org/index.php?option=com_content&task=view&id=66&Itemid=141>

December 21 - LZ DX Contest <http://lzdx.bfra.org/rulesen.html>

WIANEWS FOR WEEK COMMENCING DEC 12 2010.

Sable Island, that ON again OFF again ON again OFF again DXpedition has
AGAIN been postponed!

WIA announces the 2011 WIA National Field Day

Automatic Voice Relay System: AVRS

ZL Hams multiplex four video and audio streams

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING DECEMBER 12 2010

Sable Island, that ON again OFF again ON again OFF again DXpedition has
AGAIN been postponed!

The following from Randy N0TG and published on the Southgate News pages.

"BAD News!

We have just been advised that the Sable Island beach will not be suitable
for landing this week NOR next week. Then after next week, that puts us
into the holiday period.

Thus, we have no choice but to return home, re-group and come up with a new
re-schedule".

This press release unlike the earlier November ones, does not mention anything
about options for the refund of donations.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

All set for AR PR day 2011

The WIA has announced that the 2011 WIA National Field Day will be held on
Sunday the 17th of April.

Feedback from operators was received, requesting a change from the October date of the 2010 event and the WIA decided to have the event close to the IARU World Amateur Radio Day on April 18th.

The IARU's theme for the next World Amateur Radio Day as "Amateur Radio: The first technology-based social network", which has also been adopted by the National Field Day 2011.

Rules and guidelines will be announced early next year.

DECEMBER BIRTHDAY

Yes we really did have long wave broadcasters in Australia.

This month sees the 87 th anniversary of the establishment of VK's second radio broadcaster, a long waver, way back in 1923.

2FC Sydney was the first to be licensed, from July '23but first ON air was 2SB Sydney which went to air November.

2FC was 5,000 watts transmitted via a squirrel type cage antenna supported from two 60 metre high steel lattice towers, spaced 180 metres apart.

The station operated on the long wave frequency of 1100 metres, 171 kilohertz.

(sourced to vk2wi)

Summerland Council "off their trolleys".

Northern Star news in the Lismore/Ballina area served by the Summerland Amateur Radio Club, has reported on an innovative shopping trolley management system which 'locks down' trolleys to stop them being taken outside a certain area.

Ballina Shire Council's been debating the best way to control wayward trolleys.

Cr Keith Johnson has recently become aware of Trolleyguard, a system used extensively in ZL, which uses a buried perimeter antenna and an RF transmitter to generate a low frequency signal to define the limit of trolley travel.

When a trolley rolls near the antenna line, its brakes lock on to the wheels and the trolley is stopped in its tracks.

"The basic concept is great," he said. "BUT we'd probably need hundreds of metres of buried transmission lines, so it could become quite expensive".

MEDICAL experts have cast doubt on a Danish study that found pregnant mothers who regularly use mobile phones were more likely to have children with behavioural problems.

The survey tracked the long-term health of the children.

Mothers supplied detailed information about their lifestyles, diet and habits during and after pregnancy, including mobile phone use.

The researchers found that kids who had been exposed to mobile phones both before and after birth were 50 per cent more likely to have behavioural problems.

But Professor Rodney Croft, Executive Director of the Australian Centre for Radio Frequency Bioeffects Research and a Professor of Health Psychology at the University of Wollongong said that mothers' remembering their phone usage in a survey does not provide a good estimate of exposure.

"I do not believe that this study provides evidence of a negative effect of maternal mobile phone use on childhood development, nor for the need for added caution (relative to that already provided by the Australian Standards)".

Read more: http://www.news.com.au/technology/experts-dismiss-a-study-that-links-mobiles-and-behavioural-problems-in-children/story-e6frfrnr-1225967040880#ixzz17OpxlAan

The Australian Centre for Radiofrequency Bioeffects Research (ACRBR) is a consortium consisting of RMIT University, Swinburne University of Technology, Telstra Research Laboratories and DEPM in Melbourne, and in Adelaide - the Institute of Medical and Veterinary Sciences.

ACRBR brings together basic sciences, clinical and public health disciplines. The Centre conducts a broad program of research into possible biological or health effects of exposure to radio waves, particularly from mobile telephones.

For more information, contact ACRBR by email: acrbr2006@gmail.com
mail: 400 Burwood Road, Hawthorn, VIC, Australia 3122
or fax: (03) 9214 5525

WICEN RECEIVES $500 GRANT.

WICEN(NR) received the grant by Advantage Salary Packaging, a company which provides salary packaging services to the VK2 North Coast Area Health Service. Advantage invited employees of NCAHS to apply for a community grant. They supported 20 local organisations along the North Coast and donated a total of $10,000.

Next meeting of Oxley Region Amateur Radio Club, will be 2pm Saturday, the 8th of January in the SES Building in Central Road, Port Macquarie. Visitors will be made particularly welcome at this meeting so if you are planning to be in the "Port" area January 8 make it along.

VKC Roundup http://www.police

If you only attend one radio event in 2011, then it must be the Centre Victoria RadioFest No. 4 at the Kyneton Racecourse on Sunday the 13th of

February, just an hour from Melbourne, Ballarat and Bendigo.

It has been described by a leading electronics publication as one of Australia's largest and best known amateur radio communications field days.

The biggest of its type in Victoria and the only one that has been supported by all the major commercial traders since it began in 2007.

The Centre Victoria RadioFest also offers three different ways people can sell second-hand radio equipment and accessories, non-commercial lots, bits and pieces.

The traditional table sales continue to be popular. The other options are car-boot sales or trailer and van loads. It's your choice!

Add to this interesting program including the mini-lecture series and this is truly a major event and great social occasion for anyone with an interest in radio.

See you at the Centre Victoria RadioFest, Kyneton Racecourse on Sunday the 13th of February.

I'm Bruce Lees and you're listening to VK1WIA.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery and I've been thinking.

Time is running fast towards the season of gifts and bonhomie and have you filled your shopping list yet? If not you may just be able to sneak an order for some amateur radio reading material from the WIA Bookshop. Perhaps the gift is for you or maybe it is for some-one you know is interested in this great hobby. Don't delay - log onto http.wia.org.au/bookshop and feast your imagination on the goodies.

I have been raising the issues of what being a club member and running a club can be. I will use this personal anecdote to further illustrate these points. As I mentioned, last month, I won a chauffeur driven trip to our local health resort. This was not without personal difficulties for the rest of the family as I am the family driver. It has been tremendously rewarding and humbling to appreciate the great efforts made by various members of our radio club in supporting my family and me. So it is that I give some public recognition for these private acts.

But this is as much a reflection of the wealth of generosity within the amateur radio community and living proof of people living the Amateurs Code as it is a reflection of the personal values of those concerned.

You reckon I'm counting my lucky stars......you "betcha, mate."

I'm Geoff Emery and that's what I think.......how about you?

CLUBBING -

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

The club held its Christmas party last Saturday. Due to the rain the party was held at the club house. Despite the rain, many members were there including John, VK4WX, who had just beat the rain on his way south from Mackay.

Club members were treated to a wide range of nibblies, so many in fact there were very few cooking on the BBQ. It was also surprising that there was little talk about amateur radio, as the main topic was the rain.

In the latest AR magazine that arrived today it was pleasing to see that the Redcliffe club with its competition callsign, VK4IZ, had won the multioperator section of the RD contest. Well done to all the team who put up with the rain and mud at the campsite to achieve a great result.

As Christmas falls on a Saturday this year, the club will be open throughout the Christmas period and just in case please call on the repeater to ensure the club house is open as many members will be taking their holidays.

Charles, VK4BTC, has just completed the building of his K3 radio and is extremely pleased with the result despite a small technical hitch that was corrected very quickly with a rapid email from the States.

Peter, VK4EA, is in the process of raising a new tower at his QTH and club President David, is closer to the completion of his 2 metre homebrew amplifier. Meanwhile if the rain goes away for a couple of days, Charlie, VK4YZ will be increasing the size of his doublet antenna to almost twice its old size.

Well that is the news for this week and until next time its 73 from Ray, VK4CF.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day again, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

It's that time of year here in the Far North where we spend time disconnecting and reconnecting antennas and feedlines from our shack due to the wet season build up and accompanying lightning activity. Damned annoying when the 6 metre band is just starting to fire-up.

TREC members spent a few hours last Saturday, the fourth, at our annual breakup/Christmas party at the Tolga Hotel. Around 20 members and family enjoyed a great feed followed by yet another "TREC TRIVIA CHALLENGE"

The winning team was the "Pathetics" a truly magnificent two man team, Ron VK4ZJR and Gary VK4FD who, with a great wealth of trivia knowledge between them, clinched the winners prize.

TREC has one more meeting for the year which will happen on Saturday the 18th December at the clubrooms in Atherton.

Visit the TREC website at www.treclub.org.au for further information and you can also download the latest monthly news in TREC-NEWS.

This has been Dale VK4DMC.

TARC does Australia Day

Get out your corked hats and throwing thongs - TARC will be out in the field for Australia Day (provided the venue does not get too aquatic) at the famous Loam Island ARDF Grounds and Shelter from 11-30am Wednesday January 26th. BYO everything and engage in aussie fun and mirth - and even do some radio things too ! Bring the family, bring the lagerphone, bring the esky but don't bring the mozzies!

VK5

New digital commercial television licences for Riverland, Mount Gambier and the Spencer Gulf region of South Australia.

14th of October saw the Gulf come up digital only, the 2 new WIN licences for Mt Gambier and the Riverland will see, under the government's digital television switchover timetable, all analogue TV services in the Riverland and Mount Gambier/South East licence areas switched off 15 December 2010.

The Broadcasting Services Act 1992 provides for the allocation of an additional commercial television broadcasting licence in markets where only two commercial television broadcasting licences are in force. The services to be broadcast under the licences are to operate in a digital mode only.

VK6

Western Australian Amateurs will be gathering for a BBQ next Sunday December 19 at lunch time at Synergy Parkland on May Drive in Kings Park.

Guest at the BBQ will be the President of the Wireless Institute of Australia, Michael Owen VK3KI who has been looking for an opportunity to visit VK6 and was pleased to accept this invitation.

He's looking forward to talking with you and will no doubt address the group.

This venue has free electric BBQs, parking, a kiosk and a caf&#65533;, and playground and adventure stuff for kids.

So, mark the date in your calendar - Sunday 19th December, lunchtime, Synergy Parkland, Kings Park. BYO everything.

While in Perth, Michael will be meeting with Club representatives and the VK6 Advisory Group at the Neil Penfold State Amateur Radio Centre on the Saturday prior, 18th December, at 2pm.

Slow Scan TV Gateway Upgrade.

The Club's SSTV Gateway (VK7RTV) is currently undergoing a software upgrade.

This is completely revised software running SlowScan TV.net and is written to run on windows employing XP and above, utilising .NET 4 Framework

The advantages or otherwise of this revised operating system has still to be evaluated, with on air testing and adjustments etc. being refined.

It is anticipated that the gateway will soon be back on air using 145.625 for local sstv users.

(Tony VK7AX, News Officer - NWTATVG)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

VK3 Group NERG will run a licence upgrade course in the New Year with the aim of getting all participants to the advanced level.

The course will run one night per week for several weeks and those interested should contact Greg VK3VT via e-mail or phone.

vk3vt@nerg.asn.au
94 32 05 63.

Congratulations to the following people who recently passed assessments.

Scott VK7FRRT standard assessment,

Tony VK7FTCL also passed his standard assessment,

Roger VK7FRJS advanced assessment,

Roger VK7HMH also passed his advanced assessment and Leigh passed his foundation licence and is looking for VK7FLAR as a callsign.

Congratulations to all who have upgraded and Leigh who has entered this great hobby of amateur radio.

If you are interested in an amateur radio assessment in the Hobart region then please contact Reg VK7KK on 0417 391 607, or email regemm@ozemail.com.au

(Reg VK7KK, REAST Education Officer and Assessor)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

HABEX 3 FLYs SATURDAY 18 DECEMBER 2010

18 December the HABEX team launch a third high altitude balloon.

Carrying various payloads in preparation for a schools launch in 2011 consisting of about 8 schools, this payload is made up of 4 separate

modular units. The primary part of the payload is the controller board which has been locally designed and built and contains an APRS unit which will provide the balloon location during the flight.

Also on the board are 8 inputs and outputs that can be configured for analogue or digital operation. All data will be transferred via the APRS packets.

Also in the payload will be a beacon transmitting a message in CW on 7023 kHz.

Listeners are encouraged to send QSL cards to ZS6SCI if the beacon was heard.

The Habex team is finalising the data sheet and listeners are encouraged to visit the HABEX web site.

www.habex.za.net

The RAC (Radio Amateurs of Canada) Board is currently looking at the RAC membership rate structure.

Among the changes to be made is the introduction of a new membership class and the adjustment of international rates.

Many members have told RAC that they place a high value on RAC activities and have asked for a premium membership. RAC is pleased to announce the new Radio Amateurs of Canada Maple Leaf Operators Membership.

Members in the first year will receive a signed RAC Maple Leaf Operators Certificate, be listed in TCA, be recognized on the RAC website, and receive a RAC pin with their call sign and more.

The RAC Maple Leaf Operators Membership is $100 per year and is available on automatic renewal.

Neutron bomb inventor Sam Cohen, who in 1958 designed the nuclear weapon intended to kill people but do minimal damage to cities, has died in Los Angeles at 89 of stomach cancer.

The neutron bomb used tiny particles that could whiz through objects with little damage but still kill we humans.

Cohen also helped build the atomic bomb dropped on Nagasaki, Japan in WW2.

==========

NEWS FROM ARNEWSLINE

FCC GOES AFTER MAINLAND CHINA CELLULAR JAMMER SUPPLIER

The FCC has issued an Official Citation to the mainland China based company Jammer World and its on-line subsidiary TheJammerStore dot com. This, for marketing unauthorized radio frequency devices in the United States in violation of the Communications Act and Section 2.803(a)(1) of the Commission's rules.

Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

According to the FCC Citation, this past July 20th an agent from the Enforcement Bureau's Columbia Office viewed Jammer World's web site. There he observed an advertisement for a device listed as a "Handheld GPS and Cell Phone Jammer Mini GPJ."

On July 21, 2010, the agent made an undercover buy on-line, and received the device through the mail from New Century Technology Limited. The agent conducted tests and confirmed that the device jams signals in the Cellular Telephone Band from 845 to 975 MHz, the PCS Band from 1800 to1996 MHz and G-P-S frequency of 1575.42 MHz.

Based on this and other findings, the FCC Citation tells Jammer World that if it continues to violate the Communications Act or the Rules by engaging in sales to customers in the United States, the Commission may impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to $112,500 for any single act or failure to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment through forfeiture actions, as well as criminal sanctions, including imprisonment.

The only problem with this citation is that the company is located in Shenzhen China and the Chinese government has a long record of not cooperating with the United States in matters involving on-line sales by mainland China based companies. Without the Chinese governments cooperation, collecting a fine or forcing the company to not sell mail order to customers in the United States may be an impossible task.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

As we go to air, TheJammerStore dot com was still offering cell phone and GPS jamming devices for sale, worldwide.

TWO HAMS IN NEW ISS CREW SOON TO LAUNCH

Meantime, replacements for the now returned space adventurers will soon be on their way to orbit. On December 17th a new trio of flight engineers are expected to arrive at the I-S-S following a December 15th launch. They are identified U.S. astronaut Catherine Coleman, KC5ZTH, the European Space Agency's Paolo Nespoli, whose call is IZ0JPA and Russian cosmonaut Dmitry Kondratyev.

Jan 1-31 WIA ROSS HULL MEMORIAL VHF/UHF

Jan 1 AMSAT 2011 Straight Key Night (SKN)

Straight Key Night on OSCAR, 2011 is conducted by AMSAT for radio amateurs throughout the world.

This year's event is dedicated to the memory of Dick Peacock, W2GFF, who died this year aged 91. Dick was an active satellite operator in the 1970s and 80s, mostly on CW and usually with a straight key and could always be counted on for a kind word and a friendly QSO.

There are no rules, no scoring and no logs required. Just operate CW on any OSCAR satellite, using a straight hand key, from 0000 UTC to 2400 UTC on 1 Jan working as many SKN stations as you can..

In keeping with the friendly nature of this event, each participant is asked to nominate one of the operators worked for "Best Fist." It is not necessary that your nominee have the best fist of anyone you heard, just of those you worked.

Please send your nomination to w2rs@amsat.org

Jan 15/16 WIA Summer VHF-UHF Field Day
Includes "Microwave Challenge", with special certificates to
be awarded to the participants on microwave bands.
John Martin VK3KM tac@wia.org.au

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

Heath VK6TWO the Western Australian Repeater Group President says that the group has been providing Amateur Repeater services to WA for several decades and has recently had a significant injection of enthusiasm.

the W.A.R.G. has been VERY busy this year with several projects and activities taking place. Probably the most significant of the activities was the WIA's Centenary Celebrations through use of the VK100WIA callsign throughout

the event called "Super Springtime" as detailed on the front cover of the November edition of AR Magazine.

Super Springtime also saw two simultaneous public displays of AR at Wireless Hill and the Perth Royal Show for the duration of the event.

YouTube footage can be found
www.youtube.com/user/VK3TWO

If you're in WA, and want to know what's going on around you, check out the WAHAMS Google group
http://groups.google.com/group/wahams

WARG currently has over a dozen sites hosting X repeaters, x APRS Digipeaters, X Packet Digipeaters, and 2 beacons including the DXCF International DX beacon.

The groups extensive repeater footprint is made good use of regularly by the WIA News Broadcast Team with their world acclaimed WIA national news service.

Listen here now

WW SPECIAL INTEREST GROUPS --- APRS (AVRS)

Automatic Voice Relay System: AVRS

The major initiative that has been driving just about everything new in APRS since the 2001 time-frame has been making sure that APRS can support the signalling and information system needed so that hams can TEXT or VOICE to any other ham anywhere at any time using any device and any VOIP system knowing only a callsign.

The TEXT version of Universal hamradio Text Messaging is covered on www.aprs.org/aprs-messaging.html and a Sep 09 QST article.

The VOICE version, called Automatic Voice Relay System is on:
www.aprs.org/avrs.html

D-STAR is another part of this global AVRS initiative. D-Star can already connect voice using call-to-call addressing. Echolink, IRLP and WIRES can do it also using APRS as the callsign, and node locator.

Bob Bruniga WB4APR and his team have been working on this for now a decade and are making progress.

There are still lots more little interfaces and gateways that are needed to connect everything together. For example, a D-STAR user could establish or receive an Echolink or IRLP voice link if someone simply wrote the gateway interface. APRS then extends this to the mobile analogue user via the APRS object and FREQ QSY system to get him on the right RF frequency.

After 9 years, the hardware and mechanisms are now in place.

Now to get all the smart programmers and egos in the same room and get them cross connected.

(Bob, WB4APR)

ZL Hams multiplex four video and audio streams

The data compression, inherent in all forms of digital television, permits the simultaneous transmission of many video and audio streams in the bandwidth previously occupied by one analogue television transmission.

This technique is a feature of Broadcast digital television.

On Saturday, the 4th of December, a group of Wellington and Hutt Valley Radio Amateurs simultaneously multiplexed four video and audio streams into one digital television transmission, using low cost equipment.

The transmission was centred on 1282 MHz, in accordance with the NZART bandplan and occupied 1274 to 1290 MHz, the same bandwidth as one analogue FM television transmission.

DVB-S modulation format was used, receivable on an unmodified satellite TV set-top box.

Further development and testing is planned, with the aim of transmitting the four video and audio streams within an 8 MHz bandwidth, half that used by the above tests, using the DVB-T modulation format, receivable on an ordinary Digital Terrestrial television receiver.

Team leader was led by Doug, ZL2TAR.

WW SPECIAL INTEREST GROUPS --- DIGITAL
Australian Coordinator for TCPIP domains is Indy vk2xb@wia.org.au

New Amateur Radio digital mode - V4

V4 is a new data mode optimized for amateur radio keyboard contacts using Viterbi FEC and 4FSK modulation.

It is designed to provide good copy even in weak signal or poor propagation conditions.

V4 can be implemented on most computers using standard PC sound cards with radio interfaces.

An Alpha version of the software can be downloaded from the files section of their V4 Protocol Yahoo Group.

LOWDOWN

8.970 kHz - DK7FC's latest tests

received signals are visible (live) on VLF grabber at
https://dl.dropbox.com/u/15047843/xbm_grab.jpg

Continuing the magical exploits of Roger G3XBM.

G3XBM has received the latest VLF transmissions by DK7FC on 8.970kHz at a distance of 669km, the signal was also received by 4X1RF in Israel at 2873km!

Reception was on his 20m spaced earth electrode antenna (!) into a small FET tuned preamp and Spectrum Lab software.

The signal was weak but correlates well with the signals also received by others across Europe and, amazingly, by 4X1RF in Israel at some 2873kms!

DK7FC's 100mW ERP VLF signal was copied and recorded by 4X1RF at this astounding distance of 2873km, signal levels suggest that transatlantic amateur VLF reception may indeed be possible in the near future.

Several other stations across Europe (4X counts as Asia!) also copied Stefan's signals.

This is indeed a whole new frontier for amateur radio.

REWIND

THAT FINAL ITEM: THE SONY WALKMAN - SK

And finally this week, as the holiday gift giving season approaches we are kind of sad to report that the famed Sony Walkman will likely be on dealer shelves for the last time this year. This is because Sony has announced that the thirty-one year old cassette tape based unit is being phased out of production. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with our final goodbye:

The Sony Walkman -- the cassette tape player that forever changed music listening habits before becoming outdated by digital MP3 players -- has become a sort of silent key, this after Sony announced on October 25th that it has stopped production of the cassette tape player in Japan - effectively sounding the death knell of the now-obsolete portable audio device.

If you're looking to put a date in the Walkman's tombstone, then October 25, 2010, is as good as any. Perhaps October 23, 2001, the day the Apple iPod was launched, is the better date. But none of the success of Apple's portable music players and those of other manufacturers would have ever happened without the Sony cassette tape Walkman.

Some 220 million Walkman players were sold since the first model, the TPS-L2, debuted in July 1979. It was developed under the stewardship of Sony founders Akio Morita and Masaru Ibuka. Morita insisted the device be focused on high quality mobile playback which was considered a relatively odd idea at the time.

Originally called the "Soundabout" in the U.S., Sony quickly replaced the Soundabout name with the Walkman designation. It retailed for around $200 was an immediate sensation. In fact, it was quickly hailed by supporters as a total revolution in mobile music listening.

But more than just portability, the Walkman fostered a personalization of one's music. In fact, the Walkman was also the father of the so-called mixtape. For the first time, music listening was something you could make very personal by arranging songs in the order you wanted to hear

to them. It was also a way of courting a future spouse or love interest during the 1980's and 1990's.

For those of you too young or simply unfamiliar with this process, making a mixtape typically entailed gathering songs, putting them all on a cassette in the order you wanted them played, labelling the tape with care and giving it to a love interest in school or elsewhere.

The Walkman didn't disappear as much as it was improved upon by its creators and others. Sony continued to use it as a brand, but the company long ago surrendered style to Apple and the ubiquitous iPod. But one day the iPod will likely go the way of the 45 RPM record, the L.P. and the Walkman. When that happens in some far distant time, that generation will be waxing nostalgic about its passing just as we are today about the Walkman as it becomes a part of electronic history.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, looking for my earphones and cassette tapes in Los Angeles.

The Walkman is survived by the CD-based Sony Discman and hundreds of Chinese-made knock-off tape based players. It's also revered by those music listeners who think using a Walkman in this day-and-age is charmingly out-of-touch.

==> + REGULATORY: AMATEUR ALLOCATION AT LOWER MF GAINS FORMAL SUPPORT
IN THE AMERICAS

A secondary allocation to the Amateur Radio Service at 461-469 and
471-478 kHz gained inter-American support in meetings held earlier this
month in Bogota, Colombia, with the Permanent Consultative Committee II
of the Inter-American Telecommunication Commission (CITEL) adopting the
US position for the MF allocation. World Radiocommunication Conference
2012 Agenda Item 1.23 calls on participants "to consider an allocation
of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur
Service on a secondary basis, taking into account the need to protect
existing services." Read more here
<http://www.arrl.org/news/amateur-allocation-at-lower-mf-gains-formal-support
-in-the-americas>.
```

==> + ON THE AIR: SADDLE UP FOR THE 2010 CW ROOKIE ROUNDUP!

The ARRL's newest on-the-air operating event is designed to help newly licensed amateurs build their operating skills on HF. Three Rookie Roundups -- one each for SSB, RTTY and CW -- are held each calendar year. The CW running of the Rookie Roundup will take place Sunday, December 19 from 1800 UTC through 2359 UTC.This is a contest specifically for those new to Amateur Radio, similar to the ARRL Novice Roundup that ran from 1952 until 1995. The Rookie Roundup combines a competitive event with some on-the-air training, bringing the fun and Elmering of the old Novice Roundup into the 21st century. The Rookie Roundup is a single-operator event only. Stations are allowed a maximum of 100 W. Elmering is encouraged and use of spotting networks is allowed. Read more here <http://www.arrl.org/news/saddle-up-for-the-2010-cw-rookie-roundup>.

==> + EXAMS: NCVEC RELEASES NEW GENERAL CLASS QUESTION POOL

The Question Pool Committee (QPC) of the National Conference of Volunteer Examiner Coordinators (NCVEC <http://www.ncvec.org/>) released the new General class (Element 3) question pool <http://www.ncvec.org/page.php?id=358> on Tuesday, December 7. This new question pool -- including graphics and diagrams -- will become effective for all General class examinations administered on or after July 1, 2011; it will remain valid until June 30, 2015. The current General question pool that became effective July 1, 2007 will expire June 30, 2011. The new General pool contains 457 questions, from which 35 are selected for an Element 3 examination. The current Technician class question pool <http://www.ncvec.org/page.php?id=349> that was effective July 1, 2010 is valid through June 30, 2014. The current Amateur Extra class pool <http://www.ncvec.org/page.php?id=351> that was effective July 1, 2008 is valid until June 30, 2012.

==> ARRL PUBLICATIONS: ARRL INTRODUCES BOOK ON SELECTING, USING ANTENNA TUNERS

Antenna tuners are devices often misunderstood in the Amateur Radio world. While not every station requires an antenna tuner to transmit radio signals, without one an incompatibility between the transmitter and the antenna system can result in poor performance. The ARRL Guide to Antenna Tuners: A Radio Amateur's Guide to Antenna Matching by Joel R. Hallas, W1ZR, will help you understand how to select the right tuner for your needs and how to use it in your shack.

The ARRL Guide to Antenna Tuners discusses the details of the different configurations and requirements of antenna tuners. It explores the design, construction and applications of the different types available. You'll be able to determine if one is necessary in your station, what type of tuner is needed and where to install it for maximum improvement. This book will give you a better understanding of your antenna system and the way it can be improved through the selection and use of the appropriate antenna tuner. Read more here <http://www.arrl.org/news/arrl-introduces-book-on-selecting-using-antenna-tun

ers-in-your-station>.

==> + GET READY FOR THE JANUARY ISSUE OF QST!

The January issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at a number of do-it-yourself (DIY) projects -- the upcoming issue of QST has something for just about everyone.

If you are contemplating building your own ham radio gear, chances are that you're going to have to bring out the soldering gun. But is there another way? In his article "Reflow Soldering for the Radio Amateur," Jim Koehler, VE5FP, talks about how he found it easier to assemble a PC board using surface mount components instead of through-hole parts using reflow soldering. With this method, a PC board -- with the surface mount components held in place with solder paste -- is placed in an oven where it is heated, turning the paste into liquid solder; after the board cools, the solder solidifies again. Koehler says that because all the soldering is done at the same time, it is a very quick process.

Hams have a long tradition of making their own antennas, accessories and equipment -- but you definitely need the right tools for the job at hand. QST Technical Editor Joel Hallas, W1ZR, takes a look at some tools that you should have in your shack -- from soldering tools to test equipment to socket drivers and wrenches -- if you are looking to try a homebrew project. Who says you need a giant dish and expensive equipment to "ping" the Moon? Bob Baker, KD3UY, shows how you can do "Moonbounce on a Budget" to describe what you actually need -- and don't need -- to make that first Earth-Moon-Earth (EME) contact.

<http://www.arrl.org/multimedia> ARRL Contributing Editor Howard Robins, W1HSR, takes a look at the Yaesu FTM-350R dual band FM transceiver in this month's Product Review. He calls it "a top-of-the-line mobile FM transceiver with well thought out controls. It offers some unusual features, such as 222 MHz transmit and a stereo FM broadcast receiver, as well as options such as APRS and Bluetooth connectivity." ARRL Technical Advisor Bruce Prior, N7RR, checks out the Begali CW machine. He says that it is "more than just a keyer and offers a wide range of features for on-air CW operation and off-air Morse code training."

Of course, there are the usual columns you know and expect in the January QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your January issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + ARRL HEADQUARTERS CLOSED FOR CHRISTMAS, NEW YEAR'S HOLIDAYS

ARRL Headquarters will be closed Friday, December 24 and Friday, December 31 in observance of Christmas and New Year's Day. There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. There will be no ARRL Letter <http://www.arrl.org/arrlletter/> or ARRL Audio News <http://www.arrl.org/arrl-audio-news> on Thursday, December 23 and 30. We wish everyone a safe and joyful holiday season and a prosperous 2011.

==> + DXCC: EIGHT AFRICAN OPERATIONS APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that eight operations in Africa -- 9Q/DK3MO (Democratic Republic of the Congo), 3C0C (Annobon), 3C9B (Equatorial Guinea), 3V9A (Tunisia), 3V0A (Tunisia), TS7TI (Tunisia, also includes /p operation), TS8P (Tunisia, also includes /p operation) and TS9A (Tunisia) -- have been approved for DXCC credit. All operations -- with the exception for the 9Q/DK3MO -- are 2010 operations. The 9Q/DK3MO operation is good for operations commencing in 2007 through the present. Read more here <http://www.arrl.org/news/eight-african-operations-approved-for-dxcc-credit>.

==> SOLAR UPDATE

Tad "Lost in their overcoats, waiting for the Sun <http://en.wikipedia.org/wiki/Old_Friends_%28song%29>" Cook, K7RA, reports: The average daily sunspot numbers for the week were up more than nine points to 35, and the average solar flux rose more than six points to 87.3. These changes compare the dates of December 2-8 with the previous seven days. The average planetary A index declined 2.5 points to 2.1, while average mid-latitude A index dropped 1.1 points to 1.6. These are nice numbers, with higher sunspot numbers accompanied by lower geomagnetic indices. The predicted solar flux for the near term is right at the same level as the average for the past week, at 87 for December 9-14, followed by 85, 83, 81 and 80 for December 15-18. The predicted planetary A index for December 9-13 is 5, 8, 10, 10 and 8, followed by 5 for December 14-18, and possibly out to December 23. Note the period of slightly unsettled geomagnetic activity centers around this weekend, the dates for the ARRL 10 Meter Contest <http://www.arrl.org/10-meter>, December 11-12. But only a mild increase in geomagnetic activity is expected. This year's event is the first time that Mexican states will be counted as multipliers along with US states and Canadian provinces, as well as DXCC countries. You can see a map of the 32 Mexican states here <http://www.dxxe.org/concurso/xe-mults.pdf>. Look for more information on the ARRL Web site on Friday, December 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Simon and Garfunkel's Old Friends <http://www.youtube.com/watch?v=BPTOY8FrvNw>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEB SITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL Web site. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you use CW on a regular basis?
- If your out-of-warranty transceiver failed, what would you do?
- Do you own a tablet computer?
- Does your ARES® group use the ARRL Public Service Activity Report <http://www.arrl.org/files/file/Public%2520Service/fsd157.pdf> form to document SKYWARN activity?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the March 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> + SILENT KEY: BODY OF VETERAN BALLOONIST RICHARD ABRUZZO, KC5VWK, FOUND OFF ITALIAN COAST

The bodies of famed hot-air balloonist Richard Abruzzo, KC5VWK, of Albuquerque, New Mexico, and a companion were discovered on Monday, December 6 deep underwater off the coast of Vieste, Italy. Abruzzo, 47, and Carol Rymer-Davis, 65, of Denver, Colorado, had been missing since September 29 when they lost contact with officials during a balloon race, after their balloon made a rapid descent during rough weather. Read more here <http://www.arrl.org/news/body-of-veteran-balloonist-richard-abruzzo-kc5vwk-found-off-italian-coast>.

==> THIS WEEK ON THE RADIO

This week:

- December 10 -- NCCC Sprint Ladder
- December 11 -- Feld Hell Sprint
- December 11-12 -- ARRL 10 Meter Contest <http://www.arrl.org/10-meter>; International Naval Contest; MDXA PSK Death Match
- December 11-16 -- NA High Speed Meteor Scatter Winter Rally
- December 12 -- SKCC Weekend Sprint; CQC Great Colorado Snowshoe Run
- December 15 -- NAQCC Straight Key/Bug Sprint

Next week:

- December 17 -- NCCC Sprint Ladder; Russian 160 Meter Contest; AGB-Party Contest
- December 18 -- OK DX RTTY Contest; RAC Winter Contest
- December 18-January 2 -- Lighthouse Christmas Lights QSO Party
- December 18-19 -- Stew Perry Topband Challenge; Croatian CW Contest
- December 19 -- ARRL Rookie Roundup (CW)

<http://www.arrl.org/rookie-roundup>
- December 20 -- Run for the Bacon QRP Contest
- December 22 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2011 -- ARRL Delta Division Convention <http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention <http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention <http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention <http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here <http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1739 - December 10 2010

Amateur Radio Newsline report number 1739 with a release date of
Friday, December 10th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISS celebrates a decade of International
Space Station to schoolroom contacts, the National Conference of
Volunteer Examiner Coordinators releases its new General Class Question
Pool, a roadblock catches unlicensed radio operators in Brunei and
researchers in Belfast Ireland propose humans as walking cellphone
towers. Find out the strange details on this one on Amateur Radio
Newsline(tm) report number 1739 coming your way right now.

HAM RADIO IN SPACE: ARISS CELEBRATES ITS 10th ANNIVERSARY

Amateur Radio on boards the International Space Station, better known
by the acronym ARISS is celebrating the 10th anniversary of student ham
radio contacts with crew members on board the orbiting outpost. We
have more in this report:

--

On December 21st of the year 2000, astronaut William Shepherd turned
from his usual activities aboard the newly occupied International Space
Station. Floating over to a ham radio station attached to an I-S-S
bulkhead, he called the Burbank School in Burbank, Illinois and was
soon talking with 14 students earger to know more about life in space.
Now in 2010, amateur radio operators world-wide are celebrating the
tenth anniversary of this first ARISS school contact.

Since that first QSO, the ham operators coming to the Space Station
along with their ARISS volunteers on the ground have conducted 565
successful contacts in 40 countries and 5 continents. This has allowed
thousands of students to share the excitement of those first 14.
Moreover, tens of thousands of students, faculty, and parents have
participated in the program by working on the planning phase and
attending these events.

ARISS contacts have prompted countless students to seriously consider
pursuing science, technology, engineering, and math careers, including
becoming an astronaut. Educational programs and amateur radio clubs
established at participating schools continue to inspire students long

after the contact has ended.

The value of manned amateur radio on-orbit was so apparent to NASA and the Russian Space Agency that the ham radio from orbit became the first experiment to be activated on board I-S-S.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The use of amateur radio in space began in the early 1980's when Astronaut Owen Garriott, W5LFL, became the first ham to operate from orbit on board the Space Shuttle Columbia. His ground breaking ham radio from space operation was chronicled in the ARRL distributed video titled Amateur Radio's Newest Frontier produced and hosted by the late NBC newsman Roy Neal, K6DUE. In all, what became known as the Shuttle Amateur Radio Experiment or SAREX flew on 28 shuttle missions, proving the educational and crew morale benefits of ham radio. Ham radio also proved popular with the cosmonauts aboard the Russian space station Mir. (N5VHO, W8AAS, ARISS, ARNewsline(tm) Archives)

AMATEUR RADIO TESTING: NCVEC RELEASES NEW GENERAL CLASS QUESTION POOL

If you plan to upgrade your ham ticket, listen up. On Tuesday, December 7th, the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators released the new General class question pool also known as the Element 3 exam. This new question pool includes graphics and diagrams It will become effective for all General class examinations administered on or after July 1st of 2011 and will remain valid until June 30th, 2015.

The new General pool contains 457 questions, from which 35 are selected for an Element 3 examination. The current General question pool that became effective July 1, 2007 will expire June 30, 2011.

And for those interested in the other classes of United States ham radio license testing, the current Technician class question pool that became effective on July 1, 2010 is valid through June 30, 2014. The Amateur Extra class pool that was effective July 1, 2008 is valid until June 30, 2012. (ARRL, FCC)

BREAKING DX NEWS: SABLE ISLAND DXPEDITION POSTPONED

Some breaking news in the world of DX. This with word that the long awaited Sable Island DXpedition has been postponed.

According to team spokesman Randy Rowe, N0TG, the group has been advised that the beach at Sable Island will not be suitable for landing at this time. That puts the DXers into the holiday period. As such

they have no choice but to return home, re-group and come up with a new re-schedule.

Rowe adds that they will assess the situation over the next couple of weeks and layout our new plan at that time. Newsline will bring you another update on this long awaited operation as soon as more information is released. (Sable Island DX Team)

**

RADIO IN SPACE: SUN DEVELOPS MEGA FILAMENT

A spectacular filament is reportedly snaking around the sun's southeastern limb. Spaceweather reports that from end to end, this filament stretches more than 700,000 km. That's a full solar radius or almost twice the distance from Earth to the Moon. We have more in nthis report:

--

According to scientists at the Solar Dynamics Observatory the flare stretches nearly twice the distance between the Earth and moon.

The flare, described by astronomers as a filament, is an elongated cloud of cooler gases suspended above the Sun by magnetic forces. NASA scientists say the solar storm is confined to the Sun and poses no threat to satellites in space or the power grid here on Earth.

Last month we reported that a Purdue University professor had researched the lack of solar activity in recent years. His published report indicated that we have not had a sun spot in over 800 days. Records show that this is the longest solar spot dry spell in 300 years.

Observers are watching to see if we can expect increased sun spot activity. Those operating high frequency amateur radio bands surely hope this is just the beginning of a bright solar future.

Reporting for Amateur Radio Newsline, this is Jack Parker, W8ISH

--

The massive build up is an easy target for backyard telescopes as long as optical safety precautions to insure no damage to the astronomers eyes. Solar observers say that the filament holds the potential for an impressive eruption if it happens to collapse in the days ahead. Spaceweater.com is carrying a series of ongoing photos as well as technical updates.

(W8ISH, Spaceweather)

ENFORCEMENT: STATION ISSUED NAL FOR FAILING TO REDUCE NIGHTTIME POWER TO 15 WATTS

The FCC has issued a $6000 Notice of Apparent Liability to Donald Coss, owner of KCKX in Stayton, Oregon. This for not operating in accordance with the authorized 15 watt nighttime power specified on his license.

According to the FCC, its Portland office monitored the signal of KCKX before and after local sunset. Field strength was found to remain constant both before and after sunset on consecutive days last April. The agent also captured KCKX-AM's relative signal strengths for its daytime and nighttime operations. At that time he determined that there was no reduction in signal strength for nighttime operation.

A few days later the FCC agent inspected the station at its control point in Woodburn. The commission said that during an interview with the Portland agent, the owner said he was aware of the requirement to reduce operating power at night from 1000 watts down to 15 watts. But the owner said that it was just too costly to maintain the necessary time-keeping devices, power switching devices and other equipment to accomplish this.

Now, in its latest correspondence with the station, the FCC noted that in 2000 it's Enforcement Bureau had issued a Notice of Violation to Coss also for failing to reduce the nighttime power of KCKX AM. It then issued the $6000 Notice of Apparent Liability and instructed Coss to send a sworn statement about how he'll fix the problem. It also cautioned Cross that future violations of its rules may subject him to more severe enforcement penalties.

Cross was given the customary time to reply as well as to pay the $6000 Notice of Apparent Liability or to file an appeal. (FCC)

**

ENFORCEMENT: BRUNAI HOLDS ROADBLOCK TO CATCH UNLICENSED OPS

Unlicensed mobile radio operators in Brunai, some of whom are hams with expired licenses but still on the air have felt the sting of that nations government enforcement. This, when several of them were caught in a good old fashioned roadblock on December 6th.

The roadblock was a joint operation conducted by the Authority for Information Communications Technology and the Sengkurong (SEN CURE ONG) Police Station. In only two hour time, all vehicles with an outside antenna mounted to it were stopped and inspected. Several were found to contain radio gear capable of operation between 137 to 174 megahertz

which with the exception of 144 to 148 megahertz are supposed to be blocked from use.

The operation was part of an awareness campaign to urge operators to obtain ham radio licenses and confine their operation to within the confines of the amateur radio bands. Also, to avoid the possibility of a fine of up to $10,000 and /or three years in jail. The ventire story is on-line at tinyurl.com/brunai (Borneo Bulletin)

**

WORLDBEAT: FRENCH ATV'ERS CONCERNED OVER NEW SAT NAVAGATION IN 1.2 GHZ BAND

French amateur television enthusiasts have voiced their concerns over the future of the 1.2 GHz band. At a recent meeting, the trepidations of the French A-T-V Association were raised regarding the use of the Amateur Radio 23cm band by the Galileo and Glosnass satellite navigation systems. Heres why.

The European Union's Galileo system will use 1260 to 1300 MHz while the Russian Federation Glosnass system will be on 1240 to 1260 MHz. Both systems are expected to be operational by 2015 and there is fear among some hams I FDrance that Amateur Television operations could be impacted. Complete proceedings of the November 27, gathering in Google English is on line at tinyurl.com/38c4vhw. (Southgate)

RADIO SCIENCE: RESEARCHERS IN IRELAND PROPOSE HUMAN ANTENNAS

Turning to an interesting story out of Ireland, scientists are proposing to increase broadband nework availability by making people into walking cell phone towers. Jim Linton, VK3PC, of the WIA News is here with the rather strange details:

--

Researchers at Queen's University Belfast are looking to improve the reliability of modern wireless systems. They believe that humans could be turned into wireless towers to create what they call body-to-body networks.

A five year research project is investigating how small sensors carried by people could communicate with each other to create a ubiquitous wireless networking paradigm.

This would provide enhanced bandwidth needed when too many people use their phone in the same cell area, help the service to penetrate weak signal areas or black holes and counteract drop outs that result from interference.

In a rapidly developing science of body centric communications, new sensors carried by everyone with a mobile phone would interact with

each other and wireless devices embedded in local surroundings to transmit data, providing anytime, anywhere mobile network connectivity.

The technology also promises to open up the use of wireless communications in a wider range of activities including law enforcement and first responder teams, sports applications through to medical monitoring of patients in their own homes.

For the Amateur Radio Newsline, Im Jim Linton, VK3PC.

--

While an interesting idea, its likely to be another of those scientific advances that prove to have little practical application. At least not until scientists first prove conclusively the effect that radiation from cellphones have no adverse affect on the human body. And that may not be proven either way for decades. (WIA News)

**

HAM RADIO ON THE NET: NEW FREE SPANISH LANGUAGE HAM RADIO MAGAZINE

A new Spanish language amateur radio magazine is now available free on the Internet. Called Radio Noticias, the publication includes information on transceivers, receivers, antennas tests and much more. Also included is news from the worlds of DX, contest operation, shortwave, propagation and much more. And its picture filled website has photos of radio gear some of which is not available in the United States including a very simple to operate 2 meter mobile rig. You can download the current issue and see it for yourself at www.radionoticias.com. (Southgate)

**

HAM RADIO EVENTS: JANUARY 2 2011 IS KIDS DAY

If you are free on Sunday, January 2nd, consider using the hours of 1800 bto 2400 UTC to help introduce youngsters to amateur radio on Kids Day.

The Kids Day operating event is sponsored by Oregon's Boring Amateur Radio Club in association with the ARRL. It was created to expose young minds to the magical world of ham radio by putting them on the air under the supervision of a licensed radio amateur so that they can experience making a contact first hand. And as a Kids Day volunteer station you get rewarded by knowing that you have done your part in passing the hobby on to the next generation.

More information about Kids Day can be found on the ARRL website. That's in cyberspace at kidsday@arrl.org. (ARRL)

**

MILITARY HAM RADIO: TWO STORIES IN MULLIGAN LIFESTYLES

Amateur Radio Military Appreciation is featured in a story in the winter 2010 edition of Mulligan Lifestyles Magazine. Mulligan Lifestyles is a publication that honors our troops, veterans, active duty military, and their families. The story can be found on page 58. The same issue also contains a story about Amateur Radio on page 42 submitted by Nick Shyshuk. You can read both on line at tinyurl.com/29v7jv8 (ARMAD)

**

NAMES IN THE NEWS: ZL2BHF CELEBRATES 25 YEARS PRODUCING NZART NEWSCAST

And a word of congratulations to Newsline's own Jim Meachen, ZL2BHF. This as he celebrates a quarter of a century producing and usually voicing the monthly NZART Official Broadcast to New Zealand's national ham radio community.

The big celebration of this milestone for ZL2BHF takes place on December 19th. For the event Jim has has compiled some memorial broadcasts from presenters that are not with us. Also, the November to December bi-monthly issue of the NZART magazine Break-In will carry a story on his quarter-century of work on this New Zealand national ham radio broadcast project. (Break-In / NZART)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

HAM RADIO IN SPACE: ARISSAT ONE ENROUTE TO MOSCOW

ARISSat One is on its way to its launch site. Late word from AMSAT that the ARISSat One flight hardware and the backup unit are in Germany and are scheduled to be delivered to Moscow on Saturday, December 11th. Meantime, Lou McFadin, W5DID, and Mark Steiner, K3MS, will be heading to Moscow on the 10th of December to assist with integration and testing of the Kursk experiment and battery. The schedule still has ARISSat going to the ISS via a Progress vehicle in late January 2011 and release from the ISS in late February 2011. (ANS)

**

HAM RADIO NEAR SPACE: HABEX TO LAUNCH ON DECEMBER 18TH

South Africa's HABEX team will be launching its third high altitude balloon on December 18th. The balloon will be carrying various payloads in preparation for a future 2011 launch to serve the educational needs of students 8 schools.

The payload is made up of 4 separate modular units. The primary function is the on-board controller board that contains an APRS unit. This will provide real time the balloon location during the mission. Also, a store and forward or parrot repeater on 438.500 MHz which includes a backup APRS unit is also onboard. During the flight, if the repeater is not in use, the APRS unit will transmit data.

The Sci-Bono Discovery Centre in conjunction with the Gauteng Department of Education initiated this project. Its purpose is to support the Electrical Technology Curriculum and provide expanded opportunities to students in this field. More is on-line at www.habex.za.net. (SARL)

**

HAM RADIO IN SPACE: DISCOVEREY'S LAUNCH DELAYED

NASA has announced that the 39th planned final flight of the space shuttle Discovery is being pushed back to early February of 2011. This in order to give engineers more time to determine the root cause of cracks in the shuttle's external fuel tank covering . NASA had been targeting launch for a short window that opens December 17th and closes December 20th. But Shuttle Program Managers have determined that tests and analyses intended to determine the cause of the cracks would not be complete in time to launch during that last 2010 opportunity because engineers have not yet determined the cause of the cracks.

The space agency' concern is that such a fracture could cause foam insulation to break loose during launch and damage the shuttle's heat-shield components needed for a safe reentry to the Earth's atmosphere. (NASA)

**

WORLDBEAT: HCJB REACHES RADIO DISTRIBUTION GOAL

International religious broadcaster HCJB's recent campaign in cooperation with Moody Radio to raise funds to deliver pre-tuned radios to listeners in under-developed regions of the world appears to have succeeded. According to a press release, enough funding was raised to send 7,000 radios to Burkina Faso and Sierra Leone and Ghana. That's or 2,000 above the initial goal.

The radios were designed by HCJB's Global Technology Center in Elkhart, Indiana in the United States. Their simple operation is designed to permit listeners to tune in three HCJB partner stations in the target audience region. (RW)

**

THE DXCC PROGRAM: NUMEROUS OPERATIONS APPROVED

Bill Moore NC1L, the ARRL DXCC Branch Manager advises that a number of operations are now approved for DXCC credit. They are the 2010 operations as 3COC from Annobon, the 3C9B out of Equatorial Guinea

along with the 3V9A, 3VOA, TS7TI and the TS8P from Tunisia.

Going back in time, also approved was the 2009 approved is the TS9A also fromTunisia and the 9Q stroke DK3MO from 2007 out of the Democratic Republic of the Congo.

If you had any of these operations rejected in recent applications send a note to dxcc at arrl dot org to have your record updated. Once updated, this will be reflected in your Logbook of the World account or in the live, daily DXCC Standings at www.arrl.org/dxcc.

**

DX

In DX, G7BXU, will be spending the Christmas and New Year holidays in Sierra Leone operating portable 9L. He will be there from December 19th through January 7th likely using the callsign 9L1BXU. QSL via his home callsign after his return.

PY2ZX will be active portable PT7 from the PW7T contest station through December 13th. His operation will be limited to 6 and 2 meters looking mainly for Carribean stations operating weak signal modes and using horizontal polarization. He will also be checking 70 MHz for openings to Europe.

NA3J tells Newsline that hew will be operating through December 20th as J3 stroke NA3J Maritime Mobile aboard the 50 foot yacht the Yaba Jaba. His operation will be using SSB and CW on all bands and he will make use of the WARC bands when they're open. He says that he might get as far north as J8 but there's no real itinerary. QSL as directed on the air.

N1DG was expected to arrive in the United Arab Emirates on December 5th. He was anticipated to operate from the A61AD station possibly on 12 and 17 meters using CW, SSB and RTTY. Logs will be uploaded to LoTW on his return.

BX5AA, will be active from Taiwan during the ARRL DX SSB Contest slated for March 5th and 6th. He says that BX5 is a rare prefix for Taiwan. QSL via BX5AA.

N2RFA will be on the air as C6ABB from Nassau in the Bahamas between February 7th and the 17th. Activity will be on 80/40/20/17 meters. He plans to operate on some of the Digital modes including PSK31, RTTY and possibly SSTV. QSL via N2RFA

Lastly, WJ2O, will be active as stroke 6W from Senegal during the ARRL DX CW Contest on February 19th and 20th as a Single-Operator, All-Band, High-Power entry. Dave told the Ohio Penn DX Newsletter that he will arrive in Senegal on February 17th and will be leaving on the 23rd. Activity outside of the contest will be 100% on CW and mostly on the 30, 17 and12 meter bands. Logs will be available in almost real-time at wj2o.com. QSL via WJ2O.

(Above from various DX news sources)

**

THAT FINAL ITEM: RADIO CAN LOWER BLOOD PRESSURE

And finally this week, word from down under of a remarkable new experimental medical procedure. One that holds the promise of lowering peoples blood pressure through the use of radio waves. Graham Kemp. VK4BB, of the W-I-A News has the details of this new way of dealing with what for many is a life threatening medical problem:

--

No not BP as in Broadband over powerlines but BP as in Blood Pressure. A new procedure which takes just 45 minutes involves a doctor inserting a catheter into an artery in the upper thigh, then threading it into an artery next to the kidney.

There, they use low-power radio waves to heat up and effectively turn off specific nerves which are known to play a role in high blood pressure.

Professor Markus Schlaich from the Baker IDI Heart and Diabetes Institute in Melbourne was a principal investigator in an international trial which involved 106 patients across 24 separate sites in Europe and Australia.

After the first ten patients or so were treated, they really were quite confident that this is a fantastic new technology that allows lots of people out there who have trouble with their blood pressure.

How long will it be before this treatment is available to people in Australia? They are quite hopeful that certainly within the next year, this radio wave treatment for High Blood Pressure should be available for clinical use.

For the vAmateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

As to when this new procedure might become available in nthe United States? As we go to air, that too, is unknown. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. ** MMMonVHF - our NEW (!) AURORA Propagation-Page **

After some months of developing we are today happy and proud to
announce a new Propagation page: "AURORA". As you know from
the "SPORADIC E" and "TROPO" Propagation pages you are able to
send in your report of worked (or heard) QSOs and we will spread
it in detail and make it visible. The goal of the new AURORA page
will be to go one step further: We will show the position of the
"reflecting AURORA curtain" (cloud) and in a later stage possibly
more features will be added... So welcome to the new page and send
in as much as possible reports to: http://www.mmmonvhf.de/au.php
IMPORTANT: As well as what is often done in Aurora QSOs, it will
be necessary to mark the QTF (direction of the antenna) were you
were beaming to when having a QSO! Read more about AURORA in
Theory and the new features at our MMMonVHF FORUM:
http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=15&topic=128#msg396
SOURCE: Peter, PA3BIY & Dick, PA2DW on behalf of the MMMonVHF Team

---

** AURORA: Mega-Filament at 6th of december **

As predicted, the a "mega-filament" of solar magnetism erupted
on Dec. 6th, producing a blast of epic proportions. NASA's Solar
Dynamics Observatory recorded the action as the 700,000-km long
structure lifted off the stellar surface and--snap!!--hurled
itself into space. The eruption produced a bright coronal mass
ejection (CME) observed by the STEREO-A spacecraft: video. Earth
was not in the line of fire; the cloud should sail wide of our
planet. Earth-effects might be limited to pretty pictures.
http://spaceweather.com/images2010/06dec10/epicblast2_strip.jpg
SOURCE: http://spaceweather.com/

** B C C - MS - CONTEST 2010 **

The Bavarian Contest Club (BCC) invites all active meteor scatter
enthusiasts to join the MS contest hold during the Geminids shower
2010. The aim of the contest is to generate more activity on the
random frequency and make MS random operation more popular. It
will also provide interesting information about MS propagation
at various times of the shower. And it will give the little pistols
a chance to work the big guns, who are usually just out for square
hunting. Contest period: 11 Dec 2010, 20:00 UTC to 15 Dec 2010,
02:00 UTC Find the Links to the RULES in GERMAN or in ENGLISH at:
http://www.mmmonvhf.de/latest.php?id=3611
SOURCE: Guy, DL8EBW on behalf of the Team of MMMonVHF

** North American Meteor Scatter Contest **

NEW RULES THIS YEAR! Sponsored by the Super 7s Meteor Scatter Club.
Direct link to the Rules: www.ykc.com/wa5ufh/Contests/2010%20Rules.htm
This 5-day long contest is timed to coincide with the Geminids
meteor shower. It has been a lot of fun in the past, and this year
promises to be no different! Plan to get WSJT fired up and get on
6m or 2m starting at 0000 UTC (Friday evening in North America).
You can also try meteor scatter QSOs on 222 and 432 MHz for extra
big multipliers! Assisted contacts (i.e., scheduled in real time
using Ping Jockey) are legal and encouraged. PJ use will be heavy
so keep your posts short and to a minimum. The usual PJ rules
apply: NO communication on PJ about the QSO while it is in
progress, or else its a busted QSO and has to be started over.
THIS ALSO APPLIES TO COMMENTS FROM THIRD PARTIES. Dont comment on
or paste captures of other peoples QSOs! Direct link to PJ:
http://www.pingjockey.net/cgi-bin/pingtalk Random contacts are
also legal and in many cases will actually take less time to
complete than going to PJ, especially when PJ use is very heavy.
Listen for a minute after completing a contact for tail-enders!
See you in the contest! SOURCE: Bill W5WVO via WSJT Reflector

** Jay W9RM qrv in GEMINIDS from EN52rb **

I'm looking for well equipped stations in AZ, NV or MT who would
like to try a 2M Geminids sked. I don't want to waste anyone's
time, so I suggest you be no farther then approx 1400 miles from
EN52rb and be running some power (minimum of 300-400W) into at
least a single long boom antenna. The shower appears to peak
around 1100Z on Tuesday morning, 12/14, but peak east-west time
looks to be around 1300Z. WSJT skeds preferred, of course. Anybody?
RIG: single 2M5WL 80' and 600W

** K5N at DL88 in 2011 - A Grid Bandits DXpedition **

The K5N Activation Group is planning another assault on DL88 in
June of 2011. We are treating last year's attempt as a "Learning
Experience" and are modifying our plans accordingly. The current
dates chosen are June 1st through June 7th. We plan to travel to
Big Bend National Park on June 1st. We will stay in the Park's
motel that night and drive to the Talley2 campground in DL88 the
morning of June 2nd, which is Thursday. We will set up camp and
be operational as quickly as possible, hopefully by about 1PM.
We will do the best that we can on this... Read all details at

** SABLE ISLAND (CY0, FN93-GN03) POSTPONED **

The operational team for the 6-13 December DXpedition to Sable Island [425DXN 1017] will consist of N0TG, AA4VK, and WA4DAN. LATEST NEWS by Randy, N0TG/CY0, 2010-12-07: BAD News! We have just been advised that the beach will not be suitable for landing this week nor next week. Then after next week, that puts us into the holiday period. Thus, we have no choice but to return home, regroup and come up with a new re-schedule. What a bummer!! Certainly 'tis discouraging, expensive, and we know disappointing to all the Dxer's following the dxpedition and looking forward to having fun. We will asess the situation over the next couple of weeks and layout our new plan at that time...
Sorry. Very 73, Randy, N0TG and the CY0 Team - SOURCE: GOTO List

** Matej, OK1TEH qrv Geminids 2010 432 MHz Meteor Scatter **

Hi all, I'm qrv during Geminids 2010 432 MHz Meteor Scatter with new 800W solid state PA (800W in fsk441 for a long time) + 5,7m long 23el dk7zb and new ATF54143 LNA [0,4dB NF]. I'm especially interested in sked into OH/UA1 and EA directions, more I took holiday in work for 13-14th December, so I'll try to be logged at on4kst during whole shower. If you have something like 22el yagi 100W or more and patience, please don't be shy to ask me.
PS: QRV list is also available at: www.darkside.cz/qrv_70ms.php
SOURCE: tnx to Matej, OK1TEH, direct to MMMonVHF

** IOTA-HF and 50 MHz Activity from Republic of Palau **

Ryosei Aimiya, JH0IXE will be active as T8CW from the Republic of Palau (IOTA OC-009) between 22nd December 2010 and 6th January 2011. QRV on 160-6 metres, using RTTY, PSK31, WSJT (JT65A), CW, SSB and SSTV. "I think that I will mainly operate a digital mode"
QSL via home call. SOURCE: NG3K/Bill DX-News

** United Arab Emirates (A6) active on HF and 50 MHz **
By the time you read this Don, N1DG, is expected to leave Qatar (where he was active as A71A) to arrive in U.A.E on December 5th, for three days because of his job. However, his activity will be limited due to his work; he is expected to operate from the A61AD station once again, possibly on 12 and 17 meters using CW, SSB and RTTY. The A61AD station does have a 4 element SteppIR for 20-6 meters, so Don's activity will be limited to those bands. Logs will be uploaded to LoTW upon conclusion of his trip.
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #988

** South Cook Isl. (E5) active on HF and 50 MHz **

Compton VK2HRX, will be active as E51HRX from Rarotonga Island
between December 13-20th. Activity will be on 40/20/6 meters
SSB only. QSL via VK2HRX. SOURCE: Ohio/Penn DX Bulletin #988

** QSP from Andy, N8OFS regarding [FFMA - DL99] **

Reading the Mail here at the Summer QTH in MN. See that many
people need DL99. I will Again be hosting for the National Park
service at Amistad National Recreation Area this winter from Nov
1st to April 15th this is DL99. 3 element beam 100watts full
digital setup this year. but solar power or generator no power
in camp ground. Hope we have good winter E's this year I have
worked 87 grids confirmed from TX WANT more...

GB2RS NEWS

Sunday 12th December 2010

The news headlines:

Eight African operations approved for DXCC

Advanced Classes and Distance Learning

Straight Key Night on OSCAR 2011

ARRL DXCC Manager Bill Moore, NC1L, reports that eight operations in Africa, 9Q/DK3MO, 3C0C, 3C9B, 3V9A, 3V0A, TS7TI, TS8P and TS9A, have been approved for DXCC credit. All operations, with the exception for the 9Q/DK3MO, are 2010 operations. The 9Q/DK3MO operation is good for operations commencing in 2007 through to the present. If you had cards for any of these operations rejected in recent applications, please send an e-mail to the ARRL DXCC Desk. Results will appear in Logbook of The World accounts, as well as online on the daily listings.

An Advanced Radio Communications Exam course is planned to commence in Bath on Thursday

13 January. This is aiming for the June 2011 exam. A number of Intermediate licence holders have already signed up but there is room for more. Following the success of a number of home study students last year, Steve Hartley, G0FUW, who leads the Bath courses, is also willing to offer distance learning support to those who cannot get to classes. These classes are kindly sponsored by the City of Bristol RSGB to keep costs as low as possible. Full details from Steve, G0FUW, who is QTHR. Details on QRZ.com are correct, or you can e-mail g0fuw@tiscali.co.uk.

You are invited to participate in Straight Key Night on OSCAR 2011, conducted by AMSAT. This year's event is dedicated to the memory of Dick Peacock, W2GFF, who died in 2010 aged 91. Dick was an active satellite operator in the 1970s and 80s, mostly on CW and usually with a straight key. There are no rules, no scoring and no logs required. Just operate CW on any OSCAR satellite, using a straight hand key, from 0000UTC to 2400UTC on 1 January 2011, working as many Straight Key Night stations as you can. In keeping with the friendly nature of this event, each participant is asked to nominate one of the operators worked for `Best Fist'. It is not necessary that your nominee has the best fist of anyone you heard, just of those you worked. Please email your nomination to W2RS, w2rs@amsat.org.

Have you registered to take part in SOS Radio Week yet? It's only five weeks until the start of SOS Radio Week. Icom have agreed to sponsor the event and have donated prizes for the individual and club or team that raises the most money for the RNLI during the event. To register, visit the website at www.sosradioweek.org.uk and click over the Register option on the menu. Once registered you'll be able to download the official sponsorship forms and lots of other useful documentation.

On 17 December, a new trio of flight engineers are expected to arrive at the International Space Station following a 15 December launch. They are US astronaut Catherine Coleman, KC5ZTH, the European Space Agency's Paolo Nespoli, IZ0JPA and Russian cosmonaut Dmitry Kondratyev.

Peter Chadwick, G3RZP has been re-appointed as Chairman of European Telecommunications Standards Institute Committee ERM_TG30, Wireless Medical Applications. Nigel Wilson, G4VVZ, has been appointed Chairman of ETSI ERM_TGDMR, Digital Mobile Radio.

Please note that there will be a GB2RS bulletin as usual next week on Sunday 19 December, but not on the two following Sundays, 26 December and 2 January. The first GB2RS of the New Year will be on Sunday 9 January. Anyone with news of events taking place between now and 9 January should send it to the RSGB by e-mail to gb2rs@rsgb.org.uk as soon as possible. The deadline is, as always, 10am on Tuesday morning, so that copies can be posted to those few remaining newsreaders that do not download the script from the internet. We would like to thank all those who regularly send in items for GB2RS and look forward to hearing from you in 2011. We would also particularly like to thank the network of Main and Reserve Newsreaders, without whom the News would not be heard and Jeremy Boot, G4NJH for his weekly GB2RS podcast.

And now for the details of rallies and events for the coming week

The first rallies of 2011 will be on 16 January.

Dover Radio Rally will be held at Whitfield Village Hall, Dover CT16 3LY which is on the A2 just outside of Dover. The event was revived last year and was such a success that they have hired extra space for the rally this year. The focus will be on radio related items not other electronic bits and bobs. The website www.doverradiorally.com has all the usual information required.

The Red Rose Winter Rally will be held at the George H Carnall Leisure Centre, Kingsway Park, M41 7FJ. There is free car parking available and doors open at 11am. There will be trade stands, a Bring and Buy as well as an RSGB bookstall. Details from Steve on 07502 295 141.

Now for the news of special events

We have no details of special event stations operating this week.

And now the HF DX news compiled from 425 DX News and other sources

Siegfried, DK9FN and Hans Peter, DG1FK are heading back to Nendo Island, which is IOTA reference OC-100. Listen for H40FN and H40FK from 21

December to 3 January on CW, SSB and RTTY. QSL H40FN via HA8FW and H40FK via DG1FK.

Karel, ON5TN will be staying at the Belgian Antarctic base Princess Elisabeth, Antarctica until 24 February 2011. He plans to operate again as OR4TN in his spare time, starting in December. Updates will be posted on qrz.com under OR4TN. QSL via ON5TN.

Look for Hennie, PJ4/PE1MAE, active from Bonaire, IOTA SA-006. QSL via bureau or direct to PA2NJC.

Now the contest news

14 December sees the 432MHz UK Activity Contest taking place between 2000 and 2230UTC. Using all modes the exchange is signal report, serial number and locator.

For a very different challenge, how about trying the Russian 160m Contest? It takes place on Friday 17 December and is in fact two contests, each of which lasts just one hour, the second following on immediately from the first. There are single- and multi-op sections for young ops, those born 1990 and after, and seniors. The web page at www.radio.ru/cq/contest/rule/map-2.gif shows how to calculate your grid square which not the same as a Locator square, with most of the British Isles being in X4. The website also shows how the multipliers work for making QSOs into adjacent and further squares.

The RAC Canadian Winter Contest takes place on the following day, 18 December, between 0000 and 2359UTC. In this one there are nine entry categories and a certificate is offered to the top scoring station in each DXCC entity, so several could be awarded to UK stations. Only four UK stations appear in the 2008 results, all from England, and six in the 2009 results, all from England again, so clearly this contest presents a great opportunity for those who live in other parts of the UK to get themselves some `wallpaper'.

21 December is the UHF UK Activity Contest that takes place between 2000 and 2230. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 29th of November to the 5th of December, compiled by Neil Clarke, G0CAS on the 6th of December

The solar disc had several sunspot groups visible on most days. However, most groups were small and quiet. Only one C class solar flare took place and this occurred on the 1st. Solar flux levels increased slightly from 83 units on the 29th to 88 by the 5th. The average was 86 units. The 90 day solar flux average on the 5th was 82 units, that's the same levels as last week. X-ray flux levels remained steady most days and averaged B1 units. Geomagnetic activity was very quiet every day; the most disturbed days only had an Ap index of 3 units. The average was Ap 2 units. Solar wind data from the ACE spacecraft saw solar wind speeds

decline from 480 kilometres per second on the 29th to 270 by the 3rd. Particle densities were low throughout. With a quiet geomagnetic field Bz, as expected, showed little variation with fluctuations of no more than minus 5 and plus 4 nanoTeslas for the period.

And now the solar forecast. This week the quiet side of the Sun is expected to rotate into view. Without the appearance of a large sunspot group, solar activity is expected to be at very low levels. Solar flux levels should be in decline this week and be around the 80 mark by next weekend. Presently, there are no reasonably sized coronal holes on the Sun. They tend to be a more common feature during the decaying stage of the sunspot cycle. Geomagnetic activity is expected to be quiet every day. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 7MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 14MHz. The best time to try this path will be between 0700 and 1000 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

SARL NEWS - SUNDAY 12 DECEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

SOUTH AFRICA GETS ITS OWN NASA

TWO NEW SATELLITE PROJECTS FOR SA

HABEX 3 TO FLY ON THE 18TH DECEMBER 2010

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SOUTH AFRICA GETS ITS OWN NASA

The Minister of Science and Technology, Naledi Pandor, on Thursday 9 December officially launched the South African National Space Agency at a gala event in Mid Rand. She said that SANSA is mandated as the primary, but not sole, implementer of South Africa's National Space Programme to direct Government's investment in space sciences and technology.

The purpose is to integrate and manage the country's space activities for the greater good and implement an effective, sustainable, long term, national space programme aligned with South Africa's socio-economic policies.

On a question by the SARL at the media briefing if SANSA will support amateur radio satellite programme, the CEO of SANSA said definitely. The Radio Amateurs are part of our plans.

TWO NEW SATELLITE PROJECTS FOR SA

SA AMSAT will be launching two satellite projects, both CubeSats, but with totally different design approaches and time lines.

The first project will focus on providing a FM transponder that will be available on most passes over South Africa and will have a short time line to launch.

The second project, called SAiSAT, focuses on an innovative approach to the deployment of fold-out solar panels. The project is aimed at getting Master and PhD students involved in the development and design of various payloads and substructures. A detailed paper on SAiSAT will be released in the next two weeks on www.amsatsa.org.za.

The FM transponder CubeSat, which has yet to be named, will be based on a standard available space frame and sub system with a locally designed payload. The project will be coordinated by Hannes Coetzee, ZS6BZP.

SA AMSAT is inviting radio amateurs who have an interest in satellites to join the project team. The team's first meeting will be during mid January via a teleconference.

To be part of the project team, please send your full details, a description of your expertise in electronics, communication, satellite tracking, software design, antenna design and any other areas of expertise that will support the project. In true amateur spirit participants must have enthusiasm. Besides technical experience the team also requires radio amateurs with management, financial, and communication skills. Send your details to saamsat@intekom.co.za by 31 December 2010. You will be advised of the details of the teleconference in early January 2011.

Both satellite projects will the subject of papers to be presented at the SA AMSAT Space Symposium to be held at Vodaworld on 26 March 2011.

HABEX 3 TO FLY ON THE 18TH DECEMBER 2010

The HABEX team will be launching a 3rd high altitude balloon on 18 December 2010. It will carry various payloads in preparation for a schools' launch in 2011.

The payload is made up of 4 separate modular units including a 40 m beacon transmitting a message in CW on 7 023 kHz. HABEX can be tracked live via the internet. Go to "aprs.fi" and type in ZS6SCI-3 into the "track callsign" box.

Get the full details on www.amsatsa.org.za/habex.htm.

PRIZE WINNERS of ZS85SARL FIELD DAY STATION COMPETITION

A total of 111 contacts were made with ZS85SARL during the recent field day. The winner of the lucky draw in the SARL member category is Andre Botes, ZS2ACP. His prize, an ARRL 2011 hardcover handbook will be in the mail next week. Congratulations Andre. The winner in the non-member category is ZS5IE, I D McAllister. ZS5IE will receive a year's free SARL membership. Welcome in our midst.

SARL OFFICE CLOSED FOR THE HOLIDAYS

The SARL office will be close for the summer holidays on Monday 13 December and reopen on Wednesday 12 January 2011. For urgent matters please email secretary@sarl.org.za.

MEMBERSHIP AIMING AT 1 500

The current membership stands at 1 465, well on its way to 1 500. If you have not renewed there is still time to do it. Call Mariska on Monday, the last office day for this year at 011 675 2393.

HF PROPAGATION CONDITIONS

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspots 1 131 and 1 133 continue to quietly persist. The effective sunspot number is expected to be less than 25 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europa on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible on 20 m during the late afternoons. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally 40 m is the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 December - Launch of third HABEX high altitude balloon, parrot repeater on 438,500 MHz and CW beacon 7 023 kHz, details on www.amsatsa.org.za/habex.htm; 31 December - Closing date for submission of logs for the PEARS HF QSO Party to contest@pears.ham-radio-op.net; 31 December - Closing date for submission of details for membership of the SA AMSAT satelliet team to saamsat@intekom.co.za; 20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms; 20 January - Closing date for submission of proposals and synopsis of papers for 2011 SA AMSAT Space Symposium to saamsat@intekom.co.za; 30 January 2011 - Closing date for phase 1 of the construction competition.

SARL News invites clubs and individuals to submit terms of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

1110. [RAC-Bulletin] RAC Bulletin 2010-039E - Distracted Driving Legislation Continues to be on Provincial Agendas; New Brunswick introduces Legislation Banning Cell Phone and Two Way Radio Use

Newsgroup: rec.radio.amateur.misc
Date: 2010-12-11 20:55:56 UTC
From: rac-bulletins@eton.ca
Message-ID: <4D03E10C.7090901@rac.ca>
Source record: 5029
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2010-039E - Distracted Driving Legislation Continues to be on Provincial Agendas; New Brunswick introduces Legislation Banning Cell Phone and Two Way Radio Use
2010-12-11

Provinces have a responsibility to legislate requirements respecting road safety on public roadways and the virtually ubiquitous use of cell phones for voice and texting communication has created new challenges for legislators. RAC agrees with the need for provinces to address cell phone use.

Most provinces [eg. Nova Scotia, Manitoba, BC, Quebec, Newfoundland and Labrador to name five] have chosen not to restrict the operation of mobile amateur radio equipment during driving. These governments have recognized the value of amateur radio to their citizens. Amateur radio has served the citizens of Canada during such emergencies such as floods, dangerous weather and ice storms, in support of public events such as Marathons and in support of agencies such as the Red Cross and a variety of provincial and municipal agencies across Canada. The support provided by amateur radio is frequent, freely given and in the highest standard of public service.

On November 24th New Brunswick introduced a bill to control cell phone and &#65533;hand-operated electronic device&#65533; use while driving and this legislation will prevent amateurs from using our mobile radios while driving. RAC agrees with the intent of the legislation but has pointed out in a December 9th letter from the President of RAC to the New Brunswick Minister of Public Safety, Mr. Robert Trevors: [excerpts]

&#65533;Radio Amateurs have passed demanding examinations set by the Industry Canada to earn their authority to operate equipment. Federal radio regulations specifically permit Radio Amateurs to establish mobile stations.
By tradition, Radio Amateurs are public-spirited citizens, who regularly volunteer their time, skill, equipment and energy for everything from pubic events to providing communication in time of emergency. Radio Amateurs are often at their most useful in emergency situations when using their equipment installed in their personal vehicles.
Radio Amateurs in New Brunswick regularly and without fail respond to your citizen&#65533;s needs whether it is to help municipalities fighting

flooding along the St. John River, Marathons or police on Halloween patrol you will find amateur radio operators. Banning mobile Amateur Radios for day to day use will mean that there are no experienced Amateur Radio Operators and no mobile radios available when there is a time of need. Eliminating the use of Federally Certified Radio Amateurs to use mobile radio equipment will not increase public safety but decrease it.

Third reading on the bill is expected during the week of December 13 to 17. The Bill permits the government to proclaim the legislation at a time of its choosing anytime thereafter.

It is preferable that any exclusion for Amateur Radio operators occurs in the legislation itself and RAC has so requested. There are provisions for a regulated exclusion for Radio Amateurs in Section 265.05 [f] of Bill 4. The Lieutenant-Governor in Council may make regulations exempting, with or without conditions, certain classes or types of devices or motor vehicles, or certain classes of persons, . Regulations would follow the passing of the bill and hopefully before the proclamation of the Bill into law. Legislation [Acts] are passed by Legislators while Regulations are approved by Cabinet [both require royal assent through the Lt. Governor].

RAC will:
Continue to work with Amateurs in New Brunswick to lobby the Province for exclusion for Amateur Radio Operators during mobile operations.
Continue to work with amateurs in New Brunswick to encourage communities and served agencies to remind government of the value of amateur radio in all its forms [mobile, fixed, or portable].
Offer to work with the Government of the Province of New Brunswick to help ensure the highest quality legislation and regulation which will enhance public safety.

Amateurs and Clubs should take opportunities in their own provinces to have served agencies [public or private agencies and groups] remind provincial authorities of the continued value and relevancy of Amateur Radio. In today's world of smart phones and the internet it is sometimes easy for officials to overlook the value of Amateur Radio and our provision of a distinctive and valuable public service.

Geoff Bawden VE4BAW
President and Chair RAC

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 12th December 2010

IRTS Committee Meeting

The recent IRTS committee meeting had to be postponed due to the inclement weather and will be re scheduled for early January.

Affiliated Clubs should notify the Secretary so their representatives can be notified of Committee meeting Dates.

IRTS 80M Counties Contest

The 80m Counties Contest this year will be held on Monday the 3rd, the Bank Holiday. Rules in Echo Ireland and on the IRTS web site.

IRTS Outgoing QSL Service

Due to further recent losses with batches of QSLs in the post system, Tony EI8JK the IRTS Outgoing QSL Manager, has started a service whereby if he is made aware of cards being sent to the Outgoing Bureau via email, Tony will in turn advise when the cards have been received.

It is thought that already about 50% of Bureau users are already doing this and if the number can be increased it will add to the comfort of not only the Bureau Manager expecting batches but also the user being made aware of when the cards have been received etc.

For members who wish to avail of this service please email Tony him once cards have been sent, Tony's email address is ei8jk /at/ amsat.org

---

Geminids Meteor Shower 2010

What should be the best meteor shower of 2010 will begin on the evening of Monday, Dec. 13.

Like most meteor showers, the Geminids will be at their best after midnight (early on the morning of Dec. 14), when the Earth is heading directly into the meteoroid stream. But some will be visible earlier in the night, on the evening of Dec. 13, because the meteors' radiant - where they appear to originate - is nearly circumpolar, so they will

stay in view above the horizon all night.

ZL8X Dxpedition

With the ZL8X Dxpedition closed it has been deemed a success the world over,the online log shows details of 143.211 QSO's from 160-6m.

These QSO's are from 196 different DXCC entities, which include 43 EI's in the log. The Top four EI's in the log are EI7BA with 9 QSO's EI9O with 6 QSO's and both EI9FBB & EI6FR both with 5 QSO's well done to everyone who made it through the huge pileups.

ARISSat en-route to Moscow

ARISSat-1 was shipped from Johnson Space Center on November 24.

It was held in Germany until Saturday, December 4 at which time it was transferred to Russia.

Energia representatives are expected to pick up the hardware early this week. The Russian team will install the battery and the Kursk University experiment and will then be joined by U.S. team members. Together, the team will test the satellite for flight.

A final safety review will follow in January ARISSat-1 is scheduled to launch on Progress 41P on January 28.

DX News

For those of you still needing Bangladesh for your DXCC look out for S21FGC during the period 16-21 December. Several foreign operators will be using this call and the QSL info is via JH1AJT.

Two German operators, DG1FK and DK9FN, will be active from the rare DXCC entity of Temotu from 21st December till 3rd January. They will use the calls H40FK and H40FN from the island of Nendo.

The visit to Madagascar by F6ICX comes to an end on 18th December. He has been QRV from the island of Sainte-Marie which has a separate IOTA reference of AF-090. For the record the main island of Madagascar is IOTA AF-013.

Karel ON5TN has returned to work at the Belgian Antarctic 'Princess Elisabeth' base. He has recently been heard operating as OR4TN and will be there till 24 February.

Another station from the far south is DT8A who is QRV from a Korean base in the South Shetland Islands. His QSL info is via HL2FDW.

Both Sable Island and Jarvis Island Dxpeditions have been postponed for the immediate future.

South Dublin Radio Club Christmas Party 2010

This year's South Dublin Radio Club Christmas Party will take place on Tuesday the 14th of December.

The venue will be the same as last year, "The Morgue", Tempelogue Village from 8.00 pm until late.

Members of other clubs and visitors are as usual very welcome to this social event. Limited free food will be available for paid-up members & visitors can choose from the bar menu until 9.00 pm.

This week in History

1901 Marconi received the first transatlantic communication, letter S

1961 The first amateur satellite, OSCAR 1 was launched.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-December, through Sunday, 12th-December there were 226 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK2, ZL, ZL7, ZL8, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8 & 3B9, MAURITIUS AND RODRIGUEZ ISLAND. Jacques, F6HMJ, will be active as 3B8/F6HMJ from Mauritius between January 5th and February 21st, except between January 11-20th, he will be active as 3B9/F6HMJ from Rodriguez Island. Activity will be on all HF bands using CW, SSB and possibly RTTY. QSL via F6HMJ.

4F9, PHILIPPINES. Hans, DL5SDF, who has been active as DU9/DL5SDF from Mindanao (OC-130), now has a new callsign of 4F9HXB. He was heard this past week on 160/80/30/20 meters CW. QSL via DL5SDF.

7P8, LESOTHO. Sergey, RV9WJ, is now active as 7P8RU until December 17th. Activity has been on 80/40/30/20 meters using SSB, RTTY and PSK31. QSL via RV9WJ.

9M6, EAST MALAYSIA (IOTA & WFF Op). Paul, R2AD/W8AY, is now active as 9M6/W8AY from Borneo (OC-088) until December 16. He was heard in the ARRL 10M Contest this past weekend. His activity is planned for a visit to the following locations (dates not provided):
Tunku Abdul Rahman Park, Borneo (9MFF-027, IOTA OC-133)
Mount Kinabalu Park (9MFF-026, IOTA OC-088)
QSL direct to: Paul Sharunin, P.O. Box 727, Moscow 101000, Russia.

A3, TONGA (IOTA Op). Dave, W6ZL, informs OPDX that he is planning to be active as A35KL from Foa Island (OC-169) between December 16-20th. His activity will be primarily CW, possible RTTY and SSB, using a K3 radio and verticals on the beach for 80-10 meters. He will not have InterNet access there. QSL LoTW or direct to W6ZL, with a SASE or new style IRC.

CQ NEWS. Richard Moseson, W2VU, Editorial Director from CQ Communications, Inc., sent out the following press release on December 10th: "WorldRadio Online Garners More Than 1000 'Fans' on Facebook -- WorldRadio Online, the first major online-only ham radio magazine, has topped 1,000 fans on its Facebook page, according to Editorial Director Rich Moseson, W2VU. The magazine has had a presence on the social networking website since February of this year.
The WRO page on Facebook provides a forum for posting messages of interest to readers and potential readers, along with an opportunity for readers to engage writers and editors in online conversations. Reflecting the general demographics of Facebook, the magazine's fans there tend to be younger than the perceived age of the amateur radio community as a whole, with 65% of WRO Facebook fans being between the ages of 25 and 54. 'This provides additional data to show that younger hams are out there in large numbers, but perhaps are more visible in cyberspace than at club meetings and hamfests,' notes Moseson. 'One goal of our magazines is to build a community of readers who share experiences and information with each other, and if our online presence is able to help bring younger hams into that community, then we are achieving that goal.'
WorldRadio Online has been published online by CQ Communications, Inc., since February, 2009. The previous print version of the magazine began monthly publication in 1971. CQ Communications is the leading independent publisher in the amateur radio/hobby radio community. It also publishes CQ Amateur Radio, CQ VHF and Popular Communications magazines, along with a variety of books and related products."

CY0, SABLE ISLAND (Update/Rescheduled). The CY0 team has announced this past week: "Approval has been granted by Canadian authorities and the Officer-in-Charge (OIC) for Sable Island, for a 3rd attempt at accessing Sable Island, in early March 2011.

This time period was selected, in part, due to still having favorable
low band conditions, and also to receive the benefits of projected improved
solar conditions and propagation on the high bands near the Spring Equinox.
We are hopeful that weather conditions will be improved, even though we
have learned that no time period is certain when visiting Sable Island."
Watch for update on their Web site at: http://www.CY0dxpedition.com

LAST MINUTE UPDATE FROM RANDY/N0TG (dated Dec. 12th): "Approval has
been granted for a 'third' try to access Sable Island. This attempt
will be in March 2011 with the hope that the weather won't be quite
as volatile. Sable weather though is always an issue. With this being
our third try, the link on the Web home page, "How To Contribute" is
available for any that wish to consider this matter which will be
helpful and appreciated. We're optimistic and working hard to make
this happen. A side note: As of this writing the beach landing area
on Sable is still completely flooded from the storm surge one week
ago.....pictures are placed on the Web page at:
http://www.CY0dxpedition.com "
ADDED NOTE: Just a reminder. Al Wilson, VE1AWW/CY0, is an assigned worker
on Sable Island. His schedule is 3 months ON and 3 Months OFF. Currently,
he is on the island and will be active as work schedules permits through
DECEMBER. He is beginning to show up on the Clusters....

DX-CODE OF CONDUCT (Reminder). The "DX-Code of Conduct" are some very
important guidelines on how to best use your station, as well as providing
good operating skills to make it into the DX log in away that is both
efficient and follows the ethical standards of operating on the amateur
bands. So please visit and become a supporter of the "DX-Code of Conduct"
Web page at: http://dx-code.org

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the
following have been approved for DXCC credit:
7Z1HB - Saudi Arabia; 2007 to the present operation.
H40HP - Temotu Province; 2009 operation.

"If you had these operations rejected in a recent application, please
send an E-mail to the ARRL DXCC Desk," Bill Moore states. He also states,
"Please note that due to heavy E-mail volume, you may not receive a reply.
Results will appear in Logbook of The World (LoTW) accounts, as well as
online on the daily listings."

PLEASE NOTE (Correction): Last week we listed the TS9A operation as
being in 2010. It should have read: "TS9A Tunisia; 2009 Operation"

E5, SOUTHERN COOK ISLANDS. Giulo, IW3HVB, will be active as E51HVB from
two different Southern Cook Islands in the later half of December. His
current tentative schedule is as follows:
December 20-24th: Rarotonga Island (OC-013)
December 24-28th: Aitutaki Island (OC-083)
Activity will be holiday style mainly on 40 and 20 meters SSB; possible
operations on 17/15/12/10m if propagation is good. Suggested frequencies
are: 7057, 14267, 18137, 21267, 24957 and 28567 kHz. Equipment will be

an Elecraft K3 w/100w into a multi-band vertical antenna by I1UJX and
a 10 meter fishing rod vertical for 40 meters. QSL via IW3HVB, direct or
by the Bureau. If an InterNet connection is available, daily log uploads
will be possible on the following Web page. If not, log will be avilable
after his return at: http://www.arimarcon.it

IOTA NEWS.....
NA-180. (NEW ONE) Just a reminder, that German operators Joe/DJ1JB
(V31ML) and Max/DJ4EL (V31ME) will be on a IOTA DXpedition
activating four IOTAs from Belize during January 2011. The
duo plan to activate the following IOTAs on the following
dates: January 10-11th - Ambergris Caye (NA-073)
January 11-14th - Caye Caulker (NA-073)
January 14-18th - Long Caye (NA-123)
January 18-26th - Tobacco Caye (New One, NA-180)
Activity will be on 80-10 meters SSB using two stations with
100 watts (Kenwood TS50 and an Icom IC-706) into homemade
Quads, a wire antenna and a vertical. QSL via their home
callsign, by the Bureau or direct.

OC-093. Gerard, F2JD, (who is at the moment in Manilla, Philippines,
for his business, and is active as DU1/F2JD) will be active
as DU2/F2JD from Batanes Islands (before joining up with the
multi-national DX0DX team) between December 14-19th. Activity
will be on 20/17/15 meters using CW and SSB. He will travel
to the Zambales Province (200km NW from Manilla) around and
between December 26th and January 2nd, where there is less
QRM than in Manilla City. On Januray 4th, he will travel to
Palawan to joint the guys to go to Spratly. He will be back
around January 15th, in Manilla and stay until January 24th,
before heading back to Paris, France. QSL via F6AJA.

J7, DOMINICA. Jan, DL7JAN, is planning to be active as J79AN (applied
for) from Dominica (NA-101) between February 23rd and March 6th (2011).
Activity will be on 40-10 meters, possibly 80 meters, using CW, SSB and
RTTY. Jan plans to make a special effort to listen for Asia especially
to JA. QSL via DL7JAN, direct or by the Bureau.

KH6BZF PROPAGATION FORECAST/REPORT (For December 13-19th)....
Dec 13 HN-AN SOLAR REFERENCE KEYS
Dec 14 AN-HN --------------------
Dec 15 AN BN - Below Normal
Dec 16 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 17 AN LN - Low Normal
Dec 18 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 19 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less

UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

P6, SABA. Mike, G4IUF, will be active as PJ6/G4IUF between January 27th
and March 3rd (2011). Activity will be holiday style, but definitely
not as laid back as his recent CT3 trip, on 80/40/20/15/10 meters using
CW and SSB. Suggested frequencies are:
CW - 7 kHz up from the band edge.
SSB - 3797, 7147, 14157/14247, 21277 and 28477 kHz.
Equipment is an IC-7000 and W3DZZ antenna. He states that from his rental
villa he will be able to use plenty of trees for antennas. QSL via his
home callsign, direct or by the Bureau. NO eQSL.

9V1SJ QSLS. It is almost impossible to receive a QSL from this station.
If you look on QRZ.com, it states "SORRY, WE DON'T HAVE A MANAGER OR
QSL CARDS FOR THIS STATION" ... even the operators ask stations not
to use the address in QRZ.com. However, some stations "MAY" receive a
QSL card for activity between December 7-11th. One of the operators
named Joe, home call VK5WU, who operated from 9V1SJ as a demonstration
for JOTA, for the Boy Scouts, "MAY" send QSLs out via the Bureau once
he returns to Australia. KYFC!

NEED A QSL MANAGER? Saulius Zalnerauskas, LY5W, is available and is
volunteering. His E-mail address is: ly5w.sam@gmail.com
His mail address is: Saulius Zalnerauskas, Box 1081, Kaunas, LT-49005,

Lithuania.

PJ4D AND PJ4W QSL STATUS. Kelly, N0VD, PJ4D team member, reports that the PJ4D design went to the printer last week. The PJ4W card is still in the design stage and will go to the printer in the next couple of weeks.

TC2010GT via TA1HZ. Activity was by the members of the TCSWAT (TC Special Wireless Activity Team) this past weekend and was from the Galata Tower. This is the last special callsign to be used by TCSWAT for the "Istanbul-European Capital of Culture 2010" theme. The TCSWAT policy is to send QSL cards 100% via the bureaus. Please do not rush to send in your QSL card direct. At the beginning of January, TCSWAT will start sending out all its
QSL cards to the many countries in the bureau system. More details are available at <QRZ.com> and <www.tcswat.org>.

QSLS VIA LoTW: 3D2II, 4O50A, 5V7TT, 6W1RY, 8S0C, 9M8Z, AA4V/VP9, AH2R, CE4CT, CN3A, CE3DNP, CQ9T, CR3A, CT3KN, CW5W, DV1JM, E79D, EA3GLB, EA5GTQ, EE2K, EF8N, EF8R, EI3GC, F5IN, FO8RZ, FP/KV1J, FS/K9NB, GM7R, H7V, I3VJW, IR4M, J39BS, JW5X, KG4QW, KG6DX, KH2L, KH6ZM, KP4JRS, LA2AB, N1BUG, OE4A, OH6M, OK1CF, OK5W, OT5A, OZ6TL, P40L, P49X, P49Y, PI4COM, PZ5RA, R0FA, R1ANC, RA0FU, RK4PB, RK6FZ, RV2FW/1, SJ2W, SM5CAK, SP2DWG, SP6JZD, T30XG, TI5N, TM2Y, TM0HQ, TR8CA, UA9WZ, UR3LPM, V26B, VA7AM, VE3EJ, VK4KW, VK6ANC, VP2EMR, VP5DX, VP5T, VP9/N1SV, VR2YYW, XF1RCS, YO5BRZ, YW4D, YW5T, Z21BB and ZF1A

QSLS RECEIVED VIA MAIL: 5N6EAM, 5V7TT, 5Z4FM, 9G5SG, 9L0W, 9V1SV, EY7AD, FWD2A, LZ1UQ, MU/DL2SBY, PJ2/K2NV, PJ2/K8LEE, PJ2/OH1VR, PJ2/PB2T, PJ2/W1NG, PJ2DX, PJ2MI, PJ5/AH6HY, PJ7/K4UWH, PJ7MF, TO7ZG, TS7TI, TY5ZR, V47KP, VP2MDG, VY0X, XW1B, YI1RZ and ZD8ZZ

QSLS RECEIVED VIA THE BUREAU: TO7RJ

T8, PALAU. Tack, JE1RXJ, will be active as T88RX from the "West Plaza Rental Shack by the Sea Hotel" in Koror, Palau (OC-009), between January 21-26th. Activity will be holiday style on 160-6 meters using CW and SSB. His emphasis will be on the lower band and CW. QSL via JE1RXJ, direct (see QRZ.com) or by the JA Bureau.

XW, LAOS (Update). Hiroo, JA2EZD, will once again be active as XWPA (callsign is correct and not XW2A) from the Vientiane DX Club for another year (specific dates not provided). Activity will be on the HF bands using an IC-706 and TL922 amplifier. He was spotted on 15 meters CW between 0730-0830z. QSL via: Hiroo Yonezuka, Box DD153, Huang Sathai, Vientiane, Laos.

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, is partially QRT for a while until he identifies the severe electronic interference from the new base. He hopes to operate for short periods during this time. He thinks he has identified the fire alarm system and the air handling units as the main culprits. Once switched on, they cause severe broad band interference, preventing successful HF operations, even on the

commercial frequencies. Pierre has relocated his ZS8M operation to the old radio room in the old base for the time being and will be operational from there until he can eliminate the QRM. Pierre was heard this past Saturday on 15 meters (around 21250 kHz) between 1345-1517z. He also mentions that he has been away from home for 8 months now and only has 5 months left on the island. He expects to be back in Cape Town on May 11th. Pierre has also released another newsletter from Marion Island (Special Christmas edition) where he provides more pictures, along with more details about the happenings and activities on the island. His newsletter can be found online at: http://www.iz8epy.it/html/zs8m.html

1122. [DXNL] DXNL 1706 (Dec 15, 2010)

Newsgroup: rec.radio.amateur.misc
Date: 2010-12-14 22:09:40 UTC
From: Robert Busch - DL7VOA <dxnl@dxhf.darc.de>
Message-ID: <1731215617515.20101214230458@dxhf.darc.de>
Source record: 5041
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

DXNL 1706 - Dec 15, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(direct: dl7voa@darc.de)

CY0 - SABLE ISLAND, NA-063
The planned DXpedition to Sable Island (NA-063) has been postponed once again. The runway of the airport is currently not suitable for landing with a plane, they said. The team (N0TG, AA4VK and WA4DAN) now hopes to become active in March 2011.

DU - PHILIPPINES
Gerard,F2JD, who signs DU1/F2JD from Manila at the moment, will go on a business trip to the Batanes Islands (OC-093) from Dec 14-19. He plans to show up as DU2/F2JD in CW and SSB on 20m, 17m and 15m. After that he will stay in the province Zambales (Luzon Island, OC-042) from Dec 26 until Jan 2. He will join the DX0DX team activating the Spratlys on Jan 4 and will stay another week in Manila starting on Jan 15.
His flight to Paris goes on Jan 24.
His QSL manager is F6AJA, who confirms reliably via bureau or direct.

Hans,DL5SDF, who was active as DU9/DL5SDF from Mindanao (OC-130) before has a new callsign now. He has been spotted as 4F9HXB in CW on 20m-160m during the past few days. QSL via DL5SDF.

H40 - TEMOTU, OC-100
Peter,DG1FK (H40FK), and Sigi,DK9FN (H40FN), will spend their christmas holidays in Temotu again from Dec 21 until Jan 3. They promised to work in CW, PSK and RTTY from Nendo Island (OC-100). They will operate two radios and amplifiers simultaneously using a wire pyramid for 160m/80m/40m and a 2ele yagi for 30m-10m.
QSL info: H40FK via DG1FK, H40FN via HA8FW (direct or via bureau).
See also: http://www.mydarc.de/dg1fk

S2 - BANGLADESH
Zorro,JH1AJT, and his team consisting of JJ1LIB, JP1TRJ, KL2A, DS4EOI and A51HI will be QRV as S21FGC from the capital Dhaka from Dec 16-21.

They are supported by Dr. Zahudul Haque Shipon,S21VA, vice president
of the "Bangladesh Amateur Radio League". Operation is planned in CW
and SSB on 160m-10m, with focus on 160m/80m and 40m CW. QSL via JH1AJT.

TG - GUATEMALA
Martin,TG9/DL5RMH, will be active in CW on 40m-10m from Guatemala City
between Dec 16 and Jan 13. Martin prefers operating on 30m.
QSL cards should be sent via bureau or direct to his homecall.

XW - LAOS
Hiroo Yonezuka,JA2EZD, showed up from Laos using the unusual call XWPA.
He has a licence for 40m, 20m, 17m and 15m and will stay until Jan 9.
QSL only direct via Vientiane DX Club, PO Box DD 153, Vientiane, Laos.

4S7 - SRI LANKA, AS-003
Peter,DC0KK, has left for Sri Lanka on Dec 12 and will be active as
4S7KKG until Mar 13. Peter uses wires, a dipole and/or a groundplane.
Digital modes like RTTY, PSK and WSJT are preferred.
He asks for QSLs sent direct or via bureau to his homecall, see also
the info at QRZ.com. QSL cards will be confirmed after his return home.

7P - LESOTHO
Sergey,RV9WJ, is working as 7P8RU until Dec 17. He has been workd in
SSB, RTTY and PSK31 on 80m/40m/30m/20m. QSL via homecall.

9L - SIERRA LEONE
Stephen,G7BXU, will be QRV as 9L1BXU from Freetown in Sierra Leone from
Dec 19 until Jan 7. He will use a FT-897 and a G5RV antenna.
QSL cards should be sent via his homecall.

DXCC: Following operations have been approved for DXCC credit now:
H40HP - Temotu, operation 2009
TS7TI & TS7TI/p - Tunisia, operation 2010
TS8P & TS8P/p - Tunisia, operation 2010
TS9A - Tunisia, operation 2009
3C0C - Annobon, operation 2010
3C9B - Equatorial Guinea, operation 2010
3V9A - Tunisia, operation 2010
3V0A - Tunisia, operation 2010
7Z1HB - Saudi Arabia, since 2007

SILENT KEYS: Following DXers became a silent key during the last weeks:
Hamad Salmeen (9K2OZ), Rev. Fr. Donald R. Scherer (KD5OY),
Rimantas "Rimas" Mikalauskas (LY4CW), William G. Cossette (N0BKL),
Julius Cajka (OM3OM), Richard T.Briggs (WA7MTF)

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
A radio magazine from Spanien can be downloaded in a digital form from

http://www.radionoticias.com It is about DX, contests, propagation
forecast, receiver and antenna tests and much more.

There is an online QSL request website for the operation of OH0/DL6UAA
in November 2010 at: http://www.dl6uaa.de/oh0

UPCOMING CONTESTS

Dec 18: RAC Canada Winter Contest
Dec 18: OK DX RTTY Contest
Dec 18/19: Croatian CW Contest
Dec 19: RTC Party
Dec 19: QRP-ARCI Holiday Spirits Homebrew Sprint

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
NA-138, W4, FL State North East Group: John,K8LJG, is working as K8LJG/4
from Amelia Island until Jan 4, 2011. QSL via homecall (bureau/direct).

OC-013, E5, South Cook Islands: Andy,AB7FS, is QRV as E51AND from Rarotonga
until Jan 1. QSL via homecall (see QRZ.com).

Giulo,IW3HVB, will sign E51HVB also from Rarotonga from Dec 20-24.
QSL via homecall (bureau/direct).

OC-169, A3, Tonga, Foa Island: Dave,W6ZL, will activate Foa Island as A35KL
on 80m-10m from Dec 16-20. He mainly works in CW but sometimes also in
RTTY and SSB using a K3 radio and verticals at the beach.
QSL via W6ZL (L/d).

Lighthouse activities (WLOTA/ARLHS/ILLW)

DU2/F2JD LH 3122 Batan Dec 14-19
DU9/DK2PR LH 2803 Mindanao until Jan 3, 2011
K8LJG/4 LH 3048 Amelia until Jan 4, 2011

RAC Bulletin 2010-040E - Season's Greetings
2010-12-14

To Fellow Radio Amateurs, your Families and Loved ones;

I bring you seasonal greetings from your national radio association;
the Radio Amateurs of Canada

I hope that 2010 has been an excellent year for you and those that you
hold dear.

As we enter this holiday season I want to wish each and every one of
you a warm wish for a fabulous holiday season as well as a healthy
and prosperous 2011. I am sure that you will be taking time to be with
your friends and family. Being with those closest to you makes
this the finest part of the year.

I hope to hear you on the airwaves 0000 UTC to 2359 UTC on December
18th for the RAC Winter Day Contest.. It is part of RAC`s way to
celebrate the season.

I look forward to seeing many of you in person when the RAC Annual
General Meeting comes to Newfoundland next August.

Merry Christmas, Happy Hanukah, Happy Holiday Season.

Take care . may 2011 be good to you.

Geoff Bawden, VE4BAW
President and Chair RAC

==> + FCC NEWS: NEW RULES GOVERNING VANITY, CLUB STATION CALL SIGNS TO
TAKE EFFECT FEBRUARY 14, 2011

On Wednesday, December 15, new rules affecting vanity and club
station call signs within the Amateur Radio Service were published in
the Federal Register
<http://edocket.access.gpo.gov/2010/pdf/2010-31349.pdf>. These new
rules will go into effect on February 14, 2011. Thirteen months ago,
the FCC announced its intention to modify Part 97
<http://www.arrl.org/news/fcc-looks-to-revise-clarify-vanity-call-sign-rules>
as it applies to the vanity call sign system and club station call
signs, aligning the rules to prior Commission decisions. Last month,
the Commission released a Report and Order
<http://www.arrl.org/news/fcc-issues-em-report-and-order-em-on-vanity-and-clu
```

b-station-call-signs>
(R&O), outlining its decision. Along with the changes to the call sign rules, the FCC made "certain minor, non-substantive amendments" to portions of Part 97.

==> + SPECTRUM DEFENSE: WHAT ROLE CAN YOU PLAY TO DEFEND OUR AMATEUR RADIO SPECTRUM?

The third edition of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- has just been released on the ARRL Web site. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. Your financial support is vital to continue the ARRL's work to protect your operating privileges. You can help protect these privileges by contributing generously to the 2010 ARRL Spectrum Defense Fund before December 31.

"The coming year will see the completion of preparations for the next World Radiocommunication Conference (WRC-12), to be held in Geneva in January and February 2012," said ARRL Chief Executive Officer David Sumner, K1ZZ. " We hope for favorable outcomes on the agenda items we care about -- but that will not be the end of it. This WRC will recommend an agenda for the next one, later in the decade. Will that agenda pose serious threats to amateur spectrum? Will it include the possibility of new or expanded amateur allocations? The answers will depend in part on work being done on your behalf today, in Geneva and within regional telecommunications organizations that cover the globe."

This edition of Spectrum Defense Matters includes articles on how the IARU works with the world's six regional telecommunications organizations, a look at how the FCC's National Broadband Plan could affect the Amateur Radio Service and a message from ARRL Chief Technology Officer Brennan Price, N4QX, outlining many of the ways the ARRL advocates for the defense of your spectrum. Read more here <http://www.arrl.org/news/what-role-can-you-play-to-help-defend-our-amateur-radio-spectrum>.

==> + AMATEUR RADIO FUN: BE A STAR! ENTER THE ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its first-ever video contest <http://www.arrl.org/video-contest>! We are looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby is; extra points will be awarded for a video showing someone, young or old, licensed or not, making their first contact. Videos will be judged on overall quality and composition, and prizes will be awarded. The video author/producer must be an ARRL member; however, the people who appear in your video can be non-members. This contest is intended for amateur videographers. If you are a professional, please do not apply. Check out all the details -- including the fine print -- on the ARRL Video Contest Rules and

Guidelines Web page <http://www.arrl.org/video-contest>.

==> ARRL PUBLICATIONS: NEW EDITION OF ON4UN'S LOW-BAND DXING NOW SHIPPING

The fifth edition of ON4UN's Low-Band DXing: Antennas, Equipment and Techniques for DXcitement on 160, 80 and 40 Meters by John Devoldere, ON4UN, features new and updated material. This is a book -- with CD-ROM included -- that every fan of 40 meters through Top Band needs in the shack. It is loaded with everything you need to succeed on the low bands. It's been 25 years since Devoldere published the original Low Band DXing, sharing his knowledge of techniques for success on 160, 80 and 40 meters. Over the years, the book has evolved to keep pace with the growing knowledge of propagation, equipment, operating techniques and receiving and transmitting equipment for the low bands. This edition is no different, with significant new additions and updates throughout the book. Read more here <http://www.arrl.org/news/new-edition-of-em-on4un-s-low-band-dxing-em-now-shipping>.

==> + ON THE AIR: 2010 A BANNER YEAR FOR DXCC, INCOMING/OUTGOING QSL BUREAU

With the coming of more sunspots, comes more DX. And when more amateurs are working DX, that means the ARRL's Membership and Volunteer Programs Department -- especially the DXCC desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear.

"Compared to 2009, 2010 saw a dramatic increase in the number of cards we received from ARRL members that were sent to foreign QSL bureaus, as well as the number of cards we sent out to the bureaus," said DXCC Manager Bill Moore, NC1L. "In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased." Read more here <http://www.arrl.org/news/2010-a-banner-year-for-dxcc-incoming-outgoing-qsl-bureaus>.

==> + SUPPORT ARRL: ARRL RECEIVES $1 MILLION GIFT TO THE ARRL ENDOWMENT

In October 2010, the ARRL received word that that it is a beneficiary of the Charles and Iona Mathias Joint Trust. Dr Mathias, W8KGD, became a Silent Key in 2008 at the age of 93; Iona, his wife of 62 years, passed away in June 2010. The ARRL is one of five beneficiaries of the Trust that has an estimated value in excess of $8 million. Each beneficiary is scheduled to receive a 20 percent share of the residual after other distributions are completed. The ARRL first learned of the Trust upon Dr Mathias' passing.

"The generosity of Dr and Mrs. Mathias is a shining example of how individuals can make a continuing impact on the organizations that influenced their lives," said ARRL Chief Development Officer Mary Hobart, K1MMH. "The Mathias' generosity to the ARRL during their lifetime -- and through the Charles and Iona Mathias Joint Trust -- is

an example of commitment to the work of the ARRL, even after their passing." Read more here <http://www.arrl.org/news/arrl-receives-1-million-gift-to-the-arrl-endowment> .

==> SUPPORT ARRL: ARRL THANKS DONORS WITH PUBLICATION GIFT CERTIFICATES

The end of 2010 is fast approaching and ARRL is poised to close the books on December 31! Many members wait to make contributions at the end of the year -- these contributions are important to the ARRL funds that are not supported by member dues.

But wait! There's more! When you make a contribution of $30 or more before December 31, you'll receive a complimentary $10 gift certificate* on your next publication sales purchase with the ARRL. You can make your gift on our secure Web site <http://www.arrl.org/donate>, by mail or by phone at 860-594-0397 and we'll send your $10 gift certificate right away.

You may designate your contribution to one or more of the following funds:

- The ARRL Diamond Club <http://www.arrl.org/the-arrl-diamond-club> (to renew your ARRL membership and make a contribution!)
- The Spectrum Defense Fund <http://www.arrl.org/spectrum-defense-fund>
- The Education & Technology Fund <http://www.arrl.org/education-and-technology-fund>
- The Lab Fund
- The Historic Preservation Fund <http://www.arrl.org/historic-preservation-fund>
- The ARRL General Fund.

You may decide to make a monthly credit card contribution of $10 or more on the ARRL Web site to support one of the areas listed above. For more information, contact ARRL Chief Development Officer Mary Hobart, K1MMH, via e-mail <mhobart@arrl.org> or by phone at 860-594-0397. Your year-end contribution is tax deductible to the extent allowed by law. ARRL is an IRS designated 501(c)(3) organization holding tax identification number 06-6000004.

* About ARRL Gift Certificates: After making your contribution of $30 or more, your $10 ARRL Gift Certificate will be promptly mailed to you. Certificates must be redeemed by April 30, 2011. It is easy to redeem your certificate online, by mail or phone. This offer is valid on all sale and regular-priced ARRL publications.

==> + ARRL HEADQUARTERS CLOSED FOR CHRISTMAS, NEW YEAR'S HOLIDAYS

ARRL Headquarters will be closed Friday, December 24 and Friday, December 31 in observance of Christmas and New Year's Day. There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. There will be no ARRL Letter <http://www.arrl.org/arrlletter/> or ARRL Audio News

<http://www.arrl.org/arrl-audio-news> on Thursday, December 23 and 30; both the Letter and Audio News will return on January 6, 2011. We wish everyone a safe and joyful holiday season and a prosperous 2011.

==> SOLAR UPDATE

Tad "The windows are illuminated by the evening Sun <http://www.youtube.com/watch?v=NZtJWJe_K_w>" Cook, K7RA, reports: The average daily sunspot numbers for this week declined more than 7 points from the previous week to 27.6. The solar flux stayed about the same, up less than a point. The predicted planetary A index for the next five days -- December 16-20 -- is 8, 5, 8, 8 and 5. The solar flux for the same days is predicted at 87, 86, 84, 86 and 86. Flux values are expected to meander between 86 and 88 until the end of the month, when they are expected to hit 90 around December 29-January 1. Look for more information -- including information on JHelioviewer, a free visualization program for examining the millions of images from NASA's Solar Dynamics Observatory -- on the ARRL Web site on Friday, December 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Crosby, Stills, Nash and Young's Our House <http://www.youtube.com/watch?v=NZtJWJe_K_w>.

==> + NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEB SITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL Web site. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you use CW on a regular basis?
- If your out-of-warranty transceiver failed, what would you do?
- Do you own a tablet computer?
- Does your ARES® group use the ARRL Public Service Activity Report <http://www.arrl.org/files/file/Public%2520Service/fsd157.pdf> form to document SKYWARN activity?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the March 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- December 17 -- NCCC Sprint Ladder; Russian 160 Meter Contest; AGB-Party Contest
- December 18 -- OK DX RTTY Contest; RAC Winter Contest

- December 18-January 2 -- Lighthouse Christmas Lights QSO Party
- December 18-19 -- Stew Perry Topband Challenge; Croatian CW Contest
- December 19 -- ARRL Rookie Roundup (CW)
<http://www.arrl.org/rookie-roundup>; ARCI Holiday Spirits Homebrew
Sprint
- December 20 -- Run for the Bacon QRP Contest
- December 22 -- SKCC Sprint

Next week and beyond:

- January 1 -- ARRL Straight Key Night
<http://www.arrl.org/straight-key-night>; SARTG New Year RTTY Contest;
AGCW Happy New Year Contest; AGCW VHF/UHF Contest
- January 1-2 -- Original QRP Contest
- January 4 -- ARS Spartan Sprint
- January 7 -- NCCC Sprint Ladder
- January 8 -- Midwinter Contest (CW)
- January 8-9 -- ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>;
North American QSO Party (CW); Michigan QRP January (CW); Contest
Hunting Lions in the Air Contest; EUCW 160 Meter Contest; WW PMC
Contest
- January 9 -- NRAU-Baltic Contest (CW); Midwinter Contest (Phone);
NRAU-Baltic Contest (SSB)
- January 12-13 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

1132. [RAC-Bulletin] RAC Bulletin 2010-041E - Canada Winter Contest 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-12-17 03:59:29 UTC
From: rac-bulletins@eton.ca
Message-ID: <4D0ADFD6.90306@rac.ca>
Source record: 5101
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2010-041E - RAC Winter Contest 2010

The RAC 2010 Winter contest will be held from 0000 UTC to 2359 December 18, 2010.

The following stations plan to be active using the RAC call sign:

RAC Call Sponsor

VE1RAC VE1PJS
VA2RAC Club Radio Amateur de Qu&#65533;bec Inc VE2GEJ
VA3RAC Ottawa ARC at VE3CWM
VE4RAC VE4BAW
VE5RAC VE5CPU
VE6RAC VE6JY
VE7RAC Coquitlam, Surrey and Surrey Emergency Clubs
operating on all bands at a kW
VE8RAC VE8EV
VE9RAC VE9AV in Fredericton
VY0RAC VY0AW operating on 40 and 80
VY1RAC VY1EI
VY2RAC VY2LI
VO1RAC VO1MX
VO2RAC VO2NS

One of the stations you may want to look for in particular is VE4RAC with Radio Amateurs of Canada President Geoff, VE4BAW as operator. Geoff will be operating on 20, 40 and 80 Metres.

And as a little bonus for everyone, listen for BY1RX with former RAC President Dave VO1AU manning the station.

Dave plans to be on in the RAC Winter Contest operating as either VO1AU/BY1RX or BY1RX. BY1RX has excellent antennas and a full kW. If you need BY on a new band or mode, he would be very willing to QSY.

Finally there will be an award of a RAC coffee cup to any station that contacts all the RAC stations. Please mention in your log submission if you work all the RAC stations.

For scoring, frequencies, free software to help you submit your results and complete details on the RAC Winter Contest please use this link to the RAC web page:

http://www.rac.ca/en/rac/programmes/contests/

WIANEWS FOR WEEK COMMENCING DEC 19 2010.

Norwegian film crew from a TV show known as "The Golden Goal

UK family has five radio amateurs.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN

ZL's Official News Broadcast has racked up a 25 year milestone.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING DECEMBER 19 2010

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The Asia Pacific Telecommunity, the APT, which is the regional
telecommunication organisation that covers the ITU's Region 3, has
commenced meeting in Hong Kong of administrations in the Region.

This is one of a series of meetings intended to develop common positions
among Region 3 administrations to the agenda items for the World
Radiocommunication Conference to be held in Geneva in the early part of 2012,
WRC-2012. Of particular interest to the amateur community is WRC-2012
Agenda Item 1.23, which seeks an allocation of about 15 kHz in parts of the

band 415-525.6 kHz to the amateur service on a secondary basis.

The International Amateur Radio Union (IARU), IARU Region 3 has representatives as Observers at these preparatory meetings, called the APT Conference Preparatory Group for WRC 2012 (APG-2012) meetings.

A member of the Australian delegation, providing a specialist amateur contribution is Dale Hughes VK1DSH, nominated and paid for by the WIA.

Dale has already submitted his first report to the WIA Board, reporting on the meetings that commenced on Monday, 13 December and will continue until today, some six days.

While this meeting is not expected to adopt final positions, it is an important step in the process leading to the WRC. A further meeting next year is expected to adopt final Regional common positions.

The Minister for Broadband, Communications and the Digital Economy, Senator Stephen Conroy has released draft Terms of Reference for a comprehensive review of Australia's communications and media regulation.

Senator Conroy said technological innovations were rapidly leading to a converged media age and it was time to review current media and communications regulations.

"You can watch programs on your television, computer, or mobile phone - this is just one example of how devices and platforms are converging to deliver people what they want, whenever and wherever they want to watch it," Senator Conroy said.

"Regulations designed to promote community standards, ensure a diversity of views, encourage competition and protect original Australian content are all important measures underpinning the effective operation of Australia's media and communications sector," he said.

The Government recognises that regulatory measures designed in the 1980s may not be the most appropriate for the 21st Century.

Senator Conroy said "Our intention is that the Review will look at all content delivery platforms including broadcast, mobile and fixed telecommunications and the internet.

Public consultation on the Terms of Reference will continue until 28 January 2011.

The draft Terms of Reference and a short background paper can be viewed and commented upon at www.dbcde.gov.au/convergence

Mal Brooks VK3FDSL our WIA Manager HAS ASKED " Have you received your December AR magazine? Has it arrived in your area?

We have become aware of some difficulties with the Mailing House this month. Multiple delivery labels have been included in some AR magazine packages, resulting in some members not receiving the December AR.

If you, or anyone you know, have received multiple address labels in your AR delivery, or not received your December AR magazine at all, please advise the nationaloffice@wia.org.au of your details, so that arrangements can be made to mail replacement magazines before the Christmas shut-down.

The Mailing House is investigating the error."

On last weeks broadcast WIA ARDF co-ordinator Jack Bramham VK3WWW filed a report about a Norwegian film crew from a TV show known as "The Golden Goal" The show had contacted Jack with plans to travel half way round the world to film a segment in Melbourne on foxhunting, well it happened !

They arrived had a wow of a time and copped some great footage, Melbourne news reporter Rob Broomhead VK3DN caught up with Greg VK3FOX and the guys from the Golden Goal"

(audio at wia.org.au click broadcast)

HAMS ACROSS AUSTRALIA.

All roads lead to the Centre Victoria RadioFest at the Kyneton Racecourse, an hour from Melbourne, Ballarat and Bendigo on Sunday the 13th of February.

The major commercial traders will be there in the bustling Traders Hall. Look for their specials!

And pick up a bargain or two in the second-hand market areas - components, bits and pieces, connectors, cable, sealed lead acid batteries or antennas?

Want to make a sales table or car-boot space booking? Then be quick and obtain an application form from the RadioFest webpage via the home page of the Amateur Radio Victoria website.

Other attractions are the exclusive presentation on the DX0DX DXpedition to The Spratlys, mini-lectures, radio displays and lots, lots more.

Make it something you don't miss! The Centre Victoria RadioFest at the Kyneton Racecourse on Sunday the 13th of February.

I'm Bruce Lees and you're listening to VK1WIA.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking that this is the time of year for summer preparedness.

Sunspot numbers and cloudy skies notwithstanding this is still the traditional cyclone season and all we people who poke things into the sky should be using the dry days to maintain our skyhooks. In areas of high humidity, the cleaning and drying of equipment normally kept indoors can be crucial to continued operations. Whether we start at the earth stake through the shack

to the antennnas, this upkeep will keep your amateur station in the best condition .

One thing that many in the temperate and sub-tropical parts of the state usually give a wink and a nod to is the security of mast foundations, including guy anchors. With the la nina weather pattern, there is more chance of looseness and even concrete floating in a waterlogged hole. We have been used to soil shrinkage in the dry but we have to allow for the absorbency of the soil in the wet times.

A good thing over the last 12 months has been the drop in price of led lighting. This means that we don't have to have as many dry cells stored away as the current draw is so much less.

Another item to remember is to rotate petrol stored for back up systems such as generators. Remember that ULP does not keep well and so I use this fuel in the car where it is diluted with fresh petrol and refill the storage container.

Keep safe this summer and enjoy the summer period.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING -

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

About 40 members and 2 visitors were at the club meeting night last Monday evening. At the meeting it was announced that the next technical talk will be on 17 January 2011 and will be presented by Peter, VK4XJP and the topic will be Test instruments in radio repairs.

There was also a call for other members to put their name forward for future technical talks to share their knowledge with other members. Please contact Peter, VK4TAA is you have a topic suitable for the technical talks.

Alan VK4KZ, also presented his roundup of all courses conducted this year with some 7 new foundation licences and 2 new full calls being added. Profound thanks were offered to Ken VK4FKEN, Roger VK4ZLQ and Charlie VK4YZ for their support throughout the year and much thanks to the club's assessors, Chris, VK4ANI, Peter, VK4EA, Laurie VK4BLE and myself Ray, VK4CF.
The Advanced course is now available on a CD for those wishing to study privately, for $10 payable to the Club, plus $3 if posted. Contact Peter VK4TAA if you need this fantastic CD. Next year we are offering places for courses in all licence grades. So plan early for your new licence or even an upgrade for next year with the Redcliffe club.

Early next year, the first working bee will be to replace the guttering around the roof of the club house as it has finally succumbed to the unusual amount of rain fall over the last few months. Further details will be available early 2001.

The club also decided to purchase 2 Systron & Donner Service Monitors. This equipment will be used by club members (under supervision) in the test, align & repair of their own equipment.

John Moyle field day 2011 will again be held at Murrenbong. Planning has already started. Anyone wishing manage a particular band stations or have access to 12v amplifiers should talk to Peter VK4EA. Roger VK4ZLQ spoke about a book he was reading on coax stubbs & the issues of working multiple stations concurrently within 100m of each other. The outcome can be damage to radios receivers due to overload of harmonics. The club decided to build coax stubbs for all the bands we will be operating on at the John Moyle.

Peter, VK4NBL, advised the meeting of The Australian National Satellite Net is on this coming Tuesday, at 1930 hrs. You can join the net via Echolink by connecting to either the *Amsat* or *VK3JED* conferences. Past experience has shown that the VK3JED server offers clearer audio. The net is also available via IRLP reflector numbers 9558. The net will also be available via RF on VK4RRC, the Redcliffe repeater 146.925 -ve offset, IRLP node 6404 Echolink 44666

Well that is the news for this week, and the compliments of the season from our Redcliffe club members to all of you. The club will be operating throughout the Christmas and New Year.

Until next time its 73 from Ray, VK4CF.

SUNSHINE COAST
Maleny VK4RSC 146.850 and 438.075 VK4RSN 53.7
Noosa Heads VK4RSL 146.825 and 438.175

SCARC Christmas BBQ

The last general meeting for the year was held on Tuesday 7th of December and as usual featured the Christmas BBQ. The meeting started early at 6pm and by 6:30 pm all the business had been dispensed with and members were all keen to get outside and enjoy the food and shooting the breeze. Even a mid BBQ downpour did not stop chef Mikey VK4YFL from cooking duties.

VHF/UHF Summer Field Day

The club participated in this event and amassed an unofficial total of 33,105 points. Operators were Contest Manager Leicester VK4ALH, John VK4JMC, Wayne VK4WS and Ces VK4FMOZ. It was not possible to get the big yellow communications van up to the location at Howells knob, however Bill VK4XZ arranged for the Maleny SES communications van to be in situ for the event.

Echo/IRLP Node

Thanks to Richard VK4RY the club now has an ECHO/IRLP node on the 438.075 repeater at Wilkes Knob Maleny. Previously this was just IRLP Node 6564 but now has Echolink as node 552566 and is shown as VK4RY-R.

The club executive committee would like to wish all members, non members amateurs and non amateurs alike a safe and enjoyable christmas.

Thats it from me and that's it from Gordon VK4VP, Merry Christmas.

The Queensland Digital Group (QDG) is a social group with some 44 members including two in France. Digipeat, the club news letter, is sent out via email and web page once a month with additional information to members via email only.

The http://www.qdg.org.au/ web site is maintained for the benefit of the QDG, other local clubs, and would wide Amateur Radio.

(Alan Wills VK4NA / VK4YAR)

WICEN NET

WICEN Queensland holds a net every Sunday on 7075kHz from 8-30am (2230UTC)

The net calls in regular stations and then invites new stations to call in. If conditions are poor on 7MHz, net control might move to around 3600kHz depending on how pliable the net operators are.

Mix it with other WICEN ops and call in on the net !!

OH AND EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

VK5

A couple rescued by emergency services has been fined almost $1,000 by police for not having the correct emergency equipment on their yacht.

A 62 year-old woman and a 71 year-old man made it back safely to Port Pirie after their boat was battered by storms last week.

The unregistered yacht's navigation devices were damaged while sailing in the Spencer Gulf and the couple were not carrying any flares.

However they managed to contact police using an outdated distress radio beacon.

Police say the fines serve as a warning to other boat owners to have the correct equipment on board.

The SA Transport Department has been informed and may take further action against the skipper.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

UK family has five radio amateurs

The Daily Post reports that five members of the same family in Tywyn are now licensed Radio Amateurs.

The newspaper says that the latest member of the family to get an Amateur Radio callsign is 11 year old Ricky Duckhouse. His father Kevin, mum Alison and brother and sister Josh and Sonyarisa have all got licenses.

The article points out that Foundation holder Ricky can now hold two-way conversations with radio amateurs transmitting from around the world and his license also permits him to talk to astronauts on board the International Space Station.

RSGB General Manager Peter Kirby G0TWW is quoted as saying "This is the start of a great adventure for Ricky and one which will hopefully continue for many years to come".

"It's extremely rare for five members of one family to gain an Amateur Radio licence and the Duckhouse family have certainly made their mark on the Amateur Radio bands and put Tywyn on the map," he added.

Read the Daily Post story - Tywyn radio boy talks to astronauts

www.dailypost.co.uk/news/north-wales-news/2010/12/03/radio-boy-talks-to-astronauts-55578-27759837/

(SouthGate)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

New amateur radio bands for Spain

The Spanish Amateur Radio Society URE has succeeded in gaining access to some new bands for Spanish radio amateurs.

Spanish Amateurs now have access to:
2320 - 2322MHz
5760 - 5762MHz
10368 - 10370MHz

Amateur use of these bands has been authorised for a year, however, those intending to use 2320-2322 must first inform the telecommunications regulator.

(URE http://www.tinyurl.com/SpainURE/)

In Canada the province of New Brunswick has introduced a bill to control cell phone and "hand-operated electronic device" use while driving and this legislation will prevent amateurs from using mobile radios while driving.

R.A.C. agrees with the intent of the legislation but has pointed out in a letter from the President of RAC to the New Brunswick Minister of Public Safety, Mr. Robert Trevors:

"Radio Amateurs have passed demanding examinations set by the Industry Canada to earn their authority to operate equipment. Federal radio regulations specifically permit Radio Amateurs to establish mobile stations. By tradition, Radio Amateurs are public-spirited citizens, who regularly volunteer their time, skill, equipment and energy for everything from pubic events to providing communication in time of emergency. Radio Amateurs are often at their most useful in emergency situations when using their equipment installed in their personal vehicles.

Radio Amateurs in New Brunswick regularly and without fail respond to your citizen's needs whether it is to help municipalities fighting flooding along the St. John River, Marathons or police on Halloween patrol you will find amateur radio operators. Banning mobile Amateur Radios for day to day use will mean that there are no experienced Amateur Radio Operators and no mobile radios available when there is a time of need. Eliminating the use of Federally Certified Radio Amateurs to use mobile radio equipment will not increase public safety but decrease it."

==========

NEWS FROM ARNEWSLINE

ESA TO AWARD TEN SCHOLARSHIPS TO STUDENTS PRESENTING BAT SPACE CONFERENCE

An Italian astronomic study group has announced that the European Space Agency Education Office has offered ten scholarships. These for students who present papers at the 1st International Academy of Astronautics Conference on University Satellites Missions and the CubeSat Conference to be held in Rome from January 24th to the 29th of 2011. Students selected by the ESA Education Office will also be reimbursed their conference registration fee and awarded a maximum stipend of 300 Euros to help cover travel and accommodation expenses.

More information is on line at tinyurl.com/25wouy5

LONG DELAYED ECHOS CAPTURED ON 40M

Another case of Long Delayed Echo's of a ham radio signal being heard by the originating station has been reported and this time the ham had enough time to capture the sound to a recording. Amateur Peter Brogl, DK6NP, reports hearing Long Delayed Echo's on 7 MHz during a geomagnetic storm on November 27th. This is part of one of the recordings he made:

--

What you just heard was what DK6NP heard forty-six seconds after he transmitted his call sign at 7 MHz, he received an echo of his own transmission. Brogl said that at first he thought someone was playing on him so he changed frequency, re-keyed his call and got another echo. This went on for more than an hour, enough time for Brogl to make several recordings.

Long Delayed Echo's are not a new phenomena. They were first reported in 1927 by Norwegian civil engineer Jorgen Hals but happen rarely and are not really understood. Most researchers believe that unusual propagation conditions linked to solar storms may be one of many possible explanations. Others can be seen on Shlionskiy's Long Delayed Echo page at tinyurl.com/355lvc6.

Audio recordings made by DJ6NP of the 7MHz Long Delayed Echo's can be heard at brogl.net/audio

MAJOR SITE RENTAL INCREASE FORCES UK REPEATER TO GO QRT

The GB3PF 70 centimetre voice repeater near Blackburn in the United Kingdom is be closing down. This, after its operator, North Western Repeater Group, was notified of a site rental cost increase that would have the club paying more than £6000 a year for site space. That's over $9300 in U-S dollars and is beyond the means of the small ham radio group. Until now, the group was paying what was described as a small nominal site rental fee.

WEIRD AND WONDERFUL

Boat Anchors and the BABE

There are a lot of web sites on the Internet that deal with so called Boat Anchors - you know - old radio equipment full of tubes. Well how is this site with a variation on a theme!

BABE or Boat Anchor Beauty Evaluator is a website that contains a formula that includes terms such as:

Number of knobs on front panel,

Number of knobs not generally used,

Number of tubes,

Number of meters,

Number of devices that actually glow in the dark on their own without electrical power applied,

Rack space,

Number of radioactive devices....HIHI

and finishes with a Functionality quotient which is an arbitrary value based on "does everything work?".

SPECIAL EVENT STATIONS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

Al Wilson, VE1AWW/CY0, is an assigned worker on Sable Island.
His schedule is 3 months ON and 3 Months OFF. Currently, he is on
the island and active as work schedules permits through DECEMBER.
He is beginning to show up on the Clusters....

Marion Island ham radio station suffering severe QRM

Pierre, ZS1HF/ZS8M, is partially QRT for a while until he identifies the
severe electronic interference from the new base. He hopes to operate for
short periods during this time.

He thinks he has identified the fire alarm system and the air handling units
as the main culprits. Once switched on, they cause severe broad band
interference, preventing successful HF operations, even on the commercial
frequencies.

Pierre has relocated his ZS8M operation to the radio room in the old base
for the time being and will be operational from there until he can eliminate
the QRM.

Pierre has also released another newsletter from Marion Island (Special
Christmas edition) where he provides more pictures, along with more details
about the happenings and activities on the island. His newsletter can be
found online.

http://www.iz8epy.it/html/zs8m.html

The RSGB reports VU2PAI has uploaded about 100,000 QSOs to the Logbook of the
World, lotw, dating back to 1995. It is not complete and he still has a lot
of paper logs from his IOTA activations to AS-096 and AS-161.
Please do not send cash or IRCs while sending QSL cards, VU2PAI would prefer
it if you can put two or three DIFFERENT stamps on your envelope when you send
your card. Seems VU2PAI is a keen collector of postage stamps since he was a
schoolboy.
Please include a self addressed envelope or an address sticker along with your
QSL card.

Pai can be reached by e-mail
vu2pai@gmail.com

German postal rates

>From January 1st 2011 postal rate for an overseas airmail 1st class letter will
DECREASE from currently 1.70 Euro to just 0.75 Euro. Today this is equivalent
to exactly 0.991 USD.

Thus 1 USD will cover perfectly return postage to any country in the world!
Happy direct QSLing,
73 and early seasons greetings

WIRELESS WEATHER

Solar Mega-filament

A spectacular filament of magnetism is snaking around the sun's south-eastern limb. From end to end, it stretches more than 700,000 km - a full solar radius or almost twice the distance from Earth to the Moon.

The massive structure is an easy target for backyard telescopes (monitoring is encouraged) and it has the potential for an impressive eruption if it happens to collapse in the hours or days ahead.

Bandar Seri Begawan

Unlicensed amateur radio operators or those with expired licences and bigger than allocated "frequency airwaves" were under scrutiny yesterday when several operators were caught in a roadblock yesterday.

The roadblock was a joint operation conducted by the Brunie Authority for Info Communications Technology (AITI) and Police.

Vehicles with an outside antenna mounted to it were inspected.

Reading on brudirect.com it seems in a two-hour operation, several users were found to operate open airwaves of between 137 to 174 megahertz in which they have to 'diode' and need to be blocked by the relevant agencies.

One driver was caught using a vehicle owned by his sibling with amateur radio equipment and with expired licence where the sibling has to pay $25 for such annual licence, whilst another driver was caught for having an `open frequency' and expired road tax.

The operation was part of an awareness campaign to urge operators to obtain amateur radio licence.

Under section 34 and 35 of the Telecommunications Order 2001, violators can be fined up to $10,000 and /or three years' imprisonment.

ZL's Official News Broadcast has, for 25 Years been under the control of ZL2BHF.

Tonight, 19-December-2010, the date for the last Official Broadcast for 2010, celebrates the twenty-fifth year that the OB has been under the control of Jim Meachen ZL2BHF.

Jim has prepared all the OBs during this time and has presented most of them.

For tonight's show Jim has compiled, from his archive, some memorial broadcasts from presenters that are not with us now.

The NOV/DEC Break-In is to have a report on Jim's quarter-century of work with and devotion to the OB.

REWIND

LISTENING-IN WITHOUT LICENCE. - WARNING TO THE PUBLIC. ..

Richard VK7RO has recently located from The Mercury Newspaper on 8 September, 1926 titled.....

WIRELESS PROSECUTION - LISTENING-IN WITHOUT LICENCE.
WARNING TO THE PUBLIC. ..

The first prosecution in Tasmania under the Wireless Telegraph Act relating to the use of a listening-in set without a licence took place before the Police Magistrate (Mr. E. W. Turner) in the City Police Court.

John Heine, a youth, of Elizabeth-street, City, was charged with having, used an instrument for the purpose of receiving messages by wireless telegraphy without being licensed to do so as required by the Act.

He pleaded guilty.

A Mr. Dobson, who appeared for the Postmaster General's Department, stated that the penalties provided by the Act for breaches of the telegraph regulations were very severe indeed. Anybody who, without authority under the Act, used an instrument for the receipt of messages, was liable to a fine of
£500 or imprisonment for a term not exceeding five years, or if he elected to be dealt with summarily, the penalty was £50 or six months imprisonment.

The case was one that could not be passed over lightly. The licence fee was only 27s. 6d., but the offence was really a fraud on the broadcasting companies, who got 25s. out of the fee, without which they could not give the public the service they did. He did not press for a severe penalty or ask for the confiscation of the instrument, but there were elements which rendered it a suitable occasion on which to give a warning to the public.

Soon after the events described, Jack Heine obtained his experimental license and became 7JK. He was an enthusiastic member of the club in Hobart before moving to Melbourne a few years later.

Ian Paterson, VK2MW, in the latest copy of Old Timer's News mentions "the late, great John Heine, VK3JF". I wonder if he was the same man?

Amateur Radio Newsline(tm) Report 1740 - December 17 2010

Amateur Radio Newsline report number 1740 with a release date of
Friday, December 17th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Hawaii are ready as a Pacific storm
hits the island state, a New Brunswick cellphone law could ban amateur
radio mobile operations, the long awaited Jarvis Island DXpedition is
put on hold until November of 2011 and Ohio hams provide the technology
to improve a sheriff's radio system. All this and more on Amateur
Radio Newsline(tm) report number 1740 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAWAII HAMS READY AS PACIFIC STORM HITS

Hams in Hawaii were ready as a major Pacific storm raked itself over
the Island state. Bill Pasternak, WA6ITF, is in the newsroom with
more:

--

(Sound of ham rtadio emcomm operations)

That's the sound of ham radio RACES and SKYWARN operations as a strong
Pacific storm system moved over Hawaii on December 9th and 10th
bringing with it heavy rain, accompanied by thunder and lightning.
According to News reports, worst hit was Oahu and Kauai with gusty
winds taking down trees in several areas.

Ron Hashiro, AH6RH, is the Hawaii State Civil Defense RACES Coordinator
and an accredited SKYWARN member. He explains the system that caused
the severe storm:

--

AH6RH: "What we had was a cold front move through the system and
butting up against some warm air to the South-East. As that storm
front came through it produced a collection of thunder storms and those
were sweeping through Kauai then hiting Oahu and moving toward the
South-East :

--

Hashiro told Newsline that the National Weather Service needed severe
weather spotters all across the Island state and the hams were ready to

respond:

--

AH6RH: "Ray Tanabe, who is WH7IH, is one of our contacts at state Civil Defense asked us to activate SKYWARN so Clem Jung, KH7HO, contacted a number of hams on Oahu and put together a response team and had people scheduled from 6 p.m. on Thursday all the way through Friday evening.
--

According to Hashiro, the ham radio volunteers were both communicators and severe weather spotters:

--

AH6RH: "We (hams) provided radio communications at the National Weathewr Service in Honolulu and a number of hams at their homes or on the road called in weather reports on the tremendous amount of rain, lightning, thunder and the wind conditions. (That's) something that the National Weather Service can't quite pick up on is what is the wind speed on the ground and what is the total amount of lightning that is present in a given area. Therefore weather spotting is a very important part of the collection of information on weather conditions."

--

As hams did their job, Honolulu Fire crews worked to clear what was left of the roof of a plumbing supply company that had been sheared off by the storm. Officials said that the overnight, gusty winds blew open a large warehouse door, and then lifted the roof off. Some 3,000 feet of the roofing material was taken off, with some parts landing several blocks away on the famed Nimitz Highway.

With thanks to former Newsline Production Coordinator Bill Orenstein, KH6QX, for the on the scene audio, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels reporting for the Amateur Radio Newsline.

--

Thanks to the ongoing training that many hams in Hawaii devote themselves to, everyone was ready to handle this latest challenge that Mother Nature brought their way. (ARNewsline(tm) with some audio supplied by KH6QX)

**

RESTRUCTURING: UK GOVERNMENT LOOKING FOR 500 MHZ FOR BROADBAND

The United Kingdom's government is looking 500MHz spectrum and this could spell problems ahead for hams in that nation.

The British newspaper the Register recently carried a story on government plans to reallocate as much as 500 MHz of spectrum for

broadband Internet. The article points out that if large chunks of Ministry of Defense spectrum are sold off, the new owners are unlikely to be willing to share it with others.

The problem for UK hams comes from the fact that all Amateur Radio UHF and Microwave bands are shared with either the Ministry of Defense or the U-K Civil Aviation Authority. If some of the spectrum that gets reallocated happens be shared with radio amateurs, its quite likely that the hams will be forced off those bands.

Those interested can read the entire Register article at tinyurl.com/28ayvzl (Southgate)

**

RESTRUCTURING: NEW MICROWAVE BAND ALLOCATIONS IN SPAIN

Thanks to the efforts of the Spanish amateur radio society the U-R-E, hams in that nation now have access to three new microwave bands. These are 2320 to 2322, 5760 to 5762 and 10368 to 10370 MHz Amateur use of this spectrum has been authorized for a year, however, those intending to use 2320 to 2322 must first inform the nations telecommunications regulator. More on this regulatory change in Spain in Google translated English is on line at tinyurl.com/SpainURE. (URE)

**

RADIO LAW: NEW BRUNSWICK CANADA CELL LAW COULD BAN MONBILE HAM OPEATIONS

The Canadian province of New Brunswick has introduced legislation banning cellular telephone and two way radio use while mobile. Amateur radio Newsline's Norm Seeley, KI7UP, has the details:

--

The measure was introduced in the New Brunswick Legislature on November 24th. Its aim is to control cell phone and any other hand-operated electronic device use while driving. As worded it would prevent radio amateurs from using their mobile radios while in motion.

Now in a letter to Brunswick Minister of Public Safety, Robert Trevors, the national society Radio Amateurs of Canada has taken strong opposition to the proposed law. In its communiqu&#65533; to Trevors, RAC notes that most provinces such as Nova Scotia, Manitoba, British Columbia, Quebec, Newfoundland and Labrador have chosen not to restrict the operation of mobile amateur radio equipment while driving. RAC notes that these governments have recognized the value of amateur radio to their citizens during such emergencies such as floods, dangerous weather and ice storms. Also noted is the support by Canadian hams in support of public events such as Marathons and of emergency relief groups such as the Red Cross and a variety of provincial and municipal agencies across Canada. RAC adds that this support provided by amateur

radio is frequent, freely given and in the highest standard of public service.

The letter goes on to state that hams in New Brunswick regularly and without fail respond to the provinces citizen's needs. This includes helping municipalities fighting flooding along the St. John River. The note ends by warning New Brunswick legislators that eliminating the use of Federally Certified Canadian radio amateurs to use mobile radio equipment will not increase public safety but will decrease it.

The third reading on the bill is expected during the week of at about the time this newscast goes to air. After that the Bill permits the New Brunswick government to proclaim the legislation at a time of its choosing anytime thereafter.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching the events up North from Scottsdale, Arizona.

--

Radio Amateurs of Canada says that it is preferable that any exclusion for Amateur Radio operators occurs in the legislation itself as it has requested. However it notes that there are provisions for a regulated exclusion for radio amateurs under Canadian law. This states that the Lieutenant-Governor in Council may make regulations exempting, with or without conditions, certain classes or types of devices or motor vehicles, or certain classes of persons. Read the latter as referring to Canadian hams. (RAC, VE4BAW)

BREAK 1

This week coming to you from down-under, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W7CSK repeater serving Everett, Washington.

(5 sec pause here)

**

BREAKING DX NEWS: JARVIS ISLAND OPERATION DELAYED TO NOV 2011

The DXpedition to Jarvis Island organized by Radio Expeditions Inc has been postponed until November 2011. The reasons are complex but boil down to it taking authorities to long to come up with a plan acceptable to all parties and then getting it approved though all the bureaucratic red tape. Once it was in place several groups qualified under it. So more time was spent in holding a lottery to decide which group would be permitted to go.

While Radio Expeditions Inc was fortunate to be the group selected in late August, it soon became apparent that due to all these factors plus scheduling transportation to Jarvis, that it was best for all involved

that the expedition be postponed one year.

November remains the best month to visit Jarvis Island from a propagation standpoint, with the largest combination of openings predicted to Europe on the H-F band. This being the case the new plan is for the operation to take place in November of 2011 with exact dates to be announced. (Radio Expeditions Inc.)

**

RESCUE RADIO: OHIO HAMS PROVIDE TECHNOLOGY SUPPORT TO IMPROVE COUNTY RADIO SYSTEM

Ham radio operators have volunteered their time and technical expertise to improve communications for the Wood County Sheriff's Office just south of Toledo, Ohio. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the rest of the story:

--

After years of incomplete police radio coverage, the Wood County Sheriff's Office has made some significant communications upgrades.

In many remote areas of the county, deputies' police radios wouldn't work once they got out of their car. That caused them t0 loose contact with dispatchers and other officers. But with a little ingenuity, and some help from ham radio operators, the problem is solved.

"It was scary for me to know that there were times when my deputies went there on a call we had no communication with them, said Wood County Sheriff Mark "That caused a lot of sleepless nights."

Estimates for communications upgrades ran in to the millions. Wood County did not have that kind of money. So the Sheriff turned to amateur radio operators from around the county.

"They looked at our system and came up with a relatively inexpensive fix which was to move antenna situation around the county to much high locations," said Wasylyshyn.

Wood County was able to update the system for just $160,000. Tower space at eight locations around Wood County was donated, from radio towers to water towers. And to make sure deputies could stay in contact anywhere outside, as well as inside buildings, they are putting mobile repeaters in the trunks of cruisers.

I'm Fred Vobbe, W8HDU, reporting from Lima, Ohio.

--

To even further strengthen Wood County's communication system, it has now installed two new propane powered generators for the radio system. That means the county can maintain radio contact with its officers in the field in case of a power outage that could last several days. Up until the generators the battery back-up system would only keep the

county's communication's network going four hours. (W8HDU from published news reports)

**

ENFORCEMENT: CALIFORNIA CB'ER ISSUED NOTICE OF UNLICENSED OPERATION

The FCC's Sam Francisco Field Office has issued a Notice of Unlicensed Operation to Victor M. Coucelos of Anderson, California. This for what the regulatory agency says were violations of its Part 95 Rules governing the Citizens Radio Service.

According to the FCC, it received a complaint of Citizens Band Radio interference in the city of Anderson, California. This past August 24th agents from the San Francisco office confirmed by direction finding techniques that radio signals on 27.085 MHz were emanating from Coucelos residence. Agents also heard Coucelos station transmitting sound effects, language that might be classified as profane, indecent or obscene, and music.

During an inspection on August 25th of Coucelos CB station he was identified as the person responsible for its operation. The inspection revealed that a Galaxy, model DX 2517, transceiver was in use at Coucelos base station, and a model Magnum S-9 Nitro transceiver installed in Coucelos vehicle. These transmitters are not certificated for CB use and Coucelos operation of these transmitters voided his authority to operate his CB station.

During the inspection, the San Francisco agents issued Coucelos a verbal warning that any further operation with these transmitters might subject him to more serious sanctions for engaging in violations of the Part 95 rules.

Coucelos was told that he must cease such violations immediately. If he fails to abide by the FCC edict, he could be re-investigated during FCC enforcement efforts. If such an investigation were to indicate that Coucelos had violated any FCC Rules he could face severe penalties, including a substantial monetary forfeiture, seizure of his radio equipment and criminal sanctions including imprisonment. He was given 15 days from the date of the letter to respond advising what corrective actions hr has taken to eliminate the observed violations of the Commission's Rules. (FCC)

**

RADIO LAW: FCC GRANTS WAIVER FOR TRAIN BREAK RADIO SYSTEM The FCC has granted eight railroads temporary waivers of the power limit for telemetry operations in the 450 to 470 MHz band. Specifically, the waivers to permit the operation of end-of-train ot E-O-T devices with eight watts transmitter output power, pending the resolution of a related rulemaking proceeding. Also granted in the December 3rd decision was a waiver to permit the equipment authorization of E-O-T devices with a transmitter output power of up to eight watts.

For those not aware, end-of-train devices operate on frequency pair 452 and 457.9375 MHz. They transmit information regarding the brake pipe pressure on the rear car to the lead locomotive for display to the locomotive engineer. This in turn allows the engineer to apply the rear train brakes in an emergency. (FCC)

**

HAM HAPPENINGS: PAPERS SOUGHT FOR 2011 SOUTHESTERN VHF SOCIETY CONFERENCE

A call has gone out for papers to be presented at the 15th annual Southeastern VHF Society Conference to be held in Huntsville, Alabama on April 29th and 30th, 2011. Papers and other presentations can be on both the technical or operational aspects of VHF, UHF and Microwave weak signal amateur radio. Contact Steve Kostro by e-mail tp SVHFS2011 (at) downeastmicrowave (dot) com by January 8th if you wish to make a presentation or submit a paper. Deadline for the submission of papers is next March 11th. For further information about the conference please take your web browser to www.svhfs.org. (Southeastern VHF Society)

**

NAMES IN THE NEWS: TWO UK HAMS SERVING ON ETSIC

Some names in the news. First up is Peter Chadwick, G3RZP. He has been reappointed as Chairman of European Telecommunications Standards Institute Committee on Wireless Medical Applications. In the same announcement it was learned that Nigel Wilson, G4VVZ, has been appointed Chairman of the committee on Digital Mobile Radio. (Southgate, GB2RS)

**

BREAK 2

This is ham radio news for today's radio amateur. This week from the beneath the Southern Cross, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: SANASA TO SUPPORT HAM RADIO SPACE PROGRAM

The newly formed South African National Space Agency has announced its intention to champion the amateur radio in space. In response to a question at the agency's launch ceremony press briefing from the South African Radio League, the new space agency's representative stated that the organization will support the amateur radio satellite program and that radio amateurs are part of the plans.

Naledi Pandor is the South African Minister of Science and Technology. She officially launched the South African National Space Agency at a gala event on Thursday December 9th. At that time she said that the new agency will be that nations primary but not its only leader to direct Government's investment in space sciences and technology. Just how the South African National Space Agency will support amateur radio space efforts was not spelled out at the briefing. (SARL)

**

EMERGING TECHNOLOGY: MULTIPLEXED AMATEUR RADIO DTV DOWN UNDER

A group of New Zealand hams have successfully multiplex four digital video and audio streams. On Saturday, December 4th, a group of Wellington and Hutt Valley Radio Amateurs simultaneously multiplexed the four video and audio streams into a single digital television transmission and did so using low cost equipment.

The transmission was centred on 1282 MHz, in accordance with the NZART bandplan. It occupied 1274 to 1290 MHz, the same bandwidth as one analogue FM television transmission. DVB-S modulation format was used and was receivable on an unmodified satellite TV set-top box.

Further development and testing is planned with the aim of transmitting the four video and audio streams within an 8 MHz bandwidth. Thats half the bandwidth used by the initial tests.

The next transmissions will use the DVB-T modulation format. That wil make them receivable on an ordinary Digital terrestrial television receiver of the type sold down-under. (NZART)

**

EMERGING TECHNOLOGY: 100 MW SIGNAL ON 8.970 KHZ HEAR OVER 2873 KM

The low frequency transmissions by DK7FC on 8.970 kHz have been received at a distance of 2873 km by 4X1RF in Haifa, Israel. Reception at these super low frequencies within the human audio hearing range requires ground rod antennas, low noise preamps and sophisticated decoding software. None the less, the fact that DK7FC's 100 milliwatts of effective radiated power was copied and recorded by 4X1RF at this great a distance indicates that transatlantic amateur VLF reception may indeed be possible in the very near future. (VHF Reflector)

**

WORLDBEAT: REPEATER LOCATION GUIDE FOR GREECE NOW IPHONE APP

A directory of amateur repeaters in Greece is now available for iPhone, iPod and IPad users developed by SW1NJX is now available from the iTunes on-line store. This is a free app designed to assist hams living in or traveling through Greece to find the closest VHF or UHF to their current location. You can find it tinyurl.com/grkrpt (SW1NJX)

**

CONTEST CORNER: THE ARRL JANUARY VHF SWEEPSTAKES JANUARY 22 To 24

Turning to radiosporting news, the ARRL January VHF Sweepstakes is set for 1900 UTC on January 22nd to 03:49 UTC on January 24th. This is primarily a weak signal contest aimed mainly at operators who use SSB and CW. Some FM is allowed as long as it's not on a United States national calling frequency or through a repeater.

The required exchange is simply your callsign and the Maidenhead grid square locator you are operating from.

Logs are due no later than 0400 UTC on Wednesday, February 23rd. Paper submissions go to the ARRL January VHF Sweepstakes, 225 Main Street, Newington, Connecticut 06111. Electronic logs must be in Cabrillo format and e-mailed to Januaryvhf (at) arrl (dot) org. (ARRL)

**

DX

In DX, getr ready for Tonga as W6ZL, informs OPDX that he is planning to be active as A35KL rom Foa Island between December 16th to the 20th. His operation will be primarily CW with the possibility of some RTTY and SSB. His gear is an Elecraft K3 radio and verticals on the beach for 80 through 10 meters. He will not have InterNet access there. QSL Logbook of the World or direct to W6ZL, with a SASE or new style IRC.

JE1RXJ, will be on the air as T88RX from Palau between January 21st and the 26th. Activity will be holiday style on 160 to 6 meters using CW and SSB. His emphasis will be on the lower band and CW. QSL via JE1RXJ, direct or by the JA Bureau.

For those of you still needing Bangladesh for your DXCC listen out for S-21-FGC during the period December 16th to the 21st. Several foreign operators will be using this call. QSL is via JH1AJT.

Lastly, JA2EZD will be active from Laos as XWPA from the Vientiane DX Club for another year. His operation will be on the HF bands only. QSL to Hiroo Yonezuka, Box DD153, Huang Sathai, Vientiane, Laos. And that callsign is not a mistake. It is XWPA.

(Above from various DX news sources)

**

THAT FINAL ITEM: TV RECEIVING ANTENNAS REGAIN POPULARITY

And finally this week, word that over-the-air television antenna sales in the United States are growing dramatically. This as people disconnect from cable and satellite as they rediscover free, over the air TV. Much of it now in true High Definition.

Asked if the popularity will continue, one antenna manufacturer and distributor said yes because 80% of the population doesn't even know you can get over-the-air High Definition TV, but they are finding out.

The same manufacturer added that when you tell people that the same programming is available over the air they look at you like you're crazy. They then say: "You're saying I can actually get free HDTV from an antenna? It's shocking to a lot of people."

As it turns out, the ability of over the air stations to multicast several channels on what used to be one has opened up a a new and growing market for those wanting High Definition Television reception without having to pay a monthly fee. More about the comeback of antennas to tele-viewing in the United States is on line at tinyurl.com/39fhj39. (TV News Check, CGC)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk in the USA, I'm Jim Meachen, ZL2BHF, saying 73 from Auckland, New Zealand, a very happy holiday from down-under and we thank you for listening.

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** H40HP (EME) approved for the DXCC **

The EME-trip to the Temotu islands, as H40HP, from Hermann,
DL2NUD, is now at least approved as DXCC by NC1L - so the QSL
cards are now valid for the 144 MHz DXCC after a long time...
DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that
the following have been approved for DXCC credit:
H40HP - Temotu Province; 2009 operation.

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2010 **

As in the past years, as well the VHF DX Portal MMMonVHF will
try to find in begin of the year 2011 the Best VHF DX Expedition"
of the Year 2010. The best expedion in the sector MS and/or EME
will be voted by the USER of MMMonVHF in the first 3 weeks of
january 2011! If you interesting to see the results of past year:
http://www.mmmonvhf.de/trophy2009.php
http://www.mmmonvhf.de/trophy2008.php
http://www.mmmonvhf.de/trophy2007.php
Please stay tuned - more details will follow soon...

** MMMonVHF - our NEW (!) AURORA Propagation-Page **

After some months of developing we are today happy and proud to
announce a new Propagation page: "AURORA". As you know from
the "SPORADIC E" and "TROPO" Propagation pages you are able to
send in your report of worked (or heard) QSOs and we will spread

it in detail and make it visible. The goal of the new AURORA page
will be to go one step further: We will show the position of the
"reflecting AURORA curtain" (cloud) and in a later stage possibly
more features will be added... So welcome to the new page and send
in as much as possible reports to: http://www.mmmonvhf.de/au.php
IMPORTANT: As well as what is often done in Aurora QSOs, it will
be necessary to mark the QTF (direction of the antenna) were you
were beaming to when having a QSO! Read more about AURORA in
Theory and the new features at our MMMonVHF FORUM:
http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=15&topic=128#msg396

** SABLE ISLAND (CY0, FN93-GN03) 3rd Trial! **

LATEST NEWS by Randy, N0TG/CY0, 2010-12-12:
Approval has been granted for a 'third' try to access Sable Island.
This attempt will be in March 2011 with the hope that the weather
won't be quite as volatile. Sable weather though is always an issue
With this being our third try, the link on the Web home page, "How

To Contribute" is available for any that wish to consider this matter which will be helpful and appreciated. Were optimistic and working hard to make this happen. A side note: As of this writing the beach landing area on Sable is still completely flooded from the storm surge one week ago.....pictures are placed on the Web page at: http://www.CY0dxpedition.com "ADDED NOTE: Just a reminder Al Wilson, VE1AWW/CY0, is an assigned worker on Sable Island. His schedule is 3 months ON and 3 Months OFF. Currently, he is on the island and will be active as work schedules permits through DECEMBER. He is beginning to show up on the Clusters....
SOURCE: Ohio/Penn DX Bulletin #989

** T8, PALAU, qrv on HF and 50 MHz **

Tack, JE1RXJ, will be active as T88RX from the "West Plaza Rental Shack by the Sea Hotel" in Koror, Palau (OC-009), between January 21-26th. Activity will be holiday style on 160-6 meters using CW and SSB. His emphasis will be on the lower band and CW. QSL via JE1RXJ, direct (see QRZ.com) or by the JA Bureau.

The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

GB2RS NEWS

Sunday 19th December 2010

The news headlines

Authors sought for Radio Communication Handbook

RSGB Survey to close in under two weeks

New Worked All Britain award for 2011

Mike Dennison, G3XDV, is coordinating the editing and production of a new edition of the Society's flagship publication, the Radio Communication Handbook. He is looking for one or more people who are able to revise and update the chapters on HF Receivers and HF Transmitters/Transceivers. A royalty fee is paid based on the size of the contribution and the number of books sold. If you are interested or need further information, contact Mike by e-mail to mike.dennison@ntlworld.com.

On the 1 October, the RSGB launched a major survey of the UK amateur radio and listening community. We want to know how you pursue your hobby, your interests from QRP to moon bounce, what bands you work on, are you a contester? All the information that is necessary to see which way the hobby is moving in the 21st Century. The survey is web-based and takes about 15 minutes to complete. You have until 31 December to go online at www.rsgb.org/survey to complete the survey. If you know of a fellow amateur or listener who doesn't have computer access, please think about lending them a hand to complete the online survey.

Worked All Britain is introducing a new award for the year 2011 only. For the new Coastal and Tidal award you need to work as many WAB squares containing tidal water as you can. Valid squares are those shown as containing tidal water on an Ordnance Survey map. The basic award is for 50 squares on HF or 10 on VHF, rising in increments to 400 squares for the Diamond award. More details and a spreadsheet of valid squares are available on the WAB website at www.worked-all-britain.co.uk. All contacts must be made in the 2011 calendar year.

The United Kingdom Six Metre Group has launched an initiative to UK radio clubs and societies, to keep them informed regarding operating on 50MHz. A bi-monthly newsletter will be e-mailed to club secretaries, who have registered to receive it, containing a wide variety of information including practical operating tips specifically targeted at the large number of operators who have not previously experienced the enhanced F2

propagation expected during the sun spot cycle peak in 2012. Any club secretaries who have not already registered to receive the newsletter can do so at www.uksmg.org/phplist.

There is good news for amateurs in Spain for 2011. Traditionally the country has very restrictive allocations in the microwave bands. The Spanish Government has granted a broad one-year permit for operation in the 2.3, 5.7GHz and 10GHz bands, with only 2.3GHz needing specific prior notice of use. The permits are all aligned with the DX sections of the IARU Region 1 bandplan.

Mold and District Amateur Radio Club in Flintshire, North Wales will start an Advanced exam course on

19 January. The exam will be on 6 April. If you are an Intermediate licensee and are interested please contact Steve Studdart, GW7AAV or Keith Williams, GW4OKT. E-mail addresses are correct on QRZ.com. Further Foundation and Intermediate exam courses will be run during the year.

The RNLI fundraising event, SOS Radio Week, starts on 22 January and many amateur radio clubs and individuals have already signed up. Another big name on the UK amateur radio scene has offered a prize for those who take part. Everyone who operates during event will put in to a draw to win a new Wouxun KG-679E 2m hand-held transceiver. Simply visit the website at www.sosradioweek.org.uk and view the register page. All monies raised are donated to the Royal National Lifeboat Institution.

[Note to Newsreaders: if you plan to run a news net on either of the next two Sundays,

please ad-lib in the next item to tell your listeners]

This is the last GB2RS broadcast of 2010. There will be no news readings on 26 December or 2 January. But we will be back in the New Year, bringing you the all the latest amateur radio news. Transmissions re-start on Sunday 9 January. We would like to take this opportunity to send warm season's greetings to all our listeners and wish everyone a prosperous New Year.

Now for the news of special events

On Monday 27 December, a radio beach party is planned at Titchfield Haven. A group plan to operate from 40m to 2m on various modes from this excellent radio transmitting site on the English Channel near Southampton. Significant DX can be worked from there. The locator square is IO90JT and the address is Cliff Road, HillHead, Fareham PO14 3JT. Once on Cliff Road, look for the large antennas that will be used! A marquee will be provided for shelter and some BBQ food will be available. However due to the outdoor nature of the event, if there is severe weather on the 27th, it may be delayed until the 28th. Confirmation of the event will be e-mailed to anyone interested on 26 December. To register interest, e-mail Richard, M0UOO, whose address is m0uoo@rjbprojects.co.uk. Alternatively call Rob, M0RZF on 145.500MHz in

the South Hampshire area during Boxing Day.

Coventry Amateur Radio Society will be operating GB4BLC from the QTH of G8GMU during January. The home of G8GMU is open to the public, promoting amateur radio & Lions Clubs International. The official opening by the Mayor of Nuneaton & Bedworth, Councillor Don Navarro, will take place on 2 January. Greetings messages will be exchanged on 80m SSB, using 3.650MHz as there is no GB2RS news on this day. Further information from G8GMU on 0247 636 4235 or by e-mail to brlean@freenetname.co.uk.

And now the HF DX news compiled from 425 DX News and other sources

Andy, AB7FS is active as E51AND from Rarotonga, which is IOTA reference OC-013, in the South Cook Islands until 1 January. He runs 100 watts into a vertical and/or long wire. QSL via his home call.

Five operators will be active as S21FGC from Dhaka, Bangladesh until 21 December. They plan to be QRV on 160 through to 10m CW and SSB, with emphasis on the 160, 80 and 40 metres bands using CW. QSL via JH1AJT.

John, K8LJG will be active as K8LJG/4 from Amelia Island, which is IOTA reference NA-138) until 4 January. He will operate SSB and CW on or around the IOTA frequencies. QSL via his home call.

Now the contest news

The UKF UK Activity Contest takes place on 21 December from 2000 to 2230UTC. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

Over the festive period between 26th and 29th December, the Christmas Cumulatives take place for a couple of hours each day. Activity is on 50, 70, 144 and 432MHz each day, so lots of band hopping is called for to make a good overall score. If you can get on the air between 1400 and 1600UTC, the exchange is signal report, serial number and locator.

28 December sees the 50MHz UK Activity Contest taking place between 2000 and 2230UTC. Using all modes, the exchange is signal report, serial number and locator.

Into 2011 now. Monday 3 January sees the first 80m Club Championship CW round between 2000 and 2130UTC. The exchange is signal report and serial number.

The following day, the 4th, the UK Activity Contest and Club Championship takes place between 2000 and 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The ARRL RTTY Roundup takes place for 30 hours over the following weekend, 8-9th. There are single- and multi-op categories. Oddly enough you can use a variety of datamodes in this event, not just RTTY. Work everyone and send a signal report and serial number. USA stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code.

Now the solar factual data for the period from the 6th to the 12th of December, compiled on 13th of December by Neil Clarke, G0CAS

First this week, an update on the latest smoothed monthly sunspot numbers for March, April and May. These are 12.3, 14 and 15.5 respectively.

This week is a review of this year's solar activity and propagation. Sunspot minimum took place in November 2008, when the smoothed sunspot number was 1.7. By January this year, this had increased to 9.3. The rise continued month after month and by May, which is the latest available, had increased to 15.5. There is a suggestion, even a rule of thumb, that the quicker the rise from sunspot minimum to maximum the higher the peak of the cycle will be. Well so far, after 19 months from minimum, the rate of climb is slower than average. Going on this evidence alone, it looks like the maximum will be below average. In fact, the latest forecast is for a maximum to take place in spring 2013 with a maximum smoothed sunspot number of around 90. The average for all the cycles is around 115. This equates to a smoothed solar flux figure of about 140 units at maximum. This year there were only 12 per cent of days that were spotless, compared with 72 per cent for 2009.

On occasions solar activity increased to moderate levels. The largest solar flare of the year was a M8 on the 12 February. Solar flux levels varied between 69 units and a high of 96 units, which occurred back in February. The 90 day solar flux average increased from 75 units right at the beginning of the year to 83 by 12 December. Geomagnetic activity was mostly quiet but, on occasions, activity increased. The majority of the disturbances were caused by coronal holes, which are a more common during the declining phase of the solar cycle and around sunspot minimum. Normally, the daily Ap index would vary between 12 and 25 units for the most disturbed day during the disturbances. However, the most disturbed period was on the 5th and the 6th of April when the Ap reached 49 and 46 units. This was in response to a long duration B7 solar flare and a full halo coronal mass ejection that took place on the 3rd of April.

Propagation was mostly as expected but there were some days when forecasted levels were exceeded. This usually happened when solar flux levels were in the high 80s and during a quiet spell for geomagnetic activity. Openings on 28MHz have taken place during the last few months to all continents. The LF bands saw their seasonal peaks during January and again in recent weeks, which once again brought some very good morning openings to the Far East and the Pacific. Sporadic-E was very good for the first half of the summer season with some really good DX worked on all bands, even up to 144MHz. The second half of the season was not as productive. Several auroral opening made it down to the south of England but, as expected, stations much further north faired better. Some long spells of weather influenced by high pressure saw some tropospheric opening to the continent.

On the 2nd of December it was the fifteenth anniversary on the launch of the SOHO spacecraft. Recently it was announced that SOHO will continue

working till at least to the year 2014. This year saw the launch of the Solar Dynamic Observer, which is taking images of the Sun in detail that has never been seen before.

Well that's it for this year. I would like to on behalf of all the members of the propagation studies committee like to wish all GB2RS news readers and listeners a peaceful and happy Christmas and good DX for 2011. Also, seasons greetings go to all the staff from where information is received to produce this weekly report, without which, it would be impossible to compile. For those that would like to keep up to date on a near daily basis over the two week break can do so by visiting http://spotsandflares.lefora.com/ which is updated by Neil, G0CAS. See you all on the 9th of January for a forecast for 2011.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 20 December Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 20 December South Birmingham Radio Society is planning for 2011 radio rallies. Contact Don, on 0121 458 1603.

On Tuesday 21 December Loughborough & District Amateur Radio Club is having a Christmas drink at the Pied Bull. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 22 December Hinckley Amateur Radio Society is on the air. Details from John, M0JAV, on 07836 731544.

On Wednesday 22 December Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 22 and 29 December Midland Amateur Radio Society is closed. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 22 December Telford & District Amateur Radio Society is having mince pies and mulled wine plus a mini quiz. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 23 December Brigg & District Amateur Radio Club is holding its Christmas party. Details from John, 2E0III, on 01652 632938.

On Thursday 23 and 30 December Salop Amateur Radio Society is closed. Details on the club website at www.salop-ars.org.uk.

On Friday 24 December Nunsfield House Amateur Radio Group is having a shack night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 24, Monday 27 and Friday 31 December South Birmingham Radio Society is closed. Contact Don, on 0121 458 1603.

On Saturday 25 December Telford & District Amateur Radio Society is having its Christmas Day net on 144.6MHz, +-, and GB3TF, at 0900 and 2100 hours. Contact Mike, G3JKX, on 01952 299 677.

On Tuesday 28 December Loughborough & District Amateur Radio Club is closed. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 29 December Telford & District Amateur Radio Society is on the air and having a natter night. Contact Mike, G3JKX, on 01952 299 677.

On Friday 31 December Nunsfield House Amateur Radio Group is having a shack night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Saturday 1 January Coventry Amateur Radio Society is taking part in the 1st round of the 2m DF Trophy from 10am. Contact John, G8SEQ, on 07958 777363.

On Saturday 1 January Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 1 January Telford & District Amateur Radio Society is holding its New Year net on 144.6MHz, +-, and GB3TF, at 0900 hours. Contact Mike, G3JKX, on 01952 299 677.

On Monday 3 January South Birmingham Radio Society is putting the shack on the air and having a ragchew. Contact Don, on 0121 458 1603.

On Tuesday 4 January Friskney and East Lincolnshire Communications Club is having a quiz by Ron, G7ZRT. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 4 January Loughborough & District Amateur Radio Club welcomes its members back. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 5 January Hinckley Amateur Radio Society is having a social evening and open forum on summer events. Details from John, M0JAV, on 07836 731544.

On Wednesday 5 January Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 5 January Midland Amateur Radio Society is discussing New Year's resolutions and Christmas toys, plus having training and Morse

classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 5 January South Birmingham Radio Society is having Christmas leftovers and New Year's resolutions. Contact Don, on 0121 458 1603.

On Wednesday 5 January Telford & District Amateur Radio Society is holding a committee meeting and on the air. Contact Mike, G3JKX, on 01952 299 677.

On Friday 7 January Bromsgrove & District Amateur Radio Club is discussing plans for the New Year. Contact Chris, M0BQE on 01905 776 869.

On Friday 7 January Coventry Amateur Radio Society is having a bring your Christmas presents evening. Contact John, G8SEQ, on 07958 777363.

On Friday 7 January South Birmingham Radio Society Friday is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 8 January Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 20 December Angel of the North Amateur Radio Club is on the air an having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 20 December Sheffield Amateur Radio Club is having a quiz and/or video evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 20 December Thornton Cleveleys Amateur Radio Society is having its Christmas party. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Tuesday 21 December Halifax & District Amateur Radio Society is meeting at the Hobbit, Sowerby Bridge, Halifax, HX6 3QL at 7pm. Contact Martin, M0GQB, on 01422 341317.

On Tuesday 21 December Maltby & District Amateur Radio Society is having a pie 'n' pea supper. Contact Keith, G1PQW, on 07701 156 678.

On Wednesday 22 and 29 December Hornsea Amateur Radio Club is closed. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 22 and 29 December Maltby & District Amateur Radio Society is closed. Contact Keith, G1PQW, on 07701 156 678.

On Wednesday 22 December Mid-Cheshire Amateur Radio Society is on the air. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 23 December South Manchester Radio and Computer Club is holding its Christmas party. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 24 and 31 December East Cleveland Amateur Radio Club is closed. For more information contact Alistair, G4OLK, on 01642 475 671.

On Monday 27 December and Monday 3 January Angel of the North Amateur Radio Club is closed. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 27 December Sheffield Amateur Radio Club is having a social evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 27 December and Monday 3 January Thornton Cleveleys Amateur Radio Society is closed. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Tuesday 28 December Halifax & District Amateur Radio Society is closed. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 29 December Mid-Cheshire Amateur Radio Society is closed. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Tuesday 4 January Chester & District Amateur Radio Society is holding a construction contest. Details from Barbara Green on 07957 870770.

On Tuesday 4 January Halifax & District Amateur Radio Society is planning the club's on-air and /P activities during 2011. Contact Martin, M0GQB, on 01422 341317.

On Tuesday 4 January Workington and District Radio and IT Group is on the air. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Wednesday 5 January Hornsea Amateur Radio Club is holding a committee meeting. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 5 January Maltby & District Amateur Radio Society is having an introduction to contesting by Peter Day, G3PHO. Contact Keith, G1PQW, on 07701 156 678.

On Thursday 6 January Ripon & District Amateur Radio Society Christmas QSOs - what we worked over the Festive period. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 6 January South Manchester Radio and Computer Club is holding a homebrew contest. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 7 January East Cleveland Amateur Radio Club invites members to show what they got for Christmas. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

On Monday 20 December Greenisland Electronics Amateur Radio Society will be watching videos of the St Brandon, 3B7C and Rodrigues 3B9C expeditions by the 5 Star DX group. Details from Mi5JYK, by e-mail to mi5jyk@rsgb.org.uk.

On Thursday 6 January Bangor & District Amateur Radio Club is having its annual quiz, with lots of prizes up for grabs. Contact Mike, GI4XSF, on 028 4277 2383.

NEWS FOR SCOTLAND

On Tuesday 21 December Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 22 and 29 December Paisley YMCA Amateur Radio Club is closed. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Wednesday 22, Friday 24, Wednesday 29 and Friday 31 December plus Wednesday 5 and Friday 7 January, West of Scotland Amateur Radio Society is closed. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Sunday 19 December Bittern DX Group continues its Foundation course. Details from Linda, G0AJJ, on 01692 404154.

On Monday 20 December Basingstoke Amateur Radio Club is holding its Christmas dinner. Details from Clive, G4ODM, on 01256 326050.

On Monday 20 December Braintree & District Amateur Radio Society is having a natter night and operating evening. For more information contact John, M5AJB, on 01787 460 947.

On Tuesday 21 December Andover Radio Amateurs Club is having a club night and holding a committee meeting. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 21 December Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 21 December Bromley & District Amateur Radio Society is having a mince pies evening. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 21 December Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 21 December Surrey Radio Contact Club is having a natter night. Contact John, G3MCX, on 020 8688 3322.

On Wednesday 22 and 29 December Chesham & District Amateur Radio Society is closed. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 22 December Havering & District Amateur Radio Club is having a Christmas drink at the Queens Theatre. Contact John, M0UKD, on 07817 365354.

On Wednesday 22 and 29 December Worthing & District Amateur Radio Club is closed. For more information contact Phil, G4UDU, on 01903 816 684.

On Thursday 23 December Echelford Amateur Radio Society is closed. Contact John, G4GSC, on 01784 451898.

On Thursday 23 December Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

On Friday 24 and 31 December plus 7 January Mid-Sussex Amateur Radio Society is closed. Contact Peter, G4AKG, on 01444 239371.

On Friday 24 December Worthing & District Amateur Radio Club is running the Santa Claus net on 80m SSB, 3.650MHz, from 2130. For more information contact Roy, G4GPX, on 01903 753 893.

On Saturday 25 December Worthing & District Amateur Radio Club has its Christmas Day net on 2m FM. For more information contact Roy, G4GPX, on 01903 753 893.

On Tuesday 28 December Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 28 December Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 28 December Horndean & District Amateur Radio Club is closed. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 29 December Chesham & District Amateur Radio Society is closed. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 29 December Havering & District Amateur Radio Club is closed. Contact John, M0UKD, on 07817 365354.

On Thursday 30 December Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564242.

On Friday 31 December Loughton & Epping Forest Amateur Radio Society is closed. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 31 December Wimbledon & District Amateur Radio Society is closed. Contact Andrew Maish, G4ADM, on 020 8335 3434.

On Monday 3 January Basingstoke Amateur Radio Club is having a natter night. Details from Clive, G4ODM, on 01256 326050.

On Monday 3 January Burnham Beeches Radio Club is planning for contests. Contact Dave, G4XDU, on 01628 625 720.

On Tuesday 4 January Andover Radio Amateurs Club is having a club night. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 4 January Brede Steam Amateur Radio Society is preparing for the AFS and SSB Contest. For more information contact Steve, on 01424

720815.

On Tuesday 4 January Chelmsford Amateur Radio Society is having a talk on IOTA by Martin Atherton, G3ZAY. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 4 January Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 5 January Havering & District Amateur Radio Club is holding its AGM. Contact John, M0UKD, on 07817 365354.

On Wednesday 5 January Worthing & District Amateur Radio Club is making New Year resolutions and plans for 2011. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 6 January Cray Valley Radio Society is closed. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 6 January Horsham Amateur Radio Club is having a bring, show & tell evening. Details are on the web at www.harc.org.uk.

On Friday 7 January Cambridge & District Amateur Radio Club is having a talk, baluns re-visited, by Ian, G4AKD. Contact Ron Huntsman, on 012233 501712.

On Friday 7 January Crystal Palace Radio and Electronics Club is having a construction techniques and simple test equipment evening. Contact Bob, G3OOU, on 01737 552 170.

On Friday 7 January Mid-Sussex Amateur Radio Society is closed. Contact Peter, G4AKG, on 01444 239371.

On Friday 7 January Wey Valley Amateur Radio Group is having a club night. Details on the web at. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 8 January Chelmsford Amateur Radio Society is holding its 80m contest. Contact Martyn, G1EFL, on 01245 469 008.

NEWS FOR THE SOUTH WEST

On Tuesday 21 December Blackmoor Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony, G0GFL, on 01258 860741., www.radioclubs.net/bvars/

On Wednesday 22 and 29 December Taunton & District Amateur Radio Club is closed. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 22 December Thornbury & South Gloucestershire Amateur Radio Club is having its Chairman's Quiz and social evening. Contact Tony, G0WMB, on 01454 417048.

On Thursday 23 December South Bristol Amateur Radio Club is spreading Christmas greetings. Contact Len, G4RZY, on 01275 834 282.

On Thursday 23 December Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 23 December Yeovil Amateur Radio Club is closed. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 24 and 31 December Torbay Amateur Radio Society is closed. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Sunday 26 December Blackmoor Vale Amateur Radio Society has its Boxing Day net on 2m & 4m FM from 11am. Contact Tony, G0GFL, on 01258 860741.

On Monday 27 December Bristol RSGB Group is closed. Details from Robin, G3TKF, on 01225 420442.

On Tuesday 28 December Blackmoor Vale Amateur Radio Society is closed. Contact Tony, G0GFL, on 01258 860741., www.radioclubs.net/bvars/

On Tuesday 28 December West Devon Radio Club is closed. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 29 December Thornbury & South Gloucestershire Amateur Radio Club is closed. Contact Tony, G0WMB, on 01454 417048.

On Thursday 30 December South Bristol Amateur Radio Club offers New Year greetings to members. Contact Len, G4RZY, on 01275 834 282.

On Thursday 30 December Swindon & District Amateur Radio Club is closed. Contact Den, M0ACM, on 07810 317750.

On Tuesday 4 January Blackmoor Vale Amateur Radio Society is having a VHF evening in the club shack. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 5 January Taunton & District Amateur Radio Club is having a talk by Michael Johnson on Cubesats and PocketQubs - big science in small packages. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 5 January Thornbury & South Gloucestershire Amateur Radio Club is having a surplus equipment sale. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 5 January Trowbridge & District Amateur Radio Club is having a natter night and a committee meeting. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 6 January South Bristol Amateur Radio Club is having a display of club archives by Muriel, G4YZR. Contact Len, G4RZY, on 01275 834 282.

On Thursday 6 January Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 6 January Yeovil Amateur Radio Club is having a photo quiz with M0WOB. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 7 January Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Sunday 9 January Aberystwyth & District Amateur Radio Society is having a junk or pre-owned sale. Details and space bookings from Ray, GW7AGG, on 01970 611853.

On Monday 20 December Dragon Amateur Radio Club is having its Christmas social evening. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Thursday 30 December Aberystwyth & District Amateur Radio Society is having a night on the air with David, 2W0EDW, on 145.500 and then 145.550. Details from Ray, GW7AGG, on 01970 611853.

SARL NEWS - SUNDAY 19 DECEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

SILENT KEY

It is with regret that it has to be announced that the key of Vernon Short, ZS1KS, became silent on Sunday morning, 12 December. Vernon had a long bout with Alzheimer's disease and other problems. Our sincere sympathy with his wife Jessie, children, stepchildren, other relatives and friends

(PAUSE)

In the news today:

MONITORING SPACE WEATHER NOW A SERIOUS BUSINESS

MORE ABOUT LICENCE FEES

100 mW SIGNAL ON 8,970 kHz HEARD OVER 2 873 km

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

MONITORING SPACE WEATHER NOW A SERIOUS BUSINESS

For Lee-Anne McKinnell, ZS2LAW, acting Managing Director of HMO, the launch of the Space Weather Centre at the Hermanus Magnetic Observatory is a four year dream come true. "It started with our application to be internationally recognised as the space weather warning centre for Africa. Although there are space weather scientists in other parts of our continent we are the only space weather warning centre", she told SARL News.

Delivering the opening address on 10 December 2010, the Minister of Science and Technology said that the launch of the Space Weather Centre speaks directly to South Africa's space science and technology 'grand challenge'. "This Centre will contribute essential information for global space science and technology, as well as forecasts and predictions to protect our growing and future satellite industry. More specifically, it will provide a service to the Earth observation, communications, navigation, defense and engineering sectors."

The Space Weather Centre will contribute towards other grand challenges, such as the Energy Security grand challenge, through its potential to develop a skills base and stimulate interest and desire among young people to take part in science and technology.

This project will position our country as a leader in Space Weather for the African continent, allowing for the development of projects that will create parallel initiatives between different African countries, and provide us with a leading focus area for joint collaborations.

"There is already a possible Space Weather satellite collaboration between India, Brazil and South Africa, which will proceed in the context of the IBSA Space Weather satellite", the Minister said.

"We are working closely with African Space weather scientists who will contribute data to us and in return we will provide space weather information which will assist them with their research," Lee-Anne McKinnell said. "The data that we will produce from their input and what comes out of our centre will help us with global space weather conditions. The other 12 regional warning centres come together to present data covering their area and we are working to do that for Africa".

MORE ABOUT LICENCE FEES

ICASA is aligning its licence period with its financial year which runs from April to March. Radio Amateurs will receive an account for R6,75 which will cover January to March. During March an account for the period 1 April 2011 to 31 March 2012 will be mailed. Please pay the right amount on the account and wait for the account to arrive. Repeater and beacon accounts will be treated like wise and the amount charged will cover January - March 2011.

2011 CONTEST MANUAL NOW AVAILABLE ON THE WEB

The 2011 SARL contest manual is now available on the web. To download the manual, which is in PDF format, go to the contest section of the web or click on the link on SARL TODAY on the home page. The manual previously known as the blue book has been completely revised and upgraded and is a must have for anyone planning to participate in contests. It is yet another free service for radio amateurs from the SARL.

EMERGING TECHNOLOGY

100 mW SIGNAL ON 8,970 kHz HEARD OVER 2 873 km

The very low frequency transmissions by DK7FC on 8,970 kHz have been received at a distance of 2 873 km by 4X1RF in Haifa, Israel. Reception at these super low frequencies within the human audio hearing range requires ground rod antennas, low noise preamps and sophisticated decoding software. None the less, the fact that DK7FC's 100 milliwatt of effective radiated power was copied and recorded by 4X1RF at this great a distance indicates that transatlantic amateur VLF reception may indeed be possible in the very near future.

According to DL6QA in a tutorial published by the DARC, the very low frequency part of the radio frequency spectrum (VLF, 3 to 30 kHz) is characterized by a low attenuation rate, high phase and frequency stability, and high signal to noise ratio. Therefore, VLF radio propagation is used for many practical applications, e.g. frequency standardisation, clock synchronization, radio navigation beacons and reliable long-distance radio communications.

VLF waves can also penetrate water to a depth of roughly more or less 10 m to 40 m, depending on the VLF frequency employed, on the salinity of the water as well as on the temperature of the water. VLF is also used for very long-distance radio communications with submerged submarines near the surface.

Commercial VLF radio stations mainly apply very high power transmitters ranging from 5 kW to 500 kW or more. Due to the excellent ground propagation properties of VLF when transmitted vertically polarized and the very long wave length, all transmitters operate with very high antenna towers. Ground wave propagation is effected by the ground conductivity and the dielectric constant of the terrain. At 10 kHz the depth of penetration of VLF radio energy into the ground can be between 2,5 m to 150 m. The ground conductivity and the dielectric constant depends on the surface over which the ground wave propagates (e.g. sea water - fresh water - dry, sandy flat coastal land - marshy, forested flat land - mountainous hills up to 1 000 m - cities - etc.).

Because of the low bandwidth available in the VLF band from 10 kHz to 30 kHz it is not possible to transmit audio signals, therefore most messaging is done with alphanumeric data at very low bit rates.

There is a large group in Europe studying VLF. Is anyone interested in starting a group in South Africa? Hannes Coetzee, ZS6BPZ, recently put out a call for amateurs to join him in experimenting on 137 kHz, a VLF band soon to be available to South Africans. Drop a line with your contact details to armi@sarl.org.za with VLF in the subject line.

HF PROPAGATION

Sorry but we have no update today, but we believe that there will be no drastic change from the conditions prevailing at present. However, go and have a look at www.spaceweather.co.za for the latest information.

DIARY OF EVENTS

31 December - Closing date for submission of logs for the PEARS HF QSO Party to contest@pears.ham-radio-op.net; 31 December - Closing date for submission of details for membership of the SA AMSAT satelliet team to saamsat@intekom.co.za; 20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms; 20 January - Closing date for submission of proposals and synopsis of papers for 2011 SA AMSAT Space Symposium to saamsat@intekom.co.za; 30 January 2011 - Closing date for phase 1 of the construction competition.

SARL News invites clubs and individuals to submit terms of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

Halt, don't switch off, here follows the last item in today's bulletin, and it comes from DFennis, ZS4BS, the President of the SARL:

"The year 2010 is drawing to a close and many SARL members are on holiday and spending quality time with their families and loved ones. We think back over the year and remember many highlights in the SARL calendar and also at club level. We must also pause and think of those of our friends who became silent keys during this year.

What does 2011 hold in for us? Early in the new year, the new radio regulations will be promulgated, in April the SARL National Convention will be held in the Vaal Triangle and in August, the SARL will host the 22nd triennial General Conference of Region 1 of the International Amateur Radio Union, the first such conference on the African continent.

On behalf of the Council of the SARL, I would like to wish you and your family an very Blessed Christmas and may 2011 be filled with good health and success. To our Jewish radio amateurs, I wish you Happy Hannaukah and to everybody I wish happy holidays".

This from Dennis, ZS4BS, but to you also many thanks and best wishes to you and your family from all of us.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

>From The Business Manager ZL2DL
Debby says...
Well it's almost the end of the year and the last issue of HQ Info-line, I wish you all a very happy and safe Christmas and look forward to hearing from you in the new year.

Headquarters will be open through the two short weeks between Christmas and New year, plus will be open on Monday 10th January. However will then be closed from 11th - 26th January.

Debby ZL2DL

The Official Broadcast is Available From The NZART Web Site
If you want to catch-up on the latest Official Broadcast or just have a browse and listen, they are available on the NZART Web Site.

The latest broadcast is normally available on the NZART Web Site around 8.30 pm on the night of the broadcast. So if your contest activity or Bar-B-Queue happens during the time of the broadcast you can still hear it later from the NZART Web Site.

Two years of broadcasts are held on the NZART Web Site.

To access the Official Broadcasts go to URL:
http://www.nzart.org.nz/h-quarter/broadcast/

AR NEWSLINE (USA) Gives ZL2BHF a Tribute
On the 11-DECEMBER-2010 Jim Meachen received a surprise when he received an e-mail from the American Amateur Radio News organisation NEWSLINE. Attached to this e-mail was a tribute to Jim's 25 years attachment to the NZART Official Broadcast from Bill Pasternak WA6ITF President, and Co-Founder of Newsline.

The tribute can be heard by clicking on this LINK.

Digital Amateur Television (DATV) UPDATE - 2">
On Sunday, the 19th of December, 2010, a group of Wellington and Hutt Valley Amateurs simultaneously multiplexed four video and audio streams into one digital television transmission, having half the occupied bandwidth of the 4th of December test transmissions, reported in HQ Infoline 220.

The DVB-T modulation format was used, which is receivable on a Digital Terrestrial TV receiver, or set-top box.

The first transmission was on the 70 cm band at a power level of 5 milliwatts; the second transmission was on Channel 39 (614 to 622 MHz) at a power level of 10 microwatts.

Further development and testing is planned, to confirm the compatibility of the transmissions with in-band and adjacent-channel services.

The team was led by Doug, ZL2TAR, assisted by Gavin, ZL2TVM, Dick, ZL2TGQ, and Phil, ZL2TIQ.

FMTAG Notes For 19-December-2010 Infoline
Proposals
The Radio Electronics Group has applied to move its 2-metre repeater to Peacockes Road, Topo50 map reference BD33 030.88 129.32. We have selected a repeater transmit frequency of 147.125 MHz and a repeater receive frequency of 147.725 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

The Radio Electronics Group has applied to move its 70-centimetre repeater to Peacockes Road, Topo50 map reference BD33 030.88 129.32. We have selected a repeater transmit frequency of 438.875 MHz and a repeater receive frequency of 433.875 MHz. An Engineering Evaluation shows that there will be no interference to other stations.

SRD Interference to 70cm Repeaters
Please refer to page 28 Of November/December 2010 Break-In.

With reference to solution number 3, it may be necessary to add a CTCSS encode to the repeater's transmitter and a CTCSS decoder to the user's receiver, since the output frequency of an inverted repeater is within the frequency range of the SRD transmitters.

FMTAG has also received the following question:
"What is the likely interference range of a maximum power, legal, Short Range Device on the input frequency of a modern, full performance, Amateur repeater?"

The theoretical range, under free-space propagation conditions is about 160 km for a fully quieting input signal, and about 500 km for nuisance triggering.

However, under practical propagation conditions, including path obstructions, and the curvature of the Earth's surface, the interference range will be somewhat reduced.

December MED Licence Renewal - A Reminder
As at the close-of-business on Friday the 17th of December, Licence Fee payment had not been received at NZART HQ from the following Branch:

05 Christchurch

Final Recommendations to NZART Council
NZART Council, at its December 7th meeting approved the following application.

Branch 74 Wellington VHF Group has applied for a Spectrum Licence on TV Channel 39 for its Belmont ATV repeater, to replace its previous Radio Licence, cancelled by the MED as part of the Digital Switch-Over process. The location is Belmont, Topo50 map reference BQ32 568.79 398.86. All of the engineering parameters are unchanged from those of the cancelled licence.

Comments and Applications
Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to:
fmtag@nzart.org.nz?subject=FMTAG_INFOLINE

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available at:
http://www.nzart.org.nz/nzart/fmtag/
Completed forms should be sent by e-mail to:
fmtag@nzart.org.nz?subject=FMTAG_INFOLINE
END

A Reminder About Contest Logs for the VHF-UHF Field Day Contest
The close-off date for submitting Contest Logs for the VHF-UHF Field Day Contest, held on the 4th and 5th of December, is fast approaching.

Any remaining Contest Logs should be submitted by email to:

zl2wa@clear.net.nz?subject=CONTEST_LOG

with Contest Log in the Subject line.
Many thanks
ZL2WA

Updating Amateur Client Information
Radio Spectrum Management (RSM) have advised NZART that they have begun emailing Amateurs that have an email address in SMART requesting them to update their Client information.

RSM will send out around 500 emails a day to the 3500 Amateur clients that have an email address. The 500 figure was chosen because RSM did not want to provide a poor service by overloading their Contact Centre.

The email from RSM suggests that Amateurs log on and complete the updating themselves but RSM are expecting some phone calls to the Contact Centre.

RSM is already getting many email bounces from the first 500 emails sent. Clients that return an email bounce will get a letter in the New Year along with the approximately 2000 Amateurs who had no email address recorded in SMART.

Let There be Light
IBM scientists have unveiled a chip technology called CMOS Integrated Silicon Nanophotonics, integrating electrical and optical devices on the same piece of silicon.

According to IBM, this means computer chips will be able to communicate using pulses of light instead of electrical signals, boosting power efficiency and speed, while miniaturising chips.

IBM claims CMOS Integrated Silicon Nanphotonics enables over 10X improvement in integration density than is feasible with current manufacturing techniques...

For more information please see:

National System Award 2011
New Zealand Railway Stations
The railway network in New Zealand once had extensive coverage and service all over the country. The National System aims to provide wide coverage and reliable service to most of the country. New nodes are still being added to the system and we are not likely to be ï¿½pulling up the railsï¿½ anytime soon!...

Full rules are at:
http://www.nzart.org.nz/activities/awards/national-system-award-2011/

New Zealand Amateur Radio Day
Purpose
The purpose of the New Zealand Amateur Radio Day is to promote our hobby to the public so that some may be encouraged to join the local club, take on classes and become amateur radio operators.

Time
>From 1000-1200 hours local time annually on the 3rd Saturday of January

Location
Any prominent and public location where there is plenty of public foot traffic. The location will most likely require council (or other landowner) approval. Make sure this is sought and obtained in plenty of time as councils often have minimum notification times.

Logs
You are required to keep a log of all stations worked during the 2 hours. Logs must include the callsign of the station worked, time, frequency, and any other information you may like to include.

Callsign
Use of club callsigns is encouraged, however individuals may also set up a station using his or her own callsign.

Prior Publicity
For this exercise to be a success prior publicity is essential. Make ever effort to publicise the event through local club magazines, local newspapers and other media outlets as much as possible.

Publicity on the day
As the aim of this exercise is to promote our hobby to the public, have material to hand out on the day. A liaison person or persons should be nominated for this task. People with good communication skills are recommended to take on this role. This person should have a thorough understanding of the systems and modes being used on the day as they will be inundated with questions. Cards, pamphlets and other such giveaways, with

club representative contact details are a must. Get copies of the latest amateur radio promotional brochure from Debby at NZART HQ. If you have a class coming up make sure the details are included on any handout material. Take down details of people who express an interest in the hobby and follow them up.

Contacts
Contacts are to be made with other NZARD stations, or home stations willing to work NZARD stations. Interested public should be encouraged to have a go on the air under direct supervision.

Bands and Modes
Operation on the day can be on any band and any mode. The national system, IRLP nodes, 80 and 40m would be recommended as a starting point for New Zealand based contacts. Digital modes and CW may also be used to attract interest.

Other Rules
While this is a field type operation, mains may be used if available.

Make sure your equipment is working and presentable to the public before the event.

Afterwards
Please write an activity report and submit it with your log to warren@zl2aj.com. There is no scoring of contacts made during the day. Activity reports will be submitted to Break In. It is imperative to follow up any names collected on the day. Invite them to a club night, or get them involved in activities. Encourage them to study and get a callsign. All this will help boost club membership.

Banning AR Mobile Use in Canada?
RAC Bulletin 2010-039E - Distracted Driving Legislation Continues to be on Provincial Agendas; New Brunswick introduces Legislation Banning Cell Phone and Two Way Radio Use
2010-12-11
Provinces have a responsibility to legislate requirements respecting road safety on public roadways and the virtually ubiquitous use of cell phones for voice and texting communication has created new challenges for legislators. RAC agrees with the need for provinces to address cell phone use.

Most provinces [eg. Nova Scotia, Manitoba, BC, Quebec, Newfoundland and Labrador to name five] have chosen not to restrict the operation of mobile amateur radio equipment during driving. These governments have recognized the value of amateur radio to their citizens. Amateur radio has served the citizens of Canada during such emergencies such as floods, dangerous weather and ice storms, in support of public events such as Marathons and in support of agencies such as the Red Cross and a variety of provincial and municipal agencies across Canada. The support provided by amateur radio is frequent, freely given and in the highest standard of public service...

== + Spectrum Defense
WHAT ROLE CAN YOU PLAY TO DEFEND OUR AMATEUR RADIO SPECTRUM?
The third edition of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- has just been released on the ARRL Web site. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. Your financial support is vital to continue the ARRL's work to protect your operating privileges. You can help protect these privileges by contributing generously to the 2010 ARRL Spectrum Defense Fund before December 31.

"The coming year will see the completion of preparations for the next World Radiocommunication Conference (WRC-12), to be held in Geneva in January and February 2012," said ARRL Chief Executive Officer David Sumner, K1ZZ. " We hope for favorable outcomes on the agenda items we care about -- but that will not be the end of it. This WRC will recommend an agenda for the next one, later in the decade. Will that agenda pose serious threats to amateur spectrum? Will it include the possibility of new or expanded amateur allocations? The answers will depend in part on work being done on your behalf today, in Geneva and within regional telecommunications organizations that cover the globe."

This edition of Spectrum Defense Matters includes articles on how the IARU works with the world's six regional telecommunications organizations, a look at how the FCC's National Broadband Plan could affect the Amateur Radio Service and a message from ARRL Chief Technology Officer Brennan Price, N4QX, outlining many of the ways the ARRL advocates for the defense of your spectrum.

A Reminder For Conference Awards
Amateur of The Year AoTY
Award to be made to the radio amateur who in the preceding 12 month calendar year (January to December) has given outstanding service to Amateur Radio.

Details are found at:
http://www.nzart.org.nz/activities/awards-conference/amateur-of-the-year/

Arthur (Jumbo) Godfrey
The purpose of this award is to remember one of New Zealand's most well known radio amateurs, who fully supported NZART Inc and branch level activities, in the belief that strong branches meant a strong national organisation.

Details are found at:
http://www.nzart.org.nz/activities/awards-conference/arthur-jumbo-godfrey/

Young Amateur of The Year (YAoTY)
To Recognise The Young Amateur of the Year. Last award given out in 2005.

Details are found at:
http://www.nzart.org.nz/activities/awards-conference/young-aoty/

Weird and Wonderful
Life a Number of Centuries Ago
Houses had thatched roofs-thick straw pile high, with no wood underneath. It was the only place for animals to get warm, so all the cats and other small animals (mice, bugs) lived in the roof. When it rained it became slippery and sometime the animals would slip and fall off the roof.

Hence the saying, ï¿½Itï¿½s raining cats and dogs.ï¿½

There was nothing to stop things from falling into the house. This posed a real problem in the bedroom where bugs and other droppings could mess up your nice clean bed. Hence, a bed with big posts and a sheet hung over the top afforded some protection.

Thatï¿½s how canopy beds came into existence.

Most people got married in June because they took their yearly bath in May, and still smelled pretty good by June. However, they were starting to smell, so brides carried a bouquet of flowers to hide the body odour.

Hence the custom today of carrying a bouquet when getting married.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 19th December 2010

IRTS 80M Counties Contest

The 80m Counties Contest this year will be held on Monday the 3rd, the Bank Holiday. Rules in Echo Ireland and on the IRTS web site.

Echo Ireland

The December issue of Echo Ireland has now been posted to members. A number of member clubs are featured in this issue: an article about Dundalk Amateur Radio Society's entry in the recent CQ Worldwide SSB contest recounts how club members made over 1,500 QSOs in this contest. A new club - Amateur Portable Group (EI0Z) -reports on their first Summits On The Air activation as well as their operation from Slane Castle. Other club activities covered in the new Echo Ireland include South Dublin Radio Club and Limerick Radio Club.

The "HF Happenings" column by Dave EI9FBB has lots of information on recent and upcoming DX activity: it looks like the early months of 2011 will have plenty to keep DXers busy. Pat EI2HX brings us up to date on his experiments, this time dealing with the construction of a unit for portable operation.

Members studying for the licence examination or who are involved in helping prospective candidates will be interested in the review of the new examination syllabus, while those involved in digital modes will no doubt be reading the article by John EI7IG on a comparison of different IP and non-IP based protocols.

The newsletter also has details of contests and rallies in 2011. Seasonal features include an article entitled "Radio fun, or how does Santa do it"

EI7M Contest Team

EI7M win Europe in CQ WW SSB Top Band Contest 2010 The results of the CQWW SSB 160 metre contest, held last February, appear in the December issue of CQ Magazine and congratulations to the team at EI7M, the East Cork Contest Group on another fine achievement in attaining first place

in Europe. They use an 80m high top loaded vertical on transmit with a dipole and several beverages for receive. The team included Neil EI3JE, Jim EI3DP, John EI8IR, Jerry EI6BT, Dan EI3JZ and Pete G4CLA.

Irish Amateur Television Club

The new Irish Amateur Television Club Website is now up at www.IATC.ie. The site contains repeater information, details of member projects and more. Please take the time to have a look and contribute if you can.

The IATC are particularly looking for submissions to the Gallery and Project pages, email anything you think will be of interest to other operators or enthusiasts to ei9ed /at/ iatc.ie

---

RSGB Members Survey

The RSGB is currently conducting a survey of amateur radio which is open to RSGB members located outside of the UK.

The Questionnaire also looks as to how people might see the hobby in the future.

The survey is located on the RSGB website http://www.rsgb.org/survey/ the deadline for completion is 31st December 2010.

Radio Amateurs in the Clonmel Area

Norman M0JEC is involved with Hospital Radio Reading and as been in Clonmel a couple of times mainly to visit their Hospital Radio station. In March Norman 2011 Norman is hoping to put on a series of Special Event Callsigns over the UK celebrating 85 years of Hospital Broadcasting in the UK.

It is hoped that it may be possible to have QSO's with as many other Hospital Radio Stations around the world as possible. The guys at South Tipperary General Hospital Radio (in Clonmel) do not have any Amateurs amongst their members so Norman M0JEC was wondering if someone could volunteer or suggest an Amateur close to them Clonmel who might be up for helping to do a link up between the 2 stations in March.

If any Amateur in the Clonmel area is interested in more information in relation to how they are able to help out he can contact Norman via email at m0jec /at/ nadars.org.uk

---

DX News

Stephen G7BXU is due to be active as 9L1BXU in Sierra Leone from now until 7th January. QSLs go via his home call.

Larry VQ9LA has been a regular since December 2002 from the island of Diego Garcia which counts as Chagos Archipelago for DXCC purposes. He

finally leaves Chagos on 24th January and will be spending his time in the future between the U.S. and the Philippines. QSLs go to his stateside call N0QM

The well known DXpeditioner JA2EZD is at present active from the unusual call XWPA - four letters and no numbers. This is the station of the Vientiane DX Club in Laos and JA2EZD will be there till 9th January.

For the Island chasers there will be the chance of working two quite rare ones during January. Look for the calls CE9/VE3LYC and CE9/PA3EXX during the period 7th to 22nd January. The two operators hope to activate the Wollaston Islands IOTA SA-031 and the Diego Ramirez Islands IOTA SA-097 for up to 4 days each.

Andy AB7FS is currently active as E51AND from the South Cook Islands until 1st January. QSLs are via his home call.

ZL8X Log Update

The final update to the online log of ZL8X has been posted on www.kermadec.de John EI7BA tops the list of 49 EI stations that worked ZL8X. The following EI stations feature in the top 10: EI9O, EI9FBB, EI6FR, EI8H, EI9JF, EI3GU, EI0CZ, EI4GXB and EI4CF.

This week in History

1839 First celestial photograph (the moon) made in US, John Draper, New York NY

1914 American Radio Relay League founded by Hiram Percy Maxim

---

The IRTS Radio Newsteam would like to wish all SWL's and Radio Amateurs a Merry Christmas and Happy New Year.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-December, through Sunday, 19th-December there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9N, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3 STEVE'S TO BE ACTIVE AGAIN! Yes, it is that time again. The 3 Steve's (Steve/KF2TI, Steve/N2IFA, Steve/KB2ENF and Kurt/W2MW [aka Steve]), along with those two laughing young men, Andrew/N2IFB and Eric/K2EMZ will be guest op'ing at the ARRL station, W1AW, Wednesday, December 29th, between 1700-2045z. This is their 20th annual WAS (Worked All Steve's) DXpedition to Newington, and they will be operating on the following bands:
30M CW (Kurt aka Steve)
15, 20 and 40m SSB (Steve, Steve and Steve)
10 and 17m (possibly 80m) (Andrew/N2IFB and Eric/K2EMZ will also be operating as "Steves")
Steve (KF2TI) states, "Hopefully condx will improve and we will try to listen for outside the US. Packet spots will be posted. If you work any 3 operators, we will send you a beautiful, full color WAS (Worked All Steve's) certificate (suitable for framing). No QSL is needed, as we will have copies of the log and send out a certificate to all those who qualify. QSL cards to us are not necessary for the WAS. If you want a W1AW QSL Card, please send to them direct or via the Bureau. The logs will be posted (hopefully) after January 1st on our website:
http://the3stevesarc.org
This is not an officially sanctioned ARRL event. It is run for fun by the 3 Steves Amateur Radio Association (TSARC) - WK3SS (all rights reserved) and we are responsible for the printing and sending of the Worked All Steve's certificate (suitable for framing). We would like to thank the ARRL for allowing us to play with their great toys and putting up with us each year. Hope to work you then."

3W, VIETNAM. Bruce, XW1B, from Vientiane, Laos, is planning another operation from Danang, Vietnam, for the ARRL DX CW Contest (February 19-20th) as a Single-Op/Low-Power entry using the callsign 3W3B. He states that he will be living in Danang most of the year and anticipates being very active on the bands. At the start of his activity, he will use a simple station/antenna but plans to improve things later. QSL only via E21EIC. NO eQSLs.

4S7, SRI LANKA (IOTA Op Planned). Peter, DC0KK, is once again active as 4S7KKG until March 13th (2011). Activity will be on all HF bands using CW, SSB and the Digital modes (RTTY, PSK and WSJT). He also hopes to activate Barberyn Island (AS-171) sometime during his stay (dates are to be announced). QSL via DC0KK, direct or by the Bureau.

5I/5H, TANZANIA (Update). Igor, UA3DJY, is now active again as 5H3ACR until the end of December. He will try to be active on all bands using CW and SSB. QSL via RK3AOL. Look for him to also be active as 5I3A from the DIT Communications club station in Dar Es Salaam.

5R8, MADAGASCAR (IOTA Op). Paolo, IK2QPR, will be active as 5R8PR from Nosy Be (AF-057) between January 17-25th. Activity will be holiday style on 40-10 meters using CW, SSB and RTTY. QSL via his home callsign.

5R8, MADAGASCAR (IOTA Op). Operators Andy/SM1IRS, Al/SM4HAK and Eric/SM1ALH will be active as 5R8HL from Madagascar (AF-013) and Nosy Be (AF-057) between January 17th and February 4th. Activity will be on the 80-10 meters using CW and SSB. QSL via SM1ALH.

60 METERS. Joe, W8GEX, reports that the following stations were heard last week on 60 meters: G3SED, G4PCB, G0HGZ, G0HNW, J6/K4MK, LA2FKA, LA9BM and TF1EIN.

6W7, SENEGAL. Francis, F6BLP, will once again be active as 6W7SK between January 8-21st. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more detail, logs and pictures of his last operation, visit: http://www.f6blp.org/index.php?langue&#65533;&contenu&#65533;me.php

8Q7, MALDIVES. Nao, JK1FNL, will be active as 8Q7FF between January 4-9th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via his home callsign.

GEOPARK WEEKEND FOR 2011 ANNOUNCED. The Geoparks Communication Weekend 2011 will take place on the weekend May 28-29th. The English Riviera Geopark callsign will remain as GB6GEO (after confirmation from Ofcom). All those wishing to take part in the event next year with the special Geoparks callsign please contact Martin, G3VOF, via E-mail at: martin@riviera.fm

IO7, ITALY (Special Event). Operators Fred/IK7JWX (SSB), Vincenzo/I7PXV (SSB and CW) and Mike/IK7FPX (SSB) will activate the special callsign IO7DAI from the Abbeys of Lecce and Province between January 1st and March 31st (2011). Activity is to provide contacts for the special "Italian Abbeys Award Diploma Abbazie Italiane". For rules, see the Web site at: http://www.aribusto.it/dai_rules.htm
Send QSO data to the QSL Manager IK7JWX via: ik7jwx2003@yahoo.it
All QSOs will be QSLed via Bureau; if you wish QSL via direct, send 1 USD. The logs will be available on the Web site at: http://www.enzolog.org/login.php

IOTA NEWS.....
AS-133. Operators Peter/XU7ACY and Wim/XU7TZG will be active as XU7KOH from Koh Russei (aka Bamboo Island, AS-133) between December 20-23rd. Watch the usual IOTA frequencies. QSL via ON7PP.

AS-079. Take, JI3DST, will once again be active as either JS6RRR or JI3DST/JS6 from the Miyako Islands between December 26th and January 4th. Activity will be on 160-6 meters using CW, SSB, RTTY, PSK and FM. He will operate mainly from Miyako-Jima (JIIA AS-079-005), but he may also operate from Ikema-Jima (AS-079-001) and Kurima-Jima (AS-079-003). QSL by the Bureau only.

NA-122. Adriano, IK2GNW, will be active as HI9/IK2GNW from Levantado Island, Dominican Republic, for 2months starting January 27th. Activity will be on 80-6 meters using SSB and RTTY. QSL Manager is I2YSB. QSL only DIRECT (NO ITALIAN BUREAU) to: Borsa Silvano,

Viale Capettini 1, 27036 Mortara, Italy (please include 2 USDs
or 1 IRC). For more info and log search, please visit:
http://www.i2ysb.com

OC-093. (Cancelled) Due to the airplane problem, Gerard, F2JD, could
not be transported to Batanes Island and be active as DU2/F2JD.
He was very disappointed.

J38, GRENADA. Operators Bill/K4LTA and XYL Ruby/K4UPS will be active as
J37BO and J37RO, respectively, from Grenada Island between February 9th
and March 10th. Activity will be active on all HF bands. Look for Bill
to be active as J38A during the ARRL DX CW Contests (February 19-20th)
as a Single-Op entry. QSL J37BO and J38A via K4LTA and J37RO via K4UPS.

KH6BZF PROPAGATION FORECAST/REPORT (For December 20-26th)....
Dec 20 AN SOLAR REFERENCE KEYS
Dec 21 AN --------------------
Dec 22 AN BN - Below Normal
Dec 23 HN-AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 24 AN-HN LN - Low Normal
Dec 25 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 26 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH9, WAKE ISLAND (60m). Colin, WA2YUN/KH9, reportedly checks 60 meters
between 0900z and 1100z most nights on CH5.

LZ02, BULGARIA (WFF Op). Plamen, LZ3FM, will be active as LZ02WFF from
National Park Pirin (LZFF-002 - near Bansko, KN11RT) between December
21-25th. Activity will be holiday style on 80-10 meters using CW on
an IC-746 into an Inverted Vee antenna. QSL via LZ1BJ.

NEW OFFICERS FOR 2011. Members of the Honolulu (HNL) DX/A.R.C. have
elected the following 2011 Officers and Board of Directors:
President - John Peters, K1ER/KH6
Vice President - Dan Gleeson, KH6P
Treasurer - John Peters, K1ER/KH6
Secretary - Joan Peters, k4DPW/KH6
Directors - Lee Wical, KH6BZF
- Tom Seale, KH6AAA
- Eran Agmon, WH6R
- Bill Kendall, KH6OO

P29, PAPUA NEW GUINEA. Operators Allan/VK2GR and Josette/VK2FXGR will be
active again as P29CW from Kiunga in the Western Province ((IOTA OC-034)
beginning sometime in February 2011 and staying there for 10 months.

Activity will be during their spare time while doing volunteer aid work
with Australian Doctors International <http://www.adi.org.au> on CW/SSB/
RTTY. QSL via his manager VK2IR: Tommy Horozakis, PO Box 13, Sans Sousi,
NSW, 2219, Australia. Details about the previous operation, as well as
logs and pictures, are available at: http://www.p29cw.blogspot.com
ADDED NOTE: VK2GR and VK2FXGR are part of the Spratly Island DX0DX
Dxpedition planned for January 2011: http://www.dx0dx.net

PACIFIC TOUR. German operators Hermann/DL2NUD and Stefan/DL9GRE will be
active as FK/DL2NUD and FK/DL9GRE from New Caledonia between January
16-26th and February 3-15th. Activity on the HF bands will be done by
DL9GRE, while DL2NUD will be active on 2m, 70cm and 23cm EME. The duo
will also be active from Vanuatu (expected) between January 27th and
February 2nd. Tentative callsigns are YJ8HP and YJ8GR or any other assigned
callsigns. QSL via their home callsigns.

PJ7, SINT MAARTEN (Update). Joe, KC0VKN, will be active as PJ7/KC0VKN
from Sint Maarten (NA-105) between December 18&#65533;23rd. Activity will be
holiday style on 40-10 meters using CW, depending on operating times and
openings (but motivated to put a lot of people in the log). QSL via LoTW
or direct to his home callsign.

9Q50ON QSL STATUS. Theo, ON4ATW, reports, "Next week or so we have a
team meeting to discuss our QSL policy. We start handling the direct
QSLs as soon as possible then the Bureau cards and third we will upload
the log to LoTW. The upload to LoTW will be much sooner as previous
stated on our website. Our goal is to please all contacted stations
with a confirmation in a timely manner. Cards still have to be designed
and printed but we hope to start sending QSLs shortly after the new year.
Most probable LoTW will be available sometime in February."

9V1SJ QSLS (Update from OPDX.989). Joe, VK5WU, is now stating that the special event 9V1SJ station (from the JOTA) will be eventually QSLed via the Bureau. He also plans to put the logs in the LoTW once he has all of the logs.

JT0YAB QSL ROUTE CHANGE. Max, DK1MAX, reports: "The QSL route for JT0YAB has been changed due to mailing problems (lost/stolen envelopes) in/out UA9Y. QSL JT0YAB now via DK1MAX, direct. For more details see: http://www.qrz.com/db/DK1MAX
Russian QSL requests are via UA9YAB and Ukrainian QSL requests are via UT7QF.

PJ6A QSL STATUS. Bob, K4UEE, reports: "The PJ6A QSL cards have been designed, printed and received from the printer. The process of verifying claimed QSOs vs. actual log data is well under way and the first of the QSLs have been mailed. Because this is an all time new DXCC entity the worldwide demand for the PJ6A QSL is tremendous. The QSL manager, Bill, N4NX, has prepared a routine that will utilize PJ6A team members to aid in expediting the QSLing process. The work will continue on a daily basis until all requested QSLs are in the mail. Please do not send email with questions about the current status of individual QSLs as this will only slow the already large workload. The logs will be uploaded to the ARRL Log Book of the World (LoTW) on 1 January 2011."

PJ7E QSL STATUS. Joe, W8GEX, reports: ".. PJ7E QSL manager now has the cards and they should be out in a few weeks. He is going to mail all of them at once."

QSL STATUS OF UA4WHX EXPEDITIONS. The DX-World.net Web site has a press release from Vlad, UA4WHX, that states (edited): "It has been three years since we started sending cards for Africa. We are working very hard to answer all the requests we have received. We are currently probably well over 90% of the direct requests due. The good news is that we are getting less requests than we are sending out. We are expecting to answer all the direct requests by the end of this year, 2010." For the complete press release and a list of countries and the status of their cards, go to:

http://dx-world.net/2010/current-qsl-status-of-ua4whx-expeditions/#more-159
63

QSLS VIA LoTW: 9A3IH, AH2R, C6AKQ, C6AQQ, CT1JOP, DL9UBF, EA1DR, EA1QK, EA2ABJ, F6HKA, F6NMK, HA3AUI, IK8BQE, J5/K8RAB, JH2IEE, JH8JYV, LY6A, OE1ZL, OH0Z, OJ0B, OJ0J, OK1AD, ON4BB, PU8TEP, RN6HDL, RV2FW/1, SM2GCQ, SP6CIK, UN1L, UU5WW, UX7MX, V47NT, VK2BN, VP2E/K1XM, VQ9LA, YB0NFL and Z21BB

QSLS RECEIVED VIA MAIL: 4O50A, 6Y5WJ, CE8A, FP/KV1J, MJ0AWR, P40L, PJ2/K2NV, PJ2/K2TQC, PJ2/K8LEE, PJ4A, PJ4B, TO7ZG, V26B, VE7DP/7, VE8EV/p, VQ9LA, VY0X and ZD8ZZ

QSLS RECEIVED VIA THE BUREAU: CN2BC, CT/LZ3ND, EW5A, GB0SH, IQ0AL, LZ1BJ, LZ3FN, LZ9W, ON5SV, PZ5YV, RW9WH, SV/I2YYO, TB37F, UE6UFI, UR5MM and YO3CZW

S2, BANGLADESH (UpdaTE). Operators Zorro/JH1AJT, Hiro/JP1TRJ, Jon/KL2A, Lee/DS4EOI and Jim/A51HI are now active as S21YX (not S21FGC as first announced) from Dhaka until December 21st. Activity started on the 16th and continues to be on 160-10 meters using CW and SSB. However, they will concentrate on 160/80/40 meters CW. They have two stations with amps on the air using the following: 160m (full size L-GP at 30m), 80m (full size L-GP at 30m), 40m (full size DP at 35m), and two R-7000 at 30m. QSL via JH1AJT. A log search is available at: http://ds4eoi.karl.or.kr/logs/search.html

TJ, CAMEROON. Members of the F6KOP Team and Clipperton DX Club are planning a DXpedition in February 2011. Look for more details to be forthcoming.

V2, ANTIGUA & BARBUDA. Alan, N3AD, will once again be active as V26M for the ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/High-Power entry. He will be on the island between March 4-7th. His activity will be on the HF bands only - 160/80/40m in evening and 20/15/10m during daytime. QSL via his home callsign.

V4, ST. KITTS. Jon, W5JON, will be active again as V47JA from his new Calypso Bay vacation home between February 16th and March 30th. Activity will be on 80-6 meters SSB, including both the ARRL International DX SSB Contest (March 5-6th) and the CQ WPX SSB Contest (March 26-27th), both as a Single-Op/All-Band entry. The station's equipment is a Kenwood TS-590S with a KL-400 amplifier (400w) and multi-band dipoles. Look for his XYL Cathy, W5HAM, to also be active occasionally as V4/W5HAM. All QSLs go to his home callsign, W5JON.

V5, NAMIBIA. Ulmar, DK1CE, will once again be active as V5/DK1CE between December 26th and January 6th. Activity will be on 160-10 meters CW only. QSL via the home callsign by the Bureau or direct via DH3WO.

VP9, BERMUDA. Jamie, WW3S, will be active as VP9/WW3S from Ed/VP9GE's QTH between January 6-10th. Activity will be on the HF bands. QSL via LoTW or via his CBA.

XE, MEXICO. Before activating IOTAs in Belize (see OPDX.988), look for Markus, DJ4EL, to be active as XE1/DJ4EL from a few locations in Mexico (Mexico City, Tlaxcala and Quer&#65533;taro) between December 25th and January 9th (2011). Activity will be on 80-10 meters SSB using 100 watts into a windom-antenna and some different Quad-Loops. QSL via his home callsign, by the Bureau or direct.

XW, LAOS. After finishing is 3W3B activity, Bruce, XW1B, is now back home and plans to be active once again until December 27th, depending on his antenna maintenance/repairs. He states that he will try to concentrate on the lower bands. QSL only via E21EIC. NO eQSLs. Bruce informs OPDX that he actually lives there (Laos & Vietnam) permanently, so he will be active from one, or the other, for the "duration". He does mention that he lives in 3W most of the year, and he just got his ticket there. Currently, he states that his antenna situation in 3W is dismal and while at his home in XW he hopes to take some better antennas back to 3W with him at the end of the month.

YE2, INDONESIA (Lighthouse Op). Dani, YB2TJV, informs OPDX that the first ever amateur radio lighthouse activation from Indonesia will take place between December 28th and January 4th (2011). The special callsign YE2H will be used to activate Klirong Lighthouse (ARLHS IDO-374, WLOTA 1660), in the south beach of Kebumen City, Indonesia (WW Loc. OI42TF), Central Java Province South Coast (IOTA OC-021), and during the 75th anniversary celebration of Kebumen City. Team operators include Dani/YB2TJV, Eko/ YC2DSI, Seno/YB2LSR, Jon/YB2ECG, Heroe/YC2DBG, Yuli/YC2CYU, Anto/YC2LCT, Kus/YC2CSY, Nur/YC2FAJ, Bowo/YC2MOJ and Budi/YB2CNF. Activity will be on all HF bands and modes. QSL via YB2TJV, by the Bureau or direct to: Box 123, Kebumen 54300, Indonesia (w/SASE and GS). For more information see QRZ.com under the callsign YE2H.

ZF, CAYMAN ISLANDS. Pete, K8PGJ, will be active as ZF2PG between January 2-9th. When he is not scuba diving, Pete plans to be active as a portable station from the beach using a battery pack and an elevated 20m vertical dipole wire antenna with two or maybe 4 counterpoise. He also states that he is going to borrow some other fixed antennas so he can also be able to work 40/20/15 meters. Look for him on 20 meters around 14200 and 14250 kHz. QSL via his home callsign.

DX Newsletter

a free and weekly service of

DARC Committee "DX and HF contesting"

(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE

(direct: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV

(direct: dj5av@darc.de)

JD1 - Ogasawara: JD1BLY (JI5RPT), and JD1BMH (JG7PSJ) will be active again

during the first days of the new year from the island of Chichijima

(AS-031, WFF JAFF-090, JCG #10007) on 160 through 10 m, CW/SSB/DIGI

focussing the lowbands and satellites. Activity will be for

JD1BLY 24th December through 3rd January;

JD1BMH 30th December through 8th January.

QSL via homecalls, also via bureau. Logsearch for JD1BLY

www.ji5rpt.com/jd1/

and for JD1BMH at http://sapphire.es.tohoku.ac.jp/jd1bmh/

OA - Peru: Martijn, OA4/PA3GFE, will be in Peru for 1 month starting December

28th working "holidaystyle" on 40 through 15 m, possibly also 80 m,

mainly on CW and digital modes. QSL via homecall, via bureau or direct.

T8 - Palau: Ryosei, JH0IXE/KH0C, will be active as T8CW 22nd December

through 6th January 2011 on 160 through 6 m mostly on digital modes

(RTTY, PSK31, WSJT, SSTV) wth some CW and SSB. QSL via JH0IXE, also via

JARL-bureau.

TL - Central African Republic: Look for Christian, (ex-TZ9A and 5U5U) as

TL0A staying until late Dec or early 2011 from capital Bangui. His rig is IC-746 and 7ele beam for six bands. QSL only direct to: Christian Saint-Arroman, Chemin de Mousteguy, 64990 Urcuit, France.

V5 - Namibia: Ulmar, V5/DK1CE, will be on the air 160 through 10 m, CW only, 26. December 2010 through 6. January 2011. QSL via bureau to DK1CE or direct to DH3WO.

VQ9 - Chagos-Archipel: Larry, VQ9LA, will depart Diego Garcia (AF-006) on January 24th. He has been there since December 2002 and plans to operate as much as possible up to the last day with an emphasis on the lowbands and RTTY. Larry will spend part of the year in the US and in the Philippines as DU3/N0QM on 40 through 10 m, CW and RTTY. QSL via N0QM, direct, via bureau or LoTW.

XE - Mexico: Find Markus, XE1/DJ4EL, on the HF bands on SSB December 25th, 2010 through January 9th, 2011. Aerials are Windom dipole and several quad-loops. He will be active from Mexico-City, Tlaxcala and Queretaro. QSL via bureau to his homecall.

ZS8 - Marion & Prince Edward: Pierre, ZS1HF/ZS8M, finally works from the new base. He has to fight severe interference and will have to look for its source first, possibly he might also do somme QSOs from his former QTH. Pierre will stay until late April on Marion Island and presents a new Newsletter (Christmas-edition) on www.iz8epy.it/html/zs8m.html

5H - Tansania: Igor, UA3DJY, currently is on the air as 5H3ACR and will stay through late December in Dar Es Salaam. He is QRV on all bands using CW and SSB and wants QSL via RK3AOL. Igor will also be active at "DIT Communications Clubstation" 5I3A.

WFF-Operation: Plamen, LZ3FM, will be active "holidaystyle" 21st through 25th December as LZ02WFF from the National Park "Pirin" (LZFF-002) near Bansko on 80 through 10 m on CW. He uses an IC-746 and inverted vee dipole. His QSL manager LZ1BJ confirms also via bureau.

SILENT KEYS: Sheikh Ahmed Mohamed Zidan, HZ1HZ, was some amateur radio icon.

He worked in the Telecommunication Ministery of Saudi Arabia for many years and represented his country on IARU-Conferences since 1956. He died at 96 years of age.

Following DXers also became a silent key during the last weeks: Jack Columbus (VE1XT), Josephine C. Hansen (WB6ZUC), and "80-m-Beacon" and former SARL-President Axel Tigerstedt (OH5NW).

LINKS: Current SOTA activities (mountain summits) are announced at:

http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

Severe Weather Alert - Maritimes
2010-12-21

Severe weather including heavy rainfall, severe winds and storm surge
is threatening many towns and cities in the Maritimes. The weather
+system that is causing this disturbance is expected to remain in
place for the next 48 hours. During this time all Amateurs are
requested to +keep the National ARES Emergency frequencies clear and
monitor when able in the event that assistance is required. Also,
please pay +particular attention to traffic on local repeaters in the
event that calls for assistance are heard.

Thank you for your cooperation

Doug Mercer VO1DTM
Vice President Field Services
Radio Amateurs of Canada

Being that you are posting this in at least one, if not more,
international forums, please consider adding a list of frequencies you
wish to protect.

Thank you,

Steven Fleckenstein
N2UBP
Orange County, New York, USA ARES, RACES, Skywarn, EC,RO, County Skywarn
Coordinator.

EMCOMM: Severe Weather Alert ? Maritimes
2010-12-21

Severe weather including heavy rainfall, severe winds and storm surge
is threatening many towns and cities in the Maritimes. The weather
system that is causing this disturbance is expected to remain in place
for the next 48 hours. During this time all Amateurs are requested to
+keep the National ARES Emergency frequencies clear and monitor when
able in the event that assistance is required. Also, please pay
+particular attention to traffic on local repeaters in the event that
calls for assistance are heard.

Thank you for your cooperation

http://www.rac.ca/en/rac/public-service/ares/frequencies/

Doug Mercer VO1DTM
Vice President Field Services
Radio Amateurs of Canada
P.O. Box 1042 Goulds
Newfoundland Labrador A1S 1H2

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

December 22, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- ARRL Straight Key Night and Kids Day
- New Year's Day Contests Aplenty
- NAQP CW versus ARRL RTTY Roundup
- A Carload of Ham Radio
- W2SC - CEO of Pileup, Inc
- ARRL 10 Meter Contest - South of the Border
- K4ZA On Towers
- A Spectrum Dashboard
- Endpieces Interwoven

NEW HF OPERATORS - THINGS TO DO

Straight Key Night on New Year's Eve is a great way to exercise your
manual sending skills - and don't forget the AMSAT <http://amsat.org/>
Straight Key Night on OSCAR, too!

BULLETINS

The deadline for CQ WW CW was yesterday and scores must be submitted
for the ARRL Rookie Roundup today (the 22nd). With log deadlines moving
up left and right, be sure not to get left out of the listings!

The 070 Club's QRP DX Scramble <http://www.podxs070.com/> scheduled for
Dec 26 has been cancelled. (Thanks, Charlie K8IJ)

BUSTED QSOS

The photo of the P40 gang last week misidentified Mike N7MH as NX7M - I
have subtracted three additional operators from the photo as my
penalty! (Thanks, Mike N7MH)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Dec 25-26, 2010
```

- SKCC Straight Key Sprint (Dec 22)
- RAEM Contest--CW
- DARC Christmas Contest

Jan 1-2, 2011

- ARRL Straight-Key Night (Dec 31)
- Kid's Day--Phone
- South Dakota QSO Party (Dec 31)
- New Years Snowball Contest
- SARTG New Year RTTY Contest
- AGCW Happy New Year Contest--CW
- Original QRP Contest--CW
- EUCW 160 Meter Contest--CW
- ARS Spartan Sprint--CW (Jan 4)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Fans of the NCJ's North American QSO Party <http://www.ncjweb.com/> (NAQP) should be aware that the ARRL's RTTY Roundup <http://www.arrl.org/contests> and the NAQP CW contest will exercise the CSMA/CD (Carrier Sense Multiple Access/Collision Detection) expertise of the radiosport community this coming Jan 8th and 9th. This happens rarely, so no realignment of contest weekends was deemed necessary by the contest managers. Cooperation will be the key, particularly on 40 meters. Designers of cognitive radio systems might find the algorithms put in play by contesters to be of interest. In other NAQP news, Mark K6UFO is the new manager of the NAQP RTTY contest. The Contest Update tips its cap to retiring manager, Shelby K4WW.

After traveling to the UK, Germany, and Italy in 2010, the fifth year of Contest University <http://www.contestuniversity.com/> (CTU) has been announced by CTU Chairman, Tim K3LR, and he wants everyone to know that "early bird" registration is now open! Held in Dayton on May 19th just before the annual Hamvention <http://www.hamvention.com/>, this will be the only Contest University held in the USA during 2011. This year's CTU includes a brand-new Youth CTU track led by Scott W3TX. As always, CTU will feature well-known contesters and station builders as CTU Professors. CTU is sponsored by Icom America and a host of other supporting organizations listed on the CTU Web site - thanks to all!

How does Santa travel the world in a single night? It takes a fast start and this new rail gun technology <http://www.navytimes.com/news/2010/12/navy-magnetic-launch-success-122010/> from the Navy would sure satisfy that performance requirement! (Thanks, John N2NC)

The latest IEEE Antennas and Propagation Society <http://www.ieeeaps.org/> Student Design Challenge for 2011 is "Radiation Patterns on a Budget". Participants are asked to build a measurement system that can be used to find the gain and radiation pattern of an antenna. The top three teams will travel to the annual

AP-S Symposium, this year held in Spokane, WA from July 3-8, 2011.

The Southeastern VHF Society <http://www.svhfs.org/> is calling for technical and operating papers and presentations for the 15th annual Southeastern VHF Society Conference to be held in Huntsville, Alabama on April 29th and 30th, 2011. (Thanks, Robin K4IDC)

Ray ND8L reminds us to report radio equipment BEFORE leaving the US as your gear could be impounded on trying to leave your host country. The US Customs web site
<http://www.cbp.gov/linkhandler/cgov/travel/vacation/kbyg/kbyg_regulations.ctt/kbyg_regulations.pdf>
has complete information.

Have fun with the Reverse Beacon Net <http://www.reversebeacon.net/> and its reporting features, particularly after a recent contest, to see how your signal and those of the competition stack up. From Bob N6TV, "Hover your cursor over DX spots in the toolbar at the top of the page, then select the Analysis tool." You can click the signal strength button or the frequency button and start having fun. Hours may pass. To save the image, use Prt Scrn and then paste into an MS Paint window and crop. The image doesn't "save" like most graphics do.

Chris, N6WM is the new Director of the "Slow NCCC Sprint <http://www.ncccsprint.com/>" or SNS, replacing Mike W9RE. This is a lower-speed version of the NCCC Sprint and Sprint Ladder (NS and NSL) on Thursday nights.

A contest presence from Zone 21 has been stilled as HZ1HZ, Sheikh Ahmed Mohamed Zidan, has become a Silent Key. He was the first HZ contact for many over the last few decades. His QSL manager, N7RO has sent out over 90,000 cards for HZ1HZ. Licensed since 1949, Ahmed held several high posts in the Saudi PTT Ministry, the last being Deputy Minister of Communications, and represented Saudi Arabia at all the ITU conferences and meetings since 1956. (from the Daily DX <http://dailydx.com/> for 13 Dec 2010)

Another Silent Key from Finland was reported with the passing of Axel OH5NW. During WRTC-2002, Axel and his brother Peter OH5NQ hosted a wonderful tour of the famous Arboretum Mustila <http://www.mustila.com/index2.htm> - home to a unique collection of exotic conifer species and horticultural plants for all of Scandinavia. It was an interesting combination of garden and antenna farm!

With the deletion of the old PJ entities and the addition of the new ones it is now possible to have worked 400 DXCC countries including all current and deleted entities. K6ZO is reported to tally 398, but who will be the first to 400? (Thanks, Alan K0AV and Bill NC1L)

Bob N6TV reports cleaning up some major bugs in the Cabrillo Statistics for Windows <http://www.kkn.net/%7En6tv/cbs> (CBSW) rate sheet generator, originally written by Ken K5KA (SK), to allow it to work well with the latest versions of CTY.DAT. "It's a simple Windows

command line tool. Type CBSW and enter the name of your Cabrillo file and the name of the output file. You get a nice rate sheet in text format suitable for posting to 3830, and a breakdown of stations worked in each country or section, plus some other statistics." N2IC recompiled the Linux version and that has been updated, too.

Bad operating has now attracted the attention of academic researchers! ""North Carolina State University is a national leader in the study of LID and has advanced LID research and implementation, including the development of the state's LID guidance, the "North Carolina LID Guidebook <http://www.ces.ncsu.edu/depts/agecon/WECO/lidguidebook/>." The NC State Cooperative Extension's LID certification program also has the potential to be replicated nationally." A LID guidebook? Who thought they were that organized? (Thanks, Rich NU6T)

Users of the ARRL's Logbook of the World <http://www.arrl.org/logbook-of-the-world> should be aware that a new version of the TQSL software version (v1.13) has been released. Check the LOTW Web page for more information. (Thanks, Dick AA5VU)

Finding your local DXCC Card Checker <http://www.arrl.org/dxcc-card-checker-search> has been updated with an online search function. To find your local checker open this link and for USA click 'State' and for non-USA click 'Country'. For USA only, you can narrow your search within your state to Zip Code and distance from your zip code by noting this information in the boxes shown. Remember that DXCC card checkers can also certify QSLs for WAS, VUCC, and WAC. (Thanks, Bill NC1L)

Web Site of the Week - Ham radio was in the automotive news <http://reviews.cnet.com/8301-13746_7-20026067-48.html> this week as a new Chevy Camaro antenna design was credited to an amateur. I don't want to spoil things for you, so you'll have to read the article for yourself! What's an antenna without a rotator, asks George K5TR? This new model - the Cytorq <http://www.cytorq.com/> - looks like it could turn the Chevy Camaro antenna and the Camaro, too!

WORD TO THE WISE

Gall - yes, a lot of operators seem to have no shortage of it, but what's in mind here is a type of "cold-welding" in which the surfaces of threads break down and lock together. This is a particular problem with stainless steel fasteners. The solution is to use an anti-galling lubricant and tighten the fasteners slowly. This will save all sorts of grief in antenna work where stainless steel bolts and nuts are common.

==> SIGHTS AND SOUNDS

We know Tom W2SC as the dynamo behind 8P5A, but between contests he occupies his time as the CEO of NetApp. Forbes Magazine profiled Tom and his true vocation in this recent article <http://blogs.forbes.com/kymmcnicholas/2010/11/04/a-hobby-only-an-engineer-would-appreciate/>

about his contest activities. (Thanks, Gary KN4AQ)

Will CW fade away? Not with the enthusiasm expressed by KB1TSU <http://www.bambinomusical.com/KB1TSU/> and her dad, WB2HTO! (Thanks, Tim K3LR)

Old Timers in the aviation biz probably know what "Four Course Radio Range <http://www.youtube.com/watch?v=p-VqtNY8vpw>" means, but it was a new one to Dan K1TO as explained in this video.

If only the ancient Greeks had Lego <http://www.lego.com/>, maybe we wouldn't have to wait 100 years to figure out what the Antikythera Mechanism <http://www.youtube.com/watch?v=RLPVCJjTNgk&feature=youtu.be&a> was for! (Thanks, Dan KE7MTN)

You've probably heard the old story about the "barrel of bricks and the pulley", but our favorite myth-busting re-enactors took the retelling one step further, producing this video <http://www.yourdiscovery.com/video/mythbusters-barrel-of-bricks/> of it in exacting detail. Just perfect...and fun, too! (Thanks, David K2DBK)

While you're still laughing about that "barl" going up and down, browse on over to this video on ladder safety <http://www.youtube.com/watch?v=Jlh3evxXU4s>. We all think we know everything but ask any emergency room doctor for the real story about the effects of ladders on their workload, particularly during holiday decorating season. (Thanks, Larry W1DYJ)

As the maladaptations of "A Night Before Christmas" raise their yearly clatter, I can't resist mentioning this interesting multimedia version <http://www.youtube.com/watch?v=ailFghtEKsc> by Gary KN4AQ featuring loads of classic radio images to accompany the audio text. (Thanks, Tim K3LR)

And if jolly old St Hiram doesn't bring you that big tower, you can commiserate with KT8K's (a.k.a. the Mandolin Maniac) musical expression <http://www.youtube.com/user/themandolinmaniac#p/u/6/uNWZjzrzgwA> of that vertical angst. (Thanks, Garry NI6T and Mitch DJ0QN)

RESULTS AND RECORDS

How many XE stations were active for the recent ARRL 10 Meter contest featuring XE state multipliers? Ramon XE1KK reports after receiving log information from more than 30 stations, "The results are surprisingly good: nearly 100 XEs and 26 of 32 Mexican States were on the air...you can see the preliminary report <http://www.dxxe.org/arrl10m/xes-arrl-10-1.pdf> and we will prepare a detailed report that may take longer to generate and will be used to promote participation." Ramon also reports that, "it was a big "fiesta" down here and even the stations that made a few contacts are reporting their numbers enthusiastically. A good beginning!"

The 2010 Washington Salmon Run results, scores, and awards <http://www.wwdxc.org/> are now online - find first-place fish finishers! (Thanks, Jim K7WA for the Salmon Run Committee)

OPERATING TIP

"There is a 100% chance they will never call me if I don't keep calling CQ." (Thanks, Andy N2NT)

==> TECHNICAL TOPICS AND INFORMATION

What to do with that gift certificate you got for a present? Globe-trotting tower pro Don K4ZA has a brand-new ARRL book on Antenna Towers for Radio Amateurs <http://www.arrl.org/shop/Antenna-Towers-for-Radio-Amateurs/>. You'll find this great reading in preparation for the upcoming antenna and tower work you're planning.

In the "Oops, my oscilloscope got lost in my pocket" department, George K5TR points us at this pint-sized DSO Nano <http://www.seeedstudio.com/depot/micro-digital-storage-oscilloscopedso-nano-p-512.html> digital storage scope. While you're marveling at that achievement, consider the $16 pocket spectrum analyzer <http://ossmann.blogspot.com/2010/03/16-pocket-spectrum-analyzer.html> that adapts the IM-Me consumer gadget to span frequency ranges of 281 - 361, 378 - 481, and 749 - 962 MHz covering ISM, LMR, television, amateur bands, pagers, and mobile phones. (Thanks, Brian N9ADG)

Here's a neat on-line wire-size calculator <http://www.powerstream.com/Wire_Size.htm> - I like the table of lowest frequencies for 100% penetration of the copper.

Crank-up towers weigh a lot! How do you move them around after the truck drops it off in your driveway? Bill W2CQ rented a drywall dolly from a home improvement store for a small fee. He used a couple of sheets of plywood to act as a rolling surface across the yard and small automobile jacks to lift the tower on and off the cart. Simple, no?

Array Solutions <http://arraysolutions.com/> announces a new W3NQN-designed high-performance broadcast-band filter that is rated for use in-line with your transceiver output. This filter features a very steep roll off starting at 1.8 MHz, 50 to 80 dB of stop-band loss from 0.5 to 1.65 MHz, and has a 150- W ICAS Power rating with only 0.5 dB insertion loss at 1.8 MHz, dropping to 0.1 dB at higher frequencies.

I've referred readers to the incredibly useful RF Cafe web site in the past - now site author Kirt KB3UON returned the favor <http://www.rfcafe.com/miscellany/factoids/cq-engineers-qst-great-resource-259.htm> in pointing the readership to QST and other ARRL publications. Wired magazine also got into the act with this "How To Become a Ham Radio Operator <http://howto.wired.com/wiki/Become_a_Ham_Radio_Operator>" article. (Thanks, Joel N1BKE and Tom K1KI)

Why does recharging slowly kill off batteries? As described by this
Science magazine article
<http://news.sciencemag.org/sciencenow/2010/12/video-charging-takes-a-toll-on-a.html?ref=h
p>,
it turns out that the nanostructures inside the batteries are distorted
by the reversed chemical process, eventually leading to a more
disordered state that provides less capacity.

'Tis the season for snow sticks intended for use outside to mark
driveways and ditches buried beneath winter's blanket. These are often
fiberglass and nearly always a rugged and inert plastic - good for all
sorts of antenna building projects. Take advantage of a consumer-priced
volume item at your local hardware emporium!

Technical Web Site of the Week - The FCC recently released its most
recent version of the "Spectrum Dashboard
<http://reboot.fcc.gov/spectrumdashboard/searchSpectrum.seam>" which
allows you to browse and zoom in on all allocated spectrum from 225 MHz
to 3700 MHz with a graphical tool. (From the December issue of "Cheese
Bits <http://www.packratvhf.com/news.htm>" Mt Airy "Packrats" VHF Radio
Club)

==> CONVERSATION

Endpieces Interwoven

It's customary to gallivant through the fields and valleys of holiday
homily in a year-ending editorial, but I'll moderate the tristful
entreaties with a little fun, sprinkling busticated brumal bromides
betwixt verses of "Code For the Holidays", another of the seemingly
inexhaustable Dr Beldar's transmogrifications.

This one is for my mom, it being based on one of her favorites, the
1954 Perry Como hit "Home For the Holidays
<http://www.youtube.com/watch?v=yHDgzQ6eQw4>" when I was just a muffin
in the oven...

Oh, there's no mode like code for the holidays,
'Cause no matter how QRS you go,
When you pine for the rhythm of a friendly fist
For the holidays, you can't beat old Morse code.

I worked a gal who lives in Tennessee,
She was callin' for
Pennsylvania, so we ragchewed for a while.
>From Pennsylvania, hams are beamin'
South to work those W4's,
>From Atlantic to Pacific,
Gee, the QRM's terrific.

Even if the QRM is terrific, take an extra ten-count before firing off
that email or pressing the microphone button. Be not a provoker or too
easily provoked. Caution takes but an instant, while regret can last a
lifetime.

Oh, there's no mode like code for the holidays,
'Cause no matter how QRS you go,
When you pine for the rhythm of a friendly fist
For the holidays, you can't beat old Morse code.

With your keyer solid-state
Or that brass J-38
Even mobile while you're driving in the car
For the pleasure that you bring
When you make those earphones ring
No contact is too far

Rarely is the hyperbole so easily ladled out as tasty to eat as it smells during the cooking. Benefit of the doubt is often oil upon the waters and something we are all deserve at times. Be free with understanding and miserly with invective.

I worked a gal who lives in Tennessee,
She was callin' for
Pennsylvania, so we ragchewed for a while.
>From Pennsylvania, hams are beamin'
South to work those W4's,
>From Atlantic to Pacific,
Gee, the QRM's terrific.

And last, but not least, follow the old Native American advice of walking a mile in the other person's moccasins. Empathy is a marvelous thing, often wished for after the fact. When the sun comes up tomorrow, most of us are still going to be here on this earthly ball, whirling around our annual track, so we might as well make the effort to share the place a little better.

Oh, there's no mode like code for the holidays,
'Cause no matter how QRS you go,
When you pine for the rhythm of a friendly fist
For the holidays, you can't beat old Morse code.
For the holidays, you can't beat old Morse code.

Have a great holiday season and don't forget to have fun with the rest of your ham radio family!

73, Ward N0AX

==> CONTESTS

22 Dec 2010 through 4 Jan 2011

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Straight-Key Night--CW, from Jan 1, 0000Z to Jan 1, 2400Z. Bands (MHz): 3.5-28, 50+. Exchange: General QSO information. Logs due: Jan 31. Rules <http://www.arrl.org/straight-key-night>

Kid's Day--Phone, from Jan 2, 1800Z to Jan 2, 2400Z. Bands (MHz): 3.5-28. Exchange: Name, age, location, favorite color. Rules <http://www.arrl.org/FandES/ead/kd-rules.html>

SKCC Straight Key Sprint--CW, from Dec 22, 0000Z to Dec 22, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the fourth Wednesday UTC. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 3 days. Rules <http://www.skccgroup.com/sprint/sks>

RAEM Contest--CW, from Dec 26, 0000Z to Dec 26, 1200Z. Bands (MHz): 3.5-28. Exchange: Serial and lat/long in degrees. Logs due: Jan 25. Rules <http://www.raem.qrz.ru/>

070 Club QRP DX Scramble--Digital, from Dec 26, 0000Z to Dec 26, 2400Z. Bands (MHz): 14. Exchange: Call sign, first name, WR 100 entity. Logs due: Jan 28. Rules <http://www.podxs070.com/>

DARC Christmas Contest--Phone,CW, from Dec 26, 0830Z to Dec 26, 1059Z. Bands (MHz): 3.5-7. Exchange: RS(T) and DOK or special station code. Logs due: 3 weeks. Rules <http://www.darc.de/referate/dx/contest/xmas/en>

South Dakota QSO Party--Phone,CW, from Dec 31, 1700Z to Dec 31, 12 Mid. Bands (MHz): 1.8-28. Exchange: RS(T) and SD county or S/P/C. Logs due: 30 days. Rules <http://www.w0blk.org/>

New Years Snowball Contest--Phone,CW, from Jan 1, 0000Z to Jan 1, 0100Z. Bands (MHz): 3.5. Exchange: RST, serial, AGB number. Logs due: 3 weeks. Rules <http://ev5agb.com/index.htm>

SARTG New Year RTTY Contest--Digital, from Jan 1, 0800Z to Jan 1, 1100Z. Bands (MHz): 3.5-7. Exchange: RST, serial, Happy New Year in your language. Logs due: Jan 31. Rules <http://www.sartg.com/>

AGCW Happy New Year Contest--CW, from Jan 1, 0900Z to Jan 1, 1200Z. Bands (MHz): 3.5-14. Exchange: RST, serial, AGCW number. Logs due: Jan 31. Rules <http://www.agcw.org/>

Original QRP Contest--CW, from Jan 1, 1500Z to Jan 2, 1500Z. Bands (MHz): 3.5-14. Exchange: RST, serial, and category. Logs due: Jan 31. Rules <http://www.qrpcc.de/>

EUCW 160 Meter Contest--CW, from Jan 1, 2000Z to Jan 1, 2300Z and Jan 3, 0400Z to Jan 4, 0700Z. Bands (MHz): 1.8. Frequencies: Multiple operating periods. Exchange: RST, serial, club name, member nr or "NR". Logs due: Feb 15. Rules <http://www.uft.net/>

ARS Spartan Sprint--CW, from Jan 4, 0200Z to Jan 4, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

VHF+ CONTESTS

ARRL Straight-Key Night--CW, from Jan 1, 0000Z to Jan 1, 2400Z. Bands (MHz): 3.5-28, 50+. Exchange: General QSO information. Logs due: Jan 31. Rules <http://www.arrl.org/straight-key-night>

SKCC Straight Key Sprint--CW, from Dec 22, 0000Z to Dec 22, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies: Monthly on the fourth Wednesday UTC. Exchange: RST, S/P/C, name, SKCC nr or power. Logs due: 3 days. Rules <http://www.skccgroup.com/sprint/sks>

==> LOG DUE DATES

22 Dec 2010 through 4 Jan 2011

December 22, 2010 - ARRL Rookie Roundup, CW
<http://www.arrl.org/rookie-roundup>
December 25, 2010 - MDXA PSK DeathMatch
<http://www.mdxa1.org/deathmatch.html>
December 26, 2010 - Run for the Bacon QRP Contest
<http://www.fpqrp.com/fpqrprun.php>
December 31, 2010 - Kentucky QSO Party
<http://www.wkdxa.com/mainsite/index.php?option=com_content&view=category&layout=blog&id=35&Itemid=56>
December 31, 2010 - JIDX Phone Contest
<http://www.jidx.org/jidxrule-e.html>
December 31, 2010 - PRO CW Contest
<http://www.procwclub.yo6ex.ro/TOP%20OF%20OPERATORS%20ACTIVITY%20CONTEST-2010-1.pdf>
December 31, 2010 - All Austrian 160-Meter Contest
<http://www.oevsv.at/export/oevsv/download/AOEC/Rules_AOEC_160m.pdf>
December 31, 2010 - TOPS Activity Contest
<http://www.procwclub.yo6ex.ro/TOP%20OF%20OPERATORS%20ACTIVITY%20CONTEST.pdf>
January 1, 2011 - Feld Hell Sprint
<http://sites.google.com/site/feldhellclub/Home/contests>
January 1, 2011 - TARA RTTY Melee
<http://www.n2ty.org/seasons/tara_melee_rules.html>
January 2, 2011 - ARCI Topband Sprint
<http://www.qrparci.org/content/view/5267/118/>
January 4, 2011 - ARRL 160-Meter Contest
<http://www.arrl.org/160-meter>

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

DXNL 1707 - Dec 22, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV
(direct: dj5av@darc.de)

JD1 - Ogasawara: JD1BLY (JI5RPT), and JD1BMH (JG7PSJ) will be active again
during the first days of the new year from the island of Chichijima
(AS-031, WFF JAFF-090, JCG #10007) on 160 through 10 m, CW/SSB/DIGI
focussing the lowbands and satellites. Activity will be for
JD1BLY 24th December through 3rd January;
JD1BMH 30th December through 8th January.
QSL via homecalls, also via bureau. Logsearch for JD1BLY
www.ji5rpt.com/jd1/
and for JD1BMH at http://sapphire.es.tohoku.ac.jp/jd1bmh/

OA - Peru: Martijn, OA4/PA3GFE, will be in Peru for 1 month starting
December
28th working "holidaystyle" on 40 through 15 m, possibly also 80 m,
mainly on CW and digital modes. QSL via homecall, via bureau or direct.

T8 - Palau: Ryosei, JH0IXE/KH0C, will be active as T8CW 22nd December
through 6th January 2011 on 160 through 6 m mostly on digital modes
(RTTY, PSK31, WSJT, SSTV) wth some CW and SSB. QSL via JH0IXE, also via
JARL-bureau.

TL - Central African Republic: Look for Christian, (ex-TZ9A and 5U5U) as
TL0A staying until late Dec or early 2011 from capital Bangui. His rig
is IC-746 and 7ele beam for six bands. QSL only direct to: Christian
Saint-Arroman, Chemin de Mousteguy, 64990 Urcuit, France.

V5 - Namibia: Ulmar, V5/DK1CE, will be on the air 160 through 10 m, CW only,
26. December 2010 through 6. January 2011. QSL via bureau to DK1CE or
direct to DH3WO.

VQ9 - Chagos-Archipel: Larry, VQ9LA, will depart Diego Garcia (AF-006) on
January 24th. He has been there since December 2002 and plans to
operate as much as possible up to the last day with an emphasis on
the lowbands and RTTY. Larry will spend part of the year in the US and

in the Philippines as DU3/N0QM on 40 through 10 m, CW and RTTY.
QSL via N0QM, direct, via bureau or LoTW.

XE - Mexico: Find Markus, XE1/DJ4EL, on the HF bands on SSB December 25th, 2010 through January 9th, 2011. Aerials are Windom dipole and several quad-loops. He will be active from Mexico-City, Tlaxcala and Queretaro. QSL via bureau to his homecall.

ZS8 - Marion & Prince Edward: Pierre, ZS1HF/ZS8M, finally works from the new base. He has to fight severe interference and will have to look for its source first, possibly he might also do somme QSOs from his former QTH. Pierre will stay until late April on Marion Island and presents a new Newsletter (Christmas-edition) on www.iz8epy.it/html/zs8m.html

5H - Tansania: Igor, UA3DJY, currently is on the air as 5H3ACR and will stay through late December in Dar Es Salaam. He is QRV on all bands using CW and SSB and wants QSL via RK3AOL. Igor will also be active at "DIT Communications Clubstation" 5I3A.

WFF-Operation: Plamen, LZ3FM, will be active "holidaystyle" 21st through 25th December as LZ02WFF from the National Park "Pirin" (LZFF-002) near Bansko on 80 through 10 m on CW. He uses an IC-746 and inverted vee dipole. His QSL manager LZ1BJ confirms also via bureau.

SILENT KEYS: Sheikh Ahmed Mohamed Zidan, HZ1HZ, was some amateur radio icon. He worked in the Telecommunication Ministery of Saudi Arabia for many years and represented his country on IARU-Conferences since 1956. He died at 96 years of age.
Following DXers also became a silent key during the last weeks: Jack Columbus (VE1XT), Josephine C. Hansen (WB6ZUC), and "80-m-Beacon" and former SARL-President Axel Tigerstedt (OH5NW).

LINKS: Current SOTA activities (mountain summits) are announced at:

UPCOMING CONTESTS
---
26. December DARC XMas Contest (80/40m)

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

AN-018, Various, Palmer Land West: Find Mike, VP8DMH, through 24.12. as
VP8DMH/p on Alexander Island (WAP GBR-10, WFF GFF-041).
QSL via G0VGS (d/B).

AS-079, JA, Miyako Island: Look for Take,JI3DST, 26.12.2010 through 4.1.2011
as JS6RRR or JI3DST/JS6 on SSB, CW, RTTY, PSK31 and FM on 160 through
6 m. He might also visit Ikema-jima and Kurima-jima. QSL via bureau
"only".

AS-171, 4S, Sri Lanka's Coastal Islands: Peter/DC0KK intends to activate
also Barberyn Island (aka Beruwala during his stay as 4S7KKG in
Sri Lanka until March 13th. QSL via home call (d/B).

NA-105, PJ7, Sint Maarten: Joe PJ7/KC0VKN will be on Sint Maarten December
18th through 23rd. QSL via HOME CALL (d/B).

OC-083, E5, South Cook Islands: Giulio, IW3HVB will be E51HVB December
24th through 28th on Aitutaki Island. He will do it "holidaystyle"
on 7.057, 14.267, 18.137, 21.267, 24.957 and 28.567 MHz.
QSL via home call (d/B).

OC-100, H4, Temotu Province: Peter/DG1FK and Sigi/DK9FN will use H40FK and
H40FN on Nendo Island December 21st through January 3rd. QSL for H40FN
via HA8FW and H40FK via DG1FK (d/B).

* I2MOV via LoTW: Flavio, I2MOV, loaded some 80.000 QSOs to LoTW these
days for the calls: I1MOV, IK2MOV, I2MOV, 3A/I2MOV, and IS0/I2MOV.

QSL arrived direct: SU/HA3JB, PJ2/K2TQC (SA-099), PJ2/OH1VR (SA-099, very quick), UA0FUA (AS-025, IK2QPR, quick), VY0X (NA-108, VE3LYC), and ZD8ZZ (via K7ZZ).

QSL arrived bureau: BX0ZR (via W8UVZ), CO6RD (8P9NX), CT8/SP5UAF, TC2010CCA, TF/F5UFX, TM5EL (EU-068), TO2HI (NA-114, F6AUS), TO7RJ (DJ7RJ), V88/SM3TLG (OC-088), VK4XY, VY0O (NA-230, VE3LYC), ZB2/G3TXF, ZL3IO (OC-036), ZS6GRL, 9A/S51FB (EU-136), 9A/S52BT (EU-170), 9Q/DK3MO, and 9U1VO (via DJ2VO).

QSOs confirmed in LoTW: A41NW, BD2RJ/2, C91DJ, CE4CT, CU3EJ, CY9CWI, FJ/SM5ENX, FJ/SM5FUG, FP/KV1J, G8TMV/p, HK9K, KH6ZM, LA/DL2VFR, LY999X, M/LA1TPA, MW/LA1TPA, OH0/SP7VC, OH1/DL2VFR, OJ0B, OJ0J, OZ/DL2VFR, PJ2/WI9WI, R1ANC, S92SS, SD7V, SM6/DL2VFR, SN7Q, SV9/G4FRE/p, TA2/DL2AGB, TK/DL1RTL, TO3GA, UT4FJ/p, VU2PAI, XF1RCS, XM2CWI, XU7ADI, YJ0HA, 3B9C, 5B/DF6FR, 6V7Z, and 9H3TK.

Many thanks for contributing to this issue of the DXNL are going to: Carl Smith (QRZ DX), 425 DXNews, OPDX-Bulletin, DF6EX (fuer WIN-QSL), DJ4EL, DJ5AV, DJ9ZB, DK1AX, DK8JB, DL1MDV, DL1SBF, DL7VOA, DO3ME, F6AJA & Les Nouvelles DX, I2MOV, JI5RPT, NG3K, OE1WHOME CALL, PA3GVI, and others.

DXNL 1707 - Dec 22, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(direct: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV
(direct: dj5av@darc.de)

JD1 - Ogasawara: JD1BLY (JI5RPT), and JD1BMH (JG7PSJ) will be active again during the first days of the new year from the island of Chichijima (AS-031, WFF JAFF-090, JCG #10007) on 160 through 10 m, CW/SSB/DIGI focussing the lowbands and satellites. Activity will be for
JD1BLY 24th December through 3rd January;
JD1BMH 30th December through 8th January.
QSL via homecalls, also via bureau. Logsearch for JD1BLY
www.ji5rpt.com/jd1/
and for JD1BMH at http://sapphire.es.tohoku.ac.jp/jd1bmh/

OA - Peru: Martijn, OA4/PA3GFE, will be in Peru for 1 month starting December 28th working "holidaystyle" on 40 through 15 m, possibly also 80 m, mainly on CW and digital modes. QSL via homecall, via bureau or direct.

T8 - Palau: Ryosei, JH0IXE/KH0C, will be active as T8CW 22nd December through 6th January 2011 on 160 through 6 m mostly on digital modes (RTTY, PSK31, WSJT, SSTV) wth some CW and SSB. QSL via JH0IXE, also via JARL-bureau.

TL - Central African Republic: Look for Christian, (ex-TZ9A and 5U5U) as TL0A staying until late Dec or early 2011 from capital Bangui. His rig is IC-746 and 7ele beam for six bands. QSL only direct to: Christian Saint-Arroman, Chemin de Mousteguy, 64990 Urcuit, France.

V5 - Namibia: Ulmar, V5/DK1CE, will be on the air 160 through 10 m, CW only, 26. December 2010 through 6. January 2011. QSL via bureau to DK1CE or direct to DH3WO.

VQ9 - Chagos-Archipel: Larry, VQ9LA, will depart Diego Garcia (AF-006) on January 24th. He has been there since December 2002 and plans to operate as much as possible up to the last day with an emphasis on the lowbands and RTTY. Larry will spend part of the year in the US and in the Philippines as DU3/N0QM on 40 through 10 m, CW and RTTY.

QSL via N0QM, direct, via bureau or LoTW.

XE - Mexico: Find Markus, XE1/DJ4EL, on the HF bands on SSB December 25th, 2010 through January 9th, 2011. Aerials are Windom dipole and several quad-loops. He will be active from Mexico-City, Tlaxcala and Queretaro. QSL via bureau to his homecall.

ZS8 - Marion & Prince Edward: Pierre, ZS1HF/ZS8M, finally works from the new base. He has to fight severe interference and will have to look for its source first, possibly he might also do somme QSOs from his former QTH. Pierre will stay until late April on Marion Island and presents a new Newsletter (Christmas-edition) on www.iz8epy.it/html/zs8m.html

5H - Tansania: Igor, UA3DJY, currently is on the air as 5H3ACR and will stay through late December in Dar Es Salaam. He is QRV on all bands using CW and SSB and wants QSL via RK3AOL. Igor will also be active at "DIT Communications Clubstation" 5I3A.

WFF-Operation: Plamen, LZ3FM, will be active "holidaystyle" 21st through 25th December as LZ02WFF from the National Park "Pirin" (LZFF-002) near Bansko on 80 through 10 m on CW. He uses an IC-746 and inverted vee dipole. His QSL manager LZ1BJ confirms also via bureau.

SILENT KEYS: Sheikh Ahmed Mohamed Zidan, HZ1HZ, was some amateur radio icon. He worked in the Telecommunication Ministery of Saudi Arabia for many years and represented his country on IARU-Conferences since 1956. He died at 96 years of age.
Following DXers also became a silent key during the last weeks: Jack Columbus (VE1XT), Josephine C. Hansen (WB6ZUC), and "80-m-Beacon" and former SARL-President Axel Tigerstedt (OH5NW).

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

---
For the event of the big DXpedition to Spratly-Island in January 2011 dokufunk presents a special collection about Spratly. Find soundfiles, rare documents, and a list of all DXpeditions to Spratly at: www.dokufunk.org/spratly and a German version at www.dokufunk.org/spratly-d

----
Rob, PA3GVI, presents a video of the PJ4B activity at www.youtube.com/watch?v=q6X4JX11Ewk & http://sitekreator.com/pa3gvi/pj4b-weblog.html

UPCOMING CONTESTS
---
26. December DARC XMas Contest (80/40m)

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

AN-018, Various, Palmer Land West: Find Mike, VP8DMH, through 24.12. as
VP8DMH/p on Alexander Island (WAP GBR-10, WFF GFF-041).
QSL via G0VGS (d/B).

AS-079, JA, Miyako Island: Look for Take,JI3DST, 26.12.2010 through 4.1.2011
as JS6RRR or JI3DST/JS6 on SSB, CW, RTTY, PSK31 and FM on 160 through
6 m. He might also visit Ikema-jima and Kurima-jima. QSL via bureau
"only".

AS-171, 4S, Sri Lanka's Coastal Islands: Peter/DC0KK intends to activate
also Barberyn Island (aka Beruwala during his stay as 4S7KKG in
Sri Lanka until March 13th. QSL via home call (d/B).

NA-105, PJ7, Sint Maarten: Joe PJ7/KC0VKN will be on Sint Maarten December
18th through 23rd. QSL via HOME CALL (d/B).

OC-083, E5, South Cook Islands: Giulio, IW3HVB will be E51HVB December
24th through 28th on Aitutaki Island. He will do it "holidaystyle"
on 7.057, 14.267, 18.137, 21.267, 24.957 and 28.567 MHz.
QSL via home call (d/B).

OC-100, H4, Temotu Province: Peter/DG1FK and Sigi/DK9FN will use H40FK and
H40FN on Nendo Island December 21st through January 3rd. QSL for H40FN
via HA8FW and H40FK via DG1FK (d/B).

Lighthouse activities (WLOTA/ARLHS/ILLW)

JD1BLY LH 2269 Chichijima 24.12.-3.1.

WIANEWS FOR WEEK COMMENCING DEC 26 2010.

VK6RK New Awards Manager

WIA President Michael Owen VK3KI announced on Saturday 18
December 2010 at a meeting of WA clubs that the WIA Board
had appointed Keith Bainbridge VK6RK a member of the WIA
Awards Committee.

WIA Commences Emergency Communications Operator Training

At long last, and following extensive consultation with
clubs and interested amateurs, the first WIA training
courses for Emergency Communications Operators are to commence.

WA Club Meeting

The first meeting since the restructure of the WIA of its
affiliated clubs in Western Australia was held on Saturday
18 December 2010.

WIA Jim Rumble WA Amateur of the Year Award Presented

The Wireless Institute of Australia Western Australia
Division created the Amateur of the Year Award in back in
1977. It was renamed the Jim Rumble Amateur of the Year
Award in 2000.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING DECEMBER 26 2010

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Amateur LCD Amended

ACMA has amended the Amateur LCD) and the Overseas Amateurs Visiting Australia Class Licence.

WRC -07 allocated the band 135.7 - 137.8 kHz to amateurs on a secondary basis, but to date Advanced licensees have been able to operate on this band only if they had obtained a variation of their licence conditions.

Now all Advanced amateurs may operate on that band subject to conditions including the condition that g a radiated power of more than 1 watt EIRP cannot be used.

A worry for D-Star users and other digital modes was the requirement to use either a tone burst system that has a frequency of 1750 Hz, or a continuous tone coded squelch system or a dual tone multi frequency system if the output of the repeater was on a frequency different from the input frequency.

Now any other readily available code or signal is equally acceptable.

Many visiting amateurs were bemused by the requirement that if visiting Australia they had to give their callsign followed by the suffix VK, the opposite of the order used everywhere else.

Now the class licence has been varied and an amateur visiting Australia now must use his callsign preceded by the letters VK.

These changes were first requested by the WIA in December 2008.

There a number of other changes, mainly reflecting current drafting practises and also requiring amateurs not to communicate with amateurs in a foreign country if that would be inconsistent with the Australian spectrum plan. That rather obscure provision is really substituting the spectrum plan, which is always accessible on the ACMA website for a notice in the Commonwealth Gazette.

The WIA welcomes the changes.

The first meeting since the restructure of the WIA of its affiliated clubs in Western Australia was held on Saturday 18 December 2010. Representatives of the WA Repeater Group, Hills Amateur Radio Group, the West Australian VHF Group, the Scout Communications Team, Ham College, WICEN West Australia and Northern Corridor Radio Group met with members of the WIA Western Australia Advisory Committee, WIA Director Bob Bristow VK6POP and WIA President Michael Owen VK3KI.

The WIA President outlined the current matters engaging the WIA, including the changes to the production of the magazine Amateur Radio, the success of the Centenary year, the need for ongoing publicity promoting amateur radio, the National Field day and the advocacy/representational role of the WIA both with the Australian regulator and as a participant in the processes of the International Telecommunications Union.

Each group then reported on its current activities and concerns, responding to some of the issues raised. In a constructive discussion, a number of concerns and suggestions were advanced. Concern was expressed about delays in repeater licensing. Part of the problem was a failure to communicate and the WIA President told the group that as a result of these concerns, expressed in a number of recent meetings, new procedures had been adopted in the WIA office to ensure better communication and follow up.

The President also undertook to investigate the possibility of combining practical assessments with Standard Theory and Advanced Theory assessments as is done with the Foundation qualification.

Michael Owen said that the meeting had been very constructive and useful, and that he hoped it would become a regular event, as it had become in South Australia and Queensland.

WICEN has been involved in the Murray Marathon for a great many years and this year is looking for additional volunteers.

You do not need to be a member of WICEN to be involved playing radio in the bush and enjoying the company of other amateur radio operators.

The Murray Marathon is a canoe race that starts in Yarrawonga Tomorrow December 27th and finishes in Swan Hill 5 days later on New Years eve.

WICEN provides the communication for the event primarily on 80 and 2 metres.

WICEN particularly need more 2 metre operators to provide communications for the Doctors, First Aid vehicles and boats that form check points down the river. Camping is easy as YMCA is providing meals. Transport can be arranged from Melbourne to the event if that is necessary.

If any one is interested in joining the team for a fun week along the river please call Graham Mason VK3KMG

(03) 59811238.

The Wireless Institute of Australia Western Australia Division created the Amateur of the Year Award in 1977. In 2000 the Award was renamed the Jim Rumble Amateur of the Year Award, in honour of VK6RU, a former President of the then Division and the VK6 QSL Manager for an incredible 61 years.

With the restructure of the WIA in 2004 the national WIA took over the Award, to continue to recognise the Western Australian amateur making an outstanding contribution to amateur radio.

WIA Director Bob Bristow VK6POP, encouraged by Christine Bastin VK6ZLZ resurrected the award. On Sunday 19 December 2010 at an informal barbeque in

Perth, the Jim Rumble Award was presented by WIA President Michael Owen VK3KI to Heath Walder VK6TWO and Monique Faulkner VK6FMON.

The Award is a perpetual trophy, with an attractive certificate for each recipient.

Heath and Monique organised the collaboration of the various amateur radio groups to conduct the very successful Super Springtime promotion of amateur radio to the public in September and October.

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Today VK2WI News will only have a morning transmission at 10 am - opening as usual with VK1WIA News - and followed at 10.30 with VK2WI local news.

These is to be no transmission this evening.

This is the annual summer format and will exist until January the 16th when the evening transmission resumes.

There is also a break in the Thursday slow morse session from VK2BWI conducted by Ross VK2ER from Orange. His session will resume on the 3 rd February.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

For AR in the land down under, 2010 was a significant year with the Wireless Institute celebrating the centenary of organised amateur radio in Australia. With a special call sign and a special award and QSL card and the inaugural National Field Day, the progress of VK100WIA around the country was a big event both at home and abroad.

This year also saw the Presidents Lunch hosted in regional Queensland, in the City of Rockhampton. If memory serves me rightly, this year's event recorded the biggest attendance ever.

The publicity that the hobby, generally, and many clubs, in particular, received as a result of the media kits developed by the WIA would be valued in the hundreds of thousands of dollars, if not the millions, if the same level of coverage were purchased in newspapers, radio and television.

In the broadcast media, the digital modes of television and DAB+ radio have become realities for more and more people, this year passing. The first switch off of analogue broadcast services featured in the news.

Well the wrapping papers have been cleared and new toys explored. In a few days, it will be time to make the resolutions to propel our intentions for 2011. What shows on your calendar? What activities can we undertake to build on the centenary year? Have you dusted off the media kits and put your thoughts together to tell people about amateur radio in the coming year?

I'm Geoff Emery and that is what I think....how about you?

CLUBBING -

SUNSHINE COAST
Maleny VK4RSC 146.850 and 438.075 VK4RSN 53.7
Noosa Heads VK4RSL 146.825 and 438.175

This is Gordon VK4VP with news from the Sunshine Coast

Correction

First things first, apparently I made a mistake in the news last week, however I did cover my rear end. I made mention of SCARC achieving an unofficial score of 33,105 points in the recent VHF/UHF Summer Field day. Well it was quite unofficial to the tune of 30,000 points. I have been advised the score was 3,105 points, a much more believable number, still unofficial.

Bjelke Peterson Dam Camp

Quite a few club members camped out at the Bjelke Peterson Dam a few weeks back. From all accounts it was an enjoyable time. When I say camp out, most camp out in luxurious 2.5 tonne monsters with showers, a toilet and air conditioning so if it wasn't enjoyable they must be hard to please. Saturday evening saw a BBQ and raffles with a sufficient quantity of liquid refreshment. Just to keep things radio oriented one of the raffle prizes was a pair of binoculars with a built in radio.

Sunday morning saw the obligatory boot sale but there was not much on offer due to the main boot collector, Harvey VK4AHW, being unable to attend.

Well Christmas has been and gone so its New Year to get through now and start the whole process over again. Thanks to Graham VK4BB and the news team for their efforts during the year, it is very much appreciated.

This has been Gordon, VK4VP on behalf of the Sunshine Coast Amateur Radio Club.

TOWNSVILLE

Expressions of Interest sought for Public Safety Communications Training

Fred Swainston VK3DAC is seeking nominal dates for Public Safety Training early next year.

Roger VK4CD has proposed that if enough interest is shown then a course could be conducted in Townsville on the weekends of 29-30 January and 26-27 February.

6 to 10 registrations are required in order for the course to proceed, taking in candidates from Rockhampton to Cairns.

For Expressions of Interest please contact Roger VK4CD

vk4cd@bigpond.com

4774 0221.

Deadline for decisions is Thursday 30th December.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Christmas comes early for amateur radio society.

The bad weather currently being experienced in the UK has meant an earlier-than-planned Christmas closure for the country's national amateur radio society HQ.

The RSGB has posted the following statement on its website:

Adverse weather conditions cause early closure of RSGB HQ

Heavy snow and ice have severely disrupted transport in the Bedfordshire area. Because of this the decision has been made to bring forward the holiday closure of RSGB HQ.

RSGB HQ will now close for the Christmas and New Year holidays on Monday, 20 December 2010 at 14.00, and will re-open one day earlier than scheduled on Tuesday, 4 January 2011.

UK GOVERNMENT LOOKING FOR 500 MHZ FOR BROADBAND

The United Kingdom's government is looking 500MHz spectrum and this could spell problems ahead for hams in that nation.

The British newspaper the Register recently carried a story on government plans to reallocate as much as 500 MHz of spectrum for broadband Internet. The article points out that if large chunks of Ministry of Defence spectrum are sold off, the new owners are unlikely to be willing to share it with others.

The problem for UK hams comes from the fact that all Amateur Radio UHF and Microwave bands are shared with either the Ministry of Defence or the U-K Civil Aviation Authority. If some of the spectrum that gets reallocated happens be shared with radio amateurs, its quite likely that the hams will be forced off those bands.

Those interested can read the entire Register article at tinyurl.com/28ayvzl

New Amelia Earhart documentary

In the USA a "Betty Brown" captured the world's attention in 2006 when a National Geographic documentary featured her claims that she had heard some of Amelia Earhart's last known words while tuning in to shortwave radio broadcasts in 1937.

Last week, a new Discovery Channel documentary retold her story while expounding on recent evidence, including what might be a finger bone and a glass moisturizer bottle found on the island where an aviation investigation group thinks Earhart died.

Betty Brown watched the new film with her daughter,

"I was real pleased with it," Betty said this week. "The part of mine was handled good."

The film includes a film interview researchers did with Brown in Illinois in 2000 and a dramatized scene about her experience listening to Earhart's voice on her family's shortwave radio, which was attached to a 60-foot-tall antenna, when Brown was 15.

Though many people over the years paid no attention to Brown's family's claims of hearing Earhart's voice, the contact she appears to have heard included intimate details only Earhart would have known.

No word as to when Australian Discovery will air the program.

Patterson Irrigator - Local woman featured in new Amelia Earhart documentary

SO-67 FM Amateur Radio transponder suspended

Johann Lochner, ZR1CBC, reports that the FM Amateur Radio transponder on SO-67 is being temporarily suspended due to a probable radiation event.

On the AMSAT bulletin board he writes:

Last week the flash boot memory of a CAN controller on Sumbandila was corrupted by a probable radiation event. It does not affect satellite health but prevents activation of the amateur radio repeater, as the particular script detects an anomaly and aborts.

The same problem also occurred in October of 2009 and was corrected. However, the fix requires time consuming effort, which cannot be exerted immediately.

SO-67 repeater activations are therefore suspended. We apologise for any disappointment and hope to return to normal operations somewhere in January.

==========

NEWS FROM ARNEWSLINE

OHIO HAMS PROVIDE TECHNOLOGY SUPPORT TO IMPROVE COUNTY RADIO SYSTEM

Ham radio operators have volunteered their time and technical expertise to improve communications for the Wood County Sheriff's Office just south of Toledo, Ohio. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the rest of the story:

--

After years of incomplete police radio coverage, the Wood County Sheriff's Office has made some significant

communications upgrades.

In many remote areas of the county, deputies' police radios wouldn't work once they got out of their car. That caused them t0 loose contact with dispatchers and other officers. But with a little ingenuity, and some help from ham radio operators, the problem is solved.

"It was scary for me to know that there were times when my deputies went there on a call we had no communication with them, said Wood County Sheriff Mark "That caused a lot of sleepless nights."

Estimates for communications upgrades ran in to the millions. Wood County did not have that kind of money. So the Sheriff turned to amateur radio operators from around the county.

"They looked at our system and came up with a relatively inexpensive fix which was to move antenna situation around the county to much high locations," said Wasylyshyn.

Wood County was able to update the system for just $160,000. Tower space at eight locations around Wood County was donated, from radio towers to water towers. And to make sure deputies could stay in contact anywhere outside, as well as inside buildings, they are putting mobile repeaters in the trunks of cruisers.

I'm Fred Vobbe, W8HDU, reporting from Lima, Ohio.

--

To even further strengthen Wood County's communication system, it has now installed two new propane powered generators for the radio system. That means the county can maintain radio contact with its officers in the field in case of a power outage that could last several days. Up until the generators the battery back-up system would only keep the county's communication's network going four hours.

FCC GRANTS WAIVER FOR TRAIN BREAK RADIO SYSTEM

The FCC has granted eight railroads temporary waivers of the power limit for telemetry operations in the 450 to 470 MHz band. Specifically, the waivers to permit the operation of end-of-train ot E-O-T devices with eight watts transmitter output power, pending the resolution of a related rulemaking proceeding. Also granted in the December 3rd decision was a waiver to permit the equipment authorization of E-O-T devices with a transmitter output power of up to eight watts.

For those not aware, end-of-train devices operate on frequency pair 452 and 457.9375 MHz. They transmit information regarding the brake pipe pressure on the rear

car to the lead locomotive for display to the locomotive engineer. This in turn allows the engineer to apply the rear train brakes in an emergency.

SA NASA TO SUPPORT HAM RADIO SPACE PROGRAM

The newly formed South African National Space Agency has announced its intention to champion the amateur radio in space. In response to a question at the agency's launch ceremony press briefing from the South African Radio League, the new space agency's representative stated that the organization will support the amateur radio satellite program and that radio amateurs are part of the plans.

Naledi Pandor is the South African Minister of Science and Technology. She officially launched the South African National Space Agency at a gala event on Thursday December 9th. At that time she said that the new agency will be that nations primary but not its only leader to direct Government's investment in space sciences and technology. Just how the South African National Space Agency will support amateur radio space efforts was not spelled out at the briefing.

REPEATER LOCATION GUIDE FOR GREECE NOW IPHONE APP

A directory of amateur repeaters in Greece is now available for iPhone, iPod and IPad users developed by SW1NJX is now available from the iTunes on-line store. This is a free app designed to assist hams living in or travelling through Greece to find the closest VHF or UHF to their current location.

FROM OPDX Bulletin

3 STEVE'S TO BE ACTIVE AGAIN! Yes, it is that time again. The 3 Steve's
(Steve/KF2TI, Steve/N2IFA, Steve/KB2ENF and Kurt/W2MW [aka Steve]), along
with those two laughing young men, Andrew/N2IFB and Eric/K2EMZ will be
guest op'ing at the ARRL station, W1AW, Wednesday, December 29th, between
1700-2045z. This is their 20th annual WAS (Worked All Steve's) DXpedition
to Newington, and they will be operating on the following bands:

30M CW (Kurt aka Steve)
15, 20 and 40m SSB (Steve, Steve and Steve)
10 and 17m (possibly 80m) (Andrew/N2IFB and Eric/K2EMZ will also be
operating as "Steves")

Steve (KF2TI) states, "Hopefully condx will improve and we will try to
listen for outside the US. Packet spots will be posted. If you work any
3 operators, we will send you a beautiful, full colour WAS (Worked All
Steve's) certificate (suitable for framing). No QSL is needed, as we
will have copies of the log and send out a certificate to all those who
qualify. QSL cards to us are not necessary for the WAS. If you want a
W1AW QSL Card, please send to them direct or via the Bureau. The logs
will be posted (hopefully) after January 1st on our website:

http://the3stevesarc.org

This is not an officially sanctioned ARRL event. It is run for fun by
the 3 Steves Amateur Radio Association (TSARC) - WK3SS (all rights
reserved) and we are responsible for the printing and sending of the
Worked All Steve's certificate (suitable for framing). We would like
to thank the ARRL for allowing us to play with their great toys and
putting up with us each year. Hope to work you then."

AWARDS

WIA President Michael Owen VK3KI announced on Saturday 18 December 2010 at a meeting of WA clubs that the WIA Board had appointed Keith Bainbridge VK6RK a member of the WIA Awards Committee. The Board had acted on the advice of Chris Platt VK5CP, the WIA Director responsible for Awards.

The current WIA Awards Manager Eddie de Young VK4AN has advised the Board that he would not seek reappointment, and the Board has also appointed Keith as WIA Awards Manager, leaving it to Eddie and Keith to arrange the formal changeover at a time that best achieves an orderly transition.

In accepting the resignation of Eddie, the WIA Board formally recorded its gratitude for his contribution to the WIA.

INTRUDER WATCH - ENFORCEMENT ZONE

CALIFORNIA CB'ER ISSUED NOTICE OF UNLICENSED OPERATION

The FCC's Sam Francisco Field Office has issued a Notice of
Unlicensed Operation to an operator on 27 MHz who was
transmitting sound effects, language that might be classified as profane, indecent or obscene, and music.

If he fails to abide by the FCC, he could be re-investigated during
FCC enforcement efforts.

He could face severe penalties, including a substantial monetary forfeiture, seizure of his radio equipment and criminal sanctions including
imprisonment.

IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Phil Wait - VK2ASD says at long last following extensive consultation with clubs and interested amateurs, the first WIA training courses for Emergency Communications Operators are to commence.

Organised and delivered by the WIA's Registered Training Organisation each training program will be held over four days.

Victoria at the EMDRC club rooms Burwood.

Queensland in Bundaberg

Western Australia Perth 26 and 27th February and 2nd and 3rd April

North Queensland only if sufficient interest.

New South Wales Training will be held at a time and place to be advised.

The aim is to develop in participants the skills and knowledge required to become Emergency Communications Operators. Emergency Communications Operators are persons who provide services to a variety of Emergency Services Organisations by operating a range of communication equipment.

The Emergency Services training program is composed of six core modules plus one elective.

How to Apply?

Simply fill out the on-line application form, which you will easily see in the "Members Area" from wia.org.au

Rotary's radio prize fight

THE Rotary Club of Somerville Tyabb is holding a monster raffle to raise funds for new headquarters for community radio station 3RPP.

Peninsula Rotary clubs have joined forces to build radio and recording studios and offices at the former Mornington High School site on Wilsons Road following the end of 3RPP's lease at the Coolstores in Moorooduc.

Mt Eliza ward councillor Leigh Eustace, who is on the committee overseeing the refurbishment, has asked Mornington Peninsula Shire to make a $100,000

interest-free loan to the group to enable works to continue until the raffle funds are available in April.

Up for grabs are two cars, a cruise holiday package and plasma TV.

Rotary members will hawk tickets at community events over the holiday period, with the raffle to be drawn on April 25 so if you are listening in the area get a book of tickets there and then.

To obtain a book of tickets, call Cr Eustace on 03 9787 0415.

Amateur Radio Newsline(tm) Report 1741 - December 24 2010

Amateur Radio Newsline report number 1741 with a release date of Friday, December 24th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Region 3 of the International Telecommunications Union nappears poised to back a proposed new ham band near 500 Kilohertz, the FCC's new rules on club station calls take effect on February 14th, Butte Montana hams to be excluded from a new mobile cellphone law and a radio station replaces a city's Christmas tree that's burned down by copper thieves. Find out the details on Amateur Radio Newsline(tm) report number 1741 coming your way right now.

RESTRUCTURING: NEW LF HAM BAND ME BE REQUESTED AT WRC 2012

ITU Region 3 will likely back a proposal to create a new, low frequency ham radio allocation near 500 Kilohertz. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

The Asia Pacific Telecommunity or APT is currently hosting a gathering of the regions telecommunications administrations. This is one of a series of meetings intended to develop common positions for all of Region 3 prior to the World Radiocommunication Conference to be held in Geneva in early 2012.

Of particular interest to the amateur community is Agenda Item 1.23. It seeks an allocation of about 15 kHz in parts of the band 415 from 525.6 kHz to the amateur service on a secondary basis. The International Amateur Radio Union Region 3 has representatives as observers at these preparatory meetings. While this particular meeting is not expected to adopt final positions, it is an important step in the process leading to any decisions that will be finalized at WRC 2012 in relation to any new Low Frequency Amateur Service band.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

For those unaware, the Asia Pacific Telecommunity is the regional telecommunication organization that covers all types of electromagnetic communications in ITU Region 3.

(WIA News)

RADIO RULES: NEW CLUB CALL RULES TAKE EFFECT FEBRUARY 14

The new FCC rules governing vanity and club station callsigns will go into effect on February 14, 2011. On Wednesday, December 15, new revised regulations affecting vanity and club station call signs within the Amateur Radio Service were published in the Federal Register meaning they are effective 60 days later.

Thirteen months ago, the FCC announced its intention of modifying Part 97 as it applies to the vanity call sign system and club station call signs, aligning the rules to prior Commission decisions. Last month, the Commission released a Report and Order outlining its decision. Along with the changes to the call sign rules, the FCC also made what it calls certain minor, non-substantive amendments to portions of the Part 97 Amateur Service rules. You can read the entire Report and Order on line at tinyurl.com/2d8kpu5 (FCC, ARRL)

**

RADIO LAW: BUTTE MONTANA TO EXEMPT HAMS FROM CELLPHONE BAN LAW

Butte, Montana, will have a driving while using a cellphone while driving law with a specific exemption for ham radio operators.

According to an article in the December 17th edition of the Montana Standard, County attorney Eileen Joyce has been asked to write cellphone while driving ban. Joyce says she's modeling Butte's ordinance after one already adopted by the city of Billings. That ordinance prohibits a driver from having a cell phone or other similar device in their hand while operating a bicycle, motorcycle, any four-wheeled vehicle and motor vehicles.

Joyce says the soon to be Butte ordinance will not apply to people reporting a health, safety or a police emergency. Nor does it govern the activities of others including to emergency responders, drivers using two-way radios for work and citizens who are federally licensed amateur radio operators.

Joyce says she plans to have the ordinance written in time for the next regular council meeting on January 5th. After it's introduced, the ordinance would be read twice with the final reading as soon as February 2nd. She adds that a public hearing is not planned, but residents can contact their commissioner about it. Those not exempt and found to be in violation would face a $100 fine. You can read more on-line at tinyurl.com/26k9gc6 (Montana Standard, N1TCB)

**

RADIO LAW: CONGRESS PASSES LOCAL COMMUNITY RADIO ACT

The Local Community Radio Act passed the United States Senate on Saturday, December 18th with a unanimous vote of approval

The bill had been held up by various senators, most of whom remained anonymous. However, minor changes inserted in the House version designed to protect incumbent full power FM stations earned the support of the National Association of Broadcasters. This in turn made possible House passage on a voice vote.

The second seal of approval from the Senate had been considered all but a done deal. The bill now awaits President Obama's signature, which he has committed to do. (NAB Smart Brief)

**
RADIO LAW: RADIO CLUB LOOSES HOME TO NEW UK SCHOOL REGS

Red tape has forced a United Kingdom amateur radio club out of the school it has called home for a decade.

Great Britain's Halifax and District Amateur Radio Society has trained new hams and operated from a physics lab at Rishworth School for the last 10 years. Now it is set to become homeless as the Ripponden Boarding School is forced to tighten security in line with child welfare regulations.

School Headmaster Richard Baker said the decision was made to comply with the National Minimum Standards for Boarding Schools and the Independent Schools Inspectorate regulations. He said that regulations governing child welfare can make it difficult for a school to manage certain situations in which outsiders use the premises. At the same time he must ensure the school remains fully compliant with regulatory requirements.

Society chairman Martin Cox described the move as over-zealous, but added that he did not blame the school. Instead, the group is appealing to local businesses or groups who may be able to offer it a new home.

There are around 60 licensed radio amateurs in the Halifax and Calderdale area. Many are part of the U-K disaster response organization known as RAYNET. RAYNET is similar to the United States ARES and RACES organizations, combined. (RSGB, Southgate)

RESCUE RADIO: OLD ELT SAVES COUPLE ON YACHT AND GETS THEM FINED

A couple rescued by Australian emergency services has been fined almost $1,000 by regional police for not having the correct emergency equipment on their yacht.

The 62 year-old woman and a 71 year-old man made it back safely to Port Pirie in Southern Australia after their boat was battered by storms. The unregistered yacht's navigation devices were damaged while sailing in the Spencer Gulf and the couple were not carrying any flares. However they managed to contact police using an outdated distress radio beacon.

Police say the fines serve as a warning to other boat owners to have the proper safety equipment on board. The Southern Australia Transport Department has been informed and may take further action against the skipper. (WIA News)

**

HAM RADIO IN PRINT: OFF THE GRID NEWS RECOMMENDS HAM RADIO

Ham radio is being feature in the current issue of the e-zine Off Thre Grid News. According to an op-ed article, by David M Hill, Sr., W4DMH, people often ask him what the best option is for off-grid communication is.

Hill responds by saying that to him, there is only one answer to this question that makes sense to him. That being what he calls the wonderful world of amateur radio or ham radio.

Hill goes on to note that ham radio is the only legal form of two-way radio that you can get involved in that will provide you with all levels of communication ability. He says that no other radio service can provide all of this to you, and it's very simple to get involved in ham radio today.

This very charming and informative article can be read by taking your web browser to tinyurl.com/hamfun (Via e-mail)

**

HAM RADIO ON HE WWW: TWO NEW IPHONE APS FOR HAMS ON THE GO

Amateur radio enthusiasts who travel to the U-K and own an iPhone may find two new applications or apps from Mark Turner, G7LEU very useful. First is Ham Dashboard which is designed for hams on the move or away from home.

Ham Dashboard shows a searchable list of repeaters in the UK and Ireland, along with details of input and output frequencies, a map, and a handy bearing arrow for each system. It also includes a basic APRS tracker that allows your position to be sent to the APRS-IS network. You find this one at the iTunes store at tinyurl.com/2af5rsg.

Meantime Ham Tracker allows radio amateurs on the move to send location updates to the Internet side of APRS from their mobile device. Once sent, your position can be tracked using services such as aprs dot fi. Using Ham Tracker makes it easy to send an email containing an aprs dot fi tracking link for your callsign or a map link showing your current location. This one is also at the iTunes store at tinyurl.com/2c8f4uw. More details and screen shots of botg aps are on line at www dot kramstuff dot com. (G7LEU)

**

BROKEN TECHNOLOGY: CRACKED DROID FACEPLATE INJURES CELLPHONE USER

And now the strange story of another self destructing cellular smart phone. Jim Meachen, ZL2BHF, has the details:

--

A north Texas man talking on his cell phone was rushed to a hospital after thedisplay on his phone apparently exploded on Thursday morning, December 2nd. According to news reports, man said he had just finished a call when he said he heard a loud popping noise followed by blood trickling down his face.

His ear was bleeding profusely and he was transported to the emergency room at Parkland Memorial Hospital in Dallas. There he received four stitches but suffered no hearing loss.

Later on inspection it was found that the glass faceplate on the LCD display of the two day old Motorola Droid smart phone apparently shattered. The phone still appeared to be functioning and its battery was intact.

On Thursday evening, Motorola issued at statement non what had transpired. It said - and we quote: "Motorola's priority is, and always has been the safety of our customers, and all Motorola products are designed, manufactured and tested to meet or exceed international and local standards for consumer safety. We will reach out to the consumer and investigate this thoroughly."

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, reporting.

--

While an self destructing L-C-D displays on a cellular phone is a rare occurrence, it is not unique. Thankfully, most such accidents happen when the phone is in charging mode rather than in use. (KHOU, WFAA, other reports)

NAMES IN THE NEWS: W7EQI TO CHAIR HOUSE ENERGY AND COMMUNICTIONS

United States Representative Greg Walden, W7EQI, of Oregon used Morse code when he tweeted the news to his followers on Twitter that he had been named Chairman of the House Energy and Commerce Committee's

Subcommittee on Communications and Technology.

The full text of Walden's Twitter message read - and we quote: "Will chair comm and tech sub 73s w7eqi"

In a follow-up message Walden explained that hisst tweet was Morse code and that it was just the ham radio operator in him having fun.

Walden is one of two ham radio operators in Congress. The other is Rep. Mike Ross, WD5DVR from Arkansas.

Among other things, the subcommittee Walden will chair has responsibilities that include oversight of the FCC. (Worldradio OnLine Bulletin)

**

NAMES IN THE NEWS: DUB CHARMAN G6CJ AERIAL CIRCUS NOW ON VIDEO

If you are in need of an interesting program for your next radio club meeting, listen up. The British Amateur Television Club has made available on-line a historic video of Dud Charman, G6CJ, and his world famous Aerial Circus.

Dud Charman G6CJ was the United Kingdom's antenna guru for amateur radio aerials. There was nothing Dud did not know about the subject anf it was this knowledge that was used to bring the subject to life in a lecture known as The Aerial Circus.

The very last time G6CJ performed this lecture was in 1981. The Bristol ATV group recorded it using an early Ampex video recorder. Later, with a little help from broadcaster HTV, it was copied and edited to 1" Type C and then vaulted to preserve its historic value

This very interesting piece of ham radio history has been in the British Amateur Television Club archive since the 1980's. Now it has been made available for public showing. To watch it online go to www.batc.tv and click on the "Archive" icon. Then select Dud Charman which is near the bottom of the drop down list.

A copy of the video in Adobe Flash format can also be downloaded at tinyurl.com/22q5pvc (Southgate)

**

NAMES IN THE NEWS: THE TED RANDALL WB8PUM CHRISTMAS HAM RADIO SHOW

And if you are hearing this before Christmas, then you might want to know that Ted Randall, WB8PUM, will be hosting an international radio show on the evening of Christmas Day and you can be part of it.

Ted has set up a special phone line for ARRL Public Information Officers, clubs and individuals to call in and leave their season's greetings. You can call in through Christmas Day. These will be played during the broadcast.

The number is area code 615-547-9520. Just call in and leave your greeting for broadcast during the show that will air live on WBCQ on 7.415 MHz and WTWW on 9.480 from 8 p.m to 2 a.m. Eastern Standard time. It will also be live streamed on iTunes as well. Look for more information on line at www.tedrandall.com. (Various)

**

BREAK 2

News never stops and neither do we. From the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: HAM DESIGNS STEALTH RADIO ANTENNA FOR NEW CAMARO

The 2011 Chevrolet Camaro Convertible boasts new AM/FM antenna technology developed by a Michigan ham radio operator and his non-ham design partner.

Supporters of the vehicle spoke out negatively after leaked photos of the new Camaro revealed an AM/FM whip antenna on the rear deck lid. So General Motors turned to ham radio operator and antenna expert Don Hibbard, W8BDH, to help redesign the car's antenna system.

Hibbard and colleague Gregg Kittinger were challenged to conceal the AM/FM antenna without sacrificing radio reception. After much research they came up with a new tri-band antenna design mounted inside the cars trunk airflow spoiler. More on how this was accomplished is on-line at tinyurl.com/29pqgn2. (C-Net, Auto Design News, Others)

**

EMERGING TECHNOLOGY: FIRST MEASUREMENTS MADE OF MAGNETIC FIELD IN EARTHS CORE

A University of California at Berkeley geophysicist has made the first-ever measurement of the strength of the magnetic field inside Earth's core at 1,800 miles underground.

Bruce A. Buffett, professor of earth and planetary science at UC Berkeley is the study's author. He found that the magnetic field strength is 25 Gauss, or 50 times stronger than the magnetic field at the surface that makes compass needles align north-south. Though this number is in the middle of the range geophysicists predict, it puts constraints on the identity of the heat sources in the core that keep the planets internal dynamo running to maintain this magnetic field.

Professor Buffett indicates that the result is not controversial, but do rule out a very weak magnetic field and argues against a very strong one. Buffett says that a weak field of 5 Gauss or so would imply that

little heat is being supplied by radioactive decay. On the other hand a strong field on the order of 100 Gauss, would imply a large contribution from radioactive decay.

The results are published in the December 16th issue of the journal Naturewith excerpts in Science Daily. More on this fascinating research can be found at tinyurl.com/2eh9n42. (Science Daily)

**

EMERGING TECHNOLOGY: IBM DEVELOPS NEW CMOS TECHNOLOGY

Researchers at IBM have unveiled a chip technology called CMOS Integrated Silicon Nanophotonics, integrating electrical and optical devices on the same piece of silicon.

According to IBM, this means computer chips will be able to communicate using pulses of light instead of electrical signals, boosting power efficiency and speed, while miniaturizing the chips themselves. IBM claims this new CMOS technology provides at least a ten fold improvement in integration density than is feasible with current manufacturing techniques.

For more information please take your web browser to inyurl.com/29tr3na. (ZL1GWE)

**

HAM RADIO IN SPACE: STRAIGHT KEY NIGHT ON OSCAR 2011

Amsat says that you are cordially invited to participate in Straight Key Night on OSCAR 2011. There are no rules, no scoring and no logs required. Just operate Morse on any OSCAR satellite using a straight hand key, from 0000 UTC to 2400 UTC on January 1st. This, while working as many Straight Key Night stations as you can find.

In keeping with the friendly nature of this event, each participant is asked to nominate one of the operators worked for "Best Fist." Please send your nomination to via email to w2rs (at) amsat (dot) org. Those nominated will be recognized in an Amsat News Service bulletin to be published in early February, and also in an upcoming issue of the AMSAT Journal.

This year's event is dedicated to the memory of Dick Peacock, W2GFF, who became a Silent Key in 2010 at age 91. (ANS)

**

DXCC UPDATE: TWO NEW OPERATIONS APPROVED

Bill Moore, NC1L, the ARRL Awards Branch Manager, reports that two more operations hve been approved for DXCC credit. These are the 7Z1HB from Saudi Arabia that began in 2007 and continues to the present. The other is the H40HP Temotu Provinceo peration that took place in 2009.

Moore says that if you had these operations rejected in a recent application, please send an E-mail to the ARRL DXCC Desk. You likely will not get a direct response but updated results will appear in Logbook of The World accounts, as well as online on the daily listings. (ARRL)

**

DX

In DX, DG1FK and DK9FN will be active from the rare DXCC entity of Temotu from December 21st through January 3rd. They will use the calls H40FK and H40FN from the island of Nendo. QSL this one as directed on the air

DL5RMH will be active portable TG9 from Guatemala City through January 13th. Activity will be CW only on 40 through 10 meters with preference given to 30 meters. QSL cards should be sent via bureau or direct to his home callsign.

G7BXU is on the air as 9L1BXU from Freetown in Sierra Leone from until January 7th. He is using a FT-897 and a G5RV antenna. QSL via G7BXU.

AB7FS is on the air as E51AND from Rarotonga. He will be on the island through January 1st. QSL via home callsign.

ZS1HF stroke ZS8M on Marion Island is partially QRT for a while until he finds a way around some e electronic interference from the new base. He thinks it may be from the fire alarm system and the air handling units. Once switched on, they cause severe broad band interference, preventing successful HF operations, even on the commercial frequencies.

Lastly, K8LJG will be active stroke 4 from Amelia Island until January 4th. He will operate SSB and CW on or around the Islands on the Air frequencies. Again, QSL this one via his home call.

(Above from various DX news sources)

**

THAT FINAL ITEM: RADIO STATION REPLACES BURNED DOWN CITY CHRISTMAS TREE

And finally this week, when thieves attempting to steal wire accidentally burned down Birmingham, Alabama's official Christmas Tree, it was radio to the rescue. Amateur Radio Newsline's David Black, KB4KCH, is at the South-East bureau with the details on this holiday helping hand and he has them in holiday rhyme:

--

It was ten nights before Christmas, and all through the city, lights, trees and decorations were looking very pretty.

The city's 35-foot tree stood proudly in the park.... But evil grinches struck while it was still dark.

The bandits noticed copper attached to insulation made of plastic; If they could get the copper separated from that stuff, they thought it would be fantastic.

They used gasoline to try get to their coveted wire, Instead, by mistake, they wound up starting a fire.

In their haste to make off with copper that's worth quite a bit per pound, the 75-hundred dollar tree wound up burning to the ground.

The situation was anything but funny, especially since the city had no tree replacement money.

But this is not a story that is all sad. A Birmingham Radio Station vowed, the city would not be had.

Radio station KISS-98.7 said we'll bring the city residents some glee. We'll do it, they said, by getting a new tree.

--

Kori White: "Christmas is something that's held so sacred to so many people and that's one symbol we are not going to let anybody take away."

--

Kori White is the radio station's operations manager. He helped arrange finding a replacement tree and having it delivered less than 12 hours after the first tree had burned.

--

Kori White: " When the tree rolled up, there were some individuals in the park and this lady ran up to me and she said: `Are you guys going to put the Christmas Tree back up?'

And I said: "Of coarse, there it is right there."

And she just started crying."

--

People could ask why even bother getting a new tree? Why deal with it?

But White says this is Christmas, and he wouldn't hear it.

--

Kori White: "Everybody is excited that we were able to do it and do it so quickly because a lot of times you have companies and governments that get caught so much in the bureaucracy that nothing is going to happen. We said: `Forget about it. We are just going make it happen.'

"No matter the cost. No matter what we need to do, we were going to put this joy back into the city of Birmingham. And that's exactly what we did."

--

For a time, this copper caper might have left residents feeling in a pinch. But in Birmingham at Christmas, being a grinch is no cinch.

>From Birmingham, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

Yet another case where radio creates joy from sadness and gives that happiness freely to an entire community. (RW, ARNewsline(tm))

GB2RS NEWS

Sunday 19th December 2010

The news headlines

* Authors sought for Radio Communication Handbook

* RSGB Survey to close in under two weeks

* New Worked All Britain award for 2011

Mike Dennison, G3XDV, is coordinating the editing and production of a new edition of the Society's flagship publication, the Radio Communication Handbook. He is looking for one or more people who are able to revise and update the chapters on HF Receivers and HF Transmitters/Transceivers. A royalty fee is paid based on the size of the contribution and the number of books sold. If you are interested or need further information, contact Mike by e-mail to mike.dennison@ntlworld.com.

On the 1 October, the RSGB launched a major survey of the UK amateur radio and listening community. We want to know how you pursue your hobby, your interests from QRP to moon bounce, what bands you work on, are you a contester? All the information that is necessary to see which way the hobby is moving in the 21st Century. The survey is web-based and takes about 15 minutes to complete. You have until 31 December to go online at www.rsgb.org/survey to complete the survey. If you know of a fellow amateur or listener who doesn't have computer access, please think about lending them a hand to complete the online survey.

Worked All Britain is introducing a new award for the year 2011 only. For the new Coastal and Tidal award you need to work as many WAB squares containing tidal water as you can. Valid squares are those shown as containing tidal water on an Ordnance Survey map. The basic award is for 50 squares on HF or 10 on VHF, rising in increments to 400 squares for the Diamond award. More details and a spreadsheet of valid squares are available on the WAB website at www.worked-all-britain.co.uk. All contacts must be made in the 2011 calendar year.

The United Kingdom Six Metre Group has launched an initiative to UK radio clubs and societies, to keep them informed regarding operating on 50MHz. A bi-monthly newsletter will be e-mailed to club secretaries, who have registered to receive it, containing a wide variety of information including practical operating tips specifically targeted at

the large number of operators who have not previously experienced the enhanced F2 propagation expected during the sun spot cycle peak in 2012. Any club secretaries who have not already registered to receive the newsletter can do so at www.uksmg.org/phplist.

There is good news for amateurs in Spain for 2011. Traditionally the country has very restrictive allocations in the microwave bands. The Spanish Government has granted a broad one-year permit for operation in the 2.3, 5.7GHz and 10GHz bands, with only 2.3GHz needing specific prior notice of use. The permits are all aligned with the DX sections of the IARU Region 1 bandplan. Mold and District Amateur Radio Club in Flintshire, North Wales will start an Advanced exam course on 19 January. The exam will be on 6 April. If you are an Intermediate licensee and are interested please contact Steve Studdart, GW7AAV or Keith Williams, GW4OKT. E-mail addresses are correct on QRZ.com. Further Foundation and Intermediate exam courses will be run during the year.

The RNLI fundraising event, SOS Radio Week, starts on 22 January and many amateur radio clubs and individuals have already signed up. Another big name on the UK amateur radio scene has offered a prize for those who take part. Everyone who operates during event will put in to a draw to win a new Wouxun KG- 679E 2m hand-held transceiver. Simply visit the website at www.sosradioweek.org.uk and view the register page. All monies raised are donated to the Royal National Lifeboat Institution.

[Note to Newsreaders: if you plan to run a news net on either of the next two Sundays,

please ad-lib in the next item to tell your listeners]

This is the last GB2RS broadcast of 2010. There will be no news readings on 26 December or 2 January. But we will be back in the New Year, bringing you the all the latest amateur radio news. Transmissions re- start on Sunday 9 January. We would like to take this opportunity to send warm season's greetings to all our listeners and wish everyone a prosperous New Year.

Now for the news of special events

On Monday 27 December, a radio beach party is planned at Titchfield Haven. A group plan to operate from 40m to 2m on various modes from this excellent radio transmitting site on the English Channel near Southampton. Significant DX can be worked from there. The locator square is IO90JT and the address is Cliff Road, HillHead, Fareham PO14 3JT. Once on Cliff Road, look for the large antennas that will be used! A marquee will be provided for shelter and some BBQ food will be available. However due to the outdoor nature of the event, if there is severe weather on the 27th, it may be delayed until the 28th. Confirmation of the event will be e-mailed to anyone interested on 26 December. To register interest, e-mail Richard, M0UOO, whose address is

m0uoo@rjbprojects.co.uk. Alternatively call Rob, M0RZF on 145.500MHz in the South Hampshire area during Boxing Day.

Coventry Amateur Radio Society will be operating GB4BLC from the QTH of G8GMU during January. The home of G8GMU is open to the public, promoting amateur radio & Lions Clubs International. The official opening by the Mayor of Nuneaton & Bedworth, Councillor Don Navarro, will take place on 2 January. Greetings messages will be exchanged on 80m SSB, using 3.650MHz as there is no GB2RS news on this day. Further information from G8GMU on 0247 636 4235 or by e-mail to brlean@freenetname.co.uk. And now the HF DX news compiled from 425 DX News and other sources

Andy, AB7FS is active as E51AND from Rarotonga, which is IOTA reference OC-013, in the South Cook Islands until 1 January. He runs 100 watts into a vertical and/or long wire. QSL via his home call.

Five operators will be active as S21FGC from Dhaka, Bangladesh until 21 December. They plan to be QRV on 160 through to 10m CW and SSB, with emphasis on the 160, 80 and 40 metres bands using CW. QSL via JH1AJT.

John, K8LJG will be active as K8LJG/4 from Amelia Island, which is IOTA reference NA-138) until 4 January. He will operate SSB and CW on or around the IOTA frequencies. QSL via his home call.

Now the contest news

The UKF UK Activity Contest takes place on 21 December from 2000 to 2230UTC. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

Over the festive period between 26th and 29th December, the Christmas Cumulatives take place for a couple of hours each day. Activity is on 50, 70, 144 and 432MHz each day, so lots of band hopping is called for to make a good overall score. If you can get on the air between 1400 and 1600UTC, the exchange is signal report, serial number and locator.

28 December sees the 50MHz UK Activity Contest taking place between 2000 and 2230UTC. Using all modes, the exchange is signal report, serial number and locator.

Into 2011 now. Monday 3 January sees the first 80m Club Championship CW round between 2000 and 2130UTC. The exchange is signal report and serial number.

The following day, the 4th, the UK Activity Contest and Club Championship takes place between 2000 and 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The ARRL RTTY Roundup takes place for 30 hours over the following weekend, 8-9th. There are single- and multi-op categories. Oddly enough you can use a variety of datamodes in this event, not just RTTY. Work everyone and send a signal report and serial number. USA stations will send a signal report and their 2-letter State code, while Canadian

stations will send a signal report and their 3-letter Province code.

Now the solar factual data for the period from the 6th to the 12th of December, compiled on 13th of December by Neil Clarke, G0CAS

First this week, an update on the latest smoothed monthly sunspot numbers for March, April and May. These are 12.3, 14 and 15.5 respectively.

This week is a review of this year's solar activity and propagation. Sunspot minimum took place in November 2008, when the smoothed sunspot number was 1.7. By January this year, this had increased to 9.3. The rise continued month after month and by May, which is the latest available, had increased to 15.5. There is a suggestion, even a rule of thumb, that the quicker the rise from sunspot minimum to maximum the higher the peak of the cycle will be. Well so far, after 19 months from minimum, the rate of climb is slower than average. Going on this evidence alone, it looks like the maximum will be below average. In fact, the latest forecast is for a maximum to take place in spring 2013 with a maximum smoothed sunspot number of around 90. The average for all the cycles is around 115. This equates to a smoothed solar flux figure of about 140 units at maximum. This year there were only 12 per cent of days that were spotless, compared with 72 per cent for 2009.

On occasions solar activity increased to moderate levels. The largest solar flare of the year was a M8 on the 12 February. Solar flux levels varied between 69 units and a high of 96 units, which occurred back in February. The 90 day solar flux average increased from 75 units right at the beginning of the year to 83 by 12 December. Geomagnetic activity was mostly quiet but, on occasions, activity increased. The majority of the disturbances were caused by coronal holes, which are a more common during the declining phase of the solar cycle and around sunspot minimum. Normally, the daily Ap index would vary between 12 and 25 units for the most disturbed day during the disturbances. However, the most disturbed period was on the 5th and the 6th of April when the Ap reached 49 and 46 units. This was in response to a long duration B7 solar flare and a full halo coronal mass ejection that took place on the 3rd of April.

Propagation was mostly as expected but there were some days when forecasted levels were exceeded. This usually happened when solar flux levels were in the high 80s and during a quiet spell for geomagnetic activity. Openings on 28MHz have taken place during the last few months to all continents. The LF bands saw their seasonal peaks during January and again in recent weeks, which once again brought some very good morning openings to the Far East and the Pacific. Sporadic-E was very good for the first half of the summer season with some really good DX worked on all bands, even up to 144MHz. The second half of the season was not as productive. Several auroral opening made it down to the south of England but, as expected, stations much further north faired better. Some long spells of weather influenced by high pressure saw some tropospheric opening to the continent.

On the 2nd of December it was the fifteenth anniversary on the launch of the SOHO spacecraft. Recently it was announced that SOHO will continue working till at least to the year 2014. This year saw the launch of the Solar Dynamic Observer, which is taking images of the Sun in detail that has never been seen before.

Well that's it for this year. I would like to on behalf of all the members of the propagation studies committee like to wish all GB2RS news readers and listeners a peaceful and happy Christmas and good DX for 2011. Also, seasons greetings go to all the staff from where information is received to produce this weekly report, without which, it would be impossible to compile. For those that would like to keep up to date on a near daily basis over the two week break can do so by visiting http://spotsandflares.lefora.com/ which is updated by Neil, G0CAS. See you all on the 9th of January for a forecast for 2011.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS On Monday 20 December Gloucester Amateur Radio & Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 20 December South Birmingham Radio Society is planning for 2011 radio rallies. Contact Don, on 0121 458 1603.

On Tuesday 21 December Loughborough & District Amateur Radio Club is having a Christmas drink at the Pied Bull. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 22 December Hinckley Amateur Radio Society is on the air. Details from John, M0JAV, on 07836 731544.

On Wednesday 22 December Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 22 and 29 December Midland Amateur Radio Society is closed. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 22 December Telford & District Amateur Radio Society is having mince pies and mulled wine plus a mini quiz. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 23 December Brigg & District Amateur Radio Club is holding its Christmas party. Details from John, 2E0III, on 01652 632938.

On Thursday 23 and 30 December Salop Amateur Radio Society is closed. Details on the club website at www.salop-ars.org.uk.

On Friday 24 December Nunsfield House Amateur Radio Group is having a shack night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 24, Monday 27 and Friday 31 December South Birmingham Radio Society is closed. Contact Don, on 0121 458 1603.

On Saturday 25 December Telford & District Amateur Radio Society is having its Christmas Day net on 144.6MHz, &#65533;, and GB3TF, at 0900 and 2100 hours. Contact Mike, G3JKX, on 01952 299 677.

On Tuesday 28 December Loughborough & District Amateur Radio Club is closed. More information from Chris, G1ETZ, on 01509 504 319. On Wednesday 29 December Telford & District Amateur Radio Society is on the air and having a natter night. Contact Mike, G3JKX, on 01952 299 677.

On Friday 31 December Nunsfield House Amateur Radio Group is having a shack night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Saturday 1 January Coventry Amateur Radio Society is taking part in the 1st round of the 2m DF Trophy from 10am. Contact John, G8SEQ, on 07958 777363.

On Saturday 1 January Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 1 January Telford & District Amateur Radio Society is holding its New Year net on 144.6MHz, &#65533;, and GB3TF, at 0900 hours. Contact Mike, G3JKX, on 01952 299 677.

On Monday 3 January South Birmingham Radio Society is putting the shack on the air and having a ragchew. Contact Don, on 0121 458 1603.

On Tuesday 4 January Friskney and East Lincolnshire Communications Club is having a quiz by Ron, G7ZRT. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 4 January Loughborough & District Amateur Radio Club welcomes its members back. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 5 January Hinckley Amateur Radio Society is having a social evening and open forum on summer events. Details from John, M0JAV, on 07836 731544.

On Wednesday 5 January Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 5 January Midland Amateur Radio Society is discussing New Year's resolutions and Christmas toys, plus having training and Morse classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 5 January South Birmingham Radio Society is having Christmas leftovers and New Year's resolutions. Contact Don, on 0121 458 1603.

On Wednesday 5 January Telford & District Amateur Radio Society is holding a committee meeting and on the air. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 6 January South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 7 January Bromsgrove & District Amateur Radio Club is discussing plans for the New Year. Contact Chris, M0BQE on 01905 776 869.

On Friday 7 January Coventry Amateur Radio Society is having a bring your Christmas presents evening. Contact John, G8SEQ, on 07958 777363.

On Friday 7 January South Birmingham Radio Society Friday is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 8 January Lincoln Short-Wave Club is putting G5FZ on the air and working around the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 20 December Angel of the North Amateur Radio Club is on the air an having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 20 December Sheffield Amateur Radio Club is having a quiz and/or video evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 20 December Thornton Cleveleys Amateur Radio Society is having its Christmas party. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Tuesday 21 December Halifax & District Amateur Radio Society is meeting at the Hobbit, Sowerby Bridge, Halifax, HX6 3QL at 7pm. Contact Martin, M0GQB, on 01422 341317.

On Tuesday 21 December Maltby & District Amateur Radio Society is having a pie 'n' pea supper. Contact Keith, G1PQW, on 07701 156 678.

On Wednesday 22 and 29 December Hornsea Amateur Radio Club is closed. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 22 and 29 December Maltby & District Amateur Radio Society is closed. Contact Keith, G1PQW, on 07701 156 678.

On Wednesday 22 December Mid-Cheshire Amateur Radio Society is on the air. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Thursday 23 December South Manchester Radio and Computer Club is holding its Christmas party. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 24 and 31 December East Cleveland Amateur Radio Club is closed. For more information contact Alistair, G4OLK, on 01642 475 671.

On Monday 27 December and Monday 3 January Angel of the North Amateur Radio Club is closed. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 27 December Sheffield Amateur Radio Club is having a social evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 27 December and Monday 3 January Thornton Cleveleys Amateur Radio Society is closed. Contact Colin Hirst, G0EPY, by e-mail to colmay@sky.com.

On Tuesday 28 December Halifax & District Amateur Radio Society is closed. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 29 December Mid-Cheshire Amateur Radio Society is closed. Contact Peter Paul Fox, G8HAV, on 01606 553401.

On Tuesday 4 January Chester & District Amateur Radio Society is holding a construction contest. Details from Barbara Green on 07957 870770. On Tuesday 4 January Halifax & District Amateur Radio Society is planning the club's on-air and /P activities during 2011. Contact Martin, M0GQB, on 01422 341317.

On Tuesday 4 January Workington and District Radio and IT Group is on the air. For more information get in touch with Barry Easdon, G0RZI, on 01946 812092.

On Wednesday 5 January Hornsea Amateur Radio Club is holding a committee meeting. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 5 January Maltby & District Amateur Radio Society is having an introduction to contesting by Peter Day, G3PHO. Contact Keith, G1PQW, on 07701 156 678.

On Thursday 6 January Ripon & District Amateur Radio Society Christmas QSOs what we worked over the Festive period. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 6 January South Manchester Radio and Computer Club is holding a homebrew contest. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 7 January East Cleveland Amateur Radio Club invites members to show what they got for Christmas. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND On Monday 20 December Greenisland Electronics Amateur Radio Society will be watching videos of the St Brandon, 3B7C and Rodrigues 3B9C expeditions by the 5 Star DX group. Details from Mi5JYK, by e-mail to mi5jyk@rsgb.org.uk.

On Thursday 6 January Bangor & District Amateur Radio Club is having its annual quiz, with lots of prizes up for grabs. Contact Mike, GI4XSF, on 028 4277 2383.

NEWS FOR SCOTLAND On Tuesday 21 December Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 22 and 29 December Paisley YMCA Amateur Radio Club is closed. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Monday 3 January Burnham Beeches Radio Club is planning for contests. Contact Dave, G4XDU, on 01628 625 720.

On Tuesday 4 January Andover Radio Amateurs Club is having a club night. Details from Martin, M0MWS, on 07776 181646.

On Tuesday 4 January Brede Steam Amateur Radio Society is preparing for the AFS and SSB Contest. For more information contact Steve, on 01424 720815.

On Tuesday 4 January Chelmsford Amateur Radio Society is having a talk on IOTA by Martin Atherton, G3ZAY. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 4 January Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846.

On Wednesday 5 January Havering & District Amateur Radio Club is holding its AGM. Contact John, M0UKD, on 07817 365354.

On Wednesday 5 January Worthing & District Amateur Radio Club is making New Year resolutions and plans for 2011. For more information contact Roy, G4GPX, on 01903 753 893.

On Thursday 6 January Cray Valley Radio Society is closed. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 6 January Horsham Amateur Radio Club is having a bring, show & tell evening. Details are on the web at www.harc.org.uk.

On Friday 7 January Cambridge & District Amateur Radio Club is having a talk, baluns re-visited, by Ian, G4AKD. Contact Ron Huntsman, on 012233 501712. On Friday 7 January Crystal Palace Radio and Electronics Club is having a construction techniques and simple test equipment evening. Contact Bob, G3OOU, on 01737 552 170.

On Friday 7 January Mid-Sussex Amateur Radio Society is closed. Contact Peter, G4AKG, on 01444 239371.

On Friday 7 January Wey Valley Amateur Radio Group is having a club night. Details on the web at. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 8 January Chelmsford Amateur Radio Society is holding its 80m contest. Contact Martyn, G1EFL, on 01245 469 008.

NEWS FOR THE SOUTH WEST On Tuesday 21 December Blackmoor Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony, G0GFL, on 01258 860741., www.radioclubs.net/bvars/

On Wednesday 22 and 29 December Taunton & District Amateur Radio Club is closed. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 22 December Thornbury & South Gloucestershire Amateur Radio Club is having its Chairman's Quiz and social evening. Contact Tony, G0WMB, on 01454 417048.

On Thursday 23 December South Bristol Amateur Radio Club is spreading Christmas greetings. Contact Len, G4RZY, on 01275 834 282.

On Thursday 23 December Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 23 December Yeovil Amateur Radio Club is closed. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 24 and 31 December Torbay Amateur Radio Society is closed. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Sunday 26 December Blackmoor Vale Amateur Radio Society has its Boxing Day net on 2m & 4m FM from 11am. Contact Tony, G0GFL, on 01258

860741.

On Monday 27 December Bristol RSGB Group is closed. Details from Robin, G3TKF, on 01225 420442.

On Tuesday 28 December Blackmoor Vale Amateur Radio Society is closed. Contact Tony, G0GFL, on 01258 860741., www.radioclubs.net/bvars/

On Tuesday 28 December West Devon Radio Club is closed. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 29 December Thornbury & South Gloucestershire Amateur Radio Club is closed. Contact Tony, G0WMB, on 01454 417048.

On Thursday 30 December South Bristol Amateur Radio Club offers New Year greetings to members. Contact Len, G4RZY, on 01275 834 282. On Thursday 30 December Swindon & District Amateur Radio Club is closed. Contact Den, M0ACM, on 07810 317750.

On Tuesday 4 January Blackmoor Vale Amateur Radio Society is having a VHF evening in the club shack. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 5 January Taunton & District Amateur Radio Club is having a talk by Michael Johnson on Cubesats and PocketQubs - big science in small packages. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 5 January Thornbury & South Gloucestershire Amateur Radio Club is having a surplus equipment sale. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 5 January Trowbridge & District Amateur Radio Club is having a natter night and a committee meeting. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 6 January South Bristol Amateur Radio Club is having a display of club archives by Muriel, G4YZR. Contact Len, G4RZY, on 01275 834 282.

On Thursday 6 January Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750.

On Thursday 6 January Yeovil Amateur Radio Club is having a photo quiz with M0WOB. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 7 January Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Sunday 9 January Aberystwyth & District Amateur Radio Society is having a junk or pre-owned sale. Details and space bookings from Ray, GW7AGG, on 01970 611853.

On Monday 20 December Dragon Amateur Radio Club is having its Christmas social evening. More information from Stewart Rolfe, GW0ETF, on 07833

620733.

On Thursday 30 December Aberystwyth & District Amateur Radio Society is having a night on the air with David, 2W0EDW, on 145.500 and then 145.550. Details from Ray, GW7AGG, on 01970 611853.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 26 DECEMBER 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB. (Other news readers change as applicable).

In the news today:

SARL COURSES

NEW LF AMATEUR RADIO BAND MAY BE REQUESTED AT WRC 2012

HABEX CHALKS UP ITS FIRST MAJOR SUCCESS

IS THERE A TECHNOLOGY LESSON FOR AMATEUR RADIO IN DSTV MOBILE?

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SARL COURSES

Details of the first course to be present in 2011 are now available on the web. Visit www.sarl.org.za for details of the PIC Programming course which will be held at the SARL National Amateur Radio Centre on Saturday 29 January. The course is open to anyone who wishes to learn more about PIC programming. SARL members can book for the course at a discounted fee.

NEW LF AMATEUR RADIO BAND MAY BE REQUESTED AT WRC 2012

Newsline reports that ITU Region 3 will likely back a proposal to create a new, low frequency amateur radio allocation near 500 kilohertz.

The Asia Pacific Telecommunity or APT is currently hosting a gathering of the regions' telecommunications administrations. This is one of a series of meetings intended to develop common positions for all of Region 3 prior to the World Radiocommunication Conference to be held in

Geneva in early 2012.

Of particular interest to the amateur community is Agenda Item 1.23. It seeks an allocation of about 15 kHz in parts of the band 415 from 525,6 kHz to the amateur service on a secondary basis.

The International Amateur Radio Union Region 3 has representatives as observers at these preparatory meetings. While this particular meeting is not expected to adopt final positions, it is an important step in the process leading to any decisions that will be finalised at WRC 2012 in relation to any new Low Frequency Amateur Service band.

HABEX CHALKS UP ITS FIRST MAJOR SUCCESS

The main HABEX payload flew in excess of 33 000 metres before returning to the ground. The parrot repeater was the highlight of the day with many radio amateurs making contact from as far afield as Harrismith and Victoria West.

The balloon was launched at 07:10 and initially headed in a general southerly direction turning SE. Just south west of Koppies, at about 18 000 metres, the balloon turned completely ,heading in a direct westerly direction towards Bothaville. It was at this point that the balloon burst.

Recovery teams who were chasing the balloon descended on the area and started the search. Approximately an hour later the payload was found in a farmer's field. Unfortunately the second balloon carrying a simple controller board and ancillary equipment failed. The project was a further learning curve for the team who will build on the knowledge gained for further launches.

IS THERE A TECHNOLOGY LESSON FOR AMATEUR RADIO IN DSTV MOBILE?

Multichoice has done a great job in picking the right technology to deliver a good signal over a wide geographical area for its mobile service. Is there a lessons in it for Amateur Radio?

DStv Mobile deployed a network of synchronized transmitter stations all radiating identical signals on the same frequency. In a single frequency network (SFN) the receiver receives signals from the various transmitters located at high sites in the coverage area. Under normal circumstances these signals would interfere with each other as they arrive at different times at the receiver because of propagation path delays.

By utilising clocked transmissions and Time- and Frequency Synchronization as well as the provision of a Guard Interval, signals that arrive within the guard interval are considered as constructive and add to the received signal strength. Signals outside the guard interval are discarded.

It can be likened to diversity reception used with shortwave services. Receive antennas were spaced a short distance apart to reduce fading

and to ensure a better reception. The diversity principal was used at the Olifantsfontein radio station that in the early days provided telephony with overseas long before satellites and submarine cables were reality.

How about looking at it as an Innovation project? See www.amateurradio.org.za for competition details.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The Earth-side of the sun has been spotless for six consecutive days. Old Region 1 132 is expected to rotate back on the visible disk soon. The effective sunspot number is expected to be less than 15 for the coming week.

15 m will provide the best opportunities for DX followed by 20 m. Conditions to India will be good from the afternoon till after sunset. During the afternoons conditions will be fair towards Europa on 15 m, later to be followed by fair 20 m openings. Early evening 15 m contacts with the USA are possible. Contacts with Australia are possible on 20 m during the late afternoons. 15 m openings to Brazil and South America are possible during the afternoons. With the good 15 and 20 m openings 17 m will also be full of surprises.

For the CW and digital enthusiasts 30 m may be very rewarding with openings to many parts of the world.

Locally is 40 m the work horse for contacts around the country with 20 and 30 m also being very useful for contacts over the longer distances. 80 m will be best during the early mornings and late afternoons as well as over the shorter distances.

80 m is the frequency of choice during the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

31 December - Closing date for submission of logs for the PEARS HF QSO Party to contest@pears.ham-radio-op.net; 31 December - Closing date for submission of details for membership of the SA AMSAT satelliet team to saamsat@intekom.co.za; 20 January 2011 - Closing date for submission for application for the May 2011 RAE bursaries; visit www.amateurradio.org.za for application forms; 20 January - Closing date for submission of proposals and synopsis of papers for 2011 SA AMSAT Space Symposium to saamsat@intekom.co.za; 30 January 2011 - Closing date for phase 1 of the construction competition.

SARL News invites clubs and individuals to submit terms of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 560 kHz. There is also a podcast by ZS6RO. For a web stream and Echolink by ZS6FCS, visit www.sarl.org.za , click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 22:05 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

/EX

1162. IRTS Radio News Bulletin, Sunday 26th December 2010

Newsgroup: rec.radio.amateur.misc

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 26th December 2010

IRTS 80M Counties Contest

The 80m Counties Contest this year will be held on Monday the 3rd, the Bank Holiday. Rules in Echo Ireland and on the IRTS web site.

7P8CC

Gerry Gervin EI8CC, former Hon. Secretary of the IRTS and new Irish ambassador to Lesotho will soon be QRV on CW & SSB as 7P8CC. The final items of Gerry's equipment have been shipped to Lesotho, so expect to hear him on the air soon.

A9 QSL Bureau

It should be noted that in so far as the A9 bureau is concerned, it appears only to handle incoming cards. There are no outgoing A9 bureau facilities.

Therefore outgoing bureau cards rely on an A9 licensee having outgoing bureau facilities elsewhere, perhaps via a QSL manager, this update was kindly provides from Dave EI3IO A92IO

Icelandic Allocations

The national association of Icelandic Radio Amateurs is pleased to announce that as of December 13, 2010 continued access for Icelandic licensees has been secured on the 500 kHz, 5 MHz and 70 MHz bands.

THE 4 METER ALLOCATION. Frequency span: 70.000-70.200 MHz. Access is granted on secondary basis. Maximum bandwidth is 16 kHz and power limit is 100W.

THE 60 METER ALLOCATION. Frequency span: 5.260-5.410 MHz. Access is granted on secondary basis. Permissible modes are J3E (USB) and A1A and maximum bandwidth is 3 kHz. Power limit is 100W.

THE 600 METER ALLOCATION. Frequency span: 493-510 kHz. Access is granted on secondary basis. Permissible mode: A1A. Power limit is 100W.

HOPE-OSCAR 68 HO-68 celebrates first birthday

This week AMSAT China noted the first anniversary of the amateur radio satellite XW-1, also known as Hope-Oscar 68 HO-68.

SO-67 FM Amateur Radio transponder suspended

There are reports that the South African FM Amateur Radio transponder on the Sumbandila Satellite SO-67 is being temporarily suspended due to a probable radiation event.

It is planned to try to have the Transponder reset sometime in January.

DX News

DK1CE is due to be active from Namibia using the call V5/DK1CE from now until 6th January. Look for him on 160m- 10m CW only. QSLs go via his home call.

During the period 6th to 10th January WW3S will be in Bermuda and will appear on the HF bands as VP9/WW3S from VP9GE's QTH. QSL via Logbook of the World or to his callbook address.

Also taking a holiday in early January is K8PGJ who is heading to the Cayman Islands for a bit of scuba diving. When not in the water he will sign ZF2PG. He should be QRV till 9th January. QSLs via the home call.

JK1FNL will show up from the Maldives with the call 8Q7FF from 4th to 9th January.

XE1/DJ4EL will be on the air from Mexico from now until 9th January when he travels to Belize and during the following few weeks hopes to active four IOTA islands there as V31ME.

This week in History

1741 Astronomer Anders Celcius introduces Centigrade temperature scale

1947 Transistor invented at Bell Telephone Labs. USA.

The IRTS Radio Newsteam would like to wish all SWL's and Radio Amateurs a Merry Christmas and Happy New Year.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jessi, daughter Katie and her husband Kevin), and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy New Year". Thanks to the many individuals who have provided DX information over the past year. Without them there would not be an OPDX Bulletin. Also, thanks to the individuals who sent holiday wishes to my family and me.....
73 and Have a Great/Safe/Healthy New Year de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 19th-December, through Sunday, 26th-December there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VK9W, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZD9, ZF,

ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (AF-049). Slavo, SP2JMB, will once again be active as 3B8SC from here between February 8-17th. Activity will be on all HF bands using CW. QSL via his home callsign. View photos of Slavo's past trip and operations at: http://sp2jmb.pl/index.php?page=prawy&LANG=g

3D2, FIJI. Operators Juha/OH1LEG, Kari/OH3RB and Tuomo/OH8KXK are now active as 3D2RB until they leave on January 4th. Current activity is from Nadi on Denarau Island (Westin Resort) in the Viti Levu and Vanua Levu Island Group (OC-016). They will on Denarau Island through December 27th, before they move elsewhere in Fiji. Activity will be on 40/30/20 meters using CW and SSB. QSL via OH3RB.

3D2, FIJI (Update). Operators Eddie/VK4AN, Kenneth/OZ1IKY and possibly others are planning a big operation as 3D2A to the Fijis between March 15th and April 2nd in 2011. They are currently looking for experienced DXers to join them during this operation. They state that their activities will be from Nadi in a "3-story 2-br luxury a/c apartment with roof top antennas including a full-size 160m Inverted Vee or delta-loop, Spiderbeam, DX-88 and other antennas!" Activity will be on all bands (160-6m) and modes but with a concentrating on the lower bands. Operations will include participation in the BARTG RTTY and CQ WPX SSB DX Contests. If you would like to join their team, contact Eddie, VK4AN, at:
vk4an@wia.org.au
Also, via SKYPE at < ewdeyoung >. More details are available at their "Pacific DXers" Wweb page at: http://pacific-dxers.com
ADDED NOTE: Eddie, VK4AN, is also planning activity from Naura (C2) in mid-to-late 2011 and is looking for experienced DXers to join them for a 2 week operation.

8Q, MALDIVES. Torsten, DC9TH, is now active as 8Q7TH from Baa Atoll (AS-013 - part of the southern Maalhosmadulu Atoll) and he informs OPDX that he will stay until Janaury 4th. Activity will be mainly 20 meters SSB, possibly other bands if open. QSL via his home callsign.

9M6, EAST MALAYSIA. David, VO1AU, will be active as 9M6/VO1AU between March 2-15th. His activity will include the Commonwealth [BERU] and the ARRL DX SSB Contest (March 5-6th) as a Single-Op/All-Band/High-Power entry. QSL via VO1MX. ADDED NOTE: David will be active in the southeast Asia area over the next 2 years. The QSL routes will be all the same, so look for activity from China (VO1AU/BY1TTY, VO1AU/BY1RX and VO1AU/BY1DX), Japan (JG1RSL) and Hong Kong (VR2/VO1AU).

9Q, DEM. REPUBLIC OF CONGO. Barney, ZS6TQ (es-ZS4U), is now active as 9Q0HQ/6 until January 11th, 2011. Activity will be mainly on the weekends and some days during the week after 1800z. Operations will be on 40/20/15/10/6 meters using CW, SSB and PSK31. QSL via K3IRV.

A3, TONGA (Wrap-up). Dave, W6ZL/A35KL, informs OPDX that he was going QRT from Tongatapu Island (OC-049) on December 24th. He also informed us that his activity from Foa Island (OC-169) netted over 2000 CW contacts during his 4 day operation on, 40, 30, 20, and 17 meters. He states, "Great openings to EU on 30m. I managed 20 RTTY contacts during the OK DX contest." QSL LoTW or direct to W6ZL, with a SASE or new style IRC.

AFRICAN TOUR (Western). Peter, HA3AUI, is once again heading to Western Africa in early 2011. Look for him to be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau between February 1st and March 31st (tentative dates). Peter has used these callsigns before. His stays in Cabrousse, Senegal (6W) will be very near to the border of Varela, Guinea-Bissau (J5), and he plans to make regular trips to J5-land for the beautiful beaches there (plans to also operate from there). Using his Elecraft K3 with 500w into a 5-Band Spiderbeam and verticals, Peter's activity will be on 160-10 meters, mainly on CW and the Digital modes, but he will use the other modes on request. QSL direct via HA3AUI. Visit his Web site at: http://cqafrica.net

AFRICAN TOUR (6W, J5 and IOTAs). Laci, HA0NAR, will once again be heading to western Africa in early 2011, and plans to be there throughout February. He plans to visit and activate Senegal (6W) and Guinea-Bissau (J5) between February 5-26th. Specific dates were not mentioned, but the callsigns are as follows: Senegal (6W) - Callsign 6W/HA0NAR
Guinea-Bissau (J5) - Callsign J5NAR
Laci is also planning to activate the following IOTA groups:
AF-078 - Senegal South Group
AF-093 - Guinea-Bissau Coastal Region Group
His activity will be focused on the lower bands (160/80/40/30m), especially 160 meters from Guinea-Bissau. Look for more details to be forthcoming.

DAYTON TOP-BAND DINNER. The 22nd annual Dayton TopBand Dinner is slated for Friday night, May 20th, 2011. This year the TopBand dinner will be held at: Crowne Plaza <http://www.cpdayton.com>, 33 East 5th Street, Dayton, Ohio 45402. TopBand Social hour starts at 6:15 PM - dinner serving at 7:30 PM. The TopBand Dinner program details and menu selections will be announced in late January on: http://topbanddinner.com
Tickets will be available starting in February. Look for updated details about this annual TopBand dinner event in Dayton, Ohio, to be posted on the Web site.

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports: "For years, the DXCC card checker lookup page was available by means of a static lookup list by Division, Section then non-USA. This page has been removed and replaced with simple lookup (search) link on the DXCC web Site called:
DXCC Card Checker Search
(direct link to http://www.arrl.org/dxcc-card-checker-search)
To find your local checker open this link and for USA click State,
for non-USA click Country.
For USA only, you can narrow your search within your state to Zip Code and distance from your zip code by noting this information in the boxes shown.

Also, as a reminder, DXCC card checkers are authorized to verify applications for these programs:
* Worked All States (WAS)
* VHF/UHF Century Club (VUCC)
* Worked All Continents (WAC)
For non-USA, under the IARU General Certification Rules (GCR) any approved Awards Manager for a local IARU member society can also verify applications for these 3 programs.
DXCC is NOT included in the GCR and can only be checked by approved DXCC card checkers.
All applicants are eligible to use approved DXCC card checkers. For non-USA, you do not need to be a member of your local IARU member society to utilize your local checker. For USA and possessions ARRL membership is required to participate in ARRL Awards Programs. ARRL membership is not required for non-USA hams to participate."
Please send questions to dxcc@arrl.org

FG, GUADELOUPE. Jean-Pierre, F6ITD, will be active as FG/F6ITD from Guadeloupe and two islands between March 9-16th (2011). Activity will be on SSB and the Digital modes. He plans to visit the following two islands in the IOTA NA-102 group: La Desirade Island (March 9-16th) and Basse Terre Island (March 16-31st). QSL via his home callsign, by the Bureau or direct.

HG200, HUNGARY (Special Event). A group of Hungarian radio amateurs from J�noshalma will use the special callsign HG200LST between January 1st and December 31st (2011). Activity is to celebrate the 200th anniversary of the birth of genius composer, virtuoso pianist and piano teacher Liszt Ferenc (Franz Liszt) (1811-1886). QSL via HA5GY.

INDEXA PRESS RELEASE. "Recently the International DX Association, INDEXA, announced to the CQ DX Hall of Fame members that complimentary membership was being extended to all of the members. The CQ DX Hall of Fame members have all contributed in different and unique ways to the DXing community. The INDEXA officers thought this would be a way of extending thanks and acknowledging these DXers for their contribution to the world of DXing. INDEXA provides financial support for DXpeditions to the rare and semi-rare DXCC entities. Information about INDEXA can be found on their web at: http://www.indexa.org
73s, K4MQG, K8YC, W4UNP, K4UEE, W4NL, N4AA, W9RG, DJ9ZB and JA3USA"

IOTA NEWS.....
EU-048. Members of the Club Radio Amteurs de Lanester will be active as F6KPQ/P from Belle ile en Mer (DIFM AT-15, WLOTA L-078) for the next RSGB IOTA Contest at the end of July. Activity will be on 80-10 meters using CW and SSB. Operators mentioned are Michel/F1SRC, Jean-Yves/F4EHM, Mickael/F4FFZ, Gwena/F4FHZ, Chris/F5CBQ and Jean-Francois/F6DZD. Visit the club's Web page at: http://f6kpq.ref-union.org

OC-244. Operators Christian/EA3NT and Bjorn/SM0MDG will be active as
DU1/homecall from Tablas Island between January 17-21st. This
activity is after their participation in the DX0DX Dxpedition
to the Spratly Islands. Activity will be on 40/20/17 meters
using CW and SSB. QSL both callsigns via EA3NT.

KH6BZF PROPAGATION FORECAST/REPORT (For December 27-January 1st)....
Dec 27 AN SOLAR REFERENCE KEYS
Dec 28 AN --------------------
Dec 29 AN BN - Below Normal
Dec 30 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 31 AN LN - Low Normal
Jan 1 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jan 2 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH0, MARIANA ISLANDS. Kan, JE1SCF, will be active as KU2F/KH0 between
December 29th and January 1st, 2011. Activity will be holiday style
on 40-10 meters using CW and SSB. QSL via the address on QRZ.com.

KH9, WAKE ISLAND. Bruce, AC4G, states that he will operate from Wake Island
as AC4G/KH9 sometime in 2011 as his work permits.

LOTW NEWS. The ARRL Web page reports that the ARRL's Logbook of the World
(LoTW), an online system for amateurs to confirm two-way contacts that
can be used for various ARRL awards is once again accepting DXCC and
WAS applications. The system had been down earlier this week while under-
going testing before adding capabilities to apply for awards based on
Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award.
Testing for the addition of these functions is still ongoing.

PS150, BRAZIL (Special Event). Look for special event station PS150PLM
to be on the air between January 1-30th (2011). Activity is to celebrate
the 150th anniversary/birthday of the Brazilian scientist, inventor and
radio pioneer, Roberto Landell de Moura. Operations will be on 40/20/15/10
meters SSB and eventually CW. QSL via PS7AB, direct or by the Bureau.
All QSOs will be confirmed automatically via Bureau. For more details,
see QRZ.com.

5V7TT QSL STATUS. Silvano, I2YSB, informs OPDX that the last batch of direct and "Web Request" QSLs were processed this past week. The QSL situation can be check here:

http://www.i2ysb.com/joomla5/index.php?option=com_wrapper&view=wrapper&Itemid=9
All QSLs received from now on will be processed on the same day.

OX/N0RC QSL STATUS. Reid, N0RC, reports, "I'm finally getting around to getting all the QSL requests from OX/N0RC sent out. Sorry for the delay....73"

QSL BUREAU NEWS. The ARRL Web page reports that with the increase in sunspots, individuals are working more DX which means the ARRL's Membership and Volunteer Programs Department -- especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus -- are working in high gear. The League states, "Compared to 2009, 2010 saw a dramatic increase in the number of cards we received from ARRL members that were sent to foreign QSL Bureaus, as well as the number of cards we sent out to the Bureaus," said DXCC Manager Bill Moore, NC1L. "In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased." Through December 14, 2010, the ARRL Outgoing QSL Bureau received 709,800 cards destined for foreign QSL bureaus from ARRL members in the US. This represents an increase of 16 percent over the 2009 number of about 612,000 cards. In 2009, the ARRL shipped 673,500 cards -- or close to 4500 pounds of cards -- to foreign bureaus. "We have processed nearly 660,000 cards in 2010, and the year isn't even over yet," said MVP Administrative Manager Sharon Taratula. "I would not be surprised if we surpassed 750,000 cards by the end of the year.=
As the number of QSL cards has increased, so have the number of DXCC applications. In 2009, the DXCC Desk processed 7134 applications for initial awards and endorsements; these 2009 applications included almost 762,500 QSOs. So far in 2010, the DXCC Desk has processed 6895 applications, containing almost 860,000 QSOs, for an increase of 13 percent over 2009. "With all of the year's applications not yet fully processed, we've seen the number of QSOs increase in 2010 over 2009, even though the number of applications is a tad lower," Moore said. "Come the end of the year, I expect the 2010 application total to surpass the 2009 number." For more info on how to use the ARRL's Bureau systems (IN/OUT),

see the following Web pages:
Incoming QSL Bureau: http://www.arrl.org/incoming-qsl-service
Outgoing QSL Bureau: http://www.arrl.org/outgoing-qsl-service

S79K QSL STATUS. Dave, G3NKC, reports that he has received around 400 direct QSL requests for S79K. However, he mentions that the cards printed by the printer are apparently lost in the mail and that another lot are now being prepared. All labels are printed and ready to go as soon as he receives the cards.

Richard "Joey", W5TFW, reported this past week that he received a HUGE box of QSL cards, envelopes and OLD logs for V44KAI (that the OLD QSL Manager has never answered). He states, "It will take me a YEAR to sort all this out!" BE PATIENT!

ZL8X QSL/LOTW STATUS. Chris, DL1MGB, from the ZL8X DXpedition team, reports in a press release: "We already started with the design of the QSL cards. Stan, SQ8X, again volunteered to turn our mass of pictures into a colorful QSL card. For those who didn't get the message: We will upload our log to LoTW. All donors who are donating until December 30th, 2010, will receive their LoTW credit this year (still depending if we get the certificate from ARRL). All others in the course of the next year." For the complete press release, please go: http://www.kermadec.de

QSLS VIA LoTW: 9G5XA, A45WD, C6AUM, CW5W, DL4UL, E4X, EA3JW, ER5DX, EW1DO, GI4EBS, KH6MB, LU3JVO, LY1000X, LY2OX, LY6A, N2MM, P40W, RZ6HWA, S57YX, TM0R, UA3DPM, VA3MO, VA7ST and VP2E/K1XM

QSLS RECEIVED VIA MAIL: AO1DX/5, E51NOU, LU1ZA, LZ1ANA, OG5A, PJ2/DF7ZS, PJ2/K2TQC, PJ2/K8LEE, PJ2/W1NG, PJ2/WI9WI, PJ2A, PJ4A, PJ4B, PJ4D, PJ4LS, PJ5/AA4NC, PJ5/AH6HY, PJ5/K1XM, PJ5/SP6EQZ, PJ5/SP6IXF, PJ6A, PJ7E, PX8J, TM5KD, VE8EV/p, VP2ETN, XU7TZG and YK1BA

QSLS RECEIVED VIA THE BUREAU: H40FN, P29VCX and PJ5/K1XM

UP2011, KAZAKHSTAN (Special Event). Members of the Almaty Amateur Radio League (ARL) is organizing the activation of special event stations that include UN2011G and 8 stations with UP2011 prefix (see list below) during the 7th Asian Winter Games between January 30th and February 6th. The suffix of UP2011 stations will imply the abbreviation of the 8 winter types of sports to be featured during the Games in Almaty and Astana. Some 30 Asian countries are expected to compete in the Games which includes competitions in 11 different sports for 65 sets of medals. Look for the following stations to be active on all HF bands including 30/17/12m using CW, SSB and the Digital modes:
UN2011G (Game) - ARL club station (regular callsign UN0GL)
UP2011AS (alpine skiing) - regular callsign UN8GU, op. Andy
UP2011BN (biathlon) - regular callsign UN7QCC, op. Victor
UP2011CS (cross-country skiing) - regular callsign UN6GAE, op. Alexander
UP2011FG (freestyle skiing) - regular callsign UN8GZ, op. Vitaliy
UP2011HB (Russian hockey, bandy) - regular callsign UN6GT, op. Valeriy

UP2011IH (ice hockey) - regular callsign UN2G, op. Evgeniy
UP2011SJ (ski jumping) - regular callsign UN6QC, op. Arthur
UP2011SO (ski orienteering) - regular callsign UN8GC, op. Michael

QSL via regular callsigns (direct or by the Bureau). A special award
("Medeo - 2011") is available for those who manage QSOs with these special
stations. For more information, see: http://www.un-dx.ucoz.com (ENG)

VQ9, CHAGOS ISLANDS. Larry, VQ9LA, informed OPDX a few weeks ago that he
will depart the British Indian Ocean Territory (BIOT), Diego Garcia
(AF-006), on January 24th. He reports this week that he operated on
80 meters RTTY and it worked very well. Larry will again operate on
80 meters RTTY starting at 1900z, December 27th through 1000z, December
28th. Listen for him on 3586 kHz listening up 1-3 kHz. He also mentions
that he "MAY" operate on 40-15 meters RTTY (whatever band is open) between
1400-1900z on December 27th. He recommends to watch the Cluster spots.
All logs will be updated to LoTW, direct/Bureau QSL cards via N0QM will
also be fine. Remember Larry will be living in both the Philippines and
the USA part of the year after he departs VQ9-land (see OPDX.988).

WIANEWS FOR WEEK COMMENCING JAN 02 2011.

We look back at 2010 the WIA Centenary!

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JANUARY 2 2011.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Hi this is Graham VK3BB. Today the 2nd of January 2011 we look back, reflect
upon, and close the 12 month celebration of the Centenary of the Wireless
Institute of Australia.

It all started back on the 11 March, 1910 where a meeting took place between
like-minded radio enthusiasts at the Hotel Australia Martin Place Sydney.
There a group was formed known as the Institute of Wireless Telegraphy of
Australia. Not long afterwards a similar group formed in Melbourne known as
the Amateur Wireless Society of Victoria, then fairly quickly, similar
organisations formed in each Australian state, and in time these state groups
became divisions of federated organisations known as the Wireless Institute of
Australia.

More recently the National Wireless Institute of Australia was formed, a single national body representing the interests of all Australian Amateurs.

So from the year 1910 fast forward 100 years to 2010 our Centenary ... one hundred years of Amateur Radio in Australia, one hundred years of experimentation in the hobby and one hundred years of the WIA doing what it does best, protecting and supporting the interests of we radio amateurs.

The formal planning for the twelve month Centenary celebrations commenced twenty six months ago with the formation of a WIA Centenary Committee. Led by David Wardlaw VK3ADW as Chairman it was a group of four, members included Peter Wolfenden VK3RV heading up the history and archive research project, Jim Linton VK3PC as Centenary Media Officer managing the many Media and Publicity aspects of the Centenary and Robert Broomhead VK3DN taking care of promotional merchandise, memorabilia and the special Centenary weekend held in Canberra.

With the enormous task ahead of them the committee faced many challenges and hurdles, many were overcome, however a few ideas and suggestions put forward were simply not possible to implement. In the true spirit of the hobby many members stepped forward to assist the committee assisting and supporting the group in many practical ways. The commercial suppliers got behind the celebrations generously making available equipment, commemorative memorabilia and meeting the costs of some of the facilities offered during the Canberra weekend.

Dick Smith VK2DIK not only volunteered his services as our Centenary Patron but opened his private Flying Club museum for an unforgettable experience for those attending the Centenary weekend in Canberra. International radio societies sent representatives half way around the world to join in the special occasion.

The WIA extends a very genuine thank-you to all who have been involved in making the celebration of the WIA Centenary such an enormous success.

Centenary committee chairman David Wardlaw VK3ADW joins us to share some more,

David
In 2008 the President of the WIA setup a special committee to prepare for the centenary celebrations which were to take place in 2010 the 100th year of organised amateur radio in Australia. The first task was to present a plan to the directors of activities that would be appropriate. The committee was aware of what had taken place at the 75th anniversary. In addition to the planned activities the committee commissioned the design of a special logo and appropriate posters recognising the WIA's 100th anniversary, this part of the project required specialised help. After viewing a number of choices a final decision was made and I think we have a rather fine logo and posters. At this stage I must say that we were very disappointed that Australia Post did not accept our proposal for a commemorative postage stamp, although we fulfilled the required criteria. Despite best efforts, further discussions with Australia Post were unable to change the decision.

Special callsign, VK100WIA was chosen as by using the prefix VK rather than one of our alternatives it clearly indicated it was a very special event for

Australian amateurs that 100th anniversary of the WIA. The VK100WIA callsign was allowed to be used by nominated clubs over a 6 month period the clubs were issued with special publicity packs and made good use of them.
After consultation with the Canberra amateur radio club it was decided to combine the special celebrations with the WIA AGM in Canberra. Another bonus was that the IARU region 3 was able to schedule their annual directors meeting to coincide with the celebrations enabling there to be a significant international presence at our celebrations.

It was very pleasing to have been involved with the Centenary of the WIA an organisation I have been a member of for over 60 years, the activities were well supported and very successful in introducing amateur radio to members of the public.

Sincere thanks to all those, who helped in the activities throughout the year.

Graham
An enormous amount of time and effort was invested researching the history of the WIA, Peter Wolfenden VK3RV joins us with more on the work of the research team.

Peter Wolfenden
The 100th Anniversary celebrations focused our minds on the history of amateur radio in this country.

Personally, I had an enjoyable if not demanding time in seeking out the relevant historical material. This culminated in the articles in Amateur Radio, the release of the cd: "The Sounds of Amateur Radio Volume 2" and the wonderful program of guest speakers at the Canberra Celebrations. Thank you again to all of those who contributed so very much to this memorable event.

However, I wish to share with you a few other on-going activities which came about because of the 100th Anniversary Celebrations.

The process of sorting the many uncatalogued documents held by the institute culminated in the establishment of an archive at the national office in Melbourne. The directors allocated a room in which the shelves are now slowly filling with sorted documents.

A few years ago, Will VK6UU scanned Amateur Radio Magazine from the 1933 to 1939 issues. We now have a similar project underway and that is the scanning of all call sign listings and call books from 1912 onwards. Ian, VK3IFM has spent many hours doing much of this "hack work". This has already paid dividends for the institute which is now, from searchable pdf files, able to relatively easily answer enquiries - usually from family historians, about early licensed amateurs.

The response to the "Call for Historical Articles" in AR resulted in many submissions some of which have already been published, other very interesting and significant articles will follow. All material will be indexed and added to our archive for use by future researchers.

We can all be part of the on-going 100th Anniversary Celebrations of organised Amateur Radio in Australia, by contributing historical material to the WIA Archive - a true legacy of our 100th year!

Graham
The release of the commemorative WIA Centenary Poster, sale of Centenary memorabilia and merchandise were perhaps one of the first visible signs the Centenary celebrations were being launched. When it comes to describing sale of merchandise the word popular is perhaps an understatement with sales far outstripping original expectations. Joining us is WIA manager Mal Brooks VK3FDSL.

Mal Brooks
For those who may have missed it, we have a range of clothing, caps, hats and badges all featuring the special WIA centenary logo. Last year we sold in excess of 200 caps and hats, 120 vests and jackets and 230 shirts. We've also distributed hundreds of pins and posters, largely through the amateur radio club network. There's not much left on the shelves, but we will be placing one more order with our suppliers upon our return in January. So, if you thought you'd missed out - here is one last chance to login to the online shop and make your purchases.

Thank you for your support and best wishes for 2011.

Graham
During the course of the year the amateur bands were truly alive with the sounds of "this is VK100WIA calling CQ" yes our centenary call sign gracing the airwaves with the help of many WIA affiliated clubs airing the callsign over fifty seven three day time slots. People who had made contact with VK100WIA were often heard chasing further contacts in order to become eligible for the limited issue Centenary award. WIA Secretary Geoff Atkinson joins us with more.

Geoff Atkinson
Good Morning and Happy New Year.
This is Geoff Atkinson VK3AFA joining in this Centenary review broadcast, with a report on the Centenary QSL cards and Centenary Awards. From May to October 2010 VK100WIA was on air operated by 50 Clubs around Australia.
The online log recorded 24,460 contacts during this time. Over 100 countries made contact with VK100WIA and enquiries are being made for a DXCC award.

The Centenary Award has also proved popular with over 380 certificates having been awarded to date. Award applications close on the 31st January 2011. Some technical difficulties have delayed the printing of the VK100WIA QSL cards, however these matters are now being resolved and we expect cards to be distributed to State and overseas bureaus in the very near future. The Centenary callsign program has been a very successful activity, resulting in the reactivation of many AR stations.

Graham
The hive of activity both on and off air provided an enormous amount of enthusiasm amongst members as well as many media opportunities to talk about and promote our hobby to the public, Centenary Media Officer Jim Linton VK3PC

joins us with his thoughts...

Jim Linton
Undoubtedly the level of media coverage achieved right across Australia is something we have not seen happen before, and hopefully that exercise in promoting the WIA Centenary will have a long lasting influence on the way radio clubs think about promoting themselves and amateur radio in the future.

Rather than just celebrating the Centenary, and that was enjoyable, then opportunity to use it as a promotional vehicle for amateur radio was one not to be missed.

The WIA affiliated clubs on the VK100WIA roster, actually began demanding help and support in terms of how to deal with their local news media. At a very early stage in planning the WIA Centenary Committee identified as a priority that a Media Kit should be made available to all clubs on the roster. The WIA National Office posted out the kit at least a month before their rostered slots, and these were followed up with emails. The comprehensive kit included a template media release, background sheets on amateur radio and the WIA, plus a how-to guide for clubs. It was very pleasing to see the media release adapted with club information appear in so many newspapers and result in radio and television interviews.

If you have not already done so, please check out the VK100WIA Club & Media Feedback section on the WIA website. A media file is to be included in the WIA historical archive on the Centenary activities. Often on request a special media release was written for a few clubs, but in the main they felt comfortable doing it themselves with the media kit. Those clubs have done it for the Centenary, and there is no reason why they can't do it again in the future.

Some clubs also did it for the National Field Day - Tune-In To The World, amateur radio gets people talking - public relations exercise.

Again for many it focussed their attention on the image portrayed by amateur radio to the public. Clubs are now thinking about the need to have knowledgeable, friendly and well groomed ambassadors, if possible across a wide demographic and both genders, to give a first positive impression.

More thought is being given on what to say to someone who visits a display. Gone should be the days when visitors would be greeted with jargon such as 'we're using sideband on HF 7megs and working a ZL at the moment and he's 59'. And perhaps worst still is to use amateur radio lingo during a media interview.

On this the very first broadcast for 2011, I would suggest that all radio clubs and groups make a New Year's resolution to think seriously about, and take action on promotion. It should be a core, planned activity of any club.

A very Happy New Year to all, I'm Jim Linton VK3PC, the WIA Centenary Media Officer.

Graham
As Jim mentioned, a number of radio and TV interviews took place these as a result of clubs making well prepared approaches to the media

-INSERT RADIO INTERVIEW MONTAGE-

The Centenary weekend held in Canberra was by no doubt a real highlight of the centenary celebrations , here now a few thoughts and reflections from Robert Broomhead VK3DN who put together the weekend program.

Robert
Thanks Graham, Canberra .. Wow ! I made my first trip to Canberra back in August 2009 to start the planning mission for the Centenary weekend, there were so many Hotels to check out, many venues, many prices many options. But ...I had a pretty strange looking shopping list, as I wanted a dedicated 24/7 radio room to operate an amateur radio station, a suitable hotel roof to mount antennas, must have suitable access with permission to mount an array of antennas on the roof.

I did get some strange looks!!

It has been a tradition with the WIA AGM weekends over past years that they include one or more activities of particular interest to radio amateurs, so I was clearly on a mission to seek out and find something interesting. So you can imagine how excited I was once I discovered that the Telstra Black mountain communications tower was celebrating it's anniversary in the same month the WIA was to be celebrating it's Centenary.

The arrangements for access and the technical tours was not quite straight forward as people may imagine, but always up for a challenge, after a number of meetings with Telstra representatives and much correspondence with the property managers I had the arrangements in place.

The historical presentation program held during the Saturday afternoon at the Rydges Hotel were something that I had asked Peter Wolfenden to help with the arrangements and I must say he did a first rate job. The Centenary dinner and the Ariss contact went off without a hitch ! Thank goodness !! I cant tell you how much preparation Tony Hutchison and I had done double and triple checking everything was in place and working before the event, this was one very special contact that went off without a hitch. Many thanks to Tony Hutchison, to Carl and his Students for participating in the contact and helping make it such a memorable evening. And of course to our Centenary Patron Dick Smith VK2DIK, a wonderful and generous person. Thank you so much Dick for your time and talk during the Saturday evening dinner and for opening your flying club to us on the Sunday.

Well almost everything during the Canberra weekend went to plan, I say almost because the one thing we did a bit differently and was to run the live VK1WIA news broadcast from the radio room at the Rydges Hotel instead of at the park, it was probably even more fun being crammed into the little room swapping seats for the microphone, I think both presenters and listeners got a real kick out of it !

Happy new year to all this is Robert VK3DN

AROUND VK

VK4 - QNEWS

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

A few years ago, many VK amateurs had reason to sleep in. It was the morning after the night before. The HF bands were filled to overflowing with those of us making our first contacts on the short wave bands. The doomsayers were sure that the apocalypse was upon us with the removal of compulsory morse code. Since that morning, it seems more people have a genuine rather than a mandated interest in CW and the world still hasn't ended.

It seemed to be a paradox that the historic operational mode of the hobby has been resurrected in the frontier land of the digital world. In a similar way, it seems to me, that more people are pursuing an interest in more efficient methods of producing AM. Have a look at the modulation methods being used with power fets. There are those who are pursuing hifi ssb signals. The once ubiquitous crystal set may yet find favour as a teaching aid just because of this renewing interest in supposedly lost arts.

Whatever finds favour in your shack, we can rest assured that 2011 will continue to mix the modern with the historical in the amateur radio world. For those who lament the demise of home brew, it is the simplicity, low parts count of projects based around cw and AM that make projects attractive. We don't have to be QRO or QRP operators to indulge in building some suitable gear.

For the Foundation call, what is a crystal set but a field strength meter with headphones. A learning tool and a test instrument in one package.

Lets' all join in the fun in 2011 and remember, Amateur Radio: The first technology-based social network"

I'm Geoff Emery and that's what I think....how about you?

CLUBBING -

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe Amateur Radio club.

I know it is a little late but the Redcliffe club wishes a happy, healthy and hearty happy new year to all amateurs and short wave listeners for 2011.

During the Christmas break it was good to catch up with John, VK4BZ, who was on leave from his chaplain duties with the Army in Townsville. John advised that later in the year he will be deployed to Afghanistan for about 8 months and hopes to be the first Australian military amateur to work out of the country. This will depend of course on the military situation and the gaining of permission from higher headquarters, to operate a station on military bases.

John is presently pounding the CW key on HF, working the 6 metre band on voice and assisting his XYL around the house while the band is quiet until he departs back to Townsville about mid-January. He will be down at the club next Monday night to catch up with members.

The next club technical talk will be on 17 January 2011 and will be presented by Peter, VK4XJP and the topic will be "test instruments in radio repairs". If you have a topic that is suitable for a technical talk please contact the club secretary, Peter, VK4TAA. This is a chance for you to discuss and to share your knowledge to others about a particular topic.

How well can you cook sausages? With the support of Wendy, VK4FWEN, the club will have an opportunity to be on the local Bunnings fund raiser list in the next 6 months. This will be a fantastic time to promote our hobby to a wide audience but also to gain welcome funds for the club. More details about this venture as they come to hand.

The fridge at the club house has been re-stocked with Chocolates & drinks as part of our fundraising efforts and for those with a sweet tooth, please support your club by purchasing these items.

The Advanced amateur radio course is now available on a CD for those wishing to study privately, for $10 payable to the Club, plus $3 if posted. Contact Peter VK4TAA if you need this CD.

Stewart, VK4TSB has advised that the car park light is up but due to the rain it has not been connected yet. This will provide extra security for members visiting the club. The first working bee for 2011 will be to replace the guttering around the roof of the club house as it has finally succumbed to the high amount of rain fall over the last few months.

Finally 2011 call books are available from the club and please see Peter,VK4EA with your $25 to purchase one. Well that is the news for this week, I am off to ZL land for a short 2 week holiday and until next time, it's 73 from Ray, VK4CF.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA, I'm Col VK4CC.

HAM RADIO ON THE PHONE:-
TWO NEW IPHONE APS FOR HAMS ON THE GO

Amateur radio enthusiasts who travel to the U-K and own an iPhone may find two new applications or apps from Mark Turner, G7LEU very useful.

First is Ham Dashboard which is designed for hams on the move or away from home.

RECORDING
Ham Dashboard shows a searchable list of
repeaters in the UK and Ireland, along with
details of input and output frequencies, a map,
and a handy bearing arrow for each system. It
also includes a basic APRS tracker that allows
your position to be sent to the APRS-IS
network.
You find this one at the iTunes store at tinyurl.com/2af5rsg.

Meantime Ham Tracker allows radio amateurs on the
move to send location updates to the Internet

side of APRS from their mobile device. Once sent, your position can be tracked using services such as aprs dot fi. Using Ham Tracker makes it easy to send an email containing an aprs dot fi tracking link for your callsign or a map link showing your current location. This one is also at the iTunes store at tinyurl.com/2c8f4uw. More details and screen shots of botg aps are on line at www.kramstuff.com

STILL WITH MOBILE PHONES, THIS IS A strange story of a self destructing cellular smart phone. Jim Meachen, ZL2BHF, has the details:

RECORDING

A north Texas man talking on his cell phone was rushed to a hospital after the display on his phone apparently exploded on Thursday morning, December 2nd. According to news reports, man said he had just finished a call when he said he heard a loud popping noise followed by blood trickling down his face.

His ear was bleeding profusely and he was transported to the emergency room at Parkland Memorial Hospital in Dallas. There he received four stitches but suffered no hearing loss.

Later on inspection it was found that the glass faceplate on the LCD display of the two day old Motorola Droid smart phone apparently shattered. The phone still appeared to be functioning and its battery was intact.

On Thursday evening, Motorola issued at statement non what had transpired. It said - and we quote: "Motorola's priority is, and always has been the safety of our customers, and all Motorola products are designed, manufactured and tested to meet or exceed international and local standards for consumer safety. We will reach out to the consumer and investigate this thoroughly."

While an self destructing L-C-D displays on a cellular phone is a rare occurrence, it is not unique. Thankfully, most such accidents happen when the phone is in charging mode rather than in use.

>From the Amateur Radio Newsline to MEDIA WATCH and "ARNY".

AARNIE - Australian Amateur Radio News & Information Exchange.

AARNIE is an online resource for Australian Amateur Radio Clubs to post their newsletters.

Few Radio Amateurs receive club newsletters from outside their immediate club SO AARNIE, an email newsgroup allows large and small clubs alike to promote their club newsletters Australia wide.

K9YA Telegraph

The Good News About Amateur Radio

It's Free, It's Fun, It's All About Ham Radio

The K9YA Telegraph is a free, monthly, general interest amateur radio publication read by hams in more than 100 countries.

The K9YA Telegraph contains the stories and features most wanted by subscribers because it is written by subscribers.

An e-Zine, it is delivered monthly to your e-mail inbox as a full-colour PDF file.

If you're in the mood for Morse, hankering for history, gluttonous for gear, ravished for a review, needing nostalgia, or just plain famished for fun, you'll find it in the K9YA Telegraph.

OFF THE GRID NEWS RECOMMENDS HAM RADIO

Ham radio is being featured in the current issue of the e-zine "Off The Grid" News.

According to an article, by David M Hill, Sr., W4DMH, he says ham radio is the only legal form of two-way radio that you can get involved in that will provide you with all levels of communication ability. He says that no other radio service can provide all of this.

This very informative article can be read by taking your web browser to tinyurl.com/hamfun

REWIND

Now rewinding we wrap up this special Centenary review with our very own WIA President Michael Owen VK3KI.

2010 was the WIA's Centenary Year.

I think it was a great year for amateur radio and the WIA.

The Centenary Convention weekend at Canberra on 28 to 30 May was a great success. Our special guests from home and overseas added to the excitement of the occasion. The ARISS contact was a highlight of the dinner on Saturday night. The historical presentations Saturday afternoon captured everyone's interest.

And Sunday, thanks to our Centenary patron, Dick Smith VK2DIK was a day that we all will remember.

And then there has been VK100WIA. Involving over 50 clubs, Heaven knows how many operators and, after 5 &#65533; months, 24,440 contacts and over 400 Centenary Awards.

All of this has been built around some memorable imagery. The Centenary poster featuring that wonderfully evocative photograph from the Waverley Amateur Radio Society has been, for me, the image of the Centenary.

But I think the real significance of this year has been much more than these events and images.

The WIA provided its affiliated clubs with a totally professional Media Kit and the result has been that we have received more favourable publicity in print, radio and TV in one year in more places than ever before.

Most importantly, I believe that 2010 has been a very friendly and constructive year. It has been a year when many of us felt proud to be a radio amateur and proud of the WIA. It has been a year that has rekindled an interest in amateur radio for a number of people.

I have felt a new pride and a new interest, and a new enthusiasm from many people 2010 was a year when very many people contribute to what was a year to remember.

(direct: dj5av@darc.de)

Editor's note: The authors of the DX Newsletter want to thank all readers
for their support during the past year. We wish all readers,
DXers and DXpeditioners all the best for the year 2011.
The DXNL team: DL7MAE, DE0MST, DL7VOA

KH0 - Northern Mariana Islands: Kan, JE1SCF, will be active as KU2F/KH0 from
the Mariana Islands 29. December through 1st January. He will operate
"holidaystyle" on 40 through 10 m SSB and CW. QSL via JE1SCF, direct
or via bureau.

PJ7 - St. Maarten: Look for Uli, PJ7/DF8KN or FS/DF8KN, 30. December 2010
through 4. January 2011 on the Island of St. Maarten on the QRP
frequencies on 20m, 15m, and perhaps 17m "holidaystyle". QSL - also via
bureau - to his home call:

RI1A - Antarctica: Alex Turkeev, RD1AV (ex-RV1ZC), now is on route to Vostok
Antarctic Station, and will stay there in 2011 as RI1ANC. He uses alle
bands on CW, SSB and digital modes. His QSL manager RN1ON confirms
direct or via bureau.

T8 - Belau: Katsumi, JS1OHI, will be on the air as T88KO January 1st and 2nd
on 40/17/15/6 m using SSB only. QSL via JS1OHI, via bureau or direct
(new IRC only, no bank-notes) to Katsumi Ochiai, 457-22 Shimoosaka,
Kawagoe City, Saitama, 350-0812 Japan.

ZF - Cayman-Island: January 2nd through 9th Pete, K8PGJ, will be on as ZF2PG
on 40, 20 and 15 m. He uses battery power and a 20 m vertical dipole.
Preferred frequencies are 14.200 and 14.250 MHz. QSL via home call.

3D2 - Fidji: Juha/OH1LEG, Kari/OH3RB, and Tuomo/OH8KXK have been active as
3D2RB from Nadi (OC-016). They will stay there until 5th January using
40, 30 and 20 m on CW and SSB. QSL via OH3RB.

8Q7 - Maldives: Nao, JK1FNL, will visit the Maldives January 4 through
9th as 8Q7FF and use 160 through 6 m on CW, SSB, and RTTY. QSL via
home call.

Torsten, DC9TH, stays on Baa Atoll (AS-013) until January 4th as 8Q7TH
using 20 m on SSB. QSL via home call.

9Q - Democratic Republic of Congo: Barney, ZS6TQ, is operating as 9Q0HQ/6
on 40, 20, 15, 10 and 6 m on SSB, CW and PSK-31. until January 11th
during weekends and some days after 1800 UTC. QSL via K3IRV, bureau ok!

Brasilia, special event: PS150PLM reminds of the 150. birth day of the
Brasilian scientist and radio pioneer Priest Landell de Moura.
Activity will be in January 2011 on 10, 15, 20 & 40 m using SSB and
some CW. QSL via PS7AB, direct or via bureau. All contacts will be
confirmed via bureau automatically.

Italy, special call: Fred/IK7JWX (SSB), Vincenzo/I7PXV (SSB and CW), and
Mike/IK7FPX (SSB), will be on the air as IO7DAI from the abbeys of the
province Lecce January 1st through March 31st. QSOs count for
"Italian Abbeys Award - Diploma Abbazie Italiane". Read more about the
award at www.aribusto.it/dai_rules.htm . Request QSL via bureau by
email from their manager IK7JWX with dates of your QSO to
ik7jwx2003@yahoo.it . Check online-logs at www.enzolog.org/login.php
------
Celebrating the 150th anniversary of the Unification of Italy three
special callsigns will be used throughout 2011 by several ARI sections
ARI Torino - II1ITA; ARI Firenze - II5ITA; ARI Roma - II0ITA.
QSOs will be confirmed automatically via bureau. Find details about
the Italian Unification Award at www.dui150.it .

Special station IA7MM will be active throughout 2011 to celebrate the
150th anniversary of the Italian Navy. QSL via IZ7AUH. Further
information at http://ia7mm.iz7auh.net .

New Zealand, special call: "Papakura Radio Club" (ZL1VK), presents the
special call ZL50VK January 1st through March 31st for its 50th
anniversary. QSL via ZL1VK, also by LoTW. Visit their homepage at
www.qsl.net/zl1vk .

The Netherlands, special call: VERON Section 54 (Etten-Leur) was founded
30 years ago. Listen to their special calls PA30ATG (QSL via PA0ATG),
PA30BR (PA1BR), PA30CPA (PA1CPA), PA30CVD (PA2CVD), PA30DD (PA9DD),
PA30EBP (PA3EBP), PA30GBI (PA3GBI), PA30JSB (PA5JSB), PA30LOU (PA0LOU),
PD30GWF (PD1GWF), PH30B (PH1B) PI30ETL (PI4ETL Clubstation, QSL via
PA1CPA) throughout 2011. Details also at http://a54.veron.nl/award .

Hungary, special call: Commemorating the 200th anniversary of the birth of
Franz Liszt, the renowned Hungarian componser and virtuoso pianist,
callsign HG200LST will be used throughout 2011. QSL via HA5GY.

QSL-Status der UA4WHX-Expeditionen:

Since three years UA4WHX distributes QSLs of his Afric tour. 90 per cent of
direct cards are done now. Vlad hopes to be through it until late 2010.
Read the complete information at
http://dx-world.net/2010/current-qsl-status-of-ua4whx-expeditions/#more-15963

Silent Keys:

Following DXers became a silent key during the last weeks: Otto W. Morroy
(PZ1AC), Vladimir V. Terent'ev (RU1AX), and Claude H. Chambers (ZL3ACC).

LINKS:
Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
Find a comfortable prediction of HF propagation at www.voacap.com . Enter
your QTH and the wanted DXCC country and the program will check for you.

UPCOMING CONTESTS
----
1. January: AGCW-DL Happy New Year Contest;
1. January: SARTG New Year RTTY Contest;
1./2. January: Original-QRP-Contest;
1.-7. January: Activity week Rheinland-Pfalz.

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:

AN-011 & AN012, QSL-Status: Larry, K1IED, is QSL manager of KC4AAA
(Amundsen-Scott Southpole Station), KC4AAC (Palmer Station on Anvers
Island, AN-012), and KC4USV (McMurdo Station on Ross Island, AN-011).
He confirms QSOs as soon as he has the logs but sometimes gets the logs
with delay or not at all. Some OPs don't log at all! In any case there
are paper logs only, sent to him many months after the QSOs. There were
no logs from KC4AAA and KC4AAC since January. KC4USV logs arrived in
November those cards are answered already.

OC-021, YB0-3, Java (Jawa) Island, Mayn: A team of several YB operators will
be at Klirong Lighthouse on Java (ARLHS IDO-374) as YE2H December 28th
through January 4th, 2011. QSL via YB2TJV (d/B).

Lighthouse activities (WLOTA/ARLHS/ILLW)

JD1BMH LH 2269 Chichijima 30.12.-8.1.
JI3DST/JS6 LH 0249 Miyako 26.12.-04.01.11
OY4TN LH 2216 Streymoy resident
YE2H LH 1660 Java 28.12.-04.01.11

Amateur Radio Newsline(tm) Report 1742 - December 31 2010

Amateur Radio Newsline report number 1742 with a release date of
Friday, December 31st 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Kids Day goes International as Germany
climbs on board this twice a year youth involvement program; hams in
Iceland get a new allocation at 5 Megahertz; amateur radio vying for
spectrum with national broadcaster in India and a new way to rate boat
anchor beauty. Find out the details on this New Years Eve Amateur
Radio Newsline(tm) report number 1742 coming your way right now.

WORLDBEAT: KIDS DAY GOES INTERNATIONAL AS GERMANY JOINS THE EVENT

Kids Day has gone international. This with word that the Deutscher
Amateur Radio Club which is Germany's national amateur radio society is
supporting Kids Day on Sunday, January 2nd.

As most of you know, Kids Day is an on-air event conceived by Larry
"Tree" Tyree, N6TR, and Oregon's Boring Amateur Radio Club. Its
purpose is to encourage young people to have fun with Amateur Radio.
This, by giving members of the younger set some on-the-air experience
and in doing so to hopefully foster interest in these kids getting
licenses of their own. It is also intended to give older hams a chance
to share their station and love for amateur radio with their children
and those in their local neighborhoods. According to Tyree, this
decision by the DARC to expand Kids Day internationally is a good one
for the future of amateur radio:

--

N6TR: "Originally when I set out on this my goal was very modest which
was if there is one additional radio ham that comes out of this
(program) I'll consider it a success. Now, its likely grown beyond that
and to see it spread to other countries makes me feel good."
--

The complete Deutscher Amateur Radio Club press release can be seen in
Google English at tinyurl.com/38bkqf4. More about Kids Day and how to
take part can be found at www dot arrl dot org stroke kids-day. And if
you missed taking part in this first Kids Day of 2011, don't worry. You
will get a second chance to share ham radio with youngsters in your

area on Saturday, June 18th.

(DARC, Southgate, ARNewsline)

RESCUE RADIO: AMATEUR RADIO PRAISED FOR ASSISTING IN NEVADA FLOODS

This is Don Carlson, KQ6FM - Nevada Section EC in Reno, Nevada with some breaking news.

On December 21, Southern Nevada was inundated with heavy rains, high winds and mountain snow, which caused a number of weather-related outages and situations in the area. These included flooding in the town of Mesquite, minor flooding around the greater Las Vegas area, and a massive power outage to the Mt. Charleston area which forced evacuations. Amateur Radio Emergency Services in Southern Nevada was there providing information and backup communications during this time, under the direction of District Emergency Coordinator Glenn Hale, KB7REO and Clark County EC Bill Smith, W7HMV.

More than a dozen operators took part in the efforts, as they gave up valuable holiday time to serve their community. The communications efforts were aided by a statewide IRLP/Echolink "intercom" which allowed traffic and information to be passed around the state, thanks to NARRI dot org and Kent Johnson, W7AOR who provided us with a wonderful system to accomplish this.

According to an article in the Las Vegas Sun, Amateur radio received high praise from the director of emergency planning for the state, as he briefed Gov. Elect Brian Sandoval of the situation. He said that Amateur Radio was right on the mark, and that we provided tremendous information to the state who apparently monitored Amateur Radio frequencies and traffic being passed in and out of Clark County. According to the article, officials also noted that Amateur Radio operators are important to everyone with a presence at county EOC's. They were very grateful to Amateur Radio for once again providing a great service to the state and communities during times of disaster.

Reporting from Reno Nevada, this is Don Carlson, KQ6FM -Nevada Section Emergency Coordinator. Now back to Don Wilbanks, AE5DW for more of this week's Amateur Radio Newsline. (Nevada ARES, Las Vegas Sun)

**

RESTRUCTURING: HAMS IN ICELAND GET 5.36-5.41MHZ PLUS 500 KHZ AND 70 MHZ EXTENSION

The national association of Icelandic Radio Amateurs has announced that continued access for Icelandic ham radio licensees has been secured on the 500 kHz, 5 MHz and 70 MHz bands. In a letter from the nations Department of Post and Telecom Administration dated December 13th, 2010, access to the 500 kHz and 70 MHz bands previously granted last February 19th and to the 5 MHz band granted on January 1st, 2008 has

been extended for two years, to December 31, 2012. All were due to expire on December 31, 2010. . Privileges and access to 500 kHz and 70 MHz remains unchanged but the grant at 5 MHz is a major improvement to what hams in Iceland have had to live with. This is because the 150 kHz in the 5360 to 5410 kHz band replaces eight fixed channels permitted up to now. The only negative is that the maximum power allowed on 5 MHz was reduced from 200 to 100 watts. Permissible modes in that spectrum are Morse along with Upper Sideband at a maximum bandwidth is 3 kHz. (TF2JB)

**

RESTRUCTURING: THE AMATEUR RADIO SOCIETY VS ALL INDIA RADIO

Telecommunications interests in India, including ham radio have been meeting to decide who should be allotted what frequency bands in that nation According to an article in India's Daily News & Analysis on-line technical newspaper, the meeting are a part of the ongoing talks on the revised National Frequency Allocation Plan or N-F-A-P for the next decade.

Among those crossing each others' path are Amateur Radio Society of India and state-owned All India Radio. In a meeting held in November, it was decided that the proposal of the Amateur Radio Society of India for some frequency bands shall be examined as per the International Telecommunications Union Regulations, and that views of All India Radio must be considered as well. Exactly what issues exist between the two was not spelled out in the news article.

India's Department of Telecommunications is targeting sometime in 2012 to put in place the new National Frequency Allocation Plan. This, as per the requirements of the industry and technological developments. Currently, government agencies and companies across all sectors are following a national plan that was put into place back in 2008. (IDN)

**

HAM HAPPENINGS: ARRL WORKING TO UPGRADE LOTW FOR VUCC

The ARRL Logbook of the World web page noted on Dec 22nd that VUCC support is being installed and tested. When this upgrade is implemented, amateurs will be able to use Logbook of the World to apply for awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award. But its not ready for general use yet. You will have to await official word from the ARRL as to when this service will come on line. (ARRL)

**

HAM RADIO IN SPACE: SUMBANDILLA HAM RADIO SATELLITE OFF THE AIR AGAIN

South Africa's Sumbandilla ham radio satellite is off the air again. ZR1CBC reports that the flash boot memory of a controller on was likely corrupted by a solar radiation event. It does not affect satellite

overall health but prevents activation of the amateur radio repeater, as the particular script detects an anomaly and aborts.

This is the same problem that occurred in October of 2009 and was corrected. However, the fix requires time consuming effort, which cannot be accomplished immediately. Because of this SO-67 repeater activations are therefore suspended. Controllers say that they hope to return Sunbandilla to normal operations sometime in January. We will have more ham radio spave related news later on in this week's Amateur Radio Newwsline report. (ANS, ZR1CBC)

**

BREAK 1

Wishing you a happy new years, from the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9ELK repeater serving Elkhorn Wisconsin.

ON THE NET: NEW OWNER OF LOS ANGELES W6NUT REPEATER INTERVIEWED ON THE RAIN REPORT

The 147.435 Mhz W6NUT repeater in Los Angeles has yet another new owner. Her name is Christina Holzschuh, KE6RRI, and in an exclusive interview with the Chicago based Radio Amateur Information Network, she talks about her philosophy in regard to managing this ever controversial system:

--

KE6RRI: "As I said when it came out on the repeater, I am not here to change the repeater or to change you because .435 is really a psychology. It's a unique type of psychology that makes it work. And if I try to get in there and make all of thyese changes it will cease to work. That's not what I am attempting to do.

"I don't think that there has been a female owner of this repeater. I'm interested in my own thinking how will this work with men relating to a woman who is the repeater owner. How are they going to relate to me other than your standard slander, name calling? How are they going to relate to me giving them maybe a down time?

"I like to refer to them as down times. You know if I find that someone is jamming to much, Ill like to temper that and Ill just say Ill give you a down time for an hour, and you know to go ahead and get yourself some coffee and something to eat, Then you can come back and resume your conversation without jamming.

"I find that's most effective in that it does not put them on the defensive where they feel like they have to come at me with vulgarities

and bad words, so as to speak."

--

You can hear the entire interview between Hap Holly, KC9RP and Christina Holzschuh, KE6RRI, this week and next on the Rain Report. Just take your web browser to www.therainreport.com to listen in real time or to download the audio file for replay at a later date. (RAIN)

**

ENFORCEMENT: FCC RULES FORCE CANCELLATION OF WWTM FINE

It appears as if the FCC gave an early present to R&B Communications which is the licensee of WWTM-AM in Decatur, Alabama. This, as it cancels a $7,000 fine and instead admonished R&B for operating after its license had expired.

The case began in January 2007 when the FCC approved WWTM's license renewal application. But in April the agency fined the station $7,000 for not filing the application on time and operating the station without authorization. The renewal should have been filed by December 2003, four months before WWTM's license expired on April 1, 2004.

The agency said the renewal application wasn't actually filed until March 24, 2005. That was after the Media Bureau wrote to R&B indicating that WWTM's license had expired and that authority to operate the station had been terminated. Also that WWTM's call letters being deleted from the commission's database.

R&B told the commission its late filing was inadvertent and that it couldn't pay the fine. However, under the FCC's own rules, if the violations occurred more than a year before the fine was imposed, the fine must be cancelled. That was the case here and that's why the agency cancelled the fine and admonished R&B instead. (FCC)

**

ENFORCEMENT: FCC REDUCES UNLICENSED BROADCASTER FINE TO $750

A Christmas present of sorts from the FCC to a south Florida unlicensed radio operator. This as the regulatory agency orders Adilson Alves de Almeida of Boca Raton Florida to pay a $750 fine. But it could have cost de Almeida $20,000 until he proved the amount would be a financial burden that he could not pay. We have more in this report,

--

The story goes back to December 6, 2006. In response to a complaint of interference from an authorized government user, agents from the Enforcement Bureaus Miami Office investigated the unlicensed radio activity in the Boca Raton. On that date and two subsequent dates the agents monitored transmissions on the frequencies 294.080 MHz, 296.550 MHz, and 294.023 MHz, respectively. The agents, using

direction-finding techniques, located each of these transmissions to Mr. de Almeidas residence in Boca Raton and determined that the field strengths of these transmissions exceeded the limits for unlicensed operation under Part 15 of the Commissions Rules.

On April 19, 2007, the Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to de Almeida for operation of a radio transmitter without a license. de Almeida submitted a response requesting cancellation of the forfeiture, based on his removal of the Yagi-type antenna from his roof, expressing regret, and giving his assurance that radio interference would not happen again.

But it did happen again and on September 15, 2008, in response to another complaint of interference from an authorized government user, agents from the Miami Office again investigated unlicensed radio activity in the Boca Raton area. Once again, using direction-finding techniques, they located the transmissions to de Almeidas residence in Boca Raton. That same day, agents inspected de Almeidas station and found an Alinco transceiver that was programmed to operate on 297.235 MHz.

On September 25, 2008, the Miami Office issued a second Notice of Apparent Liability for Forfeiture in the amount of $20,000 to de Almeida for operation of a radio transmitter without a license. de Almeida submitted a response to the Second N-A-L requesting cancellation of the forfeiture based on his claim that he did not operate a radio transmitter on an unlicensed basis and his inability to pay the proposed forfeiture. He also submitted his three most recent years of tax returns to substantiate his claim.

In analyzing a financial hardship claim, the Commission has determined that, in general, an entities gross revenues are the best indicator of its ability to pay a forfeiture. As such, it reached a decision that a fine of at least $750 was warranted based solely on de Almeida's lack of income and the fact that he is a dependent of his son.

For the amateur Radio Newsline, Im Bill Pasternak, WA6ITF, reporting from Los Angeles.

--

de Almeida was given the customary 30 days to pay the fine or to file a further appeal. (FCC)

RADIO LAW: FCC PASES NET NEUTRALITY MEASURE

The Federal Communications Commission on Tuesday, December 21st voted to regulate the speed of Internet traffic. This, as the Commissioners voted on a proposal from FCC Chairman Julius Genachowski to prevent wireline broadband providers from controlling bandwidth-heavy users.

The 3 to 2 vote was down party lines, as expected, with support from the Democratic members and dissent from the two Republicans. The rules require all broadband providers to publicly disclose network management practices, restrict broadband providers from blocking Internet content and applications, and bar fixed broadband providers from engaging in unreasonable discrimination in transmitting lawful network traffic, the commission's announcement said.

Democrats and Republicans have fought over network neutrality for several years. Democrats contend it preserves an open Internet. Republicans contend it regulates the Internet unnecessarily. FCC Chairman Julius Genachowski said the rules represented a compromise because they allow usage-based pricing. The two commission Republicans nonetheless submitted stinging assessment for the record.

Reaction in the telecommunications industry has been generally negative to the FCC's Net Neutrality decision. The National Journal's David Hatch is reporting that Verizon's attorney's are gearing up for a lawsuit. Meantime, Broadcasting & Cable Magazine's John Eggerton reports that lawmakers are fixing to call the FCC to the carpet over its decision in this matter. It should be noted that these same rules would not be applied to wireless providers. (FCC, Published reports)

TECHNICAL DIFFICULTIES: SOME NEW IPODS DON'T GET NEWSLINE

This note to users of new Apple iPod or those who may have just upgraded to the latest model over the holiday and now find that they cannot download audio files or podcasts of Amateur Radio Newsline. We want to let you know that the problem is not with us here at the Amateur Radio Newsline and quite honestly we have no idea what the cause might be.

What we can say is that we have not made any changes to our production methods in years. We provide an MP3 audio file at our website at www dot arnewsline dot org that has not changed in any way for almost a decade. So if you have a new iPod that refuses to play Amateur Radio Newsline, all we can do is to refer you to Apple and let them provide the remedy. None of us are in any way expert on iPods, Iphones or any part of the Apple product line. We just produce a newscast, and nothing more.

If anyone has an answer to this one, please let us know and we will on pass it to our lidtener base. (ARNewsline(tm))

THE SOCIAL SCENE: PRIZE OFFERED TO UK HAMS PARTICIPATING IN SOS RADIO WEEK

Over in the United Kingdom, the Royal National Lifeboat Institution fundraising event, SOS Radio Week, starts on January 22nd. According to several reports many UK amateur radio clubs and individual hams have

already signed up to tale part.

Now comes word that an unidentified big name in Great Britain's amateur radio scene has offered a prize for those who take part. Everyone who operates during event will have his or her call entered for a drawing to win a new Wouxun KG-679E 2 meter hand-held transceiver.

If you are a UK ham and want to take part, simply visit the website at www.sosradioweek.org.uk and view the registration page. All monies raised are donated to the Royal National Lifeboat Institution. (RLBI)

NAMES IN THE NEWS UK FAMILY HAS FIVE HAMS

Some names in the news. Still in the UK, the Daily Post newspaper reports that five members of the same family in the town of Tywyn are now licensed radio amateurs. The newspaper says that the latest member of the family to get an amateur radio callsign is 11 year old Ricky Duckhouse. His father Kevin, mother Alison, and brother and sister Josh and Sonyarisa had all previously received their licenses. Sorry, but the article did not include the callsigns of the Duckhouse clan. (Daily Post)

THE CHANGING OF THE GUARD: FAMED RADIO ANNOUNCER FRED FPY DEAD AT AGE 89

He was not a ham, but the legendary radio announcer Fred Foy, best known for his booming, passionate lead-ins to "The Lone Ranger" radio and television series, died Wednesday, December 22nd of natural causes at his Woburn, Massachusetts.

According to his daughter Nancy Foy, her father worked as an actor before landing the job as the announcer and narrator on "The Lone Ranger" radio show in 1948. He is best remembered for the shows lead in that introduced the masked cowboy hero and his trusted horse with the line: "A fiery horse with the speed of light, a cloud of dust and a hearty 'Hi-Yo Silver!' ... The Lone Ranger!"

According to radio historian Jim Harmon, Foy's dramatic introduction and narration, performed in a powerful baritone, were so good it made many people forget there were others before him. Harmon called Foy

perhaps the greatest announcer-narrator in the history of radio drama.

Foy was born in Detroit in 1921, graduated from that city's Eastern High School in 1938 and landed a job on the announcing staff of radio station WXYZ in Detroit in 1942. He was drafted into the Army that year and served in an Armed Forces Radio unit in Cairo during World War II. Foy returned to WXYZ in 1945. Three years later he won the job on "The Lone Ranger," even stepping into the lead role for one radio broadcast when actor Brace Beemer had laryngitis. Foy also performed on other classic radio series including "The Green Hornet" and "Sgt. Preston of the Yukon."

In 1960, Foy began working for the ABC network. He spent five years as an announcer on the "The Dick Cavett Show" and narrated documentaries. He left ABC in the mid-1980's and later retired.

Fred Foy is survived by his wife of 63 years, Frances Foy, their three children and three grandchildren. He was age 89. (From published news reports)

EMERGING TECHNOLOGY GLITCH: SKYPE DOWN FOR A DAY AS SUPERNODES GO OFF LINE

Internet calling and messaging service Skype SA mostly recovered Thursday, December 23rd from an outage caused by an undisclosed glitch. The service went down for almost all of its users starting at midday Eastern time on Wednesday, December 22nd. By Thursday afternoon, things had improved to the point where about 21 million users were logged in, said CEO Tony Bates. That was 10 percent less than the usual traffic for the time of day, as some people still could not log on.

On Wednesday a spokesman said a problem affecting some versions of Skype caused many of its supernodes to go offline. Supernodes are computers that the company likens to phone directories, helping Skype users connect with each other. To help remedy the situation, Skype repurposed some servers to act as supernodes,

On average, 124 million people use Skype each month, though the total number of registered users is more than four times that. (SKYPE)

HAM RADIO NEAR SPACE: THE HABEX SUCCESS

Some good news from South Africa. This with word that the main HABEX high altitude ham radio balloon payload flew in excess of 33 000 meters before returning to the ground.

Controllers Say that the on-board store and forward or parrot repeater was the highlight of the day with many radio amateurs making contact from as far awayas Harrismith and Victoria West.

After the balloon burst and returned to Earth, recovery teams found the main payload was found in a farmer's field. Unfortunately the second balloon carrying a simple controller board and ancillary equipment failed.

Project leaders say that flight helped further the learning curve for the team who will build on the knowledge gained for further launches. (SARL)

HAM RADIO IN SPACE: SA AMSAT TO LAUNCH TWO NEW BIRDS

South Africa AMSAT announced on their web page that they they plan to launch two satellite projects with totally different design approaches and time lines.

Both of these birds will be of the Cubesat design. The first will focus on providing a FM transponder that will be available on most passes over South Africa and will have a short time line to launch. This FM Transponder CubeSat which has yet to be named, will be based on a standard available space frame and sub system with a locally designed payload. The project will be coordinated by Hannes Coetzee, ZS6BPZ.

The second bird called SAiSAT focuses on an innovative approach to the deployment of fold-out solar panels. The project is aimed at getting Master and Phd students involved in the development and design of various payloads and substructures. A detailed paper on SAiSAT will be released in the next two weeks on www dot amsatsa dot org dot za. Both satellite projects will the subject of papers to be present at the South African AMSAT Space Symposium to be held on 26 March 2011. (SA AMSAT via ANS)

HAM RADIO IN SPACE: QST EDITOR ON HO-68

And the Southgate news reports that you never know who you'll find on the amateur radio satellites. How about QST Magazine editor Steve Ford, WB8IMY.

Writing on the AMSAT bulletin board K8YSE says that Hhe recently hear Ford calling CQ on the HO-68 bird. According to K8YSE, Ford was operating from home with his TS2000 and Eggbeater antennas. He says that the two had a nice chat and the reception was excellent. (Southgate)

ON THE AIR: NEW ZEALAND AMATEUR RADIO DAY JAN 15

New Zealand Amateur Radio Day takes place annually from 1000 to 1200 hours local time on the 3rd Saturday of January. This year that's January the 15th.

The purpose of the New Zealand Amateur Radio Day is to promote the hobby to the public so that some may be encouraged to join the local club, take on classes and become amateur radio operators.

Clubs taking part are urged to set up at any prominent and public location where there is plenty of public foot traffic. Participating amateurs are required to keep a log of all stations worked during the 2 hours and use of club callsigns is encouraged, however individuals may also set up a station using his or her own callsign.

Operation on New Zealand Amateur Radio Day can be on any band and any mode. Digital modes and CW may also be used to attract interest. (NZART)

**

ON THE AIR: A QSO A DAY FOR G6HMU DURING 2011

And throughout 2011, Keith Maton, G6NHU, is embarking on an ambitious project to have a QSO every day of the year. He says that his QSOs will be on any band or any mode

There is a blog to follow the progress of this project at www.qso365.co.uk. The blog won't necessarily be updated every day but it will document how the project is going with updates as time permits. (Southgate)

DX

In DX, W5JON says that he will be operating as V47JA from his new Calypso Bay, St. Kitts vacation home from February 16th until March 30th. He will be active on 80 through 6 meters SSB including both the ARRL International DX SSB Contest SSB on March 5th and 6th as well as the WPX SSB Contest on Marth 26th and 27th. Also, listen out for John's wife Cathy, W5HAM, will also operate using her newly issued V47HAM callsign. All QSL's go to W5JON at his callbook address.

XW1B is planning another operation from Danang, Vietnam, for the ARRL DX CW Contest to be held February 19th and 20th. He will operate a a Single-Operator Low-Power entry using the callsign 3W3B. He states that he will be living in Danang most of the year and anticipates being very active on the various bands. QSL only via E21EIC. NO eQSLs will be accepted for this one.

DC0KK is again active from Sri Lanka as 4S7KKG until March 13th. Hes on all of the HF bands using CW, SSB and the Digital modes. He also hopes to activate Barberyn Island sometime during his stay. QSL via DC0KK, either direct or by the Bureau.

IK2QPR will be on the air as 5R8PR from Nosy Be, Madagascar between January 17th and the 25th. Activity will be holiday style on 40through 10 meters using CW, SSB and RTTY. QSL via his home callsign.

F6BLP, will be active as 6W7SK from Senegal between January 8yj to the 21st. This operation will also be holiday style operating mainly CW. QSL via F6BLP, either direct or by the Bureau.

Lastly, JK1FNL will be active from the Maldives as 8Q7FF between January 4th through the 9th. Listen out for this operation on 160 through 6 meters using CW, SSB and RTTY. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: BABE - THE BOAT ANCHOR EVALUATOR

And finally this week, there are a lot of web sites on the Internet that deal with so called Boat Anchors. You know -old radio equipment full of tubes. Well how is this site with a variation on this theme and its called BABE.

BABE stands for the Boat Anchor Beauty Evaluator. It is a website that contains a formula that includes terms such as the number of knobs on front panel, of these the number of knobs not generally used, the number of tubes and meters, the rack space required for the unit and more. In the end the site will give you a very subjective Functionality Quotient which is an arbitrary value based on the single question of: "does everything work?"

You can have some real fun with this one. It's in cyberspace at tinyurl.com/2b9453l (VHF Reflector)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the deadline for Dayton Hamvention award nominations is getting close. The Hamvention now sponsors four annual awards. These are the Technical Excellence, Special Achievement and Radio Amateur of the Year Awards. And as the special Radio Club of the Year was such a big success in 2010, that Hamvention planners have decided to make it a permanent addition to the Hamvention Awards program.

If you know of a radio amateur or a radio club deserving of recognition please submit your nomination. Further information and nomination forms can be found on-line at www.Hamvention.com in the awards section. To be considered for any award the nominations must be submitted no

later than January 15, 2011.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying Happy New Year 2011, 73 and we thank you for listening.

Greetings All

As part of my effort to promote Ham Radio in ZL land, I publish a
monthly newsletter.

Feel free to download January 2011 Issue of ZL Ham Band Scope from the
ZL Ham web site. Enter the URL below into your browser or ftp client.

Via FTP
ftp://zlham.geek.nz/Bandscope/bandscope-2011-1.pdf

Via HTTP
http://www.zlham.geek.nz/Bandscope/bandscope-2011-1.pdf

Items of special interest to ZL radio hams are always welcome and of
course overseas members are always welcome to join our little community
down under.
